

# SHORTWAVE BULLETIN

Issue no. 1769, April 14, 2013.

Deadline e-mail next issue:

0900 UTC, April 28, 2013.

Thanks a lot for all contributions.

Huset är nu upp och nervänt av vår lilla cockerspaniel. Hon är en riktig vilde. På onsdag stundar dock andra tider, det är valpkurs på gång. I nästa vecka kommer en liten norsk skogkatt till oss och det skall bli intressant att skåda det mötet. Undras om katten tar över regeringsmakten?

I varje fall är dagarna för hustrun fyllda med att försöka få lilla Elsa rumsren, ett veritabelt projekt ser det ut som.

En del trevliga LA signaler har gått igenom och en del intressanta saker finns i loggen trots att antalet stationer på tropikbanden är extremt få.

Så det är inte alls underligt att flertalet håller till på MV där det händer mycket mer. Vad hade SWB varit om vi bara skulle förlitat oss på de nordiska medlemmarna?

Fundera på det till konventet.

**Keep on ....**

## QSL, kommentarer, mm.

**Christer Brunström: Voice of the Islamic Republic of Iran 17560** sände ett tjockt paket med QSL-kort, brev, CD-skiva (undervisning om koranen) samt en kalender. Det är en mycket märklig station med islam och politik i perfekt symbios.

**Radio Hargeisa 7120** QSL-kort från konsulatet i Tyskland. V/s Baldur Drobnica, Consultant.

**Radio New Zealand International 15720** kort, dekaler, brev, schema, **Voice of Turkey 17755** kort, diverse, **Atlantic 2000 International via Kall-Krekel 3985** brev och kort.

**Rolf Åhman:** Årets första kortvågsQSL har äntligen kommit, nämligen **Voice of Vietnam/Son Tay 9730** och **Voice of Strait Broadcasting Station 5050** som båda svarade med kort.

**Jan Edh:** Ännu ett livstecken från Hudiksvall/Fredriksfors LA-QSL är man ju inte bortskämd med på kortvåg numer, så mycket trevligare då att kunna berätta om det.

För några veckor sedan svarade Bruce Maddux trevligt i ett par mail från **Radio Chaski 5980**. Och i dag (8/4) kom ett svar från Raimari Cardoso, direktör på **Radio Educadora 6 de Agosto i Xapuri**. Stationen på 3355 har jag jagat i många år, men aldrig fått fram något vettigt av. Men den 1 april var det dags. Kvällen/natten mot 1 april var det fina sunset-öppningar mot västra Brasilien och Peru på mellanvåg och samtidigt gick också Xapuri-stationen "som tåget". Och nu kom ett trevligt svar från direktören, som beklagade att han inte hade något QSL-kort att skicka. Jag som var så glad för ett email...

**Tim Rahto,** Luther IA. Hi Thomas, Not too much to report here, but thought you might find these interesting.

**Anker Petersen:** A solar eruption should affect shortwave conditions today, but nothing special noted last night. I listened in Skovlunde on my AOR AR7030PLUS with 28 metres of longwire.

**Tarmo Kontro:** Hi Thomas! I write in English as the bulletin has so many "non Scandinavian" members.

I have monitored 5980 Chaski every now and then and it seems there is a few kHz wide digital-QRM - or jammer? - which is more powerful now after international broadcasters left the channel.

It was off at least on April 1st and April 12th, when Chaski has been audible here. Other Peruvians noted on SW are 4810 Logos, which seems to have better mod. and strength than Chaski 5980. On 4835 the Peruvian seems to be weaker.

It seems the arctic winter with temps always below zero even in Southern Finland is finally over and the snow is finally started to melt. However, still 20-30 cm snow.

*(Thanks for the contribution. Today is the first day with "spring" weather. About 12° now in the morning. No snow, all farmers are now finished. This year they managed to do the job with the frost in the ground which is good. But all autumn sowing seems very bad. But it is good spring finally is here. /Thomas)*

5025	Apr10	0103	After my Chaski-check, notice that R. Rebelde is absent, but a very weak carrier can be detected in the approaching storm noise level; probably R. Quillabamba, Perú, normally

covered by CMBA. Notified DXLD yg of it right away, but at my next check 0142, Cuba was back. Someone got it! ``Ciao from Italy, I am at Bocca di Magra village with Dario Monferini for our BOC 29 DX nights. Radio Rebelde was off air this night till 0105. So we could tune on 5024.917 with Excalibur Pro Radio Quillabamba, Cusco. ID at 0101. 73 Giampiero Bernardini`` Rebelde was off again in the morning: Mike Gilchrist in rural East Central Iowa reports: ``130410, 1030, 5024.923. R. Quillabamba (presumed), Perú, Rebelde off air??? 130410, 1047, 5025, Rebelde, Cuba, Off air, and Peruvian (?) with talk in Spanish until 1047 back on with hum on audio.`` (Glenn Hauser, OK)

5980	Apr13	0059	Splash from 5990 is already off, so instrumental hymn is audible from R. Chaski past 0100; 0101 muffled announcement, 0102 fanfare introducing devotional capsule. Best audio I've had from them for some weeks --- S of the Equator, a bit of darkness is gained on the path while we are losing it at this end, a balancing act. Cut off at 0103:18*, roughly 5.5 sex later than last night. With an almost clear sky, my streetlite does not fire on until *0111 again this evening (Glenn Hauser, OK)
5980	Apr12	-0103*	R Chaski, QRM off today, usually blocked by a digital ute tx or a jammer - who knows ? Other Peruvians later on 4775 (weak), 4810 (good) and 4835 (poor) . TK
5995	Apr11	0517	Castilian on poor signal, i.e. REE has failed to switch from 5965 at 0400. Nothing on 5965 now. This will be bad news for Mali after 0600 if REE stays on 5995 until 0800 (Glenn Hauser, OK)

6024.96	Apr11	2228	R Patria Nueva, La Paz, carrier heard & seen, too weak for any meaningful audio, completely in the clear to 2308 t/out. Very unfortunately blocked again April 12 on 2339 recheck. (Martien Groot)
6024,97	Apr11	2256	R. Illimani – Red Patria Nueva. Got an alert from Martien Groot about a station on this frequency at 2218 onwards. He had very little audio and I checked my Perseus files and sent a recording to Henrik Klemetz who says "It is Radio Illimani now also using the slogan Red Patria Nueva as a complement. <a href="http://www.radios.la/radio31-Noticias-Bolivia-Patria-Nueva---Radio-Illimani-en-VIVO.html">http://www.radios.la/radio31-Noticias-Bolivia-Patria-Nueva---Radio-Illimani-en-VIVO.html</a> The next day the frequency was covered by Xisang, China. Thanks to Martien, Mauno and especially Henrik Klemetz for identification of this one. Also noted on my Perseus recordings on Apr14 at 0056 and 0226 when China was off again. Decent signal but very low audio this night. TN
6025	Apr13	1606	Xizang PBS, English "Holy Tibet", back here after at least two days absence allowing TWR Manzini to be heard in the clear to 1626 off on April 11 & 12 (Martien Groot)
6025,00	Apr12	1616	TWR Manzini, 1616, April 12, hints of audio, believe I could even hear their IS prior to 1626:24 carrier off. Shona scheduled here 1555 - 1625. Xizang PBS still missing, tnx to Mauno Ritola for confirmation. (Martien Groot, Schoorl, Netherlands, via DXLD)
6039.98	Apr11	1602	Nei Menggu PBS, Hohhot, carrier noted in the clear to 1605 off, //7270 swamped by co/ch RL (Martien Groot)

6101,23v	Apr2	1333	KCBS Pyongyang. After briefly returning to the exact frequency, they have again gone off frequency; in Korean with hum; // 9665 (Ron Howard, San Francisco at Ocean Beach, CA, USA)
6105	Apr5	2159	CNR1 starts up at 2200 with a longer sign on procedure and a call as "Zhongguo guoji guangbo diantai". This station is used for jamming RTI, Taiwan on the same frequency. RTI uses the WRTH call "Cheli shih Chungyang Kuangpo Tientai Taiwan chih Yin". Taiwan is the weakest of the two. Jari Savolainen listened to my recording and says I am correct assuming it is CNR1 starting up after the Taiwan ID. Thanks a lot Jari for your help. TN
6105,015	Apr7	2130	Tent. R Cultura Filadelfia quite weak just above threshold. The px sounded // to their webstream but difficult to be 100 % sure when the audio was so low. That it is R Cultura Filadelfia is confirmed by a post in DXLD where you can read: <i>Radio Cultura Filadelfia, Foz do Iguazu, Parana, Brasil, por los 6105 kHz a las 2043 UTC, bastante interferida por CRI en arabe 5 kHz mas abajo:</i> <a href="http://youtu.be/QMe9krzWrC4">http://youtu.be/QMe9krzWrC4</a> /Rodolfo Tizzi TN

### Letter of Verification (No.2013-014)

Dear Mr. Ron Howard:

Thank you very much for your reception report. We confirm you were listening to Voice of Pujiang with the following details:

Date: 4 April 2013  
Time: 12.27-12.33 UTC  
Frequency: 5.075 kHz  
TX site: Zhenru Town, Shanghai, P.R. China  
RX Location: Monterey, California, USA

Voice of Pujiang is now part of China Business News Radio. The station produces programmes concerning local life and serves listeners in the Yangtze River Delta, including Taiwanese who reside in the vicinity and beyond.

Currently we broadcast daily on these radio frequencies:  
22.00 - 16.00 UTC on 1422 kHz (MW)  
11.30 - 16.00 UTC on 3.280 kHz, 4.950 kHz and 5.075 kHz (SW)

Our programmes may also be heard live on Internet: <http://radio.weibo.com/shanghai/am1422>

Thank you for your interest in Voice of Pujiang. We hope you will tune in and listen to us again.

Sincerely yours,

China Business News / Voice of Pujiang

Am grateful to Timm Breyel (Malayasia) for his excellent work establishing the following contact information! Please see Timm's website:

Sent off a report of my reception to victor.pujiang @ [gmail.com](mailto:gmail.com), along with my [box.com](https://www.box.com) audio reference. Also told him how I miss visiting the old Xiangyang Market (which was across the street from Xiangyang Park that I often visited), where they use to sell fake designer goods (closed 2006). Received this reply:

"Thank you for your reception report! I have listened to the record. I confirm you were listening to Voice of Pujiang, please find the QSL- letter in the attachment.

When I was a high school student, many of my classmates went to the Xiangyang Market to get some cheap stuff. :) If you have another change to Shanghai, you are most welcome to come to our station, the address is shown on the QSL letter, or we can have a coffee together, I am also a DXer. Have a nice weekend!"

<https://www.box.com/s/dffglzuqo0erpr53jb80> contains a copy of the attached QSL letter. Have listened to this station for many years and am very pleased to finally have a very nice confirmation of reception (Ron Howard, Asilomar State Beach, CA, USA)

## **e-QSL Guangzhou Coast Radio Station**

The email address used to QSL the Guangzhou Coast Radio Station by Takahito Akabayashi in DXLD 12-29 is no longer in operation (this is NOT active - [gzrdo@gzrdo.com](mailto:gzrdo@gzrdo.com)), even though it is still shown on their website (<http://www.gzrdo.com/>). I searched the Web and found the appropriate email address that does work.

Sent off a reception report in CHINESE to [lmb@gzrdo.com](mailto:lmb@gzrdo.com) (including a reference to a recording of my full reception at [box.com](http://www.box.com), which was actually listened to). Received an e-QSL in CHINESE in just two hours from Mingbiao Luo, the same person that Takahito heard from. QSL confirms my reception. Here is a translation:

*Dear Ron Howard:*

*How are you? First of all, thank you for listening to our station's broadcast on safety information at sea. We confirm you heard our station's weather forecast at sea on Monday, 8 April, 2013, between 11:00 AM CST – 11:05 AM CST (Beijing Time), on 17398-USB kHz.*

*Guangzhou Coast Station was established to participate in the International Convention for the Safety of Life at Sea (SOLAS) and to fulfill the responsibilities and obligations under the International Maritime Organization (IMO). It provides safety information to ships at sea on distress alert, safety, rescue communication, ship-to-shore public communication, weather forecast on China marine waters, and navigational warnings.*

*Every year we receive reception reports from radio listeners around the world. What makes us especially pleased is our signals are heard as far as in the United States. We really appreciate you providing us with this information. It is encouraging. We hope you will continue to follow our broadcasts with interest. A 24-hour continuous report would be most ideal. We will try to provide the best services to ships at sea.*

*Guangzhou Coast Station is located in Guangzhou city, which is in Guangdong Province of China. Guangzhou is a beautiful city. We hope you will be able to visit Guangzhou some day.*

*Wish you great success and good health.*

### THE ENERGY-SAVING LED BULB THAT SWITCHED OFF THE RADIO. Which?

By Becky Pritchard, Senior Home Researcher Energy & Home 17 March 2013

[http://conversation.which.co.uk/energy-home/led-bulb-radio-interference-dab-test/?cmp=W0413\\_convno\\_lightnoise](http://conversation.which.co.uk/energy-home/led-bulb-radio-interference-dab-test/?cmp=W0413_convno_lightnoise)

We get sent some weird and wonderful tales of products going wrong, but one story piqued our interest so much that we just had to send it to the lab to test it out. Can you help us shed more light on the mystery?

Last year we received this intriguing message: 'I recently changed six halogen down-lighters to more energy efficient LED bulbs. Unfortunately when the lights were switched on, the DAB signal on my radio was wiped out!'

To try and figure out this conundrum, we sent a batch of cheap, generic 12V LED bulbs to our lab and found that when a digital radio was placed within a few metres of the switched-on bulbs the signal went fuzzy. When the radio was placed within a few centimetres of the LED bulbs, it cut out all together.

LEDs are ultra energy efficient light bulbs that can last up to twenty years and have been hailed as the future of home lighting.

It seems our members are not the only ones who have had this problem. There are other accounts of LED bulbs affecting radios, with AVForums also collecting stories. Nick Tooley shared his experience:

'I had the same problems with LED bulbs wiping out DAB reception and tried several types of bulbs, but to no avail.'

And it seems that the issue may not just be limited to digital radios – TVs may also be affected. After fitting LED down-lighters in his kitchen, Jackord noticed the following problem:

'While the lights are much better, we then by accident noticed that the digital TV would not work (I was complaining that we had no reception at all, did not make any sense, began to think that there had been some sort of catastrophic disaster which stopped the TV stations from broadcasting...lol) then someone turned off the ceiling lights in the kitchen and, hey presto, on came the TV.'

So what bulbs are affected? We tested three 12V generic LED bulbs and we also compared them to branded 240V GU10 LEDs and some halogens. We found only a very minor interference with our radio signal. So at this stage, the issue seems to be limited to cheap knock-offs rather than branded goods.

We've only done preliminary tests on this problem, so can't make any concrete conclusions on why this is happening or how widespread this bizarre problem is.

That's where you come in. We need your help – have you had this problem? If so, please enlighten us in the comments below, including what model bulb you were using and where you bought it (via Mike Terry, dxldyg via DXLD)

For years, the cheap Compact Fluorescent Lights (CFL) have been interfering with AM reception in the medium-wave band. Its a brand issue, and one particular brand has in my home shown much less interference. One clue is how hot the base gets. The cheap brands get hot (50-70C), the better circuits stay under 50C. For those that want names, here they are: GE is hot, Sylvania is not. And a reminder that heat is also a waste of electricity.

Most computers (and their LCD and or LED displays), modems and routers also have high AM-BCB interference, and have been interfering up to 10,000 kHz for many years. All new technology has been trying to kill older technology, how human (Paul S. in CT, dxldyg via DX LISTENING DIGEST)

### How to create your own memory user file (from Perseus\_SDR)

Hi, Does anybody know how to create your own user file for the Perseus?

The existing manuals only say that you should keep the same structure as the eibi or hfcc files, but that structure is not clear at all.

Is there no template file one can use or another way to create such a user file?

Thanks in advance!

Attached is a template file. (userlist2.txt)

There are a few rules you have to comply with.

- NEVER use Tabs !
- don't go beyond column 80
- add a return with an empty line at the end of the list.
- every line must have a start and end time. If you don't know it just add 0000-2400.

A good tool to edit lists is TextPad It can even find Tabs by searching for regular expressions. It's in its help file.

## Radio Bora Bora

Sorry...no new Tahitian SW station to report. However, a young lady (using that term shows I'm becoming an old man) I work with recently got married and honeymooned in Tahiti.

Somehow (🤔), she knew about my radio hobby and took a picture of a local FM station, 88.8, Radio Bora Bora for me. I thought I'd share this with the DXplorer group, as this is a station many of us would like to hear, especially since you'd have to be in Tahiti to hear it.

Interestingly, she mentioned that her and her husband enjoyed the local music, and often listened to Radio Bora Bora, but they were puzzled by the station's tendency to play snippets of music instead of whole songs, and in-between the snippets, have extended announcer talk. Having listened to lots of SW and LW stations for years, this sounded familiar, but hearing this observation from a non-hobbyist was interesting.

## PRESS RELEASE FROM THE *DANISH SHORTWAVE CLUB INTERNATIONAL (DSWCI)* [www.dswci.org](http://www.dswci.org)

**NEW SURVEY AVAILABLE:** *The DOMESTIC BROADCASTING SURVEY 15 (DBS-15), April 2013*  
edited by DSWCI Chairman, Anker Petersen. ISSN 1399-8218

The 56 years old DSWCI which counts experienced DX-ers in 29 countries all over the world as members, has just issued the 15<sup>th</sup> Edition of its annual *Domestic Broadcasting Survey*. This survey is divided into three parts:

**Part 1:** The 41<sup>st</sup> edition of the Tropical Bands Survey covering all **ACTIVE** broadcasting stations on 2300 - 5700 kHz, including clandestines.

**Part 2:** Domestic stations on international shortwave bands above 5700 kHz broadcasting to a domestic audience.

**Part 3:** Deleted frequencies between 2 and 30 MHz which have not been reported heard during the past five years, but may reappear.

This new Survey is based upon monitoring by our members, many official sources and DX-bulletins. A13 schedules are included when available. In order to make the DBS reliable, our own monitors around the world have checked throughout the period April 2012 – March 2013, if each of the 640 station frequencies is on the air. **ACTIVE** stations are marked with an A ("Regular"), B ("Irregular") or C ("Sporadic") in the list. D means "Likely inactive".

A unique feature is the right column called "Last log". It shows the last month and year before DBS deadline on March 31, 2013 when the particular station was reported logged by a DX-er somewhere in the world. This is another way of indicating the current audibility of the station. ***To avoid inactive stations in this DBS, most frequencies which have not been heard during the past year, have been deleted*** and are moved to Part 3. No other frequency list has this feature!

Other useful features for easy identification (ID) are the parallel frequencies and reference to Station ID slogans.

Three sample extracts from the DBS-14 are shown on the next page. Reviews can be found on [www.dswci.org](http://www.dswci.org)

All buyers of DBS-15 will get a username and password to the monthly updates on the tropical bands published as "**Tropical Bands Monitor**" on our website. The similar, historical data from 2005, 2006, 2007, 2008, 2009, 2010, 2011 and 2012 are available to anybody at [www.dswci.org/tbm](http://www.dswci.org/tbm).

The 23 pages A-4 size DBS-15 is available by e-mail as pdf-format (about 400 kB). A limited number is also available printed on paper.

It is sold by the treasurer:
