

SHORTWAVE BULLETIN

Issue no. 1636 March 2, 2008.

Deadline e-mail next issue: 0900 SNT, March 16, 2008.

Som vanligt blev det oordning på dagarna i början på mars. Får väl skylla på att februari innehöll en dag mer än vad jag räknat med.

I förra numret stod att stopdate var den 3:e, men som alla vet är ju normalt söndagen den dag då bullen ställs samman och dagens datum är bara den 2:e. BEFF var den ende som noterade detta. Eftersom antalet bidrag förmodligen inte påverkas av någon stopdatum så tar jag mig friheten att avsluta detta nummer nu på tidiga söndagseftermiddagen. Många tips denna gång men från bara några få medlemmar (som vanligt).

Vi får ta nya tag till nästa gång.

Se nu till att anmäla er till ARC/SWB konventet. Det är ju alltid trevligt att träffas. Man behöver ju inte bara prata radio utan det brukar komma upp en massa annat trevligt också.

Keep on

MEDLEMSAVGIFT 2008 (membership fee 2008):

Medlemsavgiften för 2008 är SEK 75:- för internetbulle och SEK 250:- för pappersbulle. För utländsk medlem, som betalar direkt via postgirot, tillkommer SEK 30:- för att täcka den avgift postgirot tar ut. Betalning till Bengt Dalhammar, postgirokonto 51 84 47 - 8. Medlemsavgifterna skall vara betalda senast 31/1 2008.

Membership fee 2008 is SEK 75:- Payment to postal account 51 84 47- 8. Add SEK 30:- to cover postal costs. Payment before Jan 31, 2008. (Foreign members please contact the editor regarding other ways to pay.) / Bengt Dalhammar.

QSL, kommentarer, mm.

Christer Brunström: Fu Hsing Broadcasting Station, Taipei, Taiwan 15375

rekommenderad försändelse med brev, QSL-kort, schema samt kartor över Taiwan och Taipei. Jag ägnade mycket tid åt denna station under jullovet; på julafton fick jag ihop tillräckligt med detaljer till en rapport.

Jan Edh: Jag har inte riktig koll om jag skickat mitt lilla KV-tips eller inte.

Det är svårt att hitta några styrkor på de få stationer som går på 60-metersbandet, det mesta där är numera av typen "hörbart men inte läsbart". Man kan konstatera att stationerna finns där, men inte mycket mer. Jag brukar försöka göra någon koll också av kortvågen de flesta gånger jag är ute i Fredriksfors men ack så sällan som det verkligen ger något. Men kanske ska det bli bättre snart nu med våren?

Björn Fransson: Du skrev stopp den 3 mars, men jag antar att det som vanligt är söndag morgon som gäller. Här kommer i alla fall ett bidrag:

QSL: Play Back International via ? (Italien?)-6882. Audiofil med ID, snyggt designat QSL i särskild fil + info om radions utveckling på engelska. Den här känns nästan litet halvseriös för att vara pirat. 2 d.

Kiss Radio via WMR-5815. Laglig pirat med snyggt "Kysskort" som e-mailfil. 3 d.

Radio Rainbow International-3935, samarbetsprojekt med Laser Hot Hits. E-mail: "Yes, it was us!".

Bjarke Vestesen: Igen nogle få tips her fra det centrale Danmark. Jeg glemmer beklageligvis oftest deadline, så de manglende tips er ikke tegn på, at jeg ikke får DXet. Radioen er vel tændt næsten dagligt, men her i vinterperioden er det mest jagten på nordamerikanske MB-stationer omkring solopgang.

Forberedelserne til næste maratontur i København den 18. maj går så småt i gang. Skal i eftermiddag helst runde en tur på 20 km, hvis ellers vejret og kroppen vil. Har fået en god tradition med at løbe på arbejde et par gange om ugen - en tur på 12 km på én time. Men så skal jeg jo også hjem igen, så det er 12 km den modsatte vej :-)

LOGGEN - ALL TIMES ARE UTC

Stationsnyheter

BHUTAN: Asia-Pacific Broadcasting Union, 22 February, 2008

The Bhutan Broadcasting Service (BBS), the country's national broadcaster, has launched an online radio service. BBS Radio introduced the Internet service yesterday to mark the 28th birthday of King Jigme Khesar Namgyel Wangchuck.

The online service is available for 15 hours a day, from 1200 to 0300 GMT. It can be accessed via the BBS website: <http://www.bbs.com.bt/>

Launched in 1973, BBS Radio broadcasts on FM in the national language, Dzongkha, as well as Sharchop, Lhotsham and English. Its shortwave service can be heard as far afield as Europe and New Zealand (on 6035 khz)

BBS also runs a television service, introduced in 1999, which broadcasts for four hours daily in Dzongkha and English in the capital, Thimphu. It reaches other urban areas through cable services.

BBS has been a member of the ABU's daily news exchange, Asiavision, since January 2006.
 (Mike Terry via HCDX)

TUVALU. I am watching an interesting program on BBC World on Tuvalu and Global Warming. They panned the Funafuti town including a large radio station tower, presumed to be T2U2, 621 that is now silent, because of equipment failure. The tower may be doubling for the FM (100.1 MHz 200 watts), but at the rate it is going, in another 40-50 years Tuvalu will be under water. It is always interesting to see areas, where I have logged and QSL'd the stations. But it is sad to see the ocean covering the islands. Kiribati is also in danger, plus several other islands. But what a beautiful location.

One side note. Tuvalu has planes that arrive from Fiji twice a week and everyone comes out to see them land. A place free of crime, pollution, traffic. I guess you can still find places like that, if the ocean doesn't swallow it up. 73, (Patrick Martin, Seaside OR, near sea level, March 1, IRCA via DXLD)

SW Article for the General Public

The following short article was in the 2/15/08 St. Louis Post-Dispatch and a number of other newspapers around that time; some carry it as part of a series called "Technobuddy": By Bill Husted | Friday, February 8, 2008, 02:01 PM, Cox News Service.

Follow today's tips and you could aggravate your spouse and spend money on out-of-date technology. You might even annoy your neighbors.

Sound good? I thought so.

I'm talking shortwave radio. I'm also talking about becoming a shortwave hobbyist the old-fashioned way, as opposed to over the Internet. That means buying a shortwave receiver and, in extreme cases, stringing up some wire between trees in your backyard. Just think how that wire in the sky will bother fussy neighbors.

And since these are analog broadcasts as opposed to digital, you and your family will be subjected to squeals, crashes of static and signals that fade in and out. In return, you'll open a door to tremendous surprises. I can only compare it to fishing: You never know what you'll catch.

You may happen upon the captain of a transatlantic flight speaking with a controller in New York on a stormy night. You'll also hear commercial broadcasts from countries whose names you can't even spell. That'll let you listen to news in a form that's not digested into a soundbite.

If you like, you can listen to ham radio operators like me; visiting with each other from across the world as comfortably as if we were on our front porches.

I can't promise that shortwave listening is for you. I limit myself to writing about this topic to once a year, but each time I hear from people who made the plunge and loved it. Some of them are returning to a childhood interest and others are trying it for the first time. I'm always pleased and a little surprised at the appeal this hobby still holds.

I always start by recommending a book I consider more important than the radio you end up buying. It's called Passport to World Band Radio. You can read about it and order it here: <http://www.passband.com>

It'll go into more detail than I ever could about antennas and shortwave listening. It also includes a schedule of most major shortwave broadcasters including frequency and time.

But, most important, it includes truly fair and impartial reviews of various shortwave receivers. You'd be a little nuts to buy a shortwave receiver without reading this first, as there is a wide range of sets at various prices.

Of course, some will not read the book. So I asked the editor-in-chief of the book, Larry Magne, to offer a few suggestions for radios in the \$200 and under category. Here's a summary of what he said: "For best overall shortwave listening, along with portability for travel, the \$160 Sony ICF-SW7600GR rules the roost.

"Similar, but simpler to operate and with slightly nicer sound, is the \$150 Eton E5.

"For modest pricing and pleasant sound, the \$100 Kaito KA-2100 gets the Kewpie doll; it is also sold as the CCRadio-SW for \$150.

"Money to burn? Try the Eton E1XM at \$500. Add \$60 worth of options and an XM subscription and you'll also hear XM satellite broadcasts."

These radios can be found online by putting the product name in Google. They include a built-in antenna that will let you avoid the problem of getting that wire up in the tree (although you can, if you like, connect an antenna to most of them). So that takes care of the neighbors.

You can even listen with earphones. That may preserve harmony at home.

If you do decide to put up a wire antenna, follow my advice and use a fishing rod to throw a weight over a tree and then pull up a support rope. I've had near tragic results trying it with a crossbow.

(I couldn't get this on the Post-Dispatch website any longer, but there are a number of web sites archiving Husted's pieces.)
(73, Will Martin via DXLD)

GO FOR TRANSCEIVERS, IGNORE THE TRANS-

My interests was aroused to do a little research on why shortwave HF radio receivers are steadily going off the market. The only new receivers coming on the market these days with upmarket features are the computer based SDR's (Software Defined Radio). Many of us don't like computer SDR receivers, but prefer the traditional radio with lots of knobs and buttons.

OTOH ham transceivers continue to sell like hot cross buns at Easter with new and advanced models coming out all the time. Mainly the ham transceivers also represent good value for money, even for listeners only. So listeners wanting the latest technology are moving forward in two directions; some are migrating to the new computer SDR receivers and some, like me, have migrated to using the latest ham transceivers.

To get a feeling for this I referred to the popular eHam website reviews, that has hundreds of reviews of both receivers and transceivers. <http://www.eham.net/reviews/>

When looking at the number of reviews I quote below, consider that they are a reflection of what sales are like for the various radios. When I was at marketing/advertising school years ago, I was taught that for everyone who wrote in, some many more didn't. If I remember rightly the figure was about 25:1, so for everyone who wrote a review there are about another 25 who didn't, and that is why I believe the figures for the number of reviews gives some indication of the sales volumes and popularity for each radio.

Number of reviews = R (receivers vs. transceivers)

Drake R8/A/B - R33	vs. Icom 746PRO series - R241
Icom R75 - R62	vs. Icom 718 - R301
AOR7030 - R17	vs. Kenwood TS-2000 - R370
Yaesu FRG100 - R14	vs. compact transceivers - R643
JR NRD545 - R10	vs. Icom 756PRO series - R449

Ten Tec RX340 - R12 of which there is no such expensive transceiver, but it may interest you that the coming Icom 7700 has attracted over 40,000 views on the You Tube website, an enormous response and interest! This top end transceiver will sell at \$6300.

Other popular transceivers in the \$2000/3000 category that reviewed well:

Yaesu FT-1000 - R440
Yaesu FT-2000 - R136
Elecraft K2/3 series - R229

So the conclusion to be drawn is that ham transceivers are hugely popular and attractive for manufacturers who can turn them out in good volumes, whereas even the most popular receivers have very limited popularity and there manufacture cannot be very profitable or economical. I wonder therefore if Mr. Thorpe will be allowed to make another high end replacement receiver for the AOR7030, or if AOR UK will find the prospect unattractive commercially?

[It's Here! New Version 1.0 Software for Perseus](#)

The much-anticipated production release of Perseus software is now available: <http://microtelecom.it/perseus/software>

On this page you will find links to the software package, specific DDL file for Winrad, and release notes for the new version 1.0.

I have been using this version for a few days, and I'm very impressed with the progress Nico Palermo, IV3NWV, has made. In particular, the 800 kHz recording bandwidth is a great feature and works excellently.

I'll be posting a review and comments on the version 1.0 software this weekend.

See <http://perseus-sdr.blogspot.com/> (Guy Atkins)

500 kHz Distance Record Broken Again

On February 21, Neil Schwanitz, V73NS/WD8CRT, on Roi-Namur in the Marshall Islands, received a signal from experimental station WD2XSH/6. This experimental station, operated by Pat Hamel, W5THT, is located in Long Beach, Mississippi -- 6679 miles away from the island in the Kwajalein atoll. This contact breaks the previous record for the longest 500 kHz contact. That record, set in January 2008, was for a distance of 4737 miles from Cottage Grove, Oregon to Roi-Namur. An article on Hamel's station appears in the March issue of QST. The ARRL 500 kHz experimental license, WD2XSH, was issued in September 2006 and has 20 active stations. Fritz Raab, W1FR, of Vermont, serves as experimental project manager for The 500 KC Experimental Group for Amateur Radio www.500kc.com

Additional information can be found at the experiment's Web site and also in the July/August 2007 issue of QEX www.arrl.org/qex/2007/07/raab.pdf

ARC + SWB Konvent 2008

26-27 april i Kanebergsstugan, Halmstad

Vi börjar som vanligt kl. 15.00 på lördagen.

Det finns goda övernattningsmöjligheter i Kanebergsstugan. Du behöver bara ta med sovsäck eller lakan, örngott och filt. Toaletter och duschar finns.

För er som vill ha hotellrum kan detta ordnas ca 1 mil från stugan. Tidigare har deltagare i allmänhet valt hotellet på Eurostop.

Programmet är i stor utsträckning baserat på bidrag från deltagarna men följande ramar gäller:

Lördag:

Kl. 1500 Välkomstfika

Kl. 1900 Gemensam middag

Kl. 2200 Nattmacka

Söndag:

Kl. 0830 Frukost

Kl. 0900 Årsmöte för ARC

Kl. 1000 Förmiddagsfika och avslutning

Priset är för närvarande inte klart men det kommer att bli betydligt lägre än förra året. För er som ligger på hotell minskar kostnaden dessutom med 40:-.

Anmälan görs till Christer på telefon 035-108090 eller e-post: christer.brunstrom@utb.halmstad.se

Jag vill ha din anmälan senast den 18 april. En tidig anmälan underlättar planeringsarbetet.

Jag önskar alla medlemmar i ARC/SWB välkomna till årets konvent!

(Christer Brunström)
