

# SHORTWAVE BULLETIN

Issue no. 1921, April 7, 2019.

Deadline e-mail next issue: 0800 UTC, April 21, 2019.

For those who want to attend the annual convention in Jönköping – it's high time now to sign up.

The creator of the fantastic MW software Jaguar will attend on Saturday. He will talk about future development and is keen to know what the MW DX-ers will prioritize.

In this issue as usual there is an extensive log. But we are also able to show some nice verifications and old QSL's.

Looking at old QSL's are highly valued by most of our readers.

Most of the stations today verify by mail or via Facebook/Messenger and a beautiful verification is not high on their list.

As I have said before, I need more input from you members to be able to create a more interesting bulletin. If you have something to tell don't hesitate to send me a mail.

Keep on ....

## QSL, comments, etc.

**Bernt-Ivan Holmberg.** Fick något så ovanligt som ett kortvågs QSL för några dagar sedan, brasse dessutom! Lyckades på 80-90 talet aldrig att få svar från **R Clude do Pará - 4885**, men nu i moderna tider så har man skaffat sig en QSL Manager vid namn Daniel Wyllyans [danielnx18@gmail.com](mailto:danielnx18@gmail.com) som svarar fint med png-QSL se bifogad bildfil.

## Sveriges DX-klubbar och -förbund

**Efter en längre paus**, på grund av sjukdom, har jag på nytt så smått börjat intressera mig för min lista över DX-klubbarna i Sverige. Listan upptar för tillfället 424 klubbar och förbund. Tyvärr finns det på listan flera klubbar för vilka jag inte har kunnat fastställa under vilka år de varit verksamma. För några har jag inte ens uppgift om hemorten. Och naturligtvis garanterar jag inte att listan inte innehåller fel. För den intresserade, och naturligtvis också för andra, så finns listan på <http://www.surfnet.fi/~tosso/dx/sk.htm> Behöver jag tillägga att jag naturligtvis är tacksam över att få kompletteringar och rättelser? (Torsten Söderström via Svensk DX-Historia)

**Manuel Méndez. Radio Kahuzi, Bukaku, 6210.2 kHz**, sent email reception report 23-02 to the station email address. Received snail mail letter with QSL card, stickers, brochures with the station history, schedule, in 38 days. Letter sent from the Florida address of Radio Kahuzi. Email: [radiokahuzi@sbcglobal.net](mailto:radiokahuzi@sbcglobal.net) P. O. Box 110173, Bradenton, FL 34211, USA.

**Radio Azteca: 6925/U, 2204-2205:40\***, March 31;

| 4885   | Apr4  | 2340   | Radio Clube do Pará, Belém, PA fair to good signal with music and comment by om in PT. (Wilkner)   |
| 4885   | Apr5  |        | This morning (April 5) two stations from Brazil heard on 4885kHz – Acreana and Bandeirantes. Yesterday Acreana was off, only Bandeirantes active, probably relayed by Clube do Pará? At the moment this is the most active frequency in otherwise almost empty band. Something very very weak on 4775 kHz here in the middle of Europe – probably Congonhas. (Karel Honzik via HCDX )  |
| -----  |       |        |  |
| Yes, it is almost a frightening feeling to tune into 60 mb these days. Now at 0900 via Brazilian remote receivers 4885 kHz is // the stream <a href="https://radiosaovivo.net/clube-belem/">https://radiosaovivo.net/clube-belem/</a> and announcing Rádio Clube do Pará. So what is going on at night and which Bandeirantes? (73, Mauno Ritola via HCDX) |       |        |  |
| 4885   | Apr4  | 1835   | R.Echo Of Hope (cland.), Nowon-gu. Kor to KRE, tks, pops. 45343 (CG)   |
| 4905   | Apr3  | 1735   | Xizang PBS, Lhasa, Tibet. Ann, local music // 4920 ( QRM Chennai) (AP-DNK)   |
| 4910   | Mar30 | 1725   | AIR, Jaipur, Hindi music, at 1730 English news. (Méndez)   |
| 4920   | Mar30 | 1726   | AIR, Chennai, at 1730 English news. Strong QRM from China on the same fq. (Méndez)   |
| 4949.732   | Apr1  | 0132   | JBA carrier, presumed RNA on signature off-frequency - checked just as I am mentioning on 9395 during WOR that Ron Howard had found them missing. Also an even weaker carrier close to 4950.0, likely AIR Srinagar, Kashmir --- neither in HFCC but in Aoki/NDXC (Glenn Hauser, OK)  |
| 4949.75  | Apr2  | 0405   | Radio Nacional de Angola, Mulenvos, Portuguese and other songs. (Méndez)   |

| 5950   | Apr1  | 1701   | Voice of Tigray Revolution, Addis Ababa, Vernacular, comments. (Méndez)  |
| 5985   | Apr3  | 1208   | Myanmar Radio. Live coverage (TV audio feed), in vernacular, of the football/soccer match between Myanmar and Nepal (Olympic games qualification for Asian women); 1225 music provided for half time break, till match resumed; mostly fair (Ron Howard, Asilomar State Beach, CA, USA)  |
| 5995.0v  | Apr1  | 0550   | R. Mali is already on with song of lament in French, S9 and best heard yet. 0556 apparent switch to IS repeating; 0557 military-band NA, sign-on in French I copy partially vs distractions, including ``Ici l'Office de Radiodiffusion Télévision du Mali, émettant de Bamako,`` and decades-outdated frequency list including 4783 and another on 60m! And 92 MHz FM (four-score and twelve). With BFO, frequency wavers very slightly. By 0602 is in non-French, probably Bambara. Anker Petersen, Denmark, has reported this on 5995.02, such as March 25 at 2120, but again I think his measurement is way off. Please calibrate (Glenn Hauser, OK) |

| 6015   | Mar25 | 0327   | ZBC (Dole). Abrupt sign-on (mid-chat in Swahili), short 'live' speech around 0345, more chat, possible ads @ 0355 & nice long drum bridge to TOH pips. (Sheedy)  |
| 6030   | Apr1  | 1657   | Radio Oromiya, Addis Ababa, Vernacular, comments.. (Méndez)  |
| 6035   | Apr5  | -1120* | BBS. Pop songs till transmitter off. The good news is that the recent jamming spur heard here from 6045, has ended, as National Unity Radio has moved away from 6045, taking the N. Korea jamming with them (Ron Howard, Asilomar State Beach, CA, USA)  |
| 6050   | Apr2  | 0227   | HCJB, Pichincha, Quechua, comments. (Méndez)   |

| They have a much more limited schedule than what the web page shows due to power availability in the Bukavu region and it's all after 1200 UTC. Not sure of actual start time but they go to about roughly 1800 UTC (it has gone past 1800 UTC on a couple of occasions but lately seems more like 1745 UTC or so). The sign off occurs with a Country & Western tune, very out of character with the usual Central African highlife music played during some programming. Here is a link to a recording I made from a KiwiSDR in SW England on Jan 2 this year (starting at 1655):<br><a href="https://goo.gl/UetgZN">https://goo.gl/UetgZN</a> . I also have one from a KiwiSDR in Iceland on 29 Jan but this is the best one to hear their programming style. (Bruce Churchill via WOR) |       |        |  |

## Station news

**AUSTRALIA.** Sad news coming out of Australia. Craig Allen, the owner and operator of Ozy Radio (4835 kHz.) has passed away.

From Craig's Facebook page, posted by Grant Allen: "To our friends and family. It is with a heavy heart to let you know that our brother Craig Allen passed away on Thursday afternoon [March 28]. We will let you know details of the funeral once it is confirmed." (Ron Howard, California)

**CANADA. 2749-USB,** April 2 at 0637 UT, unusual to hear anything in the nightmiddle, but marine weather info in French with English accent; millibars and direxions mentioned, also Matane several times which is a Québec city on the Gaspé coast NE of Rimouski. Stops at 0639\* and nothing now on 2598-USB either. I cannot find a 2019 schedule on the Canadian Coast Guard site, just 2018: <http://www.ccg-gcc.gc.ca/Marine-Communications/RAMN-2018/Part2#21> which does not show any station ending around 0640 UT; and it has never been clear to me whether these stations stay on UT or make DST shifts! CCG 2018 sked does show VCO Sydney NS \*starting at 0740 UT via Port Caledonia site, English only, which would now be \*0640 if DST be observed. Nor does this version: <http://dxinfocentre.com/mb.htm#O%20ATL>. Bill Hepburn replies already to an advance copy of the above:

*Hi Glenn, That could've just been an unscheduled broadcast with a marine warning or an amended forecast. Unscheduled broadcasts are not that uncommon. I've heard lots of them over the years. They also interrupt the VHF continuous marine broadcasts.*

*From the RAMN: "MCTS Centres broadcast marine safety information through continuous, scheduled and unscheduled broadcasts to provide mariners with information such as weather bulletins, ice information, and notices to shipping (NOTSHIP) concerning the operational status of navigational aids and dangers to navigation."*

*BTW, broadcast times noted in UT remain on UT regardless of ST/DT status. The RAMN's are now updated on an ongoing basis - so it's always the latest issue. You can check the amendment dates on the Amendment Register on page i. The "year" changes in April, the official annual issue time.*

*My guess is that you heard Escoumins Coast Guard Radio broadcasting from its site on Grindstone Island, QC. Regards, Bill Hepburn`.* (Glenn Hauser, OK, DX LISTENING DIGEST)

**EUROPE.** Dear friends!

We have been now been on with our 8-10 watts Beacon transmitter from Europe for a week. This coming night will be the last one with this power in a time. From tomorrow we will reduce the power to 1 watt making it a more challenge to catch it. So try it ;-)

The 8-10 watts CW Beacon transmitter has been heard in the east coast of th USA, as well as in the southern part of South America. Lets see what a 1 watt can do :-)

The frequency is 6342 kHz CW. Sched. is: 19.00 to at least 08UTC, sometimes even later. If you are in doubt, you can check it at our website [www.radiopirana.com](http://www.radiopirana.com) where we will have a sign of, if it is ON or OFF.

This coming week we will also sending out replies for reports for our broadcasts from South America. Most have already received a preliminary answer from us, but this week a more complete reply.

**JAPAN. NHK** will continue to broadcast on AM, April 06, 2019

Full article here: <https://www.japantimes.co.jp/news/2019/03/28/national/japanese-broadcasters-call-end-mandatory-radio-due-cost-lack-listeners/>

---

According to March 27 edition of Sankei Shimbun and April 4 edition of Tokyo Shimbun, Japan Commercial Broadcasting Association (JBA) required the following main items at the meeting of experts in Ministry of Internal Affairs and Communications (MIT) held on March 27.

- 1) System modification before 2028 to enable AM broadcasters to convert FM by their own judgment,
- 2) Permission before 2023 to enable AM broadcasters to stop AM broadcasting experimentally for a long period.

It is said MIT fears China will occupy and dominate the vacant AM(MW) band.

The president of NHK, Ryoichi Ueda, said at the press conference on April 4, NHK will continue to broadcast on AM, because, by the Japanese broadcasting law, NHK is under the obligation to completely cover the whole territory of Japan.

According to JBA, there are 207 members in April 2018. Among them 15 MW, 1 SW, 32 AM+TV broadcasters.

## Other radio news

**The book "Shortwave and earthquake in Armenia (1988)." In Russian.** George Chliyants (UY5XE).

Read, download the book "Shortwave and Earthquake in Armenia (1988)" in PDF format - <https://deltaclub.org.ua/images/Leninakan-knigaWEB.pdf>

Dedicated to the 30th anniversary of the tragedy.

Dear friends!

You have in your hands - an attempt to collect together the materials preserved in history about this terrible tragedy - the strongest earthquake in Armenia, which occurred on December 7, 1988.

This book is built in the form of chronology - both general earthquake data and reflecting the main points of the role of shortwave in works - both on radio communications during rescue operations and on providing radio communications for earthquake zones with many regions of the country. Also included are the memories of the direct participants in these works and about the corresponding awards they received.

Found the place and the publication of scans from some of the "Logs" of shortwave coordinators and publications in the media of those years, as well as the history of the creation of the USSR PAC and subsequent stories of the creation of the Russian PAC and Ukraine. For quite natural reasons, the stated material cannot claim the right of absolute historical truth, but the author conscientiously processed the materials available to him. Successfully the book is done or not - to judge you!

I would be grateful for your feedback and critical comments.

## Kev-Flex Stealth Kevlar Antenna Wire: an incredibly durable wire for field radio

My good friend [David Cripe \(NMOS\)](#) has recently informed me about a new product he's offering to the radio community via [his eBay store](#): **Kev-Flex Stealth Kevlar Antenna Wire**. It looks like a superb option for field antennas of all stripes especially since it has such an incredibly high tensile strength. It's available in 75' bundles, but he can also cut custom lengths. NMOS is a trusted retailer in the ham radio world.

Here's the product description and link:

<https://www.ebay.com/itm/254172905818> :

Kev-Flex is a unique antenna wire manufactured exclusively for NMOS Electronics. The lightweight center core of the wire is made from Kevlar

fiber, giving the wire its incredible strength. The Kevlar core is wrapped with six tinned strands of 30 AWG copper. The effective surface of the wire creates an effective skin area capable of handling well over 100W.

The cable is protected from the elements by a coating of UV-resistant black polyethylene. With a total diameter of only 1/16" (incl. insulation) and a weight of just 16 feet per ounce, the tensile strength 125 lbs allows lengthy unsupported horizontal runs. Kev-Flex is ideal for extremely long LW-antennas and Beverages and is great for balloon or kite-supported antennas. Its low weight and high break-load makes it most suitable for SOTA activations and other field operations.

The outer insulation makes the wire kink-resistant, and its slippery finish makes it ideal for stealth antennas that must be passed through trees or other obstacles without snagging.

This antenna wire is sold in 75 foot long bundles, which is enough for a 40M dipole or EFHW. Two 75 foot bundles would make a great 80M dipole. Custom lengths are available on request.

### **Specification**

- Kevlar fiber core wrapped with six 30 AWG copper strands
- Weather-proof black polyethylene (PE) insulation, 1/16" O.D.
- Weight: 16 feet per ounce
- Breaking-load: 125 lbs
- Velocity factor 0.97

### **[WOR] Ascension Island**

A good article on current operations at the Ascension relay station: <https://www.radioworld.com/columns-and-views/managing-sw-broadcasts-from-ascension-island>

It confirms that there are six active transmitters: two of the 1966 Marconis (originally there were four) and four RIZs (installed in 2009 says <https://www.swcountry.be/g.html>). This means that the two Marconis moved to Ascension from Daventry in 1988 are no longer active.

And as today is the 37th anniversary of the start of the South Atlantic Conflict, here's my look (from 2017) of what was going on at Ascension in 1982: "The Requisitioning of Sender 302" <https://radioatlanticodelsur.blogspot.com/2017/12/the-requisitioning-of-sender-302.html>

### **QSL CARDS FROM THE PAST by: W8JYZ**

The legacy of "Old Time" Ham Radio Operators can be found in the QSL Cards they left behind. This Website is dedicated to those Old Time Radio Operators.

I have a Collection of Old (US and Canadian) Ham Radio QSL Cards dating from the early 1920s.

A complete list of Old QSL Cards now totaling 53 THOUSAND can be accessed by clicking on the [Master File](#) Links below. Over 22 Hundred Online Scans of Old QSL Cards are also available by clicking on the required Scan Link.

Improvements and updates will continue to be made, as the Collection grows and I learn more about this WEB PAGE DESIGN "stuff", so check back often.

## DX nostalgia

A letter to TL from Radio France Asie in French Indo-China. The station was active from 1950 to 1956 broadcasting from Saigon. The enclosed programme schedule for December 1955 tells of features like Indochina Letter, Gypsy Music, Letter From Paris, Cinema Organ and so on.

QSL from Radiodifusora Venezuela received by Tore Larsson TL in 1962. According to the QSL the transmitters were home made in 1932. The station used to be very common on 4890 kHz.

QSL from Ondas del Lago in Maracaibo, Zulia, Venezuela sent to TL in 1963. The station was quite regular on SW. It also ran a television network for a brief time in 1957 before giving up the project.

Yes, you have seen this card before and many of you have it in your own collection. Radio Globo used to be one of the most common signals from Brazil in the SW bands. Sadly it turned into a non-verifier over the years. TL received this QSL in 1956.

Finally another QSL from the collection of Tore Larsson: Radio Mundo 740 kHz in Maracaibo, Venezuela. Received in 1964.

Ronny, thanks for sharing those rare verifications with us. /TN
