

SHORTWAVE BULLETIN

Issue no. 1834, Oct 11, 2015.

Deadline e-mail next issue: 0800 UTC, Oct 25, 2015.

Första morgonen i höst med nattfrost och sol från en molnfri himmel. Det blev först en runda med vår cocker Elsa och sedan en cykeltur i det fina vädret. Sen kom granen och hade strul med sin Internetförbindelse. Mest troligt var det ADSL modemmet som lagt av.

Efter detta känns det som det är hög tid att skriva ihop en utgåva av SWB.

En hel del trevliga bidrag har anlänt och signaler på några frekvenser har fått sin lösning.

En kul loggning från en pirat med bara 8 W är signalen från OZNRH i Hilleröd, Danmark. Den gick svagt här och trodde inte den skulle höras så långt. Men både i Norrtälje och i Randers hördes den också. Kul!

Christoph Ratzer kommer att montera upp en reversibel beverage högt uppe i Alperna inom några veckor - kommer att bli intressant att följa hans loggningar.

Keep on

=====

QSL, kommentarer, mm.

Thomas Nilsson: Mailreply from OZNRH in Hilleröd, Denmark. of 6310 kHz reception on Sept 30 1535 UTC:

Hej Thomas :-).

Først tak for rapporten i tekst og lyd. Ja 8 Watt er jo ikke meget og jeg håber at høre fra dig igen når jeg får gang i PA-trinet igen. Så øges effekten jo med lidt over 10x.

Okay 10x forøgelse af effekten giver teoretisk 'kun' ca. 2 S-grader mere ude i landet, men det er da også værd at tage med :-).

Jeg mener at du kender min hjemmeside hvor du kan læse mere, men for en sikkerheds skyld: <http://radiooznrh.webnode.com/>

Her kan du jo også følge med når der kommer 'mere fut i fejemøget' :-D..

Bedste 73 fra Ole Piratos :-).

I also got the QSL card seen below for a report on 1611 kHz from March 2014. You can really see he's a pirate (but you can't see he's a jazz lover)!

Olle Bjurström: Hej Thomas!

Jag har knappast rört radion till för några veckor sedan, men har reparerat några antenner som skadats av nedfallna grenar. Idag planerar jag att sätta upp antennerna som varit nertagana under sommaren för att klippa gräset utan att skada koaxialkablarna.

Häromdagen skickade jag faktiskt en rapport efter ett tips att OZNRH i Dan-

mark skulle sända med 8W på 6310 kHz. Den hördes, med modern jazz, men inte med njutbar styrka. Ett fäglätt QSL kom nästa dag med e-post.

This was the tip: *Radio OZNRH hat eine Sendepause jetzt, aber heute 30/9 am 15.00-16.00 UTC gibt es eine Sendung von Radio OZNRH mit nur 8 Watt auf 6310 kHz. Empfangsberichte werden an diese Adresse willkommen: radiooznrh@gmail.com. (Stig Hartvig Nielsen via A-DX)*

Thanks for listening :-).
73 Ole Olesen Hillerød

Christer Brunström: WWV 15000 klassiskt QSL-kort som tydligen är nummer 30 902 i ordningen. **Radio Revival/SDXF 7430 kHz** två olika QSL-kort föreställande klassiska mottagare.

Jan Görlin (JGÖ). Hej Thomas! Inte så mycket lyssnande för närvarande!
Men till min förvåning droppade det in ett stort rek från Brasilien med **QSL** från **A Voz de Misionaria** som jag rapporterade från Parka i mars 2014! Man skall aldrig sluta hoppas. Bifogar det för publicering, om du inte haft det nyligen i SWN!

Tack för bra jobb med SWB, alltid intressant att kolla vad som hörs, mörkret faller så det är väl dags att sätta i kontakten till mottagaren!

Robert Wilkner: Greetings from a very wet South Florida enjoying tropical rain storms and poor radio reception.

John Ekwall: Fixade min bäver i veckan - av på tre ställen - efter avverkning vid skogsbrynet där den slutar. Gick en del LA på MV men på KV bara Rebelde vid 7-snåret.

Log

(UTC)

2485	Oct6	1210	VL8K is very strong this morning (around 1210 UTC Oct 6, right around local sunrise) on 2485, peaking at close to an S9 on the Perseus and a NW steered SAL-20. Unfortunately the rest of the Pacific seems to be about average. VL8T and VL8A are much weaker, and I'm not seeing a trace of Radio Symban. (Tim Rahto, Luther, Iowa)
2582u	Oct11	0036	Bermuda Harbour Radio sign on with om "...is Bermuda Harbour Radio" (Wilkner)
2598U	Oct2	0054	YL in English with marine weather including "visibility less than one mile" [sic], "strong wind warning in effect". Also mentions Grand Banks, Newfoundland, and Newfoundland Daylight Time [UT minus only 2.5 hours]. Per dxinfocentre.com at this hour the station in the N/L group is VCP-4 in Placentia, starting at 0048. Placentia is in the southeast, on the western side of the Avalon Peninsula. About S8 signal. At 0107 recheck, another marine weather in English just starting mentioning "Radio" and "Newfoundland", i.e. VCM in St. Anthony's on the northern tip. Also on Oct 10 at 0050, YL in English, S8 with winds forecast; she has very good enunciation and sounds like a human. The Canadian Coast Guard website I referenced recently shows starting at 0048 is MCTS Placentia / VCP - Broadcasts via site St. Lawrence --- that's rather imprecise or is there a place by that name in Newfoundland? Otherwise it may be the site just across the Labraborder in Quebec (Glenn Hauser, OK) ----- Re: Canada coastal stations: 2015 Canadian Coast Guard facilities information of coastal stations (freqs, locations, times etc) for Canadian Atlantic, St. Lawrence, Lakes and Arctic is at: http://www.ccg-gcc.gc.ca/Marine-Communications/RAMN-2015/Part-2-Atlantic-Facilities-Information (Jari Savolainen via DXLD)
2749U	Oct10	0052	A bunch of pre-recorded "Notices to Shipping" by M human voice, with serial numbers M2052, M2050, also mentioning XX4, i.e. obstructions and other hazards. Soon switches to French with heavy English accent, "Avis aux navigateurs", and modulation is telco-

quality, from afar? Canadian CG reference shows MCTS Sydney [NS] / VCO - Broadcasts starting at 0040 UT from site Port Caledonia, which is near Sydney and per Wikipedia: ``Port Caledonia (also known as Big Glace Bay) is a small community in the Canadian province of Nova Scotia, located in the Cape Breton Regional Municipality on Cape Breton Island. It is located on the Donkin Highway, between the town of Glace Bay and the village of Donkin. It currently has one gas station/convenience store as well as a public beach, known as the Big Glace Bay Beach. The community received media attention in 2011 when resident Shirley Sampson appeared on the reality television program Canada's Worst Driver 7, ultimately being named the worst driver in Canada.[1]`` (Glenn Hauser, OK) Now it has received more media attention!

2749u	Oct10	2330	VCG Riviere-au-Rernard yl in French. (Wilkner)
3310-	Oct10	0931	Very poor music slightly on the lo side, and since it doesn` t match the KCRC/KGWA 1390/960 local mix of talkers, conclude it`s really R. Mosoj Chaski, which I never hear in the evenings. Quick DXLD archive search on ``3309.`` finds several reports of it on 3309.98, from 2009-2010-2011y if not lately. Only an earthquake can get me up at this hour. Not much else from LA, but 3290 Guyana, 4875 & 4885 Brasil are audible on the FRG-7 (Glenn Hauser, OK)
3310,00	Oct9	0135	R Mosoj Chaski, Cochabamba Quechua ann, music 15121 (AP-DNK)
3320,00	Oct9	0125	R Sonder Grense, Meyerton Afrikaans ann, music 23132 CWQRM (AP-DNK)
3324,88	Sep28	1236	RRI Palangkaraya (very low modulation) // 3905, Pro 1 RRI Merauke // 4750, Pro 4 RRI Makassar // 4869.88, RRI Wamena. Wonderful to be able to hear all four RRI stations; long session of the Jakarta news ending with patriotic song "Garuda Pancasila"; Makassar with Bangladesh Betar & CNR1 QRM (not a very good day for them). (Ron Howard, Asilomar State Beach, CA, USA)
3915,00	Oct5	-2300*	BBC, Kranji. English interview on trade, song, 2259 ID: "BBC World" (AP-DNK)
3945	Sep28	1401	R. Vanuatu. "RN2" (Japan) signed off as usual, during weekdays; after that heard faint music; slowly improving after my local sunrise; finally by 1414 heard the song I was looking for ("You Are the Only One" by Black Brothers) and heard again at 1429; ham QRM. Very nice to find this can now be regularly heard (Ron Howard, Asilomar State Beach, CA, USA)
3985,00	Oct5	1940	R 700, Kall-Krekel. German cultural programme relayed from Bulgaria. QRM Echo of Hope (AP-DNK)
3985	Oct7	*1900-	Voice of Mongolia via Kall-Krekel, English, identification: "Welcome to the Voice of Mongolia in English", news and comments. At 1740 Radio R 700, Kall-Krekel, German, comments, songs. (Méndez)
3990,00	Oct5	*2248-	Gannan PBS, Tianshui. Opening music, 2250 ID in Tibetan by man and woman, "The East is Red" anthem, Tibetan talk, Chinese music. // 5970 (heavy QRM from CRI) (AP-DNK)
3995,00	Oct3	0650	HCJB, Weenermoor. German DX-programme. 35243 (AP-DNK)
3995	Oct7	1737	HCJB Germany, Weenermor, German, religious comments, song in Spanish: "Reina con poder". // 7365. 14321. (Méndez)
4010	Oct2	1245	Kyrgyz R. hrd from 1245 at much better lvl than in recent months from Perseus site in Edmonton AB. Also noted in SoCal but at reduced audibility. Pretty much all talk in Kyrgyz w/ man and woman ancers other than a brief music fanfare at 1300. Sounded like a news pgm after 1300 with short music fanfares interspersed for the first few min. Then pgm sounded more like a commentary. SINPO 3+5434 (Bruce Churchill via DXplorer)
4010	Oct3	-1800*	Kyrgyz Radio, ID, hymn and s/off. 34333 (SHN)
4010,04	Oct9	0140	Kyrgyz R 1, Krasnaya Rechka Kyrgyz talk 35333 // 4819.88 (15221) (AP-DNK)
4055	Sep26	-0612*	Radio Verdad, Chiquimula, religious songs and comments, English, identification, anthem and close. (Méndez)
4451,1	Oct8	2320	Radio Santa Ana, Santa Ana de Yacuma very weak signal, often off the air (Wilkner)
4750	Sep28	1235	Bangladesh Betar (HS), Monday. Even with the additional QRM here from RRI Makassar, was happy to be able to still make out a few items from the weekly SAARC news bulletin in English; President Md Abdul Hamid hosted a reception at Bangabhaban (official residence and principal workplace of the President of Bangladesh), marking Eid-ul-Azha. I note daily that Bangladesh starts to be heard about 1229, with their usual theme music (Ron Howard, Asilomar State Beach, CA, USA)
4750	Oct1	1159	Pro 4 RRI Makassar, 1159 local ID; 5 pips; Jakarta news and // 3324.88, RRI Palangkaraya (better modulation today) // 3905, Pro 1 RRI Merauke // 4869.88, RRI Wamena; switching back now to patriotic song "Bagimu Negeri" to end the news; it will be recalled that for all of August news ended with patriotic song "Dirgahayu Indonesiaku" and for all of Sept news ended with patriotic song "Garuda Pancasila"; after "Bagimu Negeri" another local ID; much better reception than normal; virtually no QRM. My audio (good quality) at https://app.box.com/s/458mlrb1f88vbp81b26iogo2hq966w0w . (Ron Howard, Asilomar State Beach, CA, USA)

4750,00	Sep28	2050	Voice of China, Hailar Chinese talk. // 4800 (AP-DNK)
4750	Oct10	1530	Bangladesh Betar, news in E for 15 minutes. 25333 (SHN)
4760,0	Oct8	-1630*	Some very strange signals here before 1630. As you can see from Arne Nilsson's screenshot and mine below a carrier signs off at ~1625. Unfortunately too much noise to have any chance to catch an ID. The harmonics continue until 1630:15. I have checked the frequency nearly every day lately and the same pattern repeats each day. Down here at my place the only real signal noticed is the one from Port Blair all alone after 1630. It should be nice to know if it could be AIR Leh with transmitter problems causing a lot of spurs or sidebands. On Oct 10 the spurs were completely gone and the station signing off at 1625 turned out to be <u>Trans World Radio!</u> We have to wait a few weeks more until Christoph Ratzer has installed his new reversible beverage up on the mountain hoping for reception of AIR Leh then. (TN)
4760,0	Oct10	-1625*	<u>Trans World Radio</u> Manzini, Swaziland with good signal when the annoying spurious signal here was completely gone. Only station remaining after sign off was AIR Port Blair. (TN)
4760,003	Oct8	-1700*	AIR Port Blair. I have been monitoring this frequency for a while both in the afternoon and at night here. Weekdays sign off at ~1700 (1700:45) and Saturday & Sunday at ~1730. The signal at 1730 is remarkably weaker than at 2400. The ID heard on Oct 8 at sign off sounded like "Akashvani Radio Port Blair". Exact frequency measured by Christoph Ratzer, see screenshot below. (TN)
4760,003	Oct8	2356	AIR Port Blair. The signal here has improved day by day. ID is given after the same piece of music each day at about 2356. ID as "Akashvani kabli Port Blair Kendra Hey" or as a plain "Akashvani Port Blair Kendra Hey". The ID also repeated just before 2400. On Oct 9 no signal noticed at this time but the station was heard at sign off 1700. Also take a look below on the graph from Christoph Ratzer showing Port Blair signing on at 2342 and AIR Leh at 0157. (TN)
4765,00	Oct3	0205	R Progreso, La Habana, SS ann, Cuban songs. Weak QRM from Tajik R 4765. (AP-DNK)
4774,91	Sep29	0040	R Tarma, Tarma Spanish talk 15231 (AP-DNK)
4789,99	Oct7	-1330*	BBC WS via Tajikistan in Uzbek language. Couldn't nail the ID given at the end so asked Mauno Ritola for help with this question: " <i>Glenn Hauser has a unid here at about 1300 UTC. Managed to record an ID just before sign off at 1330. But I can't understand the language. Do you have any clue? BBC WS in Uzbek is one and also back Azzad Kashmir has been here.</i> " (TN) Mauno's reply: <i>Hei Thomas, please listen to http://www.bbc.com/uzbek/multimedia/2011/12/000000_daraklar_1 at 29½ minutes into the clip and you hear the same announcement. At 35 seconds into your clip there is weak bbcuzbek nokhta com . Yes, it was a radio play. Seems, that BBC doesn't promote their frequencies much: at least I couldn't find *any* frequencies on BBC Uzbek page. Aoki mentioned it first:</i> https://www.facebook.com/groups/wrthgroup/permalink/10153566603288698/ (= BBC Uzbek on new 4790 kHz 1300-1330 daily via TJK Yangiyul from 1st Sept.) /73, Mauno Ritola. On Oct 9 observed again with very weak signal on 4789,98 so obviously drifting a little. No other carrier observed this day. On Oct 10 sign on at 1245 now again on 4789,99. (Mauno, thanks for your help and info). (TN)
4790-	Oct5	1252	UNID JBA carrier with traces of music vs heavy CODAR QRM. 1300 I do perceive a timesignal about 3 seconds late. Slightly on the lo side, implying RRI Fak2 Indonesia possibly reactivated, but the TS implies CNR1 jammer, or maybe BBCWS Uzbek via Tajikistan, but which isn't supposed to start until 1300. Oz DXers could quickly confirm whether Fak Fak is back, or even whether there is a CNR1 jammer on here now. Tried to compare with 7445, but 4790 is just too weak (Glenn Hauser, OK)
4790-	Oct 8	1247	UNID JBA carrier yet again amid CODAR. Is it BBC Uzbek via Tajikistan warming up already for its 1300 broadcast? Thomas Nilsson in Sweden hears that well and sent a clip of the closing by 1330 yesterday including the BaBcoCk theme music. Then I hear from him today: ``Hello Glenn, Set my Perseus for recording today. Enclosed you will find a pdf showing two signals from 1240 UT about 1.5 Hz apart. The stronger one is BBC WS. I can't tell what the other signal is, maybe a spurious signal from BBC WS as it is far too early for Indonesia here at this time of the year. The exact frequency is 4789.99 taking the misalignment into account. So I think people over there must check for a possible Indonesia. Regards, Thomas`` (Glenn Hauser, OK) On Oct 10 I noted an extremely weak carrier here on 4989,85 at 1420 on the Asian antenna direction. (TN)
4800, 00	Sep29	0045	AIR Hyderabad Indian songs, vernacular ann (AP-DNK)
4810,00	Sep29	0045	AIR Bhopal Indian songs, vernacular ann, not // 4800 (AP-DNK)

4810	Oct4	1731	AIR, Bhopal, English, news. //5010. (Méndez)
4810	Sep26	*1900-	Armenian Public Radio, Yerevan, tuning music, Arabic, comments. 24322. (Méndez)
4810,00	Oct9	-1930*	Armenian Public R, Noratus Arabic talk about democracy in Iraq, 1921 Armenian folk-song by female, 1929 Male ann website and ID: "Huna idha'at Jumhuriyat al-Yermaniyah min Yerevan". (AP-DNK)
4835,00	Oct9	1930	VL8A Alice Springs, NT English news read by man and woman 35222 (AP-DNK)
4869,88	Oct1	1239	RRI Wamena with "Kang Guru Indonesia," starting at 1239; starts with singing Kang Guru Indonesia jingle; language lesson; segment of spelling many words; pop songs; not very readable; presented by Ana & Greg. (Ron Howard, Asilomar State Beach, CA, USA)
4869,91	Oct2	1530	UNID carrier here without any audio most likely RRI Wamena. Normally sign off around 1500. Maybe forgot to switch off the transmitter? Also noted on Oct 10 at 1420 on the same freq. (TN)
4869,94	Oct1	1250	RRI Wamena noted with EE pgm by man and woman ancrs conversing to 1306.5, then into 2-3 pop vocals. Man ancr in Indonesian at 1314-15. Pop vocals again at 1315. At 1316:11 AIR's carrier came up just a few KHz above Wamena, but Wamena was still audible underneath. Could have neutered this with LSB but wasn't at the controls then. AIR programming started at 1329 and Wamena still audible underneath until AIR played music, then it was difficult to track. Site used was Edmonton AB. SINPO 35333 until 1316 then SINPO 32332. (Bruce Churchill via DXPlorer)
4875,10	Oct3	0215	R Dif. Roraima, Boa Vista, RR Portuguese ann, Brazilian songs 45233 (AP-DNK)
4880	Oct7	1720	AIR, Lucknow, Hindi music, Vernacular, comments, at 1730 news in EE. (Méndez)

4920	Oct4	1733	AIR, Chennai, English, news. //5010, 4910. 24322 (Méndez)
4920,00	Oct5	2305	Xizang PBS, Lhasa, Tibet. Tibetan talk // 4905 Lhasa (CWQRM) and 6025. <u>The transmitters on 4920 and 6025 have been off (for maintenance ?) since May 2015!</u> (AP-DNK)
4949,8	Oct3	2134	Radio Nacional, Mulenvos, Portuguese, comments. 15321. (Méndez)
4985	Oct3	2133	Radio Brasil Central, Goiania, Portuguese, comments. // 11815. (Méndez)
4985,02	Oct3	0220	R Brasil Central, Goiânia, GO Portuguese ann, songs. CWQRM // 11815 (AP-DNK)
5010,00	Sep29	0055	AIR Thiruvananthapuram Indian songs, Malayalam ann 45444 (AP-DNK)
5010,00	5.10	2315	R Taiwan International, Kouhu. Chinese talk - heavily jammed by Voice of China, Beijing, // 4800 (AP-DNK)
5010	Oct4	-1741*	AIR, Thiruvananthapuram, Hindi music, Vernacular comments, at 1730: "This is All India Radio, the news...", news en EE, vernacular comments and close. (Méndez)
5010	Oct3	1730	AIR Thiruvananthapuram, E news, s/off 1740 UTC. 24333 (SHN)
5020	Oct3	0758	SIBC hrd from Perseus site in Edmonton AB at virtually local quality - this with 20 db attenuation set to minimize R. Rebelde on 5025 which usually overpowers SIBC. Tonight, however, SIBC was overpowering Cuba from 0758 to past 0900 w/ armchair listening - the best I have ever hrd SIBC. SINPO 4+4444 with gradual improvement over time. Many interesting pgms in Pidgin and EE. Program schedule by woman at 0800, news at 0801, frequent coml's and local anmts, pop vocals and local music - at 0831 drums, "Thanks to God" messages and information about death of a Chief in the Isabel province, qualifications and rules for National Youth Awards, etc. w/ drums again at 0843. Man ancr giving PSA for villages to be visited by government health field teams. Anchor Baby Milk coml. Pop music. Anmt by man with schedule times and other PSA anmts on traffic safety. More pop and local music w/ Bible reading from Luke at 0859, ID of "SIBC, Voice of the Nation", Storytelling by man at 0900 to past 0910. (Bruce Churchill via DXPlorer)
5020	Oct3	1930	SIBC with quite good signal and mx. Heard several days at this time lately. Usually gone around 2000. (TN)
5020	Oct 7	1900	Solomon Island Broadcasting Corp., Honiara. Viel statisches QRM, aber der Sendebeginn mit der Hymne um 19 Uhr UT war auf 5020 zu hören. 73 Christoph Ratzer
5020,0	Sep28	-1159*	SIBC - Voice of the Nation. Pop music show with dedications in Pijin; "Evening Devotional"; cut off with no ID or NA; fair; one of their better days (Ron Howard, Asilomar State Beach, CA, USA)
5024,89	Oct9	2230	R Quillabamba just below R Rebelde and nearly as strong, mx. (TN)
5040	Oct4	1736	AIR, Jeypore, Vernacular, comments. (Méndez)
5050	Sep29	1300	Guangxi Beibu Bay Radio, checking randomly 1300-1400; time pips; "Beijing time is now 9 PM"; 1300-1332 almost all in Chinese, except for the normal English/Chinese segment 1320-1323; at 1332 went into Thai for maybe 5 to 10 minutes and then back to Chinese; the BBR schedule shows Thai 1300-1400, but not observed as such; 1400 "Beijing time is

			now 10 PM" and English ID for "Guangxi Beibu Bay Radio"; mostly fair. (Ron Howard, Asilomar State Beach, CA, USA)
5066,3	Oct 7	1925	Radio Candip. Zum Sendeschluß um 1945 UT auch noch richtige Trommelmusik. (Christoph Ratzer)
5129,97	Oct9	1620	Radio Sedaye Zindagi, Afghan Christian Radio http://sadayezindagi.com/ with good signal . ID heard at 1633. (TN)
5795,3	Oct9	1600	Unid. Greek pirate playing Greek folk music, 4 th harmonic. Also audible on fundamental 1448.8 kHz – though quite weak. 34443 (SHN)
5910	Oct5	0447	No sign of HJDH QRM to NHK Japanese via FRANCE; nor anything on 6010.1, so both Alcaraván Radio and La Voz de tu Conciencia are off tonight (Glenn Hauser, OK) (When I checked the freq's at 0030 the same day both could be heard, so maybe early sign off?) (TN)
5910	Oct10	0527	Alcaraván Radio, Puerto Lleras, Latin American songs, at 0531: "Son las 0 horas 32 minutos". Weak. 14321. (Méndez)
5910,02	Oct2	0144	Alcaraván Radio is reactivated after missing about 5 months, and its sibling 6010.1 La Voz de tu Conciencia already reactivated a few weeks ago and remains reliable including now. First date back, as definitely absent from 5910 thru last night. S9 signal, EZL music, 0147 break for arpeggio and brief Spanish announcement about El Señor, more music. Overridden a couple times by ``running water`` ute, but no broadcast QRM at this hour. That will be at 03-05 from Japan via France; and 0543-0600 M-F from TWR via Austria On Oct 4 at 0054 music at S9+5 from Alcaraván Radio, still reactivated (Glenn Hauser, OK)
5910,08	Oct4	0150	Alcaraván R, Lomalinda Reactivated ! Nice Colombian songs, Spanish religious conversation (AP-DNK)
5935,00	Oct5	2335	Xizang PBS, Lhasa, Tibet. Chinese talk // 4820, 6050 and 7240 (AP-DNK)
5950,00	Oct5	1915	Voice of the Tigray Revolution, Addis Ababa. Tigrinya talk, Horn of Africa songs with choir 35343 (AP-DNK)
5960,00	Oct5	2345	Xinjiang PBS, Urumqi, Chinese talk. // 7260 (AP-DNK)
5965	Oct11	0630	Radio Trans Mundial, Brazil, on clear frequency, P talk, ID's. 35333 (SHN)
5985,00	Oct5	2350	Myanma R, Naypyidaw. Bamar folksongs 35233 (AP-DNK)
6005,00	Oct4	1700	R 700, Kall-Krekel English Amateur DX-programme, many R Mi Amigo ID's, German pop song. (AP-DNK)
6010,1	Oct8	0445	La Voz de tu Conciencia, Puerto Lleras (presumed), Latin American songs. (Méndez)
6010,16	Oct5	0030	La Voz de tu Conciencia not strong and disturbed by a considerably stronger R Inconfidencia on 6010,065. Also noted on Oct 10 at 0130 with quite weak audio on <u>6009,94</u> so drifting from day to day. (TN)
6034,95	Sep28	-1146*	BBS. Clearly in English; played pop songs till suddenly off; QRM from PBS Yunnan (China). BBS sign off varies a lot! (Ron Howard, Asilomar State Beach, CA, USA)
6034,95	Oct4	1540	BBS Thimphu. Extrmely strong signal with extended service, observed at 1930 and as late as 0100. (TN)
6034,96	Oct4	1500	BBS Thimphu, Bhutan. Ich konnte keinen Grund finden warum heute so lange gesendet wird, vielleicht hat der Radiomechaniker des Königs Geburtstag. Und auch nach 17 UT noch immer ein gutes Signal aus Bhutan... Von 15 bis nach 18 Uhr UT konnte ich keinerlei Unterbrechungen hören, einzig gegen 1812 UT war das Audio kurz weg, danach aber bis zum Beginn der Sendung aus dem Iran um 1919 UT wieder ohne jede Störung aufzunehmen. Ein seltenes Vergnügen. Thimphu hat gestern (Oct 4) tatsächlich den ganzen Tag und die ganze Nacht durchgehend gesendet. Größte Signalstärke gegen 00 UT mit S9. Ein Bild des Signals von 2030 UT bis zum Fade/out. (Christoph Ratzer) ----- Daß man Muttertag in Bhutan erst am Oct 4 und dann mit solchem Trara feiert ist schon sehr interessant! (Martin Elbe via A-DX) ----- 6034.952. Extended shortwave relay schedule tonight Oct 4th. Thimpu was widely heard here in all Europe and reported on various newsgroups, on this special ?national holiday? Oct 4 on throughout the UTC afternoon. (73 wb df5sx wwdxc germany)
6040,00	Oct9	0205	Rádio RB2, Curitiba, PR Portuguese talk. // R Aparecida 6135.23 (AP-DNK)
6070	Oct8	2340	CFRX Toronto with om talking about "excellent places to visit in Canada (Wilkner)
6115	Oct4	-1819*	Radio Congo, Brazaville, French, comments, at 1801 identification: "Radio Congo", news, French, "Radio Congo, le journal". 14321. Also 1815-1837, Oct06, French, news and comments: "Les Congolaises, La Republique". (Méndez)
6134,82	Oct10	2325	Radio Santa Cruz good signal en español using lsb (Wilkner)
6155			[Non] CNR2/China Business Radio, as of Sept 29, I continue to find this frequency clear of any station during my mornings. CNR2 has been silent here for some time now. (Ron Howard, Asilomar State Beach, CA, USA)

6159,98	Sep28	1212	CKZU – Vancouver. Most mornings I check here briefly to enjoy hearing their local shows/traffic conditions/IDs; "You are listening to the Early Edition here on CBC Radio One, 6-90 on your AM dial and 88.1 FM, across metro Vancouver"; fair with a solid signal (Ron Howard, Asilomar State Beach, CA, USA)
6160	Oct10	2333	CKZN St. John's "in the studio..at this time ..if some of us start laughing much better signal the last few evenings (Wilkner)
6173,9	Oct10	2320	Radio Tawantinsuyo, Cusco very weak signal noted en español om (Wilkner)
6185	Oct5	-0500*	Radio Educación, Mexico D. F., Spanish, comments, classic music. 24322. (Méendez)
6200	Sep29	*1235-	Voice of Jinling. Well I guess it was bound to happen sooner or later - Sept 29 found Tibet (PBS Xizang) has again returned to broadcasting here. First heard Tibet at 1150, with almost fair reception. VOJ with double sign on at *1235 and then off; finally on for good at *1236; VOJ much stronger than Tibet, but later noted more mixing of the two signals. Thanks to Hiroshi and also Hiroyuki Komatsubara for the alert that Tibet has returned to their former frequencies (Ron Howard, Asilomar State Beach, CA)
6265,05	Sep27	1015	Bogusman, UK, in E, playing hard rock. 45544 (SHN)
6309,79	Sep30	1535	Radio OZNRH weak with music. A report to Ole resulted in a reply by mail. Using only 8 watts. See more info above. Last time I heard them was on 1611 kHz. (TN)
6309,8	Sep30	1415	Radio OZNRH, Denmark, with easy-listening jazz, tx power only 8 W. (24332) SHN
6309,979	Sep 30	1533	OZNRH, Danmark med modern jazz och QSB S2-S5. OB (<i>Olle, nice catch! Down here, only 60 km away from the transmitter, just as weak as at your site. (TN)</i>)
6990	Oct11	0735	Radio Komintern (pres.), Russia, Russian songs, female announcer. 25443 (SHN)
7120	Sep26	1834	Radio Hargeisa, Hargeisa, East African songs, Vernacular, comments. . (Méendez)
7120,00	Oct1	1830	R Hargeisa, Hargeisa Somali talk 32442 HAM QRM (AP-DNK)
7200	Sep29	1240	Soft song and Chinese talk, over CCI, and also an LSB ham who is oblivious to such broadcast QRM. Aoki shows jamming and RTI at 10-13; blowing away Myanmar if it's really on too. (Glenn Hauser, OK)
7236,7v	Oct10	1710	Radio Ethiopia, no E, only Arabic or other ME language heard until s/off around 1755, no ID. Quite severe frequency drifting. 33432 (SHN)
7254,9A	Oct5	1800	Voice of Nigeria with usual "60 minutes" programmes from Abuja, but not on its usual frequencies 9690 + 15120. This is likely not the same transmitter as reported on Oct.2: <i>just now, Oct 2 1830+, nothing on 9690 or 15120 again... But at 7255 there was an empty carrier leaving just before 1850, which is not usual at that time. However this was quite exactly on-channel, so likely not the usual Abuja transmitter, but might have been of course Ikorodo testing, oder anything else... Nothing in the afternoon on 9690 from Nigeria, again.</i> Both theoretical livestreams on https://cp4.shoutcheap.com:2199/start/voiceofnigeria/ and http://iframe.dacast.com/b/35454/c/48799 are off, not heard for over a week despite regular checks, as well, 15120 DRM has been off most evenings recently, 9689.9 was quite irregular. Signal on 7254.9 is relatively weak here, maybe strong western beam? (Thorsten Hallmann via DXLD)
7265	Sep29	1217	Azad Kashmir Radio (tentative). Would like to think this was AKR that I was hearing. Have monitored here at this time period off and on all year; many days found a definite open carrier, but never any audio - until today; had positive subcontinent sounding music; unable to make out language of announcer; totally covered by CNR2 sign on at *1230. This is a first for me here! Has been a year since I last tentatively heard AKR on 3975. Am very pleased to finally have audio above threshold level (Ron Howard, Asilomar State Beach, CA)
7265	Oct3	*0600-	Hamburger LokalRadio, Bremen, English, news and comments, identification, at 0630 Glenn Hauser's "World of Radio" program. (Méendez)
7265	Sep27	*0700-	Radio Gloria International, via HLR Bremen, identification: "Radio Gloria International", comments, pop music. (Méendez)
7265,00	Oct3	-1448*	Hamburger Lokalradio, Göhren. English DX-interview with old recordings: "This is Radio Moscow", "This is Radio Prague", 1439 Glenn Hauser with "World of Radio", but the transmitter suddenly went off at 1448 ! Also heard at 0640 on Oct 3 with very weak signal. (AP-DNK)
7310,00	Oct4	1130	R 700, Kall-Krekel English ann, pop songs 35233 (AP-DNK)
7365	Oct7	1733	HCJB Germany, Weenermor, German religious comments, songs. //3995. (Méendez)
7595	Oct3	1715	Radio Latino, Italy, S ID, uptempo music. 45544 (SHN)
8989u	Oct10	2330	Nicaragua "El Pescador Preacher" om locutor en español under some high noise level (Wilkner)
9445,00	Oct8	*2044-	AIR, Bengaluru. Hindi ID, ann, English frequency ann, short poetry, EE review of Indian Press: Mrs. Angela Merkel visiting India, devotional melody on mandoline (AP-DNK)
9485	Sep27	-0700*	Radio Gloria International via HLR Bremen, 0640-0700*, Sep27, pop music, identification in English "Radio Gloria International". 34433. (Méendez)

9505	Oct10	1820	Voice of Africa Omdurman. Der Sendeschluß der Voice of Africa um 1928 UT nun in meinem Blog: http://remotedx.wordpress.com (Christoph Ratzer)
9525,98v	Oct1	1315	VOI. "Today in History"; on this date 1917, Gesang Martohartono, was born, was an Indonesian singer & songwriter - in 1965 "30 September Movement" revolt in Indonesia failed - 2005 Bali bombings; very readable even with prominent hum (Ron Howard, Asilomar State Beach, CA, USA)
9526	Oct1	1800	The Voice of Indonesia is now back on the air after an absence of a few Days. At this time news in German. 2-3 CB
9555,00	Oct6	1915	Saudi International R, Riyadh. Arabic ann, instrumental music, taking phone-in calls, song with choir. (AP-DNK)
9590	Sep30	-1328*	Thazin Radio via Pyn Oo Lwin. In vernacular playing many different styles of music; usual indigenous theme music at sign off. Wonderful to now be able to hear this in the clear with no QRM (Tibet is off the air). Thanks to Ralph Perry, Dave Valko and Hiroyuki Komatsubara (who found "without interference at 0930-1100 and 1200-1330") for their assistance with this now enjoyable reception. Three minute audio at https://app.box.com/s/aop6p864x3ytgr6tax04gpueyv9uwc0q (Ron Howard, Asilomar State Beach, CA, USA)
9645,3	Sep30	0058	No signal from R. Bandeirantes; nor at 0138 when 9630v and 9665v stations are confirmed. I logged it last week, Sept 21 at 0545 with that quarter-hour timesignal, but Brazilians on the radioescutas group have been concluding the station has quit SW for good. We hope that's premature, as lots of stations break down for some reason and come back; let's keep checking. But this from Lenildo da Silva, No Mundo do Dexismo, via Daniel Wyllyans, HCDX on Sept 26 [gh improved Google translation]: ``Apparently, Rádio Bandeirantes of São Paulo (SP), ended its shortwave transmissions, since it is no longer captured on 9645 and 6090 kHz; transmission on 11925 kHz had been suppressed for several months. Affected by a financial crisis, the São Paulo station began a wave of layoffs in its workforce in August, not even sparing established names from the sports department. The obstructive cuts, which have reached other parts of the Bandeirantes Group, seem to have come now to shortwave transmissions. We hope, however, that the traditional broadcaster of journalism and sport, can overcome this crisis and re-operate on shortwave soon`` (Glenn Hauser, OK)
9664,93	Oct9	0041	R. Voz Missionária is drifting off-frequency again after being reported on 9665.0; fair signal in Brazuquese (Glenn Hauser, OK)
9745	Oct9	1430	Shabab FM, Bahrain, Arabic music and a few Western songs, mostly music nonstop, E ID: "98.4", AM with LSB missing. 35443 (SHN)
9819,5	Oct5	0440	Radio 9 de Julho, Sao Paulo, religious comments, Portuguese. (Méndez)
9905	Oct11	0603	Voice of Africa, Sudan, s/on at 0603, music, ID. 35433 (SHN)
9925	Oct10	1730	Radio Pilipinas, s/on, E ID and music. 25232 (SHN)
11535	Oct4	0830	Marconi Radio Int'l, Italy, E ID, pop, poor audio, low mod. 34442 (SHN)
11710,69	Oct9	0050	RAE measured here as it varies slightly, never to 11710.0 or 11711.0. Recheck at 0212 to confirm it's in French, despite someone reporting English during this hour, which was swapped several months ago with French ex-03 (Glenn Hauser, OK)
11720	Oct3	1040	Scandinavian Weekend Radio, Finnish, death metal, E ID, //6170. 35544 (SHN)
11750,00	Oct7	-1755*	SLBC, Trincomalee Sinhala ann, Sinhala folksongs, abrupt s/off (AP-DNK)
11764,6	Oct4	0924	Super Radio Deus e Amor, Curitiba, religious comments, Portuguese. (Méndez)
11780	Oct4	0939	Radio Nacional da Amazonia, Brasilia, comments, Brazilian songs. (Méndez)
11995,00	Oct4	-1629*	AWR, via Trincomalee "Wavescan" in English with Jeff White, report from JSWC, asked for reports (AP-DNK)
12014,9	Sep27	0900	Voice of Mongolia, start of E prg, ID. 22442 (SHN)
12015	Sep27	*0900-	Voice of Mongolia, Ulaan Baatar, tuning music, program in English, identification: "Voice of Mongolia", comments. (Méndez)
12065,00	Oct4	1415	R Australia, Shepparton English phone-in programme about religion in Australia co-channel RRC Kranji in Hindi (AP-DNK)
15190,1	Oct4	0908	Radio Inconfidencia, Belo Horizonte, program "Trem Caipira": "Pela Radio Inconfidencia Trem Caipira", Portuguese, comments and brazilian songs. (Méndez)
15345,16	Oct4	1835	Radio Nacional, General Pacheco, Spanish, soccer, live, match Velez Sarfield-Nuevo Chicago. (Méndez)
15345,28	Oct6	1855	RAE, General Pacheco. Many ID's in various languages: "RAE Radiodifusion Argentina al Exterior", 1900 Italian ann, Argentine songs. (AP-DNK)

Comments:

7200. Victor 4S7VK told us recently, that also Myanmar Radio on 7200v kHz is again on air, but regular checks here in Germany in past weeks revealed no successful reception in 41 mb so far. Reception from Myanmar into Europe was much better in 2011-2014 years... wb

BBS, Bhutan on Oct 4 with extended schedule as observed in Salzburg by Christoph Ratzer (see his log above)
Tonight, Oct 4, a fantastic S9 signal around 00 UT on 6034,96 kHz, audible signal from 1400 - 0230 UT!

(Christoph Ratzer)

4760 All India Radio

All India Radio **Port Blair**, South Andaman **s/on at 2342 UT**, All India Radio **Leh**, Ladakh **s/on at 0157 UT**. Recording: October 09, 2015.

Both TXers are exact on 4760,003 (with my NetSDR and GPS Disciplined Oscillator), Hari Windom, 78 mt. (Leh is not audible).

(Christoph Ratzer from his website <https://remotedx.wordpress.com/>)

Mysterious signals on 4760 kHz:

15-10-03 (Saturday) One station signs off at -1625* and the spurious signals end at 1630:15. One station remains until sign off at 1731. (Recorded by Arne Nilsson, Sjulsmark)

15-10-04 (Sunday) 1625:15 one of the carriers (on the low side) disappears and at 1630:15 the spurious signals disappear. The remaining signal continues until sign off at 1730.

On Oct 10 the frequency was clean and the station signing off at 1625 is Trans World Radio giving a nice ID at the end of the transmission!

15-10-09 This is how the signal looks like just before sign off at 1630.

Station news

ANTARCTICA, 15476, LRA36, Radio Nacional Arcángel San Gabriel, Base Esperanza. I have sent an e-mail reception report to the station for a 2012-2034 UTC, 25-09 transmission and here is the station reply:

"Desde ya muchas gracias y siempre atento Usted. Nos da una gran ayuda con los informe que Usted nos manda por este medio.

Muchas gracias por su disposición.

Esperamos mas Informes.....

Un fuerte abrazo a la distancia

Atte: Sergio LUCERO - Enc LRA 36"

MYANMAR. some bcst sce log of Sept 30, 0000-0030 UT, Myanmar Radio transmission check, during equinox now. Weak signals noted on 5915 and 6030 kHz, fair S=8 signal strength on 5985 and 6165 kHz observed here in Germany Europe.

Victor 4S7VK told us recently, that also Myanmar Radio on 7200v kHz is again on air, but regular checks here in Germany in past weeks revealed no successful reception in 41 mb so far. Reception from Myanmar into Europe was much better in 2011-2014 years...

(wb)

KIRIBATI. Radio Kiribati. Well, I just found out something to those of us interested in Pacific radio signals. Radio Kiribati 1440 JUST started a live webstream.. JUST.. as in, like within the last few days!

The audio levels can be a bit loud and overdriven at times, but i am corresponding with their Chief Engineer and the Radio station manager at the Broadcasting & Publications Authority in an effort to get levels set just right.

The audio is average and I wouldn't expect much more, quality wise, then what they've got now.. as most of these stations have hare basics when it comes to some equipment.

The Radio Kiribati stream was just added to the Reciva.com database for internet radios and should be there soon if it isn't already.

The stream is at <http://202.6.120.13:8000/> The stream itself is of amazing quality at 64k vorbis, which sounds good to my ears via my CC Wifi Radio and CCrane Senta speaker.

Oh, I forgot to add, Radio Kiribati only broadcasts local programming at certain times of day. Sometimes I'll hear Radio new Zealand International outside of local broadcasting, other times I won't

TX times are as follows.. most of their programming is in their native language, which is gilbertese according to wikipedia. It's a Micronesian language of the Austronesian language family. The do three segments of english broadcasting every day, some 30 minutes long and one is an hour long.

Kiribati is UTC+14... at 416pm Thursday in Southwest Arkansas, where i am.. it's 916am Friday morning in Kiribati.

Morning: 0700am to 0830am. English at 8am. *Lunch:* 1200 noon to 1330. English at 1300. *Evening:* 1700 to 2130. English at 1800.

(Enjoy, Paul Walker www.onairdj.com)

I remember the SW broadcasts from many years ago. Seems they used amateur ham equipment then, with classic audio. Those were the days! (Walt Salmaniv via DXLD)

MADAGASCAR Das seit 2005 anhaengige Projekt einer neuen Kurzwellenstation von **World Christian Broadcasting** 605 Bradley Court Franklin, TN 37067, USA. <<http://www.worldchristian.org>> liess 2015 weiter auf sich warten, machte aber einen wesentlichen Fortschritt. Das Projekt hing lange an der Einfuehrgenehmigung fuer die Sender. Diese kam letztlich erst nach einem Gespraech von WCBC-Praesident Charles Caudill mit dem madegassischen Praesidenten bei einem Besuch in Washington. Die Sender sind seit April auf Madagaskar und wurden in Mai aufs Gelaende gebracht. Wie Caudill mitteilte, sind inzwischen USD 12 Mio. in das Projekt geflossen.

Inzwischen wurden auch wieder Frequenzen fuer den Sendestart registriert, der von verschiedenen Mitarbeitern mit dem Fruehjahr 2016 avisiert wurde.

0100-0200	9445	(100 kW, 40 degr)	Englisch Richtung Ostasien

MARSHALL ISLANDS. State broadcaster of the Marshall Islands, **Radio Marshalls (V7AB)**, has a live audio stream available at <http://radiov7abmajuro.listen2myradio.com>. This was observed signing on at 1830 UT then signing off at 1130 UT 2/3 October 2015. Programming noted was mostly in local languages, except for regular relays of BBC news in English.

Eagle Christian Radio is another Marshallese broadcaster, offering live streaming at <http://eagleradio.radio12345.com>.

The station broadcasts on 99.9MHz FM (listed as AFN Kwajalein in current WRTH) and mediumwave 1170kHz (not listed in WRTH).

PARAGUAY COOL! Do you have any info as to the proposed coordinates of the new site?? (Richard Lucas-NY-USA mwmasts Sept 30)

I had the foresight as soon as I heard the rumour of the imminent move of the Radio Nacional site to a new location to check it out with a reliable source.

Adan has once again come up with the goods brilliantly.

"Just verifying a few details as to the move of Radio Nacional del Paraguay's Transmitter Site to Chaco'i, or to Villa Hayes.

The present site has been occupied for 70 years, and contains a World War II vintage 5 kW Philips, a World War II U.S. Military BC-610, a newer RCA 10 kW, a 1970 Harris Gates 100 kW Medium Wave and another 1970 Harris Gates 100 kW Short Wave, a Taiwan - Republic of China 10 kW Medium Wave and a new Harris Digital 100 kW Medium Wave.

The move to the new cross-river site will cost 2 Million U.S. Dollars. New facilities will be built, a new tower erected and a new STL established with Asuncion.

Most probably, the new Harris Digital 100 kW transmitter will be taken by truck to Chaco'i, while one of the older transmitters serves as a backup. It has already been stated that there will be no break in transmission.

There are still problems to be solved and there is opposition to the move. Some persons do not believe that the 100 kW Harris should leave the strategically important Departamento Central, while others do not wish for a 100 kW transmitter to be installed in their neighborhood. The present plan calls for the new Transmitter Site to be operational, before the end of the year.

One thing is for certain, the move most probably spells the end of the Short Wave Service. RNP has a beautiful Rhombic Antenna, directed on Miami, and a 100 kW Harris Gates, needing new Power Amplifier Valves. It is improbable that the Short Wave will be reactivated, in Chaco'i. I will advise as to any changes.

With best wishes. Adan.

(Dan Goldfarb-UK, mwmasts Sept 30, via wwdxc BC-DX TopNews Sept 30)

SAO TOME & PRINCIPE. State radio in the former Portuguese colony of Sao Tome & Principe has gone online with a website at www.rnstp.st, offering live audio streaming of **Radio Nacional**. The site's programme guide only gives details for the morning period, but all programming listed there and observed so far today (since 0830 UT) has been in Portuguese - as is the website itself. The station identifies on air as 'Rádio Nacional de São Tomé e Príncipe' and broadcasts on 945 kHz mediumwave and on FM.

Other radio news

Timor-Leste (East Timor): Former clandestine Radio Maubere

There's an interesting article on Radio Maubere, a clandestine station broadcasting on 3805 kHz (later 5270 kHz) shortwave to and from within Timor-Leste (aka East Timor) after the Indonesian invasion in 1975. It now broadcasts legitimately on 99.9MHz FM in the capital, Dili, and various other FM frequencies throughout the country.

The media in Ladakh needs a helping hand, June 3, 2015

Students of the Department of Convergent Journalism, Central University of Kashmir, on a trip to Ladakh, found that in the Himalayan region the media is not exactly in paradise. The government should actively explore the possibility of starting community radio and even community television services to better integrate the people of the isolated region with the mainstream developmental processes, says **John K. Babu**

Ladakh is far away from anywhere. It is regarded as Paradise on Earth, and offers a serene retreat from the pressures of modern life. Long caught between unfriendly neighbours China and Pakistan, Ladakh is a border region in the state of Jammu and Kashmir. It consists of two districts – Kargil and Leh – with a total population of 2,74 lakh(*) (2011 Census). It is famous on the world tourist map because of its rich cultural heritage. However, students of the Department of Convergent Journalism, Central University of Kashmir, on a trip to the Himalayan region, found that in Ladakh, the media is not exactly in paradise.

Students learn the news reading process at the Doordarshan Station in Leh. The writer can be seen in the background, to the right.

Newspapers and magazine are needed to serve as a window to Ladakh's centuries-old cultural heritage and values, apart from daily happenings, for thousands of outsiders visiting the unique place, besides Ladakh's own scholars, students and academicians. Despite considerable climatic constraints, weekly, fortnightly and monthly periodicals have been registering growth over the last few years. Reputed national media professionals pool their efforts and contribute to the running of local papers for the benefit of Ladakhi people.

There are a handful of private news outfits.

Reach Ladakh Bulletin, a fortnightly English newspaper is published from Leh and printed in New Delhi. The colourful 12-page tabloid is the leading newspaper of the region and is full of attractive pictures and information. Tundup Dorje, who founded the publication in 1999, has kept it on a steady course all these years. Editor Rinchen Angmo Chumikchan's primary focus is the latest news and tourism-related information from Ladakh.

Rangyul, previously called Kargil Number, is a fortnightly bilingual (English and Urdu) newspaper published from Srinagar covering news of Ladakh. The 16-page, black and white tabloid paper mostly circulated in Kargil started its journey in August 2004. With a mission to promote functional literacy, Ladags Melong (Mirror of Ladakh) was started by the Students Educational and Cultural Movement of Ladakh (SECMOL). It is a bilingual (English and Ladakhi) magazine published from 1993 to 2005 and has a web portal providing news content besides video and pictorial information. Heritage Himalaya is a bi-annual news magazine, launched on 21 August 2012, published by the Himalayan Cultural Heritage Foundation (HCHF), a Leh-based Non-Government Organisation devoted to cultural promotion and preservation.

Ladakh Sargyur (Ladakhi News) a bi-monthly newspaper is perhaps the only paper available exclusively in the Ladakhi language. This colourful, four-page newspaper is edited by Chhimet Namgyal and published by Ladakh Buddhist Association youth wing from Leh. Voice of Ladakh is a Kargil-based newspaper owned by the Imam Khomeini Memorial Trust. It consists of eight pages and is a bilingual fortnightly tabloid. Daily updated news of Ladakh can be accessed on visitladakh.com. Stawa a monthly English news magazine is published from Leh and printed in Mumbai under the editorship of Sunetro Ghosal.

Interestingly, Ladakh has been pushed onto the digital media bandwagon without experiencing the usual quota of daily print publications. Ladakh Today, a multi-edition newspaper is published from Delhi, Leh and Jammu and Kashmir, in electronic form. In today's digital age, electronic journals provide publishers and readers an opportunity for wider dissemination of knowledge than print publications. They can incorporate daily updates along with features that improve on or go beyond those that have traditionally been available in print publications.

Apart from local periodicals, some daily newspapers such as Greater Kashmir, Rising Kashmir, State Times, The Daily Excelsior, Kashmir Times and some monthly magazines which cover the state as a whole also include Ladakh in their scope. National dailies have to reach Ladakh by air. At the best of times, they arrive a day late, and during winter, it could take up to a week or ten days.

All India Radio (AIR) started its services in the tiny town of Leh on 25th June 1971. There are three transmissions in a day, together amounting to 12 hours and 30 minutes. Ladakhi, Urdu, Hindi, Balti and Tibetan are the languages in which programmes covering a population of about 200000 (including paramilitary forces and Tibetan refugees) are being broadcast in Ladakh's two districts. Doordarshan (DD) has a station in Leh that broadcasts local content and news for a few hours a day.

The Ladakhis produce feature films that are screened in auditoriums and community halls. They are made on fairly modest budgets. Rigzia Dolma, an educated young woman in a jewellery shop in Moti market in Leh, said, "People, especially elders in Ladakh, rely on the radio for news and information. For entertainment purpose, they have local folk media with its rich heritage of song and dance and television."

There are well established religious, social and political organisations in both districts that could easily run newspapers and thereby contribute to making this backward society aware of the political and social developments taking place in and around Ladakh. In April 2013, two organisations – Centre for Science and Environment (CSE), New Delhi and Ladakh Arts and Media Organisation (LAMO) – jointly conducted a two-day media workshop for journalists in Leh with special focus on reportage of local environmental issues. About 30 reporters from Leh and Kargil attended.

The time is ripe to make extensive use of alternative media channels such as local newspapers, community radio, and community television channels, apart from social media and online news magazines. Government support and cooperation is needed to help media organisations in Ladakh to bolster the efforts of the local people. The government should actively explore the possibility of starting community radio and even community television services to better integrate the people of this isolated Himalayan region with the mainstream developmental processes.

(The writer is assistant professor, Department of Convergent Journalism, Central University of Kashmir, Srinagar.)

Comment:

(*) **Lakh** är en indisk räkneenhet, och motsvarar 100 000 i det västerländska tiosystemet. Skrivs lakh i pluralis görs detta enligt följande mönster:

7 500 000 = 75 lakh → indisk stil: 75,00,000

Det går sedan 100 lakh på 1 crore.

(Thomas Nilsson)

Radio Korca och tolkningar av låten **Xhinxhile**

Ardit Gjebrea, född 7 juni 1963 i [Tirana](#), är en [albansk](#) sångare, låtskrivare, producent och programvärd.

Gjebrea har skapat många originella sånger med anknytning till Vlora, kuststaden i södra Albanien.

Dagens flicka är XHINXHILE och här har Gjebrea gjort en humoristisk version av en gammal folkvisa.

Det är ungarlens klagan: "Det går inte att vara ensam, kan jag inte få sova hos dig bara en natt!" Häftigt!

https://www.youtube.com/watch?v=Cl2cWIKMbM0&feature=player_detailpage

Men det finns en tidigare historia. 1978 gjordes en intressant film i Albanien, på Enver Hoxhas tid. Den tog upp ett tema från den italienska ockupationen, då italienarna försökte penetrera den albanska folkkulturen med sin propaganda. Klarinettisten Halit Berati kommer i fokus för motståndsrörelsen genom sitt virtuosa framförande av albansk folkmusik.

Jag undrar om inte detta var lika mycket en anklagelse mot den då rådande regimen, där premiärministern "Slaktaren" Mehmet Shehu hade uttalat: "Vi har tagit oss an folkkulturen, rensat den och ställt den i det socialistiska samhällets tjänst." Makten vill alltid behärska kulturen men människor strävar emot... Ett utdrag ur filmen, som märkligt nog också spelats i Sverige, du kan sedan höra mer skön albansk musik med klarinet...

[Xhixhile moj xhixhile \(Gjeneral Gramafoni\)](#)

Apportkastare - linkastare

Hej Alla på NORDX-listan.

Efter reportaget från NDLs lyssnarträff har jag fått flera förfrågningar om hjälpmedlet för antennn uppsättningar. Det är en s.k. APPORTKASTARE och används för att träna jakthundar. Det finns en mängd olika s.k. dummies att skjuta iväg som hunden skall apportera. I den här versionen knyter man fast ett snöre i dummyn och skjuter.

Det här är en makalös möjäng. Med lina går dummyn 70 rakt upp, Jag har mätt snöret, så det stämmer. Den fungerar alltid oavsett väder och får lätt plats i en väska. Nackdelen kan vara den höga smällen och att grannarna funderar vad man håller på med.

Alla som har slangbellor och tennisbollkanoner vet att svårigheten med antennn uppsättningar är att "dra" ned linan på andra sidan trädet. Det måste vara något tungt. De här projektilerna är precis så tunga att de fixar detta. Men, det behövs ett tunnt snöre, helst med en diameter på 0,5 mm eller mindre, vilka oftast finns hos pappersgrossister (Gogla "filmgarn").

Det här behövs:

Apportkastare (linkastare)

<http://www.teba.se/apportkastare-i-metall-med-delbart-axelstod-lucky-ii--p-3943-c-1031.aspx>

Dummie

<http://www.teba.se/pvc-dummy-till-apportkastare-rod-med-svans-langd-15-cm-bredd-75-cm-innerror-i-aluminium--p-7692-c-1044.aspx>

OBS. Detta är inte den dummy jag har. Fråga innan köp. Jag har modellen "3328 DDBF PVC dummy Röd t apportkastare med vajerögla".

Starka skott

<http://www.teba.se/starka-skott-roda-100-stfp-p-1684-c-1397.aspx>

Regöringsset med olja (bra att ha)

<http://www.teba.se/rengoringsset-smorjrengoringsmedel-hard-borste-torkpinnar-till-apportkastare--p-7935-c-1048.aspx>

Priserna har tyvärr höjts rejält pga dollarn. Har du för avsikt att beställa så ring gärna till TEBA och säg vad du vill ha så fixar de detta. Hänvisa till mig - jag måste vara ökad vid det här laget Dessutom ändras dummy-sortimentet allt eftersom.

Det här är den bästa och värsta antenmackapären jag haft. Ett måste för alla nördar.

Googla gärna på "apportkastare" eller "linkastare". Den engelska benämningen än "Dog Gun". Det finns flera mindre bra filmer på YouTube. Linkastare används i samband med sjöräddning.

(Lycka till, Lennart Deimert via NORDX)

Gefälschte Empfangsberichte (via Christoph Ratzer, A-DX)

Der nachfolgende Text den mein Hobbyfreund Timm Breyel aus Malaysia heute auf Facebook gepostet hat sollte man - auch wenn er in Englisch ist - unbedingt gelesen haben. Ein Grund warum ich KEINE Audiofiles mehr veröffentliche, auch wenn ich gerne so seltene Dinge wie die Aufnahme eines S9 Empfangs aus Bhutan teilen würde....

Plagiarism and fake radio reception reports? Yessiree. There are a few DXers out there who in the pursuit of a QSL have the gall to fabricate a reception report. The phenomenon, if it can be called that, is nothing new. It is as old as radio itself.

Why address the subject? Well, a few days back a fellow DXer and free-radio operator called it to my attention. He informed me of an individual who, apparently after reading my blog entry for his station, decided to pass off a reception report as his own. The station alerted me and promptly asked the guy to submit an audio file of the transmission. Guess what? He couldn't produce it.

Wait a minute! He could have sourced the Internet for an audio file and produced a sample, right? It does happen. I actually had one young man do just that. He submitted a file of WWV and CHU on frequencies for times normally not received in his quarter, yet he tried to pass it off as genuine. How did I know it was fake, aside from the obvious physics? The audio file -- stolen from a fellow radio listener -- still had the original Box or Soundcloud name attached to it.

Even with the advent of remote web-receivers some DXers attempt to pass off the remote RX location as their home RX location. A diligent station engineer/operator will immediately recognise this for what it is -- a bogus or less than accurate report. Why hide the obvious fact? There is no shame in stating the actual RX location, even if it is remotely observed. Simply keep one's home and remote QSLs in separate categories. Be honest.

Now, it is possible to submit a reception report to a station, honestly believing it is a particular broadcaster. The time, frequency and language of the broadcaster all seem to be the station. Unfortunately after either submitting a report or further listening, usually days later, one discovers the error. It happens. I have done it more than a few times myself over the decades. Yet, I will fess up and duly note my error.

Folks, honesty is more priceless than any QSL, however prized it may be. No DX contest for X number of stations, X number of countries is worth sacrificing one's integrity. Be patient and diligent in DXing. It's like fishing. It takes time, calculation and patience. And the results are far more rewarding when one knows it was a genuine catch.

Happy DXing!!!

Timm Breyel, Malaysia

(73 Christoph Ratzer via A-DX)
