

# SHORTWAVE BULLETIN

Issue no. 1813, Dec 21, 2014.

Deadline e-mail next issue: 0800 UTC, Jan 4, 2015.

Har precis kommit in efter en lägre runda med vår lilla vovve, Elsa. Det är riktigt vått och blött efter ett par dagars rejält regn. På morgonkvisten gäller det att passa sig för nattfrosten. Här ute på vischan har det varit en aning halt på sina ställen.

Detta nummer av SWB går i julens tecken. Ett antal jul- och nyårshälsningar har kommit till mailboxen och det tackar vi för. En del av dessa kan beskådas längre fram. JOE har också letat bland gamla brev från 60-talet och hittat ett antal julhälsningar från några av de mera välkända radiostationerna. Hur trevligt som helst att få ta del av dessa snygga kort.

En hel del tips har också droppat in. Det är bara att hoppas att några av oss även nästa år rattar över KV-bandet. Om vi har tur kanske nån ynka ny station dyker upp eller ev. reaktiveras.

Keep on ....

## QSL, kommentarer, mm.

Thanks for all the nice contributions during the past year. 2015 is waiting for us on the other side of the door and I hope the coming year will be just as nice.

- To all of you -

*Merry Christmas  
and a Happy New Year*

**Olle Bjurström:** Häromkvällen fann jag hyfsat starka signaler på 60 och 90 meters banden med hörbar modulation hos SIBC, Candip och RNA. På 3360kHz har jag också en OID på Afrika antennen. Stationen verkar väldigt ostabil med drift och avbrott men det kan vara läge att hålla ögonen på frekvensen.

Under hösten har jag flyttat en av mina två dubbel delta 310 graders antenner och i samband med intrimningen av bästa dämpning blev jag förvånad hu känsligt F/B förhållandet var för värdena på avslutningsmotstånden. En enprocentig ändring (10 ohm) kan reducera minima med 6 dB i verkligheten. Jag körde Teamviewer på en laptop ute vid antennerna medan jag varierade motstånden och tittade på signalen på min stationära dator där Perseus är ansluten.

**Christer Brunström:** Voice of Vietnam 5955 kort och All India Radio 11670 kHz kort.

**Per Eriksson:** Hej, Jag har inte hunnit lyssna särskilt mycket under senare tid, men njutit av CFRX på 6070 kHz har jag i alla fall gjort. Sändaröversynen gjorde tydligen gott! Har också haft mejlkontakt med Steve Canney, VA3SC, som sedan mer än 20 år sköter QSL-utskicken för CFRX och moderstationen CFRB på 1010 kHz.

Han berättar att det har kommit en hel del rapporter från Sverige under senare tid. Problemet är att stationen slutat stötta honom och Ontario DX Association med portokostnaderna, varför han börjat ta pengarna ur den egna hushållskassan.

Därför är det viktigt att skicka ett par tre dollar, kanadensiska eller amerikanska, tillsammans med rapporten. Steve Canney nås på adressen 1831 Waterdown Rd, Burlington Ontario, L7P 5A2, Kanada.

Passar på att önska er alla en riktigt fin jul- och nyårshelg.

**Lennart Weirell:** Några QSL att rapportera: R Norton - 6300 e-QSL, Station QRP - 6924 e-mail k, Christmas FM - 6942 e-mail.

Merry Christmas and a Happy New Year to all SWB readers!

**Dan Olsson:** Jag får önska alla SWB:are en God Jul och ett Gott Nytt År.

Ett litet svar har jag fått: 6875 R Europé med e-brev och 2 kort.

Här kommer lite loggningar ifrån en lyssnarnatt 29-30/11. Jag kan också göra reklam att vi har en lyssnarnatt 27-28/12 med start 15.00 SNT.

**Robert Wilkner:** Merry Christmas & Happy Holidays from Florida and California.

4920	Dec8	1350	poor signal with YL in unknown language, 1355 some music mixing, S Asian? No timesignal across 1400, as it is fading down. As on so many 60m frequencies, we have to choose between India and China/Tibet as the two countries are unwilling to coördinate and not collide with each other, despite plenty of clear spots on the band. I'm not sure Tibet would do a timesignal at its hourtop, but India certainly would not at its hourbottom, so I am tentatively leaning toward this being AIR Chennai. With BFO it seems there is a second signal on the frequency. The only other suspect signal is 5040, which would be AIR Jeypore with nothing from China. Nothing audible vs RTTY on 4905 which would be another Tibet frequency if that area were propagating (Glenn Hauser, OK)

5020	Dec13	1900	Solomon Island Broadcasting Corp. Honiara, 1900 UT; SIO 353. Pünktlicher Start, Chormusik aus dem Pazifik zum Sendestart. Der Sonnenaufgang in Honiara ist aktuell um 1855 UT, die besten Signale hier in Salzburg sind nach dem Sendestart um 19 Uhr UT aber zumeist erst etwas später, gegen 1930 UT ist das Signal schon sehr anständig. Gestern war das Signal bereits gegen 1910 UT mit S7 sehr laut, oft geht das S-Meter bis 1945 nicht über S3 hinauf um dann nochmals etwas stärker zu werden. Ich hätte gestern eigentlich den Sonntagsgottesdienst erwartet, aber bis 20 Uhr UT spielte man nur endlose Schlagermusik ohne jede Ansage, danach begannen die Nachrichten. Der Rauschflur an meiner Pazifik Beverage liegt bei ca. -140 dBm, da kannst du schon wirklich was vernünftiges hören, auch wenn die Signale nur S 2-3 sind. Zusammen mit dem Excalibur PRO bringt dann bei solchen ruhigen Bandbereichen auch der Vorverstärker des G33 eine erkennbare Anhebung des Signals. Zur selben Zeit ist zB mit der Hari-Windom viel weniger zu hören, da dort der Rauschflur auf 5 MHz um 10-15 dBm stärker ist und natürlich die Richtwirkung fehlt. Sollte die Sonne in den nächsten Tagen mitspielen werde ich Dir gerne eine spätere Aufnahme machen. Wie auch von Olaf gewünscht habe ich einen kurzen Mitschnitt zum Sendestart in meinem Blog <a href="http://remotedx.wordpress.com">http://remotedx.wordpress.com</a> bereitgestellt. Viel Spaß beim Anhören! (73 Christoph Ratzer via A-DX)

## Station news

**BANGLADESH:** As recorded in the latest edition of WRTH, the **Radio Bangladesh (Bangladesh Betar)** website has a new URL: <http://www.betar.gov.bd> (it doesn't work without the www). The site has also been given a bit of a revamp, including comprehensive frequency info but no longer a live audio stream.

Home page hits you first with anti-Pakistan commentary; seems they still hold a grudge. Well, it has buttons for Live AM, Live FM, and ondemand news in English et al. I get music on Live AM, but the 9:45 English news is very muffled, poor audio. <http://www.betar.gov.bd/wp-content/uploads/2014/03/Newse.mp3>

**BHUTAN. 6035.00.** Bhutan right now is booming in here near Colombo 0143, Dec 11. (Goonetilleke in DXplorer). Thank you very much to Victor for your hint! I tried the frequency in the middle of our night of Dec 12 and heard it at 0133-0215 (beginning to fade out here). The frequency was empty 0100-0120+; beautiful Bhutanese folksongs and ann in Dzongkha by man and woman, 0200 talk by woman (probably reading news), 35333. The transmission from the Bhutan Broadcasting Service has a special importance for me, because I visited Bhutan in April 2010. There I visited the Sangaygang Hill with the transmitter and a wonderful view down over the capital Thimphu. Later I tried to visit the BBS Broadcasting House downtown, but it was closed due to a local holiday. (Petersen)

**CENTRAL AFRICAN REPUBLIC. 6030, 3390, Radio Ndeka Luka or Radio ICDI.** The installation is the same 49 m band with a 1 kilowatt transmitter. We air shows from 5:45 am to 9:00 pm (if security allows). That's 12:45 am (EST) to 4:00 pm (EST) [apparently meant EDT, as CAR is UT +1 = 0445-2000 UT --- gh].

-----  
Earlier this year at the height of conflict, the Seleka rebels targeted the radio station. Armed men came up to the station and threatened the staff members' lives directly, but they were saved and are thankful for God's protection. The soldiers were basically closing in, but were distracted and chased after some of their enemies who happened to pass by. After that, the staff told us about how they hid out in the bush for days, evading the rebels. I have attached a few photos from our visit. It is amazing to me that such friendly, jovial men have been through so much!

We broadcast evangelistic/Christian shows, national news, music, and peace and reconciliation messages. We also do original reporting on the water projects work and well maintenance visits that our teams provide. The goal is to sensitize communities to our work so that they are better prepared to partner with Water for Good when our teams arrive in the villages to start a project. Some of our content is Sango and other shows are in French.

When I was there, the radio station staff expressed pride in the fact that their messages are reaching villages across the country. There are few other forms of communication that reach these populations. On one show, "Bon Week End," listeners from across the country can call in on Saturday and give a "shout out" to friends and relatives, and get a chance to hear their own voices on the radio. The radio director emphasized that this extremely popular and a big morale boost for the villages. It demonstrates the role the radio station plays in the country -- reaching the rural population that is under-served by most media.

Since the conflict started, this same network of listeners has helped the Water for Good station keep rural areas informed about security. Our current model aims to raise some funds in CAR by selling airtime at a reasonable rate to faith-based groups and community development organizations active in CAR. This supports the mission of the radio station and builds some local financial sustainability. At the same time, Water for Good directly covers much of the overhead, and organizations and individuals in the USA can support the radio station by donating funds, expertise, and equipment that will help build up the radio station's capacity.

Right now, there are several urgent needs for the station... improved electrical equipment, equipment for reporting/recording interviews, new personnel, training for our current staff, etc. It would be good to know whether or not we can increase the station's wattage without having to change transmitters. We would like to expand our reach to audiences in Eastern CAR. This is a lot of information at once, but I hope that it paints a picture of the vision, strengths, and needs of the radio station. I would be glad to discuss anything in further detail! Please let me know about your interest in getting involved what your contacts, like other short-wave hobbyists in the USA, might be interested in. Sincerely, Adrienne Lane, Director of Development (via Ralph Perry, IL, Listeners Notebook, Nov NASWA Journal via DXLD)

**NEPAL: Radio Nepal** website has a new URL, superseding the one cited in WRTH: <http://www.radionepal.gov.np> (David Kernick, Interval Signals Online via DXLD)

**PERU:** En ny KV lisens i Peru: **6090, OAD3A** New licence to Epifanio Donato Sanches Lirio – 1 kW. Jr. Los Jardines 670, Distr. de Independencia, Prov. de Huaraz, Dept. de Ancash (MTS) (Tore B Vik)

**SWEDEN:** Dear Listeners, Relays via 3950kHz and 6065kHz are restarting from December 27th at 12.00 UTC with programmes from SDXF and Radio Merkurs at 13.00UTC.

Two transmitters are ready for relays to Europe on 3950kHz (5 KW) and 6065kHz (10 KW).

If there are any radio stations interested in relaying via this relay service from the Sala transmitters in Sweden, please contact Ronny at this email address [info@rock.x.se](mailto:info@rock.x.se). The cost for both channels are 30EUR per hour.

### Re: Finished With The Perseus Receiver (Non-existent Repair Service)

**This is my experiences** of USB2 and USB3:

My HP Pavilion dv6 (has two USB2 and two USB3 ports) with Windows 7 and Perseus v 4.0 works OK when connected either with USB2 and USB3.

My (new) ASUS G750JH (has only USB3 ports) with Windows 8.1. It does NOT work with Perseus 4.0. It works with Perseus v 4.1 when the Internet is CONNECTED, BUT when Internet is DISCONNECTED, after a while Perseus "Input Select" changes automatically from "Perseus" or "Wav" to "Net"!!! Then reception and recording stops. (I intend having this PC disconnected). This problem has been discussed in this list, but no solution. I wonder if Microtelecom can help.

## [DXplorer] \$99 USD Windows 8.1 Tablet Runs the Elad FDM-S2 Very Well

I've been using the new HP Stream 7 tablet with the FDM-S2 receiver for a few days, and it works quite well. It handles the entire medium wave band with only 11-13% CPU usage, and can record & playback to a micro SD card without audio stuttering.

The Stream 7 is currently available in the USA for \$99 from Microsoft stores and other outlets. It's like paying for a Windows 8.1 license and getting the hardware free :^)

This tablet is the "Signature" edition with is free of bloatware and 3rd-party add-ons, but does include a free year's subscription to MS Office 36 5 for both the tablet and another PC. This is worth \$70 alone.

The tablet and SDR combo could make for a compact setup for travel and DXpeditions; I'm investigating whether or not the Stream 7 can handle other SDR software.

Here's a video of the Stream 7 and the FDM-S2 in action: [HP Stream7 - Elad FDM-S2 SDR Demo](#)

### HP Stream7 - Elad FDM-S2 SDR Demo

This short video demonstrates that the Elad FDM-S2 software defined radio runs well on the \$99 HP Stream 7 Windows 8.1 tablet. In the demo the entire medium ...

## Jul- och Nyårshälsningar från 60-talet

John Ekwall. Är väl rätt lämpligt att publicera lite hälsningar som de stora radiostationerna skickade under 60-talet. Snyggast är nog R Habana Cuba som väl passar rätt bra nu i samband med islossningen.

Har bara kollat lite MV på morgonkulan. Det går lite grann - imorse var 1610 starkast vid 8-snåret.

## NEW HISTORY MATERIAL AT <http://www.ontheshortwaves.com>

**If you were buying** a good a shortwave receiver in the 1960s, chances are you looked at radios from Hallicrafters and National, two of the best-known manufacturers of the day.

- Under "DX History/Equipment & Advertising" we have posted two items from these companies: a Hallicrafters brochure from 1964, and a booklet on National receivers (circa 1961, judging from the pictures).
  - We have made several changes, including two new items, on our "USCGC Courier" page. You can find the page at the top of the "DX History/Stations" section (these changes/additions are marked "New" in green.)
  - And under "Specialized Resources," we have two new "Wavescan" entries from Adrian Peterson: "The Story of the Good Ship Radio Scotland," and "Ancient DX Report: 1909" (both in Wavescan N302, December 7, 2014).

## K1N Navassa - Exklusivinterview

Glenn Johnson, W0GJ, einer der beiden Teamleiter der bevorstehenden Navassa-DXpedition K1N, hat dem Dokumentationsarchiv Funk das erste von drei vereinbarten Interviews gegeben. Das zweite folgt während der Aktivierung, das dritte anschließend als Zusammenfassung.

Glenn beschreibt ausführlich, wie und mit welchen Auflagen K1N doch noch bewilligt wurde und wie sich das Team auf die zu erwartenden gewaltigen Pile-ups einstellt. Er erläutert den Betriebsplan und wie gegen die gezielten Störmanöver vorgegangen werden soll, von denen die letzten großen DXpeditionen stark beeinträchtigt waren. ## Julhälsning från Lennart Deimert

# GOD JUL

önskar Lennart

*(Lennart, Stort tack för en variant på de annars så vanliga snapsvisorna. Julmust är verkligen gott! /TN)*

## It's A Must

Nu är julen kommen  
Klappar tycker jag om, men  
Ingenting väcker min lust  
Som ett stort glas med julmust

Här sitter jag och grubblar  
Så hör jag något som bubblar  
Vad är det, om inte just  
En nyöppnad flaska med julmust

Jag har jobbat hela da'n  
För att hugga mig en julgran  
Det var jobbigt, flås och pust  
Nu vill jag ha julmust

Julmust måste det vara  
För att jag ska julen klara  
Glögg, det kan jag tåla  
Men inte Coca-Cola

Nu är julen gången  
Och snart är även sången  
Nu ska jag släcka min törst  
Med ett stort glas med julmust
