

# SHORTWAVE BULLETIN

Issue no. 1904, July 15, 2018.

Deadline e-mail next issue: 0800 UTC, Aug 12, 2018.

## Stopdate for next SWB is Aug 12.

An almost sensational entry on the tropical band is Radio la Voz de Pueblo on 4920.8. Our friend Pedro F. Arrunátegui was the first to hear the station and it was at first not possible identify the station but he could get the location in Peru. But after a few days listening Pedro managed to also get the name R la Voz de Pueblo. A few have already logged this station.

There is more information in the section "Station News".

To the right you can find some comments from Carlos Goncalves where he asks you to be careful with the languages.

I also have some additional comments regarding the way some of you write logs.

I assume the same comments are valid also for the logs in other bulletins.

Congrats to France for winning the breathless six goal thriller.

Hope you all will enjoy the coming holiday season.

Keep on ....

## QSL, kommentarer, mm.

Lennart Weirell: Ett QSL att rapportera: **R Pandora** - 6264 k stc, 12 v.

**Carlos Goncalves:** My (repeated) mistake: 5840, World Music R\_DNK, Due to lack of information, I have several times indicated this station as a "pirate station" whereas this is a \*legal\* Danish station, owned by Stig Hartvig Nielsen. Needless to say he's entitled to my apologies request.

-----  
And now for strange details so to speak:

*By Tomas Burian, CZE: 9650, R.Guinée, Conakry-Sonfonia, F, ID vuzekute R.Guinee journal.*

--- what's "vuzekute" ? "Vous écoutez" would be appropriate.

-----  
*By Manuel Méndez, E: 11735, Radio Transmundial, Santa María, news, "Estas foran as principais noticias aqui na Trans-mundial", "5 horas 1 minuto en Brasilia", "Esta e a Radio Transmundial, transmitindo de Santa Maria, Rio Grande do Sul, Brasil..."*

--- This is what it should read, \*not\* Castilian-polluted sentences which onlymislead other readers: Rádio Transmundial, Santa Maria, ..., estas foram as principais notícias; aqui na Transmundial, 5 horas, 1 minuto em Brasília, Esta é a Rádio Transmundial, transmitindo de Santa Maria, ... ---

I fail to understand why on earth non-speakers insist in writing such rpts.

Good DX and regards, Carlos.

-----00000-----

**Some additional comments from your editor regarding the log entries. See this merely as a wish-list to simplify the job of editing as all of you use different formats.**

- Use a space after . or , (point or comma)

- No need to enter 4920,**0** or 4920,**00** if a station is spot on nominal frequency, use the simple **4920**. Decimals are only needed if the station is out of nominal frequency.

- You don't need to specify language for stations who always use their native language, like Portuguese for Brazilians or Spanish for most other Latin Americans.

## THE GOOD OLD DAYS OF MW DXING

Occasionally we talk of the "good old days" of mediumwave DXing, usually referring to back in the 1960s and earlier. Was it better? By how much? I tabulated the difference between what was on the band in 1941 and 2018. Too much info to paste into a post here. Check it out on my blog:

3260	Jul9	1108	NBC Madang ("Maus Blong Garamut" - voice of indigenous drums). Nice to hear the full ID for "NBC Madang, Maus Blong Garamut." July 11, from 1156 till cut off at 1219*; on the air slightly longer than normal (Ron Howard, Asilomar State Beach, CA, USA)
3219.89	Jul11	1117	// 3920, KCBS Pyongyang. Music program; clearly //, but 3920 is not on the air daily, whereas 3219.89 is regularly heard. (Ron Howard, Asilomar State Beach, CA)
3310	Jul7	2230	Radio Mosoj Chaski, Cotapachi, Quechua, comments. (Méndez)
3325	Jul6	1215	Voice of Indonesia, via RRI Palangkaraya, back to normal operation after yesterday's 1215+ carrier only signal; today started around 1100 (mixing with NBC Bougainville); at 1300, was fairly readable in English, as NBC was gone by then; the usual "9-5-2-5 kilohertz" intro. At 1301, the VOI news (interesting item about Argentine Ambassador to Indonesia expressed his appreciation for the launch of Broadcast Program Exchange with Radio Republik Indonesia today. According to him, radio is one medium that is relied upon by the people of Argentina in obtaining information. He said "Radio was an important tool in the past, but radio may still be the strongest communication tool in my country. Radio programs spread in Argentina. Everyone listens to radio, in the car, while working, you hear people's comments." To date, four countries have signed cooperation agreements with RRI regarding the sharing of information/programs, namely Russia, Thailand, Brunei and Malaysia); followed by "Today's Commentary." At 1314, "Today in History" (July 6, 1975, the Comoros Islands, off coast of Africa, declared independence; this date in 1998, the Hong Kong Kai Tak airport closed, and this date 2007, the IOC approved the creation of a youth version of the Olympic Games). Very enjoyable to again hear the VOI in English with decent reception! (Ron Howard, Asilomar State Beach, CA, USA)

4920.7	Jul9	0112	JBA carrier. Awaiting further confirmation from the South Americans that this be the new `*RADIO INTERNACIONAL "ECOS DEL ALBA" / OAZ9A / 4920 khz (60 metros)*` as claimed on the website <a href="http://www.dawnbible.com/es/anuncios.htm">http://www.dawnbible.com/es/anuncios.htm</a> Nothing new seems to have been added to previously quoted <a href="https://dxbrazilsw.blogspot.com/2018/07/reportagem-unid-4920-khz-suspeito-peru.html?m=1">https://dxbrazilsw.blogspot.com/2018/07/reportagem-unid-4920-khz-suspeito-peru.html?m=1</a> (Glenn Hauser, OK)
4920.761	Jul7	0122	0122 past 0201, JBA carrier also vs storm noise, less than 4925 Brasil. I am checking out the unID/new Peruvian reported by Daniel Wyllyans as `4920`, in HCDX: `4920 kHz UNID (Banda Tropical) Passando música andina e salsa. No inicio do vídeo a mulher fala "Salsa" às 0144 UT, 04 de Julho 2018/ Esperei até hoje 05 Julho ficando na escuta porém não houve nenhuma ID, somente tocando músicas. Fiz um rápido estudo da banda tropical em 4920 kHz. Houve no passado a Radio Quito (Equador), Radio Caracas YVKKR (Venezuela) e Radio RICA (Radio Informaciones de Centro America), (Nicarágua). Chequei o streaming de áudio ao vivo dessas emissoras e nenhuma não deu o mesmo resultado. Como tocam muita Salsa a suspeita vai para Colômbia. Talvez um pirata? Mas quem teria um transmissor de alta potência? Porque aqui cobriu a PBS Xizang em boa parte dos horários. Cuba também tem salsa más acho que esse transmissor está em algum lugar dos Andes (América do sul). <a href="https://youtu.be/bLGBKjduTu8">https://youtu.be/bLGBKjduTu8</a> Daniel Wyllyans, , Nova Xavantina, MT, Brasil
			----- This station observed here in New Zealand since 0410 UTC tune in today (7 July) on 4920.78 kHz with non-stop Latin American vocals - have recorded it for analysis but no evident identifications heard as yet. Good clear signal past 0635 UTC. (Bryan Clark Mangawhai, Northland, NZ. via WOR/DXLD) (See more info in Station news section /TN)
4920.8	Jul11	0540	Radio La Voz del Pueblo, Santiago de Chuco (Thank you to Pedro Arrunátegui for identifying this station), at first only carrier detected, but later songs can be heard. Extremely weak, barely audible. Also 0445-0540, Jul12, very weak, but between about 0510-0525 very good propagation and the station heard clearly with very nice program of non stop peruvian songs, later signal inaudible. (Méndez)
4920.8	Jul14	0411	(OAZ9A??) hrd from 0411 from NZ Radio DX Club KiwiSDR in Bay of Islands - non-stop Huayno music vocals from 0411 tune to past 0530. Started at SINPO 25332 but after 0500, significant improvement to SINPO 35333 as the gray line approached NZ. By 0520, one of the strongest signals on the 60 mb, surpassing R Clube do Para on 4885 and almost rivaling R Rebelde on 5025. Five min audio recording here with vy nice signal into NZ: <a href="https://goo.gl/oRZp6v">https://goo.gl/oRZp6v</a> . (Bruce Churchill via WOR)
4920.83	Jul12	0315	<b>R La Voz del Pueblo</b> , Santiago de Chuco, La Libertad (p) Spanish talk heard from this station (n 4910) - extremely weak. (AP-DNK) ----- The new Peruvian station heard on 4920.83 kHz is NOT the religious Ecos del Alba, but Radio La Voz del Pueblo, scheduled on 4910 kHz. This information was sent out yesterday by Peruvian DX-er Pedro Arrunátegui with his recordings of the ID. Today he also sent me their official page at <a href="https://www.facebook.com/Radio-La-Voz-Del-Pueblo-Santiago-De-Chuco-137302053483702/">https://www.facebook.com/Radio-La-Voz-Del-Pueblo-Santiago-De-Chuco-137302053483702/</a> (AP-DNK)

Thanks very much to Amano-san for his generous, on-going assistance with the new VOF schedule (now 1406*, ex: 1506*) and some of their new programs, as provided via the "Now On The Radio" website. 1140 - "Aneun geos-i him-ida" program ("Knowing is power") - my audio <a href="http://goo.gl/RBvxFD">http://goo.gl/RBvxFD</a> 1200 - "Haengboghan Daehanmingug" program ("Happy Republic of Korea"); Ex: 1100-1150. My audio at <a href="http://goo.gl/1Tyu5F">http://goo.gl/1Tyu5F</a> 1250 - "Namnam Bugnyeo-e haengbog mandam geug" program ("South man and North woman's happy comic theater"). My audio at <a href="http://goo.gl/v5n2oY">http://goo.gl/v5n2oY</a> 1300 - New program; name to be determined. My audio at <a href="http://goo.gl/HszPrv">http://goo.gl/HszPrv</a>

1400-1406\* (Ex: 1506\*) - Full ID and "Yaga Pen Songun, Mail Sevyeok 0 (Yo-ung) Shiats 5 (Tassot) Shikaji" ("Nighttime broadcasting is from 0 o'clock [1500 UT] to 5 o'clock [2000 UT] early in the morning every day") and "Cho Young Panson Nun, Off 6 (Yosoku) Ship 11 (Yolan) Shikaji Panson Gemnida" ("Evening broadcasting will be broadcast from 6 pm [0900 UT] to 11 o'clock [1400 UT])")  
Station's singing jingle - "jinsil-e soli, huimang-e soli, jayu-e soli bangsong!" ("Voice of truth, Voice of hope, Voice of Freedom broadcasting"); ending with the very nice song "aleumdaun nala" (Beautiful Country). My audio of closing format, with the full song, at <http://goo.gl/v64jv7>  
July 9 (Monday), surprised to hear non-stop easy-listening songs 0901-0954+, which was probably the "Bugnyeok-e ttuiuneun eum-ag pyeonji" program ("A letter of music sent to the north"); 1100 - "Hanminjog tong-illo milaelo" program.  
July 11 (Wednesday), at 0959, with the end of "Bugnyeok-e ttuiuneun eum-ag pyeonji" (?) program; 1000, the "Bodo gwangjang" program ("News plaza"); 1020 probably the new program called something like "Han Min Jok Yokusagi" (?) (needs confirmation); 1040 new program (positive name not confirmed yet); 1100 "Hanminjog tong-illo milaelo" program (Ron Howard, Asilomar State Beach, CA, USA)

11726			11726, 11699 The play-by-play announcer mentioned Uruguay at one point, so I guess it's the match between Uruguay and France. I must have caught the header goal at 1457. There seemed to be a quick station ID at 1511 but I couldn't copy. Pretty distorted. Ha!! Looks like France just scored again. I just heard another "GOALLLL" at 1519 and the beginning of "La Marseillaise" played. Now at 1522 thought I heard mention of "Radio Globo", but not sure. OK, it looks like this is R. In east-central Botswana near the Zimbabwe border, S-P is the sixth largest city in Botswana, somewhat SSE of Francistown (still named that?) which was once known as a radio site. Moeping Hill is *much* harder to locate, as it may just be a real hill rather than a populated place. All the few Google search hits on ""moeping hill" botswana`` lead to DX reports about it! including my own, and Bill Whitacre`s 909 kHz logs from Maine (at IBB, he surely knows exactly where it is). I assume the Botswana relay was not originally set up to serve the Mideast, but why not, if there is a convenient antenna, and an hour to spare on some transmitter? HFCC shows it`s 100 kW at 10 degrees. That angle misses Kurdistanish Iraq and Iran, rather thru Israel, Lebanon, Syria into Kurdistanish Turkey. E.g. distance to Diyarbakir is 6.8 megameters or over 4.2 kilomiles, overland (Glenn Hauser, OK)

## Station news

### El Chasqui DX Julio 2018

**4920.8 PERÚ, R. La Voz del Pueblo**, Santiago de Chuco, La libertad 1140-1340 UTC 33333 mx variada.. ID "Radio la Voz del Pueblo, transmitiendo en la banda de 60 metros en los 4910..." Indican como se encuentran en el dial, junto a Norandina, (el locutor explica como encontrarlos en el día de un radio). (Escuchar grabación) dicen que su QTH es Poemas Humanos 650 Altos San José.. El nombre de la calle se debe capaz a que en esa ciudad nació el poeta Cesar Vallejos, incluso en algunas canciones que ellos ponen, citan a este poeta.

Desde el 4 de Julio, en diferentes días y horarios, he venido tratando de escuchar esta estación con sus problemas iniciales de operatividad, el s/on lo efectuaban inicialmente a la 1800 UTC (1 de la tarde como indican en su grabación, después su s/off lo fueron variando inicialmente a las 0300, 0330 UTC hasta hace dos días que lo están efectuando a las 0400 UTC, siempre cortando la mx sin indicación alguna.

Hoy trate de ver si salían al aire en la mañana, de un momento a otro a las 1200 UTC, salieron al aire y en un px que por primera vez lo escucho, dicen su ID. (Después de varias oportunidad en que solo transmitían mx variada sin ninguna indicación)

Por la mx variada que ponen y un comercial de un corrida de toros, no creo que sea una estación con fines bíblicos.. tal como aparece en la hoja de propaganda. Cabe indicar que en las varias escuchas efectuadas no han pasado ningún mensaje y/o px bíblico.

Parece ser la estación 4910 OAW2H según el WRTH 2018 pag. 318, ellos no pueden salir al aire si no cuentan con el permiso previo a MTC.. Bueno tiempo al tiempo y sabremos más de ellos.

Con este reporte doy término a mi tiempo sabático sobre nuestro DX, nuevamente estaré participando en el sideral mundo de nuestro DXLA.

Agradezco a Henrik Klemetz y Tore Vik sobre las diferentes comunicaciones y soporte sobre esta estación para lograr su ID, al fin lo logramos....

Estoy usando un antena de hilo largo de 20 metros acompañado del Elad ASA-42 y RSP1A

Señores: Radio la Voz del Pueblo tiene facebook

<https://www.facebook.com/Radio-La-Voz-Del-Pueblo-Santiago-De-Chuco-137302053483702/>

tnx Taka

(Saludos, Pedro F. Arrunátegui) (& Henrik Klemetz for additional info)

Thanks a lot for this extensive report and nice to see another Latin American on the tropical bands. /TN

## Comments from Henrik Klemetz with translation to Swedish based on the first reports from Brasil:

Reportagem UNID 4920 kHz Suspeito (Peru)

Hoje 05 de junho fiquei na escuta na maior parte de 10 UTC se 14 UTC Novamente não houve identificação o sinal é bem forte inclusive 11 da manhã em meu QTH.As 11 da manhã somente estava chegando em ondas tropicais de 60 metros as emisoras Brasileiras e Peruanas sinal fraco. Já está decidido as músicas são Peruanas mesmo tendo a salsa.Mencionado pelo dexista do Chile Claudio Galaz.O segundo motivo que me foi enviando uma foto pelo dexista Argentino Marcos Rodriguez que torna o Peru mais suspeito ainda...

*Tips oid 4920 kHz misstänkt (Peru)*

*Idag 5 juni lyssnade jag större dele mellan 10 och 14 utc. Som tidigare ingen id, signalen är hyfsat stark även kl 11 utc i mitt QTH. Kl 11 på morgonen var det bara brassar och peruaner som hördes med svaga signaler. Det är klart att musiken är peruansk även salsa-musiken. Rapporterad av chilenske DXaren Claudio Galaz. Anledning nr 2 är ett foto från den argentiniske dxare Marcos Rodríguez som gör att jag misstänker Peru ännu mer. Kolla länken: .....*

\*RADIO INTERNACIONAL "ECOS DEL ALBA" / OAZ 9A4,920 khz (60 metros)\* Mesmo sendo uma emissora gospel eles podem sim tocar músicas de bom gosto Peruana.Enviei um email na esperança de confirmarem se é a mesma emissora Peruana.

*Radio Interacional Ecos del Alba (alba betyder gryning, min anm.( OAZ9A 4920. Även om det är en gospel-station kan den spela peruansk popmusik. Jag skickade ett email i hopp om att få bekräftat att det är samma peruanska station.*

Marcos, aquella música es popular. En el norte de Chile suele escucharse por los migrantes peruanos, razón por la que ubico el genero.

*Marcos, det är popmusik. I norra Chile hör man den hos peruanska invandrare.*

Sí lo sé y todo vale para ir filtrando. Los hermanos de Brasil al Sur comparten con nosotros el Chamamé.

*Det vet jag och det duger för att komma närmare sakens kärna. Brazilianernas grannar i söder (=argentinarna!) delar chamamé (musikrytmen) med oss.*

## Comments from Glenn Hauser, DXLD:

It's on FB, with a number of logo grafix dating back to May - June 2017, mentioning 4910 kHz --- of course, no one ever heard them on that frequency, or 4920+ until recently.

I retype the florid content of the grafix:

``Radio la Voz del Pueblo

Al pie del majestuoso Quilla Hirca, al frente del rebelde Huacapongo y la hospitalaria Chiminiga, desde el histórico Pichi Paccha, como un rayo de luz, nace radio LA VOZ DEL PUEBLO, el mensajero andino de la voz telúrica de los chucos y sus ondas vuelan por los cielos del mundo como el condor milenario llegando la antorcha del mensaje chuco a los pueblos. Escúchelo en el punto exacto [sic] de su dial 4910 kh.

Radio LA VOZ DEL PUEBLO, siempre en tu corazon, con la mejor programación: música variada, noticias, entrevis-

tas, todo lo que quieras escuchar y difundir.

¡PROPICIAMOS LA LIBERTAD, LA INTEGRACION Y LA VERDAD!

Radio La Voz del Pueblo, tu radio, pone a tu disposición la hora del folclor santiaguino. Disfruta de tu música, de tus sonidos que hacen historia...`

Now the question is, whether they are +0.761 kHz off-frequency, or really believe they are on announced 4910, and thus +10.761 kHz off??

Besides the rare discovery of a brand-new SW station, we`re glad to learn that this has led Pedro to end his almost 2-year ``sabbatical`` away from DXing! (Glenn Hauser, OK, DX LISTENING DIGEST)

#### **AUSTRALIA. 5055 4KZ.**

Hi Glenn,

Sent off an inquiry to Al Kirton (general manager of Radio 4KZ). Appreciate his response received on June 30, at 0212 UT: "5055 has been on the air every day. Due to seasonal conditions, we are only running 5055 between 6 am [2000 UT] and 8 pm [1000 UT] local time. Our target area is 1000 km around Innisfail [Queensland - Ron]. The signal dies sharply in this region before 7pm [0900 UT].

**Our times will vary with the seasons."**

Innisfail sunrise now at 6:47 AM AEST (2047 UT) and sunset at 5:52 PM AEST (0752 UT).

Back on June 4 & 6, I reported former sign off time for 4KZ, at 1353\* UT (11:53 PM AEST).

**AUSTRALIA.** [WOR] China's growing radio presence in the Pacific?

Pacific: Recently, the DX Listening Digest documented some articles concerning "China Radio International grabbing up Radio Australia frequencies". As short wave listeners, we know "the rest of the story". Kai Ludwig already made the necessary comments, but wondered about the situation on FM.

If you leave out New Zealand and the islands under Australian, British, French, New Zealand and US control, you get 13 island states. Looking at the World Radio TV Handbook 2018, you find many program relays (BBC, R. Australia, RNZ Pacific), which might be only partially documented in the WRTH 2018. So one can only compare the specially designated 24-h-FM-relays of the competitors. The result looks like this:

Cook Islands: R. Australia

Fiji: BBC World Service, R. Australia, R. France Internationale

Kiribati: BBC, R. Australia

Papua New Guinea: BBC, R. Australia

Samoa: China Radio International, R. Australia Solomon Islands: R. Australia

Tonga: CRI, R. Australia

Vanuatu: BBC, CRI, R. Australia, R. France Internationale It is difficult to research the TV situation and other media, but at least regarding the FM presence, Radio Australia is still a clear leader (Dr Hansjoerg Biener, 2 July 2018, DX LISTENING DIGEST)

**BRAZIL.** July 13 at 0543-0554 UT, I survey the mostly JBA carriers from overnight stations, some with a bit of audio, to measure them precisely, as to be a Brazilian SW station, you \*must\* be off-frequency:

11934.938, R. Evangelizar

11855.825, R. Aparecida

9818.834, R. Nove de Julho

9725.359, R. Evangelizar

9664.408, R. Voz Missionária

9630.552, R. Aparecida

9564.960, Super R. Deus é Amor [vs over-run Cuban jamming]

#### **KOREA. Echo of Hope - Voice of Hope (VOH)**

June 22 - Interesting happenings with Echo of Hope - Voice of Hope (VOH). At 1105 UT, noted 4885 was off the air; very unusual for them to be off; while all the other VOH frequencies were jammed by N. Korea (3985, 5995, 6250, 6350, and also 9100). Hiroyuki Komatsubara (Japan), at 0918, also found 4885 silent. Rechecking at 1148, I heard 4885 back on the air with their usual good signal and as is normally the case with no jamming at all.

4885 (not jammed) // 9100 (jammed), had singing station jingle at 1157, along with chimes and full ID in Korean; 1200 with "Onule Soshi" (Today's News), but then very surprised to hear the **jamming on 9100 ended at 1200**, becoming as good as 4885.

My 4885 kHz. audio, 1157+ UT (singing station jingle, chimes & ID) at <http://goo.gl/an4gjA>

My 9100 kHz. audio at 1159+ UT (jammed and clear ending of it with the news), at <http://goo.gl/jSJ16M>

**BOLIVIA, 6134.8, Radio Santa Cruz**, Santa Cruz de la Sierra is on air again, but with distorted signal. Heard here in Reinante, 2329-2340, 22-06, . Spanish, comments, very weak, distorted and with interference from Aparecida. 12321.

June 20 and 21 I heard it via SDR Kiwi Paraguay and Pardihno, Sao Paulo, 6134.88 kHz, at 1015 UTC with Bolivian songs, comments in Spanish and identifications "Radio Santa Cruz", but very distorted signal. Aparecida out of air at that moment.

I contacted again with the station to inform them about the distorted signal and here the reply:

*"Estimado Manuel:*

*Continuamos con algunos problemas en la OC, el equipo técnico está trabajando en mejorar las condiciones.*

*Muchas gracias por el seguimiento y agradecemos poder estar en permanente contacto.*

*Un fuerte abrazo"*

They say they continue with some problems on short wave, and the the technicians are working to improving the conditions of the transmitter.

Brukar snoka på COLLINS Hammarlund Hallicrafters modifikationer samt presentationer i gamla Amatör tidningar speciellt CQ Magazine 73 Magazine samt QST om jag har inloggning på och då kan jag hämta artiklar i PDF format på ARRL hemsida. På denna sida hittar man också ett sk Cumulativt register för tidningen NCJ=National contest journal Jag brukar använda det registret när jag snokar på antenn artiklar som det finns en hel del av i den tidningen.

Har bifogat en fil att kolla i, se <http://www.arrl.org/index-1973-2003>

Man gör så HÄR:

Kopiera ur registret den artikel benämning man vill kolla upp.

Även en hopplöst inaktiv fd DX-are kan hitta något som kanske kan vara av intresse? Det rör sig om ett nytt tyskt frimärke med motiv av en världsradiomottagare. Passande nog har det en valör på EUR 3,45 som är lämpligt för porto till utlandet. :-)
