

SHORTWAVE BULLETIN

Issue no. 1835, Oct 25, 2015.

Deadline e-mail next issue: 0800 UTC, Nov 8, 2015.

Well guys, it looks like I have to write this column in English as most of our contributors are from all other places than from the Nordic countries.

A few have asked me why I list the same station for each of the contributors. The answer is easy - it takes too long time to edit into one log. You see, cut and paste is very handy.

This time there is a picture of the "big" guys behind the SDR's and also some information about Equatorial Guinea and Andaman Islands. Those countries are quite unknown for most of us.

I also include the interesting story from Walt Salmaniv from his latest visit at Haida Gwai.

More interesting news - Ronny Forslund has started a new Facebook group covering the Swedish Radio History. I think some of you already have heard about a few of the old guys starting up the social movement called DX-ing. Just look at the picture from the Swedish Championship in SW listening from 1955.

Keep on

=====

QSL, kommentarer, mm.

Bjarke Vestesen: AOR AR7030+ 50 meter via flagstang ud til badebro i Svendborgsund, QTH: 55.029973, 10.669778.

<https://www.google.dk/maps/place/55%C2%B001'47.9%22N+10%C2%B040'11.2%22E/@5.0299668,10.6692269,182m/data=!3m2!1e3!4b1!4m2!3m1!1s0x0:0x0?hl=da>

Lennart Weirell: För tre helger sedan var jag i Väsby utanför Norrköping och lyssnade med NDL. Tyvärr missade jag förra stoppdatum, men jag bifogar en logg nedan ändå. Inkomna **QSL: SDXF via RRS (april) – 7440 k, SDXF via RRS (maj) – 7430 k, Misti R – 6295 e-mail.**

Dan Olsson: Så här mitt i natten skriver jag nu mitt bidrag. Blev ett par timmar försenad eftersom jag fick besöka akuten i Lund efter att i eftermiddag fått ett spik i huvudet när jag var uppe på vinden och jobbade. Det blev till att få en stelkramppsspruta och bli limmad i huvudet också. Tipsen denna gång kommer från en lyssnarnatt i Saxtorp. Lite **QSL** har ramlat in som jag redovisar nu: **6300 R Monique** e-brev och kort, **6850 Bandido R** med e-brev och kort, **6950 R Voyager** med e-brev och kort samt **6990 R Komintern** med e-brev och foto.

Ron Howard: Just back from a nice vacation to France and Istanbul.

*Ron, thanks for a very nice picture of the Eiffel-tower, hope you enjoyed your visit to Europe.
/ Thomas*

2325	Oct9	1909	VL8T, Tennant Creek, Territ. ^o do Norte, inglês, texto; 35331. (Carlos Gonçalves)
2485	Oct9	2101	VL8K, Katherine, Territ. ^o do Norte, inglês, canções; 25331. A emissão não seguia em paralelo c/ a VL8A 4835 ou a VL8T 2325. (Carlos Gonçalves)
2485	Oct3	1842	VL8K, ABC Katherine, Australia med ring-in px (LWV)
3260	Oct19	1140	NBC Madang, 1140 to off about 1218 (tuned away for a minute and missed the exact time). Reactivated after being silent since early this year; unusable at tune in; slowly improved; 1200 seemed usual news in English; open carrier on both 3275 (NBC Southern Highlands) and 3365 (NBC Milne Bay), so NBC Madang was the strongest NBC station, with some audio. Thanks very much to Hiroyuki Komatsubara (Japan) for the alert. It's nice to have three NBC stations on the air again at the same time! (Ron Howard, Asilomar State Beach, CA)
3320	Oct9	1807	SAUK/R.Sonder Grense, Meyerton, africânder, música pop', texto; 35332. A propagação alterou-se p/ melhor, e em 11/10, pelas 1815, o sinal registrado foi de 55444 ! (Carlos Gonçalves)
3324,88	Oct14	1425	RRI Palangkaraya heard frequently here. S3 signal. TN
3904,976	Oct14	-1503*	RRI Merauke with usual sign off, ID & "Love Ambon". TN
3904.982 -3904.985	Oct14		Footprint Pro 1 RRI Merauke, Indonesia, back on the air regularly since Sept 27. (wb, wwdxc BC-DX TopNews Oct 14)
3905	Oct18	-1500*	Pro 1 RRI Merauke. Program of pop hit songs in English ("Imagine" by John Lennon, "How Do I Live?" by LeAnn Rimes, etc.); program theme music by Kenny G (instrumental "Forever In Love") with announcer talking over it; off with ID and usual "Love Ambon" theme music, a few seconds before 1501; poor/ ham QRM; my local sunrise 1417 UT. PNG-NBC New Ireland (3905) was last reported by me on Jan 29, of this year, with no trace of it heard recently. https://app.box.com/s/52kzvqp7erb2kgjv0ope8zv6ggvp44by contains audio (poor quality) of sign off.
			Oct 20 - Found RRI Merauke on 3905 silent at 1157 and subsequent checks till 1315. Myanmar Radio on 7200.07, not heard at all at 1349 check. (Ron Howard, Asilomar State Beach, CA)
3905	Oct10	1820	R.Alice_HOL, holand./ingl., música pop', texto, saudações p/ a est. holandesa Carrier Wave e a italiana R.Arcadia; 45343. (Carlos Gonçalves)
3905			[and non-log]. Pro 1 RRI Merauke, on Oct 23, continues to be silent from 1146 and subsequent monitoring till 1404. (Ron Howard, Asilomar State Beach, CA)
3925	Oct14	-1501*	R Nikkei with sign off at 1500:49, quite weak. TN
3944,993	Oct14	1415	Unid weak carrier here after R Nikkei sign off at 1400. Any ideas? TN
3990.00	Oct13+	2300	Gannan PBS, Tianshui Tibetan fast talk by woman, 2310 short lively musical interlude, ann by man, woman continued talking // 5970 (AP-DNK)
4054.993	Oct20	0245	R Verdad, Chiquimula. Nice signal, "I Know Whom I Have Believed In" instrumental organ, Spanish ID. R Verdad has steadily been on this .993 offset for 3 days.[Jordan-TN]
4055	Oct11	0520	Radio Verdad, Chiquimula, religous comments, English, Spanish, identificacion: "Radio Verdad, Chiquimula, Guatemala, Centroamérica". 14321. (Méndez)
4055	Oct16	0155	R. Verdad, Chiquimala, spansk, religiøs snak, orgelmusik 32222 (BVx)
4055.00	Oct18	0420	R Verdad, San Esteban, Chiquimula, religious talk, best in LSB (AP-DNK)
4699.92	Oct20	*0900-	R San Miguel, Riberalta. on mid-song, slowly strengthening to 0940 peak, talk by man, mentions of Bolivia. Fair signal, but light modulation and noisy band made for poor reception.[Jordan-TN]
4746.94v	Oct20	*1021-	(p) R Huanta 2000, Huanta. presumed this signing on with just barely audible audio amidst ever present CODAR, almost an hour past Huanta 0928 sunrise. Transmitter variable +/- 10 Hz. [Jordan-TN]
4749.944	Oct14	1230	Footprint RRI Makassar, Sulawesi Selatan, S=5-6 signal on remote SDR unit at Nagoya / Tokyo Japan. Adjacent channel of CNR1 - stronger signal on 4749.993 kHz. (wb, wwdxc BC-DX TopNews Oct 14)
4750	Oct12	1538	Bangladesh Betar, Dhaka, reports in English till 1545, good (Bernardini)
4760	Oct11	2348	AIR Port Blair noted via Perseus site in C. Germany to past 0025, but fading fast as the gray line had passed Port Blair after 0000. Decent signals today with vocal/inst music, woman ann between songs. At 0025 there was a short anmt by woman and then a man ancr. From 0001.5-0007 there was a group singing with drum accompaniment - not a typical Hindi vocal but sounding more indigenous. SINPO was 33433 using a Beverage covering S. and SE Asia. A 2-20 MHz vertical at the same site gives similar results but with increased atmospheric noise. (Bruce Churchill via DXPlorer)

4760	Oct4	-1630*	AIR Leh with transmitter problem? For the last few days a rough carrier (without any audio) is noted on 4760 which goes at 1630 UT. It tallies with AIR Leh schedule. Yours sincerely, (Jose Jacob, VU2JOS, National Institute of Amateur Radio, Oct 4, Hyderabad, India, dx_india yg via DXLD)
4760	Oct19	-1625*	Trans World Radio still here but almost nothing can be heard due to the rough carrier shutting down at 1630. TN
4765.00	Oct24	0330	R Progreso, La Habana Spanish ann, Cuban jazz melody and songs. (AP-DNK)
4774.89	Oct20	*1014-	R Tarma, Tarma. Transmitter switched on at 0957, modulating starting at 1014 local music back to back. DJ at 1021 with TC and Tarma mention, back to music. Good despite ever present CODAR, slightly more tolerable in uECSS [Jordan-TN]
4775	Oct10	2112	R. Congonhas, Congonhas MG, missa; 25331. em 11/10, pelas 2045, difundiam um prgr. de futebol, e o SINPO foi substancialmente melhor. (Carlos Gonçalves)
4784.98	Oct20	*0944-	R Caiari, Pôrto Velho - RO. male announcer with dom dia and accurate TC, vocal, male and female talk. Fair signal at transmitter sunrise sign-on then fading after 1000. Every present CODAR [Jordan-TN]
4789.85	Oct10	1420	Comment from Mauno Ritola re log in SWB1834: > <i>On Oct 10 I noted an extremely weak carrier here on 4789.85 at 1420 on the Asian antenna direction.</i> (TN)

			I think it is something from Eastern Europe. Not visible in Japan, Australia or Qatar but in Moscow, here etc. (73, Mauno Ritola)
4790	Oct22	1300	BBCWS relay with timesignal ending one second late, into Uzbek. Grayline is about right: sunrise here in Enid *1245 UT, sunset in Dushanbe 1238* UT. CODAR QRM as always (Glenn Hauser, OK)
4800			[Non] Voice of China, Golmud was off the air Oct 13+14+15, maybe for maintenance (AP-DNK)
4800	Oct11	1713	AIR Hyderabad, música indiana, noticiário das 1730; 32441, QRM da CHN.
4800	Oct16	1715	All India Radio, Hydredab, indisk musik, ID og nyheder klokken 17.30 34333 (BVx)
4805	Oct10	2114	R. Dif. ^a do Amazonas, Manaus AM, relato de jogo de futebol entre o Vitória e um outro club não identificado, anúncios comerciais pelo meio; 44343, QRM de CODAR. (Carlos Gonçalves)
4809.98	Oct20	*0856-	R Logos, Chazuta. on with very tentative NA directly into Christian music. No announcements heard until 0910 when ID by male into lengthy announcements. More Christian music, from contemporary, traditional to rustic. Good despite ever present CODAR. [Jordan-TN]
4810			Radio Logos, Chazuta, Tarapoto, Peru, 2320 UT Oct16, SIO 242 Auch nicht sehr oft zu hören, derzeit leise mit peruanischer Volksmusik auf 4810 kHz. Radio Logos ist ein von HCJB unterstütztes Projekt. (73 Christoph Ratzter)
4810	Oct10	-1740*	AIR Bhopal, cf. 4800 Hyderabad; 45343. (Carlos Gonçalves)
4810	Oct11	*2305	AIR Bhopal. Sanskrit trad. "Mahalaya" recitation of hymns with chorus //4895 (AP-DNK)
4810	Oct12	1504	Voice of Armenia, Yerevan, reports, unid lang. fair/good (Bernardini)
4819.88	Oct12	1548	Birinchi Radio, Kirghizistan, strong QRM China (Bernardini)
4824.45	Oct20	*1050-	(p) LV de la Selva, Selva. presumed Selva here, VERY strong carrier with a very tiny amount of modulation in there, definitely not the OC I originally thought. Carrier overpowering ever present CODAR. [Jordan-TN]
4824.9	Oct9	2105	R. Canção Nova, Cachoeira Paulista SP, texto, música; 33331, QRM adj. de sinal de est. ponto a ponto. (Carlos Gonçalves)
4835	Oct9	1805	VL8A, Alice Springs, inglês, música pop', conversa; (Carlos Gonçalves)
4835	Oct12	1730	VL8A ABC Alice Springs, Australia, "good morning!", good (Bernardini)
4835	Oct3	1840	VL8A, ABC Alice Springs, Australia starkare än Katherine (LWV)
4835	Oct15	2050	VL8A Alice Springs, NT English report. No other Australian frequencies heard in the 120 or 60 mb 35232 (AP-DNK)
4835	Oct18	1540	AIR Gangtok weaker than VL8A. Sign off at 1600. TN
4844.99	Oct20	*0822-	R Daqui, Goiânia - GO. on with Brazilian pop music in progress, ballads, DJ with heavy echo mentioning Rádio Daqui at 0828. Fair in uECSS to avoid ever present CODAR. [Jordan-TN]
4845	Oct9	2103	R. Cultura do Amazonas, Manaus AM, canções; 35332. (Carlos Gonçalves)
4850			[non-log]. RE: DXLD 15-39: status of WE2XRH - Glenn noted "Bad news for the only broadcaster on 4850, AIR Kohima and its big fan Ron Howard, but has he noticed any QRDRM?" Since PBS Xinjiang (East Turkistan) left this frequency earlier this summer for their usual seasonal change, have not heard anything on 4850, except like today (Oct 19) covered by OTH radar (4840 though 4900, at 1243 & 1331), but this is only occasionally heard. As happens every year, I hope to hear AIR Kohima on Dec 1, with coverage of their major Hornbill Festival and also the anniversary celebration of Nagaland Legislative Assembly (Ron Howard, Asilomar State Beach, CA)

4869,91	Oct14	1430	RRI Wamena quite weak here. TN
4875.08	Oct20	*0905-	R Roraima, Boa Vista - RR. transmitter on at 0802 and running an OC until finally modulating at 0905 with Camargo & Luciano pop music in progress. Canned ID at 0908, more Camargo & Luciano into live Bom Dia talk by two DJ's with lot's of echo. Excellent signal. [Jordan-TN]
4875.1	Oct8	2125	R. Dif. ^a de Roraima, Boa Vista RR, chamadas de ouvintes, conversa; (Carlos Gonçalves)
4875.11	Oct12	2138	Radiodifusora Roraima, Boa Vista, Brazil, talks songs, weak/fair (Bernardini)
4875.11	Oct24	0335	R Dif. Roraima, Boa Vista, RR Portuguese ann, Brazilian songs (AP-DNK)
4880	Oct10	-1740*	AIR Lucknow, cf. 4800 Hyderabad; 35332. (Carlos Gonçalves)
4880	Oct10	1723	AIR, Lucknow, Hindi music, vernacular comments, at 1730 news in English. (Méndez)
4885.01	Oct20	0640	R Clube do Pará, Belém - PA. after being absent the past 24 hours, very pleased to hear this one back with a crash start at 0640 with programming in progress. Excellent in IECSS bypassing ever present CODAR, huge by Belém 0854 sunrise! [Jordan-TN]
4895	Oct12	1510	AIR Kurseong, India, reports, weak/fair (Bernardini)
4895.00	Oct11	2230	AIR Kurseong. Sanskrit traditional "Mahalaya" recitation of hymns with chorus // 9470 (AP-DNK)
4910	Oct10	-1740*	AIR Jaipur, cf. 4800 Hyderabad; 45343. (Carlos Gonçalves)
4910	Oct12	1514	AIR Jaipur, India, talks, weak/fair (Bernardini)
4915	Oct8	2127	R.Daqui, Goiânia GO, canções e propag. relig.; (Carlos Gonçalves)
4915.00	Oct24	0345	R Dif. Macapá, Macapá, AP (presumed). Portuguese ann, Brazilian songs (AP-DNK)
4920	Oct10	-1740*	AIR Chennai, cf. 4800 Hyderabad; (Carlos Gonçalves)
4920	Oct12	1517	AIR Chennai, India, talks QRM China (Bernardini)
4925.2	Oct9	2107	R. Educação Rural, Tefé AM, anúncios de programação, noticiário regional; 35332. (Carlos Gonçalves)
4925.22	Oct20	*0958-	R Educação Rural de Tefé, Tefé - AM. Sign-on with nice canned ID by man directly into "Jornal RCR" with female host. Excellent, slowly fading, slowly drifting down to 4925.2 by 1100. [Jordan-TN]
4939.95	Oct24	1500	Voice of Strait, China, music, English news from 1504. IDs. 24332 (SHN)
4940.00	Oct15	*2028-	VOA, Pinheira. EE ID twice: "This is the Voice of America, Washington DC signing on" and march, 2030 Hausa news and reports. The carrier came on at 2023 on 4940.05, but drifted down to 4940.00 before sign on (AP-DNK)
4950,02	Oct13	1430	AIR Srinagar quite weak signal here. TN
4954.98	Oct20	*1035-	R Cultural Amauta, Huanta. on with vocal in progress, male speaker at 1041 with ID over music as it ends into monologue that sounds Quecha. Signal slowly fading. [Jordan-TN]
4964.99	Oct20	*0856-	(p) R Alvorada, Parintins - AM. transmitter on 0851, modulation begins 0856. Nice carrier strength but weak modulation, peaking around 0926 Parintins sunrise. Definitely Brazilian, not enough modulation to ID. [Jordan-TN]
4965	Oct12	0958	Radio Alvorada de Parintins, ON, Parintins, Amazonas, Brazil. Passando um jornal OM e YL CX sobre o Governo do Amazonas e da liberação de creditos a pequenas empresas e pequenos produtores rurais simo 33333 o som está sendo recebido com média interferencia Atmosférica em minha região esses dias . https://www.youtube.com/watch?v=yQtv7VBtqSA (Daniel Wyllyans Nova Xavantina MT Brazil)
4965	Oct8	2130	R. Alvorada, Parintins AM, prgr. de canções; 35332. (Carlos Gonçalves)
4970	Oct17	1540	All India Radio Shillong, aus dem Osten Indiens ist heute gut zu hören, Sendeschluß gegen 1630 UT. (73 Christoph Ratzer)
4970	Oct12	1519	AIR Shillong, India, talks, weak (Bernardini)
4970	Oct21	1434	AIR Shillong. In English; program schedule & local IDs; Delhi produced "Sports News." Unfortunately the local Shillong studios normally produce a somewhat weak audio (low modulation). Is amazing to hear the difference between the local Shillong audio compared to the stronger audio provided from New Delhi. A very significant jump in the audio level when they picked up "Sports News" from Delhi, as noted in the following recording I made https://app.box.com/s/gk9gm7a4cud xp1pvhsey908jpqoeq8ok (Ron Howard, Asilomar State Beach, CA)
4985.49	Oct20	*1054-	R Voz Cristiana, Chilca. on with music followed by religious talk, sounds Quecha? Voz Cristiana ID at 1058. Poor, but not bad considering Chilca sunrise was 1038 UTC. [Jordan-TN]
5005	Oct11	1813	RNGE, Bata, canções tribais,..., música pop' afric.; 44343, QRM de sinal de est. ponto a ponto durante algum tempo, desde as 18h13. O fecho da emissão ocorreu entre as 2035 e as 2050. A RNGE saiu (finalmente) da toca ou isto é apenas uma amostra de curta duração ou não se tratasse de uma estação africana? (Carlos Gonçalves)
5005.00	Oct18	1726	Radio Bata for a few minutes, gone at 1730. 25443 (SHN) <i>Also noted here at the same time when shutting down abruptly in the middle of the music. Weak. Also noted on Oct 24 shutting off the signal at 1702:20. TN</i>

5005.02	Oct13-16	0500	Radio Bata signing on a little after 0500 usually with nonstop music, on Oct 16 three Radio Bata ID's heard, var. announcements in S, fades out after around 30 minutes. Up to 5005.05. 25432 (SHN)
5005+	Oct16	0540	JBA carrier, slightly on hi side. Checked after Stig Hartvig Nielsen's HCDX report from Denmark that R. Bata has been signing on around 0500, i.e. Oct 13 at tune in 0505 on 5005.02, and about the same time next mornings, 5005.05 on Oct 16. For him, it starts fading out around 0515 and is lost by 0545. So I must try closer to 0500 UT subsequently. Other recent reports of the reactivated Bata are as early as 0425, which would be propagationally better for all concerned, and on the low side, 5004.9. I see some spellings as Batá, but not so in atlases. Based on monitoring in the evenings, when SHN can't hear it, Arthur Miller in Wales says in Communication of the British DX Club that the 5005 station he heard Sept 24 was R. Malabo but after mentioning Bata, Malabo went off at 2058, and another weaker signal came on 5005 at 2102, leading him to suspect that both stations are sharing 5005. I also frequently check the old Malabo frequency, 6250, last heard in May 2011 per DSWCI DBS, in case it be reactivated.

			Oct 17 at 0459, I start monitoring with BFO for Bata to come on, as Stig Hartvig Nielsen reported yesterday. At 0504 there are three brief carrier cut-ons and off --- possibly RNGE trying and failing to keep the transmitter on. Still nothing till 0509 when I take a break until 0515 --- still nothing, nor at 0529, 0537 when I quit. Could also be their schedule on Saturdays is different. As the name implies, at 2 degrees north, sunrise time varies little, but as a matter of fact it was 0504 UT today in Bata; 0509 in Malabo which is almost 4 degrees north and further west. (Glenn Hauser, OK)

			I think it has been reported years ago that the Bata program also includes productions from Malabo. Who knows to which extent, or indeed if still at all, Bata and Malabo transmitters are programmed separately nowadays. Thus I would not jump to conclusions about a reactivated Malabo shortwave outlet using the current Bata frequency for the first time now, after five decades on 6250 kHz. Concerning the spelling: Could it be that Batá is the Spanish one and has officially been replaced by an Africanized one, in the same manner they eliminated the original name of Malabo altogether? And the whole broadcasting operation from Equatorial Guinea appears to have no web presence at present. rtvge.com fails to establish a server connection while rtvgeint.tv, where the website dedicated to their international TV service is supposed to be, greets its visitors with a friendly 403. (Kai Ludwig via DXLD)
5005+	Oct19	0459	5005+, Oct 19 at 0459 tune-in, JBA carrier is here from presumed RNGE Bata, after no such signal on Sat or Sun, Oct 17 or 18. It's very very slightly on the hi side, on the FRG-7 comparing BFO pitches with 6005 BBC-Ascension presumed to be 6005.000. This carrier is constant, but far too weak to detect any modulation; still there at 0538. Wolfgang Büschel agrees that it was back on air today and his fingerprint of +4 Hz off matches closely my observation: ``On Monday Oct 19 at 0502 UT tuned-in, RN Guinea Equatorial Bata was already ON AIR on 5005.004 kHz footprint, played a lot of African fast music, in southern Germany, Belgium and France not much strong signal this morning, at selected SDR options, span 12.5 kHz RBW 15.3 Hertz approx. signal strength of S=5 or -94dBm. GNE signal strength lowered more and more to fade-out around 0535 UT, best signal noted at transmission start at {varies} 0458-0500 UT. RN Equatorial Guinea Bata widely reported in Austrian A-DX newsgroup in past days, BUT IRREGULARLY time on air`` (Glenn Hauser, OK)
5010	Oct10	-1740*	AIR Thiruvananthapuram, cf. 4800 Hyderabad; 45444. (Carlos Gonçalves)
5010	Oct12	1535	AIR Thiruvananthapuram, India, English reports, good (Bernardini)
5010.4	Oct10	2112	R. Madagasikara, Ambohidrano, texto, presum. em malgaxe; 25341, sinal c/ portadora e BLI. (Carlos Gonçalves)
5010.405	Oct18	1926	Malagasy - der olle Siemens-Wien Sender, ex Radio Bremen, und SWR Rohrdorf hüpfte wie üblich 20 Hertz um die 5010.405 kHz footprint herum. (73 wb df5sx)
5010.925	Oct 12	0238	JBA carrier, suspect MADAGASCAR which is known to vary around here. The Cubans are not off-frequency from 5040 and 5025, so if they produced a leapfrog it would be close to 5010.0. (However, if 5025 and 5040 are really at different sites now, as in Aoki, Quivicán and Bauta, respectively, there could be no such transmitted mixture anyway.) (Glenn Hauser, OK)
5020	Oct17	*1900-	SIBC, Honiara. Sendebeginn heute um Punkt 1900 UT, diesmal mit der vom Chor gesungenen Nationalhymne. Das Signal noch immer schwach, aber schon etwas besser, teilweise bis S5, in ein paar Wochen wird das sicher noch besser. (73 Christoph Ratzer)
5020	Oct19	1157	Tune-in to JBA carrier in splash from 5025 Cuba, but enough to detect its cutoff time: 1158:35.5* as typical for SIBC (Glenn Hauser, OK)

5025.00	Oct24	0350	R Rebelde, Bauta. Spanish report from a sports event, reporter counting to 8, crowd shouting and blowing horn (AP-DNK)
5034.98	Oct20	*0951-	(p) R Aparacida. presumed the signal here, but too much QRM and too weak for details. [Jordan-TN]
5040.00	Oct24	0400	R Habana Cuba, Quivicán Spanish time check, ID, frequency ann, "Noticias" about Raul Castro receiving a guest from Palestine (AP-DNK)
5066	Oct10	1945	OID med FF. Det skulle kunna vara CANDIP men den har väl stängt vid denna tid? DO

6925	Oct12	2245	Radio Paisano. Excellent reception of this annual Columbus day pirate broadcast. Solid signal, S8 , with only slight QRM from ever-present Portuguese fishermen's net. Very entertaining, excellently politically incorrect, program of 1950-60's Italian novelty songs. Mainly from New Jersey's own Lou Monte. I received a QSL from "Luigi" in less than 10 hours. QSL has a picture of Columbus's fleet & was # 155. I mentioned to "Luigi" that I had lost a previous QSL in a computer crash. He was kind enough to forward a copy of that QSL from 2008. This was not expected, or requested . What a great operator and a pleasure to deal with. (Stephen C Wood via DXLD)
6985	Oct18	1330	QBC, Italian pirate, IDs, pop. 14332 (SHN)

Masset DXpedition 15 - 23 October 2015 Shortwave loggings

I'm back from another visit to my cottage on Haida Gwaii. Fourth visit this year, but the first that I was able to devote a lot of time to DX. I had fun erecting various antennas and testing them, and in some cases, taking back down. Conditions were OK for SW generally, and at times, very interesting for MW DX. I'll have a separate email for MW DX. Receivers used were 2 Perseus SDRs (one live, and the other using Mestor for timed recordings), and an AOR 7030+ receiver. Antennas used with most important first, as follows, along with comments:

1. NW BOG (Beverage on ground). 700' or so in length. Untermated. This is always my go-to antenna with excellent results. It's the first antenna up, and the last to be removed. DX RPA1 amp added at the antenna lead in, as well as chokes on both ends of the coax.
2. DKAZ aimed 220 deg. This was an impressive antenna after a few hiccups. Before local dawn, it was often as effective as the BOG. And only requiring 140' of real estate. Fed to a FLG 100 LN head, and via coax to the Wellbrook interface. Often the only antenna that would hear Hawaii well. This one's a keeper from now on. Not good for LW, however. The DKAZ performed very nicely on SW, in addition to MW.
3. ALA 100 LN antenna: double loop, separated by about 30 cm, as suggested by Andy Ilkin (Mr. Wellbrook). Aimed NE/SW. Normally an excellent all band antenna. This time around, it somehow did not perform as well as in previous DXpeditions. The only change was that I purposely separated the 2 loops to 30 cm, from around 10 cm (as recommended by Andy). The other possibility was of a coax fault, although the lead in is milspec RG 58 cable. Almost in no case, this time, was the ALA better than the others, even on SW. More investigation needs to be done as it's a very quick antenna to get up and running.
4. Mini Beverage aimed due north, terminated into the sand on the beach, and under water at high tide. About 500' long, so I call it a mini-Beverage. It is elevated about 12' or so. At times a great antenna. I was hoping for some European MW DX, but nothing ever came about. Often picked up Alaskans very well, and at times equal to the NW BOG for TP DX (like this morning). This is a permanent antenna, except for the beach portion.
4. Parallel BOG to the NW BOG. Fiddling with it, and feeding it into a Misek Phaser, for instance, did nothing at all. Didn't seem to enhance anything, so I moved it towards the SW.
5. SW BOG: about 600' and aimed about 230 deg. This path takes it directly across the land mass of Haida Gwaii (whereas the NW BOG aims to the direct open ocean). Overall, not a great performer, even with a DX-RPA1 amp.

Masset rainbow 22 October 2015, on our beach.

Once again, it could be due to a lossy coax, as it was quite a way to the shack, or the direction. I do recall in the past erected a similar BOG with much effort (with Bruce Portzer) and also being disappointed. Makes me attribute this to the land mass phenomenon. Not ideal for BOGs.

Here's the report for SW. As always, excuse the typos, or mistakes. Please let me know, and I'll correct them.

DXpedition to Masset, BC 15 – 23 October, 2015 SW loggings

3275 PAPUA NEW GUINEA Madang 10 kW/ND or 25 deg NBC Southern Highlands, Oct 21 1334 - Quite good reception this morning, talking in English about population control. Unfortunately, they pulled the plug in mid sentence just before 13:35. Measured on 3274.989. (Salmaniw, Masset, BC)

3325 INDONESIA Palangkaraya 10 kW/ND RRI Palangkaraya, Oct 21 1340 - A good morning for both PNG and Indonesia. Unfortunately, Palangkaraya suffers from splatter from North Korea 5 kHz down. Measured on 3324.891. Once again this morning, nothing on 3905 RRI Marauke, but 4870 was coming in very well, as was 4750. (Salmaniw, Masset, BC)

3365 PAPUA NEW GUINEA Alotau 10 kW/25 deg NBC Radio Milne Bay, Oct 21 1342 - A presumed logging, as it's a little weaker than was Southern Highlands. 3364.983 is the measured frequency. (Salmaniw, Masset, BC)

4055 GUATEMALA Chiquimula Radio Verdad, Oct 16 0259 - Quite good reception with a presumed National Anthem on measured 4054.992. Strong modulation. At 03:02, mentions of onda corta, etc, then into a Spanish religious broadcast just before 03:03. (Salmaniw, Masset, BC)

4750 BANGLADESH Shavar 100 kW/ND Bangladesh Betar (non), Oct 20 1421 - Two stations heard here this morning. One at excellent level, on 4749.946 and the other on 4749.996. The strongest on the former frequency has the BD flavour. The other is barely audible underneath. Normally, RRI Makassar is the strongest, so will have to monitor further to be sure who it is. Non-stop music. At 14:30, announcer took a phone call, so clearly not BD but Makassar. The cochannel(s) are more audible now, and I'm pretty sure there's the CNR 1 transmitter apparent as well as BD. As for RRI Marauke on 3905, not on the air when first checked at 13:30. (Salmaniw, Masset, BC)

4870 INDONESIA Wamena, Papua 0.3 kW ND RRI Wamena, Oct 20 1435 - 2 transmitters here: 4869.919 and 4869.999 causing quite a mess on AM. I suspect that Wamena is on the lower frequency and AIR on-channel. Aoki lists only 300 w for Wamena. Is that accurate? Sounds many times more powerful. The presumed AIR sounds like an OC. (Salmaniw, Masset, BC)

(Walt Salmani via DXLD & DXPlorer)

+ lots of additional loggings above 5 mHz, see DXLD or DXPlorer for a complete list /TN

Station news

ALBANIA. 7425, Oct 23 at 0156, weak S5 signal mostly open carrier, but enough very low modulation in Spanish to match it to 7365, i.e. Radio Martí, Greenville NC USA. I'm checking this carefully on behalf of R. Tirana, Albania, which was planning to use 7425 for English to North America at 0230-0300 UT Tue-Sat in B-15, now only a few days away.

The US 7425 signal is a result of intermodulation between the 7365 Greenville transmitter, and another one there on 7305 which I tuned first at 0154 to find an S9+40 level open carrier prior to Vatican Radio relay at 0200 --- but with a little bit of R. Martí Spanish modulation bleeding onto 7425! There should be a match on 7245.0 where I do also detect a just-

barely-audible carrier, but with LSB QRaM. The formula is 2B - A and 2A - B, or put more simply, leapfrogs 60 kHz above and below the two intentional frequencies 60 kHz apart.

Once Vatican is modulating on 7305, I check 7425 again at 0204 Oct 23: the signal and mixing modulation levels are still very low, but I can make a match with both 7305 Vatican and 7365 Martí.

GB plans to continue on these two frequencies in B-15, 7365 until 0400, and 7305 until 0245, which means the 7425 mix would interfere with half of the R. Tirana broadcast.

Therefore, R. Tirana needs to go to another frequency. 7465 is well-established for them on other transmissions, including in B-15 English at 2100-2130 Mon-Sat to Europe (and North America beyond), and 0000-0100 daily Albanian to North America. During the 0230-0300 period, 7465 is presently clear; however, extremely strong WRMI on 7455 can splash upon it, and some receivers may have trouble separating them.

Therefore I am recommending Tirana use 7470, which is also clear of any other interference as is adjacent 7475. Greece has not made any HFCC registrations, but if it should show up on 7475 this winter, it should concede or Tirana should go back to 7465. As for interference on the upper side, more weak Cuban pulse jamming is around 7480, above which there is also splatter from 7490v WBCQ; and at 0258 there is weak RTTY on 7477.9 (Glenn Hauser, OK, DX LISTENING DIGEST)

PERU 3397 3.7.93 0247. Radio Internacional, San Pablo, Cajamarca. Lähetin asemalle fupin vuonna 2003 ja sain 29.7.2014 eli vuosi sitten Facebookissa kaverikutun ja viestin, että tosi kiva kun olet kuunnellut meitä. No, mitään viittausta aseman nimeen ei ollut, joten kysäisin sitä kohteliaasti, ja tänään 8.10.2015 tuli vastaus, että Radio Internacional San Pablohan se asemamme on. Ei hyvää kusillia kannata häätemällä pilata. JMS (Jim Solatia)

I noticed this entry in latest DXCL. As Google can't figure out some of the words I asked Mauno Ritola to translate into understandable English. Here is his translation:

I sent a f/up to the station in 2003 and on 29.7.2014 I got a friend request in Facebook and a message, that it's been nice, that you have listened to us. Well, there was no hint about the name of the station in the message, so I asked politely and today 8.10.2014 came the reply, that our station is of course R. Internacional San Pablo. No way to spoil a good QSL by too much hurry.

(73, Mauno Ritola)

Mauno, thanks a lot for the translation, now it make sense! /Thomas

TAJIKISTAN 4790 * BBC in Uzbek from Dushanbe, Yangi Yul 1300-1330, marked with * asterix in Aoki Nagoya list, - I guess - likely jammed by western China mainland in Kashgar? This 4790 kHz TJK transmission IS NOT registration requested in ITU / HFCC lists A-15 or B-15, maybe is a VEILED target service towards Kashgar western China area?

In winter B-15 season on shortwave relays:

13865 1300-1330 30S,40NE SLA 250kW 10deg -25 211 Uzb OMA BBC BAB

15510 1300-1330 30S,40NE NAK 250 325 25 211 Uzb THA BBC BAB

17780 1300-1330 30S,40NE SLA 250 10 0 146 Uzb OMA BBC BAB

(wb)

U S A. 15555-USB, Oct 23 at *1402:20, WJHR Milton FL pops on the air with music already playing (seems it's always 2+ minutes late), sign-on with contact addresses, but missed whether George Scott Mock now announces 15555 instead of 15550. Then playing theme music `Rock of Ages` and joining deceased John Hill offensive preaching in progress. The station exists only as a memorial to him.

This replaces 15550-USB, noticed by Walt Salmani yesterday and before that ``last week`` by Paul Walker, as now on the ``wrong`` frequency. Sheryl Paszkiewicz, Wisconsin, tells me she had it on 15555 USB, already Oct 15 at 2144.

Axually, it's the *right* frequency, where they should have moved long ago to avoid conflict at 1500-1630 with Vatican transmitting Radios Tamazuj and Dabanga, which is to continue in B-15. Maybe they finally noticed my log reports about this collision? And HFCC B-15 does show WJHR on 15555 instead of 15550, so it's just a head-start. Wolfgang Büschel found that they had already requested 15555 from FCC as of August 12, before the Brisbane HFCC B-15 conference.

15555 should encounter no direct collisions in B-15 unless Voice of Tibet via Tajikistan, and consequent CNR1 jamming happen to land around there. Current Aoki shows *15557 at 1230-1235 only, but you never know where they will go next, and at later hours. DW, RFI and Radio Biafra will be on 15560 during the 16-20 UT span amid the WJHR span of 1402-2202 UT. So from 1600 to 1627 at least, WJHR will be squeezed from both sides.

WJHR started on 15550 circa Xmas 2009y; it remains quite an anomaly, USB and no carrier (which delayed my zeroing in on it at sign-on), and obviously a weak transmitter, but claimed to be 50 kW, which maybe they attain only in terms of PEP, and thus supposedly comply with FCC requirements; azimuth 5 degrees, pretend-target CIRAF 4 only = Ontario, Quebec and northward (Glenn Hauser, OK, DX LISTENING DIGEST)

Other radio news

New PLC Standard announced Southgate, October 23, 2015

The new standard for Power Line Communications (PLC) using frequencies above 30 MHz has now been completed. PLC devices can cause severe pollution of the precious radio spectrum

CENELEC Committee TC210 WG 11 has completed the standard for in-house PLC devices which operate above 30 MHz. The first standard in the family - the now in-force EN 50561-1 - covers the frequency range up to 30 MHz and was debated heavily amongst radio users. It does safeguard the broadcast, amateur and aeronautical frequencies, but spoils the rest of the spectrum for local use. The reason for that is the fairly high emission limit of 110 dB μ V.

The now positive voted EN 50561-3 covers measurement setup and limits for frequencies above 30 MHz, while devices which also operate on the low band (which is the usual case) still need to comply with EN 50561-1 or show compliance via an alternative route. A fairly low emission limit value between 85 and 80 dB μ V (depending on frequency) was set in EN 50561-3, and additionally the amateur bands (50 - 52 MHz and 70.0 - 70.5 MHz) were notched down to 55 dB μ V. This coming standard will again help to stabilize the situation of PLC coexistence and at least to keep the amateur spectrum clean.

Source: IARU Region 1 <http://iaru-r1.org/>

The EN 50561-3 standard is mentioned on the Interference website at
<http://interference.org.uk/forum/showthread.php?tid=342>

(Mike Terry via DXLD)

Svensk DX-historia (Ny Facebook grupp)

Detta är en grupp för alla DX-are och radioentusiaster som är intresserade av radiohistoria och då främst den svenska DX-ingens historia. Välkommen att dela DX-relaterade bilder, QSL, radiominnen och annat trevligt. Sprid gruppen till kompisar som du tror kan vara intresserade.

Den svenska DX-historien kommer att presenteras i bokform genom DX-boken som ges ut av Sveriges DX-Förbund www.sdx.se. Boken beräknas finnas ute hösten 2015.

DX-ing (distanslyssning) var en gång i det närmaste en folkrörelse i vårt land

och ingenstans i världen fanns så många DX-are som i Sverige. Det är vår förhoppning att vi alla ska kunna hjälpa åt att hålla minnet av en mycket trevlig radiohobby vid liv - och kanske uppmuntra några inaktiva för detta DX-are att damma av sin gamla mottagare och köra igång igen. Fortfarande finns mycket trevligt att lyssna på....

This group is aimed at all DX-ers and radio enthusiasts interested in the history of radio and especially the history of ing. You are welcome to share DX-realtd pictures, QSLs, memories and so on. Please invite friends who you think might be interested.

The history of Swedish DX-ing will be presented in a book, the DX book, released by the Swedish DX Federation www.sdx.se. It will be in Swedish but depending on interest an English bversion may also be made. The plan is to present the book in late 2015.

DX-ing (long distance reception) used to be a very popular hobby in Sweden and nowhere else were there so many DX-

ers. It is our hope that we together will be able to keep the memory of a very nice hobby alive - and maybe even inspire some old DX-ers to take up the hobby again. There are still lots of stations to listen to out there....

Equatorial Guinea Travel Guide

(Population: 722,254 (2014)).

Perhaps best known as the inspiration for Frederick Forsyth's coup-laden thriller *The Dogs of War*, the political situation of hot and humid Equatorial Guinea leaves a lot to be desired. Corruption, human rights abuses and political violence are frequently recorded, and despite huge oil wealth little has trickled down to the people, where real poverty still exists.

This means the country, which occupies a slice of mainland Africa and five offshore islands, is not set up with tourism in mind. Travel can be hard and hotel rooms both limited in number and expensive compared to neighbouring states. However, Equatorial Guinea offers a rare opportunity to experience central Africa's colonial history and unspoiled natural beauty.

Large areas of Rio Muni, mainland Equatorial Guinea, have been set aside as protected zones. Noted internationally for their biodiversity and hiking opportunities, the country's rainforests are the habitat of various endangered primates including mandrills, chimpanzees and gorillas, as well as forest elephants.

The capital, Malabo, lacks the frenetic energy of some cities on the continent, with nothing happening very fast. Its tranquillity and the laidback air of its people perhaps results from lying on the steamy island of Bioko. Its atmospheric sides streets are the best place in the country to encounter the architectural splendours left by Spain's colonial regime.

Outside the capital, Bioko Island is also the location of the crater lakes of Lago Loreto and Lago Biao. Idyllic spots for relaxation, even the least interested birdwatcher will suddenly become the most ardent ornithologist: the sheer diversity of avian wildlife is staggering.

Its natural wonders and hospitable inhabitants should have put Equatorial Guinea on the map years ago, but a reputation for political instability means this remains an untapped mine for now.

In Equatorial Guinea, a mix of beautiful scenery and rich vegetation promises travelers a variety of enticing attractions. It's rare that a feel of the African tropics, volcanic landscapes, relaxing coastal escapes, and Spanish colonial towns can all be enjoyed in one destination. Tourists generally start in the big cities like Bata and Malabo where they can find contemporary comforts and explore the culture at the markets and try local cuisine before venturing out to the surrounding areas where the wilderness awaits. Getting around may be a bit challenging but enjoyable for the adventurous, whether by bicycle, four-wheel drive vehicle or public transportation.

Top tourist attractions in Equatorial Guinea

Bata

Located with 236 km from Malabo on the island of Rio Muni and along a coastal road there are beautiful white sand beaches surrounding Bata City. Is a really pretty city, with beautiful spanish colonial buildings.

Arena Blanca

Arena is located within 40 km from Malabo City. Arena Blanca is the only white beach on Bioko Island. During the dry season thousands of butterflies can be seen.

Bioko Island

Bioko Island is one of the most beautiful and biologically-significant places in all of Africa situated within 40 km from Malabo and 32 km off the coast of Cameroo. It is home to Africa's greatest concentration of endangered primates and to more than fifty unique species of plants. During the dry season butterflies gather in the rainforest and endangered marine turtles come ashore to nest on the black sand beaches.

Moca

Moca is situated in the Moca valley in the southern highlands on the island of Bioko in Equatorial Guinea. Moca Valley is home to plenty of natural attractions including Lake Biao, Lake Loreta and the famous Cascades of Moca which house different species of monkeys.

Monte Alen National Park

Monte Alen is located within 288 km from Malabo and it is a protected area of tropical rainforests spanning covering 1,400 sq km. The Park offers a variety of opportunities like; trekking, hiking and wildlife viewing. The forests in the park are home to many species of animals including crocodiles, elephants, chimpanzees, gorillas and jungle trails.

Pico Basile

Pico Basile is highest mountain on the island of Bioko standing at 3,000 m. it is the summit of the largest and highest of three overlapping basaltic shield volcanoes which form the island.

Kongou Falls

Kongou Fall is a massive cataract about 4 km wide located in Ivindo National Park. It is part of the Ivindo River and has a total height of 56 meters. It is the 928th biggest waterfall in the World.

It is known to be the most beautiful waterfall in Central Africa.

River Benito

Benito is a river in Equatorial Guinea situated within 259 km from Malabo. It divides the country roughly along the middle, running east to west. Only this 20 km portion of the river is navigable and the river is used to float logs for forestry operations.

Cellular Jail Andaman – A Major Tourist Attraction For Everyone

The Cellular Jail, also known as Kālā Pānī (Black Water), was a colonial prison situated in the Andaman and Nicobar Islands, India. The prison was used by the British especially to exile political prisoners to the remote archipelago. Many notable dissidents such as Batukeshwar Dutt and Veer Savarkar, among others, were imprisoned here during the struggle for India's independence. Today, the complex serves as a national memorial monument.

... Signal plot from Simon Browns SDR Data File Analyser. Thanks Nils Schiffhauer.

Hello from France ! What happens when there are several stations on the same frequency, within a few Hz ? Is it possible to “track” a specific one ? Thanks, and have a nice week-end. /Patrick

Yes, you can “track” it. You search at the Waterfall picture in high resolution (100 Hz), than you see where the wanted transmitter is, click it, and than use at the signal plot left the arrows to walk in 1 (!) Hz steps up or down. If you are some Hz away from the carrier, the signal line is gone...

Saturday Night Group of SDRs Enthusiasts

During the last week-end, close to the city of Bolzano - Italy it took place the 17th edition of the Radio & Communications Meeting.

As it usually happens since the first editions the meeting is the occasion for passionate guys to share their developments and interests in a really friendly and informal way.

I met Alberto, I2PHD, for the first time right in one of the first editions. It was maybe in 2002 or so, when someone of us already were playing with our SDR related toys and, along years, the group of players grew and became larger. Here is a nice picture of this edition taken Saturday evening:

From left to right: Alberto (I2PHD), Leif (SM5BSZ), Aygun (HDSDR), Günter (FMList) and me.

Thanks to all the participants for having been here. I liked to be with all of you really much.
(73s, Nico / IV3NWV via Perseus_SDR)

I couldn't resist sharing this picture with you. The persons you see here know everything about SDR technology and are very active in the Yahoo groups. /Thomas

Signalanalyse für Dummies

"Der Titel könnte auch heißen „Wie finde ich heraus, was ich gerade empfange?“. Ich will hier ein paar grundlegende Arbeitsweisen im Zusammenhang mit dem Funkempfang erklären und so Anfängern den Einstieg erleichtern. Ein wenig Vorwissen sollte man schon mitbringen, also wo befindet sich so grob welcher Knopf in meiner SDR-Software und was ist eine Modulationsart etc." <https://www.hamspirit.de/2286/signalanalyse-fuer-dummies/>

"Longwave Broadcasting Retains Listeners" Radio World, October 10, 2015

Interesting article by James Careless: <http://www.radioworld.com/article/longwave-broadcasting-retains-listeners-1277274> (Mike Terry via DXLD)

NEW HISTORY MATERIAL AT <<http://www.ontheshortwaves.com>>

Byrd Expedition-II. On page 2 of the South Pole Radio News, which we posted last time under "DX History/QSLs & Other Station Memorabilia," there is an offer for a large map of the Second Byrd Antarctic Expedition, free for the asking with two Grape-Nuts box tops. This time, also under "DX History/QSLs & Other Station Memorabilia," we are posting a copy of this good-looking map, together with accompanying cover letter and the mailing envelope. Zoom in for the detail. -- And in this week's "Wavescan," under "Specialized Resources," Adrian Peterson takes us to an island that is very much in the news right now. Read "The Radio Scene on a French Island in the Indian Ocean (Debris from the Missing Malaysian Airliner!)," Wavescan N345, October 4, 2015 .

HFCC B-15 schedules

The HFCC B-15 schedules have been posted at <http://www.hfcc.org/data/b15/> Lots of info to digest. Particularly interested if BBCWS has made any further SW reductions due to budget issues.

Play-DX Philatelic, An Albanian radio stamp

One of Europe's most interesting countries is undoubtedly Albania. From a historical point of view it has a lot to offer. Much remains from early civilisations.

For centuries Albania was part of the Ottoman Empire which explains why Islam is the major religion in the country. But there are also Catholics and Orthodox Christians.

Two Albanians have achieved worldwide fame. One is the Albanian national hero Skanderbeg and the other is Mother Theresa of Calcutta.

Albania became an independent state in 1912 but the first years were far from easy. The idea was for Albania to be a monarchy with a German prince as king.

The Prince of Wied arrived in the country in 1914 but before he could be crowned Albanian patriots forced him to leave the country. However, Albania became a kingdom in the 1920s when President Ahmed Zogu crowned himself as king in 1928. All this and much more is mirrored in Albanian philately.

On 28 November 1938 Radio Tirana went on the air for the first time. Later on the station in the capital was followed by a number of small regional stations some of which operated on shortwave. Older readers probably remember Radio Küsesi on 6666 kHz. In the 1970s this was one of this columnist's favourite stations.

Today broadcasting in Albania is basically limited to the FM band (and the Internet). Radio Tirana, the foreign service, still uses medium-wave and shortwave to reach its listeners in Europe and North America.

Strangely enough the Albanian Post Office has issued very few stamps devoted to radio broadcasting. Fortunately there are some exceptions.

In 1978 Albania released a 25q stamp spotlighting the country's mass media. The stamp shows daily newspapers, radio and television. Here we find antennas and radio and TV receivers. The newspapers can be identified and include titles like Zeri e Popullit which was the organ of Albania's Labour Party during the country's socialist period.

Those who listen to Radio Tirana Today will hear press reviews quoting papers like Panorama and Shqip.

The stamp discussed here has a low catalogue value but as it is part of a set it might be rather difficult to get hold of it.
