SHORTWAVE BULLETIN

Issue no. 1785, Nov 24, 2013.

Deadline e-mail next issue: 0900 UTC, Dec 8, 2013.

SWB kommer lite senare än vanligt på söndagseftermiddagen. Jag är sekreterare i Höja Hembygdsförening och vi har precis avhållit vår årliga julmarknad. Som vanligt i de flesta föreningar så krävs det att styrelsen ställer upp lite mer än andra. Så idag fick den aktiviteten gå före.

I varje fall är grönkål och vitkål införskaffad så att julbordet blir likt något även i år. Grönkål och brunkål måste bara finnas med.

På radiofronten intet nytt. Kondsen har varit ganska dåliga en längre tid och bara några enstaka stationer har letat sig fram. Trots det blir loggen ganska omfattande.

Hoppas nu att konds och aktivitet blir bättre när mörkret på allvar kommer in över oss. I nästa vecka är det åter dags att sätta på vinterdäcken på bilen. Häromdagen var det minusgrad3er och naturligtvis smällde det lite till höger och vänster. Skåningar lär sig tydligen aldrig ...

Keep on

SWB-info

SWB online på HCDX: SWB member information: SWB anniversary issue: Dateline Bogotá 1993-1998: SWB latest issue:

Finally, a big thank you to all

our contributors. Without you

SWB wouldn't be possible.

A special thank you goes to

Robert Wilkner for the nice

copies at the end of this issue.

BBS, Bhutan on 6035 seems to

be on air irregularly. This week

PBS Yunnan was heard on the frequency up to 1500. I found a

beautiful OSL card here:

http://www.hard-core-dx.com/swb http://www.hard-core-dx.com/swb/member.htm http://www.hard-core-dx.com/swb/SWB_history.pdf http://www.hard-core-dx.com/swb/Dateline.htm http://www.thomasn.sverige.net/password.htm

QSL, kommentarer, mm.

Ullmar Qvick: Tack för ett nytt nummer av SWB.

Förutom att jag är ganska inaktiv på SWBC så är jag som vanligt glömsk. De här QSL-en skulle inrapporterats, men kanske du kan ta dem med nästa gång. AWR Nauen D 11610 kHz kort, AWR Meyerton AFS 11840 kort, AWR Moosbrunn AUT 11955 kHz kort, LLE-3 Erdal/Bergen N 5895 kHz kort, RAE Buenos Aires tyska pgm 15345 kHz e-kort + bild av lamadjur samt trevligt e-brev, v/s Rayén Braun.

Samtidigt har jag fått ett 50-tal amatör-QSL. Lite skillnad.

Stormen kom av sig här, troligen omdirigerad av SMHI. Normalt ser verket till att vi har hyfsat väder här i Norrköping.

Rolf Åhman: Lao National Radio 7145 svarade med ett tjusigt kort och blev land nr 204. Stort tack till Thomas som tillhandahöll v/s och adress.

LLE-3 Bergen Kringkaster 5895 svarade med en trevlig folder på rapporter från PAX101.

Arne Nilsson: Since SWB has become international, I decided to write my comments and logs in EE!

Cx here in Northern Sweden have been rather poor for a very long time, but a few exceptions have been noted. Some Pacific signals have found their way also to this part of the world and my new 50 degree Beverage (only 200m long) seems to pull in signals quite well. It is always nice to be able to listen to The Cross! PNG stations, on the other hand, except 3905 New Ireland, seem to be very absent here but the hunt goes on!

Dan Olsson: Hej allesammans. Inte mycket till bidrag men ett svar har kommit sen sist nämligen **6210 R Tango Italia** med kort och e-brev. Blev min 2900: de verifierade station.

Anker Petersen: Due to illness, only a few loggings this time from Skovlunde on my AOR AR7030PLUS with 28 metres of longwire.

			1012 noted in Spanish with fair signal 14 November; 1035 to 1045 weak on the 13 November (Wilkner)
3360,07	Nov16	2329	A weak station noted here. I heard atime pip and first thought it wasn't a harmonic
			from 1680. Also strange music, a little like Arabic. A recording was sent to Henrik
			Klemetz and he asked me to contact Jari Savolainen. Jari says: altho it may sound
			Arabic, I'm pretty sure the music is in fact Greek and the male voice is in Greek. The
			Greek pirate harmonics are often heard on 90 mb. So this could be one from about
			1680. I'll send the file to Mauno Ritola for confirmation Mauno also thinks it's
			Greek pirate. Maybe you can send the file to Greek DXer Zacharias Liangas. I think he recognizes the music and talk. /Jari.
			Said and done. As we had some problems with his mail address he replied to Henrik
			Klemetz via Facebook:
			As for the file i could not find a real ID except that he called for a break and the
			remain is rather lost in the dust . and if you want the name of the female singer on the
			start is called Eleftheria Hristopulu a doggish 'as i call this style' stinger.
			/ZachariasLiangas.
			He will try to do some further checks. On Nov 22 the station was there again and this time I could check that the same signal also was audible on 1680. In fact the station
			was stronger on 3360!
			Thanks a lot Henrik, Jari, Mauno and Zacharias for your help! TN
3364,9	Nov7	2245	R. Cultura, Araraquara SP, canções; 24331. Melhor sinal em 09/11, 2240. Carlos
			Gonçalves
3375,1	Nov20	1020	Radio Municipal São Gabriel da Cachoeira 1020 to 1047 om in Portuguese, weaker
			signal today 20 November; 0917 om with some music to 0935, possibly a yl announcer as well, on 14 November (Wilkner (Wilkner)

3905			Radio New Ireland, Kavieng, Papua, 1933 UT, Nov 23 SIO 252 Es geht ja! Und auf
			5019,8 ist heute zum ersten Male set Monaten ein Träger mit S3 zu sehen, aber kein
2005	NT 10	1 402	Audio zu hören. Könnte aus Honiara stammen. (Christoph Ratzer via A-DX)
3905	Nov12	-1403	NBC New Ireland, PNG. Best reception ever of this station. They closed with Nat.
			anth. sung by a children's choir. Someone forgot to switch the carrier off; it was still there 25 min later. AN
3905	Nov20	1355	NBC New Ireland rather weak this day. But the carrier is noted most days at this time.
5705	110120	1555	Also this day the carrier stayed until shut down at 1420. TN
3925	Nov18	1400	R Nikkei 1 audible already now and very clear at 1515. TN
3945	Nov18	-1401*	R Nikkei 2 with sign off. Weaker signal than on 3925. After their sign off a weak
			carrier without audio remains on exactly 3945. TN
3945	Nov19	1400	R Vanuatu, Vanuatu. Island music followed by classical music until 14:00.
			Unmodulated carrier after 14:00. Nick Hacko, VK2DX Sydney – Australia

			Hi Nick, There have been several logs recently of R. Vanuatu BEFORE 1400 UT, but I respectfully submit what is actually being heard then is RN2 (Japan). Website at http://www.radionikkei.jp/rn2/ . It in fact does sign off close to 1400 from Monday to Friday. Indeed after 1400 I have recently also heard an open carrier with no audio, which I think might be the R. Vanuatu tx still on. For me here in California, it is all but impossible to hear R. Vanuatu through the strong signal of RN2 on weekdays. It is only on the weekend that it is really possible to check for Radio Vanuatu without the presents of RN2. Attached is a recent audio of the RN2 sign off format. http://xa.yimg.com/kq/groups/12397727/94010928/name/RN2%2C%203945%20kHz %2C%20off%20at%201401%20UT%2C%20Nov%2014%2C%202013.mp3 They use many IDs in English ("RN2"), given by native speakers of English, which I think has confused people into believing it's Radio Vanuatu, but not so. Hope this helps.

Brief audio at - https://app.box.com/s/oh85vskkqqikisntxcrq (Ron Howard, Asilomar State Beach, CA, USA) 1245 PBS Xinjiang seems to have returned again; first day here Nov 12; first heard at 1245 through 1400; started at below threshold level and very slowly improved to poor; 1332 to 1358 non-stop singing; at both 1300 & 1400 time pips; not able to make out language, but possibly their Kazakh service as heard in past years here. So is this replacing 6015? Am positive was not AIR Kohimal An unfortunate development, as I am expecting AIR Kohima to be on the air here with coverage of the major event of the year for them, the Hornbill Festival, which takes place in Nagaland from Dec 1 to 10. Website at http://www.hornbillfestival.com/. With PBS Xinjiang here, it will make for difficult reception of Kohima. As this year is AIR Kohima's Golden Jubilee, surely they will be broadcasting the festival via SW, as they have done in past years. BTW - The state of Nagaland was formally inaugurated on December 1, 1963, another important reason for Kohima being on the air Dec 1. https://app.box.com/s/gwp7030yiwl24h5tsa1s contains a recording of a typical reception of AIR Kohima during the Hornbill Festival (2012 - "Festival of Festivals") (Ron Howard, Asilomar State Beach, CA, USA) 4860,00 Nov9 0030 AIR Shimla Hindi news, 0035 ID: "All India Radio", English news, Indian music 32232 CDDAR QRM AP-DNK 4865,06 Nov7 2309 R. 5050 5130	Nov23 Oct9	2329 1530	(Wilkner) Beibu Bay Radio, Nanning, China, SIO 343 Christoph Ratzer Sedaye Zindage via Kyrgyzstan - Music, YL talk pres Dari/Pashto to close at 1745. Fair signal but very low audio modulation; 242 (Dave Kenny, Sheigra, Sutherland, Sattland, JW DVradition, New DDVC, JW Communication via DVLD)
5875	Nov 23	1103	Scotland, UK DXpedition, Nov BDXC-UK Communication via DXLD) fair signal in Vietnamese, BBC? No, BBC does not start from Nahkon Sawan until 1200 in English. At 11-12 it's HSK9, R. Thailand, Udorn, quarter-hour each in Vietnamenes, Khanga Khanga Chang WECC (Chang Hauser OK)
5910	Nov8	2231	Vietnamese, Khmer, Lao, Myanmarianese, per HFCC (Glenn Hauser, OK) Alcaraván R via Voz da tua Consciência, Lomalinda, canções; 45433. Carlos Gonçalves
5910	Nov18	1334	Shiokaze/Sea Breeze via Yamata, noted 1430*; moderate jamming. (Ron Howard, Asilomar State Beach, CA, USA)
5930	Nov13	0629	R. Rossii, Pet/Kam, check for // to 7320, but it`s not. At 0630, maybe it is, but not synchronized (which is the usual situation when both sites on same network feed 6 hours later on 5930, 5940). ACI to 7320 from 7325 increases circa 0629 as BBC switches from Woofferton to Ascension (Glenn Hauser, OK)
			Hi Glenn, There is a good chance that you did not find 5930 // with 7320 at 0629 UT, due to 5930 broadcasting their own local "Radio Rossii Kamchatka" programming from 0610 to 0630 (Mon-Fri). This per Aoki, which lists "Kamchatsky." For myself, I have often heard the "Radio Rossii Kamchatka" programs from 0710 to 0800 with good reception. <u>https://app.box.com/s/ 28ldp2uz650q9o7iaux2</u> contains an audio of a typical recent reception. /Ron Howard via DXLD
5940,8	Nov9	2254	R. Voz Missionária, Camboriú SC, propag. relig.; 43422, qRM adjacente. Carlos Gonçalves
5950	Nov16	0054	very poor signal here from something, as I was checking for Bolivia on 5952.4 – not heard. Per EiBi, HFCC, and Aoki, it can only be the IRIB Tajik service at 0050-0220, 500 kW, 50 degrees via Sirjan. (Glenn Hauser, OK)
5952,5 5965	Nov8 Nov19	2233 1501	R. Pío XII, Siglo XX, quíchua, música índia, texto; 35432. Carlos Gonçalves Very poor signal in Russian is the OSOB by now, and I figure it will be CRI: yes, per Aoki, this hour is 500 kW, 55 degrees from Beijing site. That aims across DVR including Petropavlovsk/Kamchatsky, tip of Aleutian Islands, but considerably offshore west of North America. The azimuth from Beijing to Enid is more like 25 degrees (Glenn Hauser, OK)
5975	Nov18	*1600-	Shiokaze/Sea Breeze via Yamata. With their new schedule am now able to catch their second frequency; Nov 18 at *1600; fair with very light jamming (Ron Howard, Asilomar State Beach, CA, USA)
5995	Nov9	2256	R. Mali, onde está o áudio? 54433, QRM adjacente. Carlos Gonçalves
6020	Nov19	1344	Not CNR1 but song, announcement in uncertain language. Presumed as in Aoki, CNR8 service, 100 kW, 15 degrees from Beijing 491 site, in Mongolian at 12-14 (Glenn Hauser, OK)
6035	Nov22	-1500*	UNID with S6 signal but low audio, sign off 15.00:31. My first thought was a reactivation of BBS. On Nov 23 at 1445 I compared the audio with the stream from BBS web site but definitely not //. Finished with hymn from 1459. Maybe PBS Yunnan? A recording of the last 2 minutes was sent to Ron Howard for help. TN
			Greetings from California Thomas. Definitely PBS Yunnan signing off as usual at 1500. Nov 23 heard clearly at 1300 UT with the normal ToH theme music and no other signal heard. Nov 22 also noted 1500 sign off and nothing else there at that time. BBS has not been broadcasting recently at that time, per my observations and: "But I didn't find BBS's signal on 6035kHz on the evening and night on both November 20st & 21st also. More monitoring updates soon. Plus - "I've not found any signal of Bhutan Broadcasting Service on 6035kHz on November 23th during my several airchecks from 0200 to 1030UTC. 73 & 55 Gautam Kumar Sharma(GK) Abhayapuri(Assam)(India)" All of which conforms to what you and I observed. So when BBS is on the air, running a reduced schedule? Not heard with English from 15-16 UT. BTW - Last year BBS was on 6035.04. We need to check if that will be the case now! Yunnan is 6035.00. Let's keep monitoring :)) /Ron Howard Many thanks for taking time to listen and for your valuable comments! /TN
6055	Nov10	1500	Radio Rwanda - After more monitoring, believe I can safely say the four languages

			used at 1500 for the news headlines, separated by unique theme music, are
			Kinyarwanda, French, English and Swahili , but not always in that order. Also I
			noted these news headlines on Sunday (Nov 10) at 1500 (item about the peace negotiations in the Congo with the UN special envoy, etc.), so in fact they do have
			some news on the weekend. The only question now is do they have headlines on
			Saturday? I believe that day is devoted to sports coverage, but is that always the case?
			(Ron Howard, Calif.)
6055	Nov18	1501	Radio Rwanda. Via long path with no multi- language news headlines today; program
			probably in Kinyarwanda with many sound bites; fair with clear IDs (Ron Howard,
			Asilomar State Beach, CA, USA)
6075	Nov23	0100	I crossed this frequency in bandscan, and something was there, assumed usual CRI
			English via Kashgar, but Bob LaRose, W6ACU in California reports: ``YHWH on
			again: They've made another Friday afternoon appearance, this time on 6075 kHz.
			Relatively strong around 0100 Saturday UT with sideband QRM from Havana on
			6070. Same old stuff. Could be same identical program as before, as reported by
(000	NL O	0025	others'' (Glenn Hauser, OK)
6080	Nov8	2235	R. Marumby, Curitiba PR, , propag. relig.; 23431, QRM CHN. // 9515 c/ SINPO
6080	Nov21	0510	35433. Carlos Gonçalves Solomon Islands Broadcasting Corp., Solomon Isl. 21/11 Carrier visible as of 05:10
0080	INOV21	0310	GMT. Recognizable copy as of 08:06. Female presenter, in English. 08:08 Web details
			of WWF in 'relation to protected areas'. 08:12 "in Solomons and around Solomons"
			mentioned repeatedly. 08:14 on SPC (Secretariat of Pacific Community). 08:15 male
			voice ID 'island radio'. Uninterrupted talk, two YL on regional politics. At 08:27
			signal strength reaches S9+10dB however readability remains rather average due to
			heavy static and crashes, (local storm). 08:28 Sport; on Commonwealth Youth Games,
			2015 Australia. 08:34 couple of adverts followed by musical item, young singer, which
			sounds like an original piece. Local announcement in relation to Pacific Aid. Shipping
			timetables, mentioning number of local islands. As of 08:44 reception significantly
			improved. Information from Headmaster to all primary students. Dept / arrival times on
			cargo and ferries to Temotu Province. Note on mining and environmental Officer
			visiting various regions. Long list (5 min) of names of students (admission roll?). 08:56
			announcement of topics for next hour. 08:57 adverts for various mobile service
			providers. Prices in thousands of (Solomon) dollars. 08:58 Bible reading Matthew
			8:14-22 in Pidgin. 09:00 Radio Australia flattens the freq. with S9+30dB signal and service in - pidgin for Solomons! However – and this is the bit may be important to
			you – the Solomon signal remains detectable under the Goliath. Full credit goes to
			moderator and members of dxld for much needed and truly appreciated guidance.
			Audio recording of 4 minutes Solomons followed by 2 minutes of Radio Australia:

Station news

BHUTAN: BBS back on 6035kHz. Here is an interesting DX info which I think may be interesting for you...

On November 20th, I heard Bhutan Broadcasting Service(BBS) in English on 6035kHz from 0847UTC onwards with good reception with slight noise & hum.

I was surprised when I heard BBS in English on 6035kHz after a long break and I thought that BBS might have discontinued shortwave transmission and there is no possibility of resumption of its shortwave analog transmission in future. Anyway, let me monitor in coming days whether it is a regular comeback or something else. The English Transmission on air well beyond 1000UTC (1028UTC infact my last checked time). In the transmission there was discussion on "Salt Business", then some announcements etc, English Songs aired, Listeners Calls with music requests & dedications & music mostly English Songs aired etc etc as per my monitoring .

Please check my blog for more detail report plus links to audio files www.gkcalling.blogspot.com

Today i.e. on November 21st, also I heard BBS-Nepali Service with songs in Nepali at 0603utc on 6035kHz, English Programs with Listeners calling show..music requests etc during afternoon during 0830utc upto 0950utc upto my latest monitoring period.

Thanking You, 73 & 55, Gautam Kumar Sharma(GK) Abhayapuri(Assam)(India)

RUSSIA: I noted over the weekend a change in ID announcements from Voice of Russia. I don't know whether this is to be a complete change but I repeatedly heard Radio VR as their identity. I wonder whether this will be adopted on all broadcasts? /73's Dan Goldfarb via dxldyg

Response posted to dxldyg: Hi Dan, Thanks for the alert. Rare that I actually listen to Russia, but did so Nov 13. Heard on 6115, via Vladivostok, from 1416 to 1457, in English and // to weaker 4960 via Dushanbe. Can indeed confirm your observations! It was obvious that the primary ID used was "Radio VR," much more so than the few "Voice of Russia" IDs. At 1425 "Burning Point" show. /Ron Howard, California

The Radio VR identification has been used from at least September 12. I did a talk on the history of the Voice of Russian for the Reading International Radio Group September 14, taped a part of their morning show from the DAB service in the UK and they were using it then. /Mike Barraclough via DXLD

SEYCHELLES: BBC Seychelles relay station to close in March 2014, BBC Media Centre, 21 Nov. 2013

The British Broadcasting Corporation (BBC) announced today that the Indian Ocean Relay Station (IORS) transmitter site at Grand Anse, Mahé, will cease all shortwave transmissions on 29 March 2014.

The site was established in 1988 and has been in continuous service since then, relaying BBC broadcasts to audiences in East Africa primarily in English and Somali.

The closure will not affect the availability of BBC World Service programmes in Seychelles, which are relayed from satellite broadcasts on to local FM frequencies 106.2, 105.6 and 105.2MHz. In areas of East Africa still dependent upon shortwave broadcasts, the signal will be supplied by other relay stations.

The announcement follows an earlier decision to stop all shortwave broadcasts from the BBC World Service site in Cyprus for similar commercial, technological and audience reach reasons. These ended in March of this year.

The announcement will unfortunately result in 11 staff being put at risk of redundancy. The staff over the last 25 years have operated and maintained this shortwave broadcast facility with passion, expertise and professionalism. The technical ability and commitment of the team at the IORS has been applauded by the BBC World Service.

The decision to close the site has been taken due to changing commercial and technological circumstances. As countries develop and their media markets open, listening and viewing habits have changed. New technology has changed the way audiences listen to BBC programmes and reduced the importance of shortwave broadcasts in much of the area currently served by the IORS, making the IORS commercially unviable.

The BBC is supporting the development of new delivery platforms such as internet and mobile streaming as well as FM radio and TV broadcasts. Shortwave broadcasts continue to regions and markets where listening remains strong and BBC services can be delivered efficiently to large geographic areas.

http://www.bbc.co.uk/mediacentre/latestnews/2013/seychelles-relay.html (Mike Terry via DXLD)

Other radio news

Some observations and questions: Sudan, Nigeria, Djibouti (tent.)

Nigeria: Voice of Nigeria Lagos (or presumed Ikorudo) quite irregular throughout the past few weeks with very variable audio quality, for example Nov. 17 on air till about 0730 on 15120, then off, missing on 9690/15120 1500-1800, but heard on 7255 after 2100. On exact frequency and with sometimes very low audio, sometimes loud but distorted. Missing Nov. 18 0700+. DRM-Service from Abuja seems to be regular, as well as the odd 9689.9v from 2000-2128. Different stream than on 7255//livestram and better modulation.

Djibouti: 4780 tent. Djibouti heard Nov. 17 2130-2200+ - slow traditional music only, likely religious, fair-good, very very likely Djibouti, s/off at 2100 or 2200 probably a thing of the past?

Sudan: It seems the language schedules published here and there for the Voice of Africa service on 9505 are insufficient: OK, French at 1630 and English at 1730 seem to be regular, but after 1830: Certainly not Arabic or Swahili, but likely a number of different languages. I'm no expert in distinguishing african languages, but likely Somali was among them (nov 17 after 1900), and probably Amharic or other Ethiopian languages (several times before 1900), also I heard the word "Hausa" several times in something that sounded like a kind of station announcement around 1900, whatever it may have meant then. Somebody observed this more exactly/systematically?

Congo: 6115 is certainly quite irregular. And signing off often around 1822, if on air.

Congo DR: CANDIP 5066.3 seems to be quite irregular also with variable s/off.

(73, Thorsten <u>www.muenster.org/uwz/ms-alt/africalist/</u> via A-DX)

Auch für die Voice of Nigeria gibt es noch ein nettes Zeitfenster am späteren Abend: 7255 von 2100 bis 2200.

Interessant ist auch die Voice of Africa from Sudan auf 9505. Hier werden Englisch bis 1830 und diverse regionale Sprachen ab 1830 ausgestrahlt - aber welche?

Aaah, I found a little facebook entry on that:

https://www.facebook.com/pages/Voice-of-africa/129214883921579?id=129214883921579&sk=info

Times and order of the languages are certainly not correct, but Hausa, Amharic and Tigrait seem to be the languages in question. The official website does not give us much info on the schedule however: <u>http://www.sudanradio.info/english/</u>

Radio Congo ist zur Zeit wieder ganz brauchbar auf der 6115 zu hören.

Nichts zu hören war jüngst leider wieder von Radio Candip auf 5066.3.

(73, Thorsten <u>www.muenster.org/uwz/ms-alt/africalist/</u> via A-DX)

Driver install problem in Windows 8.1

Install succeeded thanks to Matthias Holz who is not a member if the group and mailed me privately. Microsoft had changed the procedure in W8.1 as to make it possible to install unsigned drivers.

(73' Ron ON2RON via Perseus_SDR)

(Radio is put to many good uses....) The Local, 12 November 2013

The listenership to Swedish Radio has been given a four-legged increase after animal lovers in northern Sweden hung up portable radios in an attempt to prevent the elk from slipping through thin ice.

According to the local Piteå Tidningen paper at least five elk and a deer have drowned in the region having fallen through the ice over the past week.

Locals in Arjeplog have used various methods in order to get the animals to turn around and avoid the thin patches on the strait which flows into a local lake.

One method involved tying transistor radios to items of clothing and blaring out Swedish Radio (Sveriges Radio) station P4 at maximum volume.

"I have also fired shots into the air to scare them. Today I got four of them to turn around but there must be at least a dozen elk out here in the woods and above," said Michael Karlberg to the PT newspaper.

Arjeplog in northern Sweden has thick snow on the ground with temperatures as low as -14C already recorded this winter.

Another reason for wanting to prevent the deer from wading throug is to prevent any threat to the local water supply.

"Animals are an environmental hazard. It is a long time since we rescued alive elk from icy water and we don't want to expose our staff to that kind of danger," said head of rescue services Hans-Eric Jonsson to PT.

In addition to firing shots and playing the radio, locals have also trampled into the snow to make it freeze better and thus make it more secure for the wandering elk.

Perseus WAV Files for Download - LW & MW at Rockworks #4, Oregon

Below are links to four, 458mb files of the frequency range 150-1750 kHz which I recorded at my recent Rockworks Cliff #4 DXpedition to Oregon.

Local sunrise during the DX trip was within a minute or two of 1500 UTC, when many Pacific time zone domestic stations boost their output to daytime power, with the resulting increase of QRM to Trans-Pacific signals.

These links are in pairs-- WAV files from Top-of-the-Hour, 1459:30-1500:30 UTC on November 2nd and 3rd, and a few minutes earlier from 1452-1453 UTC on November 2nd and 3rd. These two recordings made a few minutes prior to local SR have generally less splatter because locals/regionals have not yet boosted their output.

I haven't tuned the long wave range of these recordings... I'm sure theres' some interesting Pacific and Asian LW DX to be found on them!

My apologies for the annoying "video ad Capcha's" security for download of these files; the Mediafire.com host requires watching a short video ad before you can enter a code and proceed with download. In the future I may move everything to my Box.com account to avoid this.

http://www.mediafire.com/download/3ak50ibq2z782zm/atkins_rockworks4_2nov13_1452utc_150-1750kHz.wav http://www.mediafire.com/download/c9koya788w946dd/atkins_rockworks4_2nov13_1459utc_150-1750kHz.wav http://www.mediafire.com/download/g9dhl8n86sq0ydk/atkins_rockworks4_3nov13_1452utc_150-1750kHz.wav

http://www.mediafire.com/download/gg3angh4he1kc2g/atkins_rockworks4_3nov13_1459utc_150-1750kHz.wav

A few years ago I published a Perseus SDR blog ("Five Below") about tropical bands and MW DXing with this receiver. A popular section of the blog was links to Perseus WAV files recorded by DXers around the world.

These files are still online and available to anyone who is interested. They are organized in sub-folders by geographical region of the DXer. The entire folder of files (93 WAV recordings) is located at: http://www.mediafire.com/folder/1shbad73mby1c/way

(Alokesh Gupta, New Delhi, via DXLD)

What SDR to buy?

The reason the Perseus is the dominating SDR, at least for MW DX-ing, is that it was the first to offer full MW sampling, hence it became the receiver of choice for many of us. I have a G33DDC, and although it's "better" on paper, it's next to impossible to hear any difference. It's all in the software. Perseus offers good audio quality, although some of the GUI is imperfect. But there's lots of third-party software available. Winradio chose a software path which is inefficient for the MW DX-er who wants to check a large (literally hundreds) number of files

It should be said though, that the G33DDC has had no issues related to driver installation, and is rock stable. I have been heard in software issues too.

In my opinion, and this is a general, across platform observation, software developers have been more focused on layout and less focused on efficiency. Efficiency regarding recording, monitoring and playing back huge amounts of DX.

(Regards, Bjarne Mjelde, arcticdx.blogspot.com)

I have both the Perseus and Winradio G33DDC SDRs and use both regularly.

I entirely agree with Bjarne that the important differences are not in performance, but in usability. Most high-end SDRs are so good that you should not choose between them on the basis of specifications, but on their ease of use. Some of the cheaper SDRs may have inferior dynamic range or other limitations, but at the upper end of the market - which certainly includes both Perseus and Excalibur Pro - the significant differences are all about the interface. And that's a very subjective thing. For example, I disagree with Bjarne's comment that Winradio's approach is less efficient for MW DXers. Personally, I find it more efficient when dealing with overnight MW recordings. Of course, the Winradio software for their G31DDC Excalibur receiver is very poor in this respect because of the lack of timestamping, Perseus is vastly better, but the Excalibur Pro software is the one that I find most efficient for MW DX (not necessarily for other uses). Others will have different views, or may reach the same conclusion based on entirely different criteria. It's a personal preference.

When trying to decide which SDR to buy, I would suggest that you start with budget and find the best ones that you can afford. Next download all the software that you can find, both from the SDR manufacturers and 3rd party sources, and try them out in demo mode (most now provide a demo mode that lets you experience the software without actually being able to receive your own signals). If you intend to make use of the SDR's spectrum recording facilities, pay particular attention to usability there because it's the one area where they differ quite fundamentally and also the one where individual users' needs vary the most.

Having compared Perseus with Excalibur Pro on the same signals, I am convinced that anything you can hear one, you can hear on the other. Where there are audible differences these are minor and probably due to differences in the way that, for example, AGC operates or the implementation of the digital filters or the characteristics of the audio output stages. Sometimes one receiver will be marginally better, sometimes the other, but it's impossible to say that one or other is consistently better. So, it all comes down to which software you find more comfortable to use. Of course, value is a factor too and Perseus is much more affordable than Excalibur Pro. (Regards, Jack)

USB3

USB 3 (=Useless Serial Bus) is still unstable. As a software developer one has to use drive routines supplied by hardware manufacturers. Those are stiil not very good:-) I am the author of Linrad which worked well with the perseus hardware when Perseus was new. Then there was a change on the USB system that required WinUSB. That is many years ago but people using Win98 still have to use the old USB system.

I have bought a PCI card that gives me USB 3. When installed with the accompanying CD, I can not run Perseus from Linrad. However, when I installed the latest driver from the chip manufacturer I could run Linrad under Windows XP but not under Windows 7. Some day the drivers will probably be corrected, but until then the USB3 backwards compatibility with USB2 is problematic. Do not expect it to be OK - and do not blame Microtelecom for that!!

It is the responsibility of drive routines to make modern hardware perfectly compatible to old standards.

Future SW Station in Peru

The Ethnic Radio Project, a Christian organization, dedicated to bringing the gospel message to indigenous tribes in rural areas of Peru, is planning a new SW station, "Radio Station Maranatha", to broadcast from Pucallpa, Peru.

A map of the area is attached. This could happen as early as 2014 depending on receipt of adequate funding.

The Ethnic Radio Project also operates Radio Logos OAW9A from Chazuta, Peru on 4,810 KHz.

Bonito AntennaJet ASM300, Neuvorstellung auf der Interradio.

PC-Controlled 3-Way Antenna Switch & Mixer. Mit dem AntennaJet ASM300 erweitern wir unsere Empfängerzubehörpalette um einen weiteren Baustein. USB-gesteuert lassen sich bis zu drei verschiedene Empfangsantennen im Frequenzbereich von 9KHz – 300MHz verlustfrei auf einen Ausgang schalten. http://newsroom.bonito.net/?p=222

Endlich ein Umschalter auch für Remotebetrieb.

ASA-62 Antenna Splitter

Das geht vermutlich auch mit dem ASA-62 von Elad. Das Gerät hat einen Remoteconnector, der sich z.B. von einem Raspberry Pi ansteuern läßt.

Leider ist die Beschreibung (noch) recht dürftig.

Ein Remoterechner ist beim ASM300 ebenfalls fällig, Umschalter mit Ethernet und Webinterface gibt es AFAIK noch nicht. Das wäre noch eine Marktlücke... http://ecom.eladit.com/ASA-62/en

Teracom TCW181B

Ich nutze einen Teracom Controller, schalte damit neben den Antennen auch alles was 230V benötigt, eine runde und günstige Sache. <<u>http://teracom.cc/index.php/products/monitoring-and-control/ethernet-controllers/tcw181b-cm.html</u>>

(73 Christoph Ratzer via A-DX)

Antennaswitch 1269

If you have more than three antennas I can highly recommend this remote control for up to ten antennas:

http://www.remoterig.com/wp/?page_id=1793

I use it in my remote listening station since this august, and I can confirm that it works well.

(Per Eriksson via A-DX)

Funktioniert der Remoterig 1269 auch auf Mittelwelle? Das war bis jetzt für mich der Grund für eine andere Lösung... "Frequency Range: 1,6-55 MHz"

(73 Christoph Ratzer via A-DX)

Yes it sure does! It has helped me to log stations from North America, Spain, UK...

I also noted the somewhat limited specs, so before I laid my order I asked Microbit, the manufacturer, about this. They told that they do not market it towards MW DX-ers, but that there was no problem at all going down in frequency. That answer implies perhaps that it may not be used on higher frequencies than 55 MHz, but my interest stops well before reaching 30 MHz.

I use the switch inside, but it comes in a very sturdy metal box that can be mounted on an antenna mast. I guess that this boxing is one of the reasons for the rather high price. But besides of that, I am really satisfied. Software works fine, as well.

The World at my Fingertips

Bill Winchester of Eastbourne, East Sussex remembers:

It was in the mid 1930s when radio manufacturers began adding the short wave bands to their products that a friend

gave me his previous set, a Cossor Melody Maker. It was operated by batteries, a 120v dry battery and a wet acid one, which had to be charged regularly at a cost of 6d. The radio just had long and medium wavebands, which were changed by opening the lid and moving a switch on the top of the two coils.

These were the days of Radio Normandy and Radio Luxembourg beaming the music of the day to us all and a favourite station was Hilversum in Holland with The Happy Station in English every Sunday morning with Edward Startz. He did that for 40 years and on a trip to Holland some years later, my wife and I visited Hilversum and had tea with his lovely secretary Jean Versteeg and later met the man himself. These were also the days of our great dance orchestras like Roy Fox, Ambrose, Sidney Lipton, Harry Roy and many others who were on late night radio. I'd listen to them in bed and would often wake up with the headphones still on and flat batteries.

Returning home after six years in the RAF, I bought a radio with plug in coils that gave me the chance to explore the shortwave frequencies so that I could hear the amateur radio stations of the world but it was not very efficient at all. After buying a much better radio, which received stations from far and wide, I was in serious business.

To become a radio amateur you have to have knowledge of the inside workings of radio and pass an exam before you can be granted a licence and a personal call sign. There are strict rules to adhere to, two of which state that you must operate within the bands specified and must not cause interference. The amateur bands are for that use only and in general are a

certain few kilocycles or megacycles wide. Every country has its own prefix letters and amateur has his or her own call sign.

I became an avid listener and logged all the countries I heard and was always keen to hear a new one or a very distant station like the Falklands with perhaps only one person there with a radio. It is a very good geography tutor and much can be learned about the country, the people, where they live and what they do for a living. In many cases there may be just one person on a small island in a remote part of the world, in some places it may be a person in the services operating a small station as a hobby. I joined one of the radio clubs, the International Short Wave League as call sign G2152, reading and contributing to its magazine, Monitor.

Another aspect of amateur radio was the sending of QSL cards between stations as confirmation of a contact or, in a listener's case, the sending of a report of hearing a station with a true report of the reception including signal strength, fading or interference. I still have a very good collection of QSLs from all over the world.

As a sideline I often toured the short wave broadcast bands which could be very interesting and have some verification cards

A QSL card that Bill was sent in 1952 after making contact with a station in Kuwait.

from them. I was listening one evening on the 20 metre band. It had been very quiet, then a voice appeared as MG Q MH RAF Airborne at 22,500 feet calling for a contact. He gave his amateur call sign and I sent him a report for which I got a QSL of a Wellington bomber and the comment that it was good someone heard him as no one else did. Another person I often heard was Captain Kurt Carlsen on Flying Enterprise , an ocean going ship in the the Atlantic. The last time I heard it was as it was sinking and I gathered all the radio contacts from Falmouth Coast Guard.

I have had a few radios in my time and in 1995 a new one came on the market with continuous coverage of long wave up to very high frequencies. At the risk of breaking the bank, I bought it. This enabled me to hear the local lifeboat and shipping in the Channel and listen to the aircraft flying over the southern skies and the Gatwick and Heathrow air controls as well as track aircraft crossing the Atlantic.

It has been a most interesting hobby and quite time consuming but coming up to 93 years old, I only listen now and again.
