

SHORTWAVE BULLETIN

Issue no. 1945, Mar 8, 2020.

Deadline e-mail next issue: 0800 UTC, Mar 22 2020.

Too sad to hear that one of the oldtimers has passed away. Carl Gustav Köhler was one of the members of ARC/SWB in the eighties and was one who attended many DX expeditions to the north.

Many of us are now so called oldtimers and we are soon in the dangerous zone.

I have a wish for the future log

Those of you using many abbreviations – please write plain text instead.

Please also note that it is unnecessary to specify language if it is the only language used by the station.

Like for instance Portuguese for Brazilian stations. It is important to tell if a station uses several languages.

In such cases I will remove that part.

The log items will be extremely difficult to read and understand if a lot of abbreviations are used.

If we can avoid this it will benefit all our readers.

Keep on

QSL, comments, etc.

Carl Gustav Köhler in memoriam

Har den tråkiga nyheten att meddela att Carl Gustav Köhler har avlidit i sitt hem i Uppsala.

Efter att ha uteblivit från några läkarbesök gick min mamma in i hans lägenhet genom handräckning av polis.

De hittade då CG död i sitt sovrum. Han skulle fylla 75 år dagen efter, så detta var den 30/1.

CG och jag lärde känna varandra 1982 då vi var några DXare som träffades i Uppsala. Senare hade en lyssnarnatt i en studentstuga (december 1982) arrangerat av Anders Franzén. Vi började sedan umgång regelbundet och var bl a aktiva tillsammans i Eter Aktuellt, DX-Köp och i SDXF styrelse.

Vi åkte på många DX-expeditioner tillsammans och hade många olika QTH vi testade runt om i Uppland. På 80-talet körde vi ganska mycket bil-DX. På 90-talet hade vi stuga i Tierp som vi sedan bytte ut mot Öbo, Möklinta.

Det var under en av dessa bil-DX aktiviteter som CG pajade sin vrist som gjorde att han fick steloperera hela vristen (tidigare foten). Detta var på det som idag är bostadsområdet Sävja i Uppsala.

När lyssningen inte gav mycket spenderade vi mycket tid med att spela kort och under tiden i Tierp blev det en hel del biljard.

Vår första expedition var till Abisko september 1986 tillsammans med Göran Karlsson. Det var sedan CG, jag och Sigge som hittade Parkalompolo sommaren 1995 som sedan dess är allas expeditionsval numer.

Det var några år sedan CG lade radion på hyllan, men vi fortsatte att umgå främst på storhelger. Han var alltid med oss på julafton tills jag flyttade från stan. Min mamma och pappa som bodde kvar i stan hade fortsatt tät kontakt med CG ända till slutet.

CG var en av mina absolut närmaste och viktigaste vänner som jag kommer sakna. Vi har gjort så mycket tillsammans vilket vi ofta pratade om när vi umgicks till storhelgerna.

/Lars Jeppesen, Växjö via NORDX

En koll i medlemslistan 1981 visar att CGK tillbaka i tiden var en av medlemmarna i SWB. Carl Gustav - vila i frid! /TN

Robert Wilkner. Radio Free Prague. I had a tape recording of this station, now long lost Found this on YouTube. "Radio Prague from Occupied Czechoslovakia"

QSL

Wir bestätigen den Email-Empfangsbericht von **OM Manuel Mendez, Las Cañollas, Teneriffa, Spanien** über Radio Joystick's Charlie-Prince Show via **Moosbrunn, Österreich** auf **7330 kHz** mit **100 Watt** am **1. März 2020 von 11:00 bis 11:37 Uhr** UTC / GMT.

Danke - und bis bald!

Charlie Prince Show

SuperClan Radio

THANK YOU FOR SENDING YOUR RECEPTION REPORT!

On the picture the building Hofwieshof Castle in Niederösterreich in the Netherlands. In the early 70's the home of offshore radio station Radio Noordzee International. Nowadays the home of the Dutch national radio station 100.1 NL and Radio 10 (Dutch national radio) 10 Dab3 as well as shortwave radio station SuperClan Radio.

Name: Manuel Mendez
Country: Lugo, Spain
Time: 08:00 - 08:33 UTC
Date: Feb 23rd 2020
Frequency: 6070 kHz

7290, Radio Joystick, The Charlie-Prince Show, Moosbrunn, received eQSL in three hours for a reception report sent 01 March from Tenerife, Canary Islands to chapri@radiojoystick.de

7290, IRRS/NEXUS, program "Coronavirus Pandemic", received special eQSL "Stay home, stay safe: listen to short-wave", in about 16 hours. Report sent to: reports@nexus.org

Log

(UTC)

2485	Mar5	-1100*	Radio Vanuatu on 2485 kHz., from 1008 to 1059:46* UT. News, weather ("weather conditions," giving many maximum and minimum temperatures in "Celsius," "outlook tomorrow," etc.) in vernacular; after that mostly religious songs; at 1054, ID and NA; 1055-1059:46*, just an open carrier till off. Poor reception, but one of their better days! My audio, of at times semi-readable weather conditions, at http://bit.ly/3cDExHV . (Ron Howard, Asilomar State Beach, Calif.)
2598u	Mar6	0050	VCP-4 Placentia, Newfoundland, weather. good signal (Wilkner)
2749u	Mar6	0049	VCO Sydney NS weather coming in well. (Wilkner)
2826	Feb29	1657	Vesti FM, Grigoriopol/Maiac, tk //1413, harmonic freq. x1413=2826kHz. (TB)
2850	Feb29	1658	KCBS, Kor, variety mx (YL tk) TS id? ...inminda, chor sx. (TB)

5980	Feb24	2328	JBA carrier from Radio Chaski vs Cuban pulse jamming against nothing else; until autocutoff at 2352:27.5*. Last check was Feb 18 until 2352:40*, 6 days ago and 12.5 seconds later, so averaging slightly over 2 seconds earlier per noctem. My first definite

timing in latest cycle was until 2355:27.5* on November 26, 2019 --- That was 90 days ago, and exactly 3.0 minutes or 180.0 seconds later, making for a very neat exact 2.00 seconds long-term average and they have not reset the timer so far, as 2 seconds a day is hardly noticeable to them. Nor could there have been any power failure over three months, as that would surely have knocked askew this inexorable slippage; speaks well for Urubamba Electric (Glenn Hauser, OK, WOR)

6754U	Feb27	0237	CHR, Trenton Military, is back! Had been missing exactly a month, first noted absent January 27 also from 15034-USB daytime. Since then I have bandscanned past 15034 at least once daily, and 6754-USB less than nightly. 6754-USB is now S9+10 with usual "no report received" from many but not all, currently Lajes, Keflavik, Shannon, Prestwick. The same repeat a few times but not always with the same NRRs. 0241 ID "This is Trenton Military, Time 0140 Z" -- so they *still* haven't set their clock from 61 minutes slow. Another sesquiweek and it should be almost right again, if DST/ST caused such confusion. Then into the usual rotation of Canadian bases, some of them NRR, until

the next ID at 0246 as if ``0145 Z``. 15034-USB is also back, Feb 27 at 1546, VG peaking S9+30. The question is, how did all those Canadian military flights manage without CHR on SW for a month? (Glenn Hauser, OK)

BRAZIL. Ref WRTH 2020 – missing **R. Aparecida on SW**. R. Aparecida on SW was deleted from WRTH 2020. From Anker Petersen I have received information that R. Aparecida is active on 5035/6135/9630/11 855 kHz. A big thanks to Anker who has monitored R. Aparecida during the last year. (Tore B Vik)

BRAZIL, 3365, Radio Cultura de Araraquara, Araraquara, Sao Paulo.

Checking for more than a week via SDR Remote receivers in Sao Paulo, this station is on air all days, signing on at 2100 with identification: "A Radio Esportiva da Cidade, ..., Araraquara, estado de Sao Paulo, Brasil, seis horas", "A radio esportiva da cidade, 107.5", "Os Campeões da Bola, 107.5". Soccer program "Os Campeões da Bola" with information about Campeonato Paulista, Copa de Brasil and local soccer team Ferroviaria de Araraquara.

From Monday to Saturday program "Os Campeões da Bola".

Sundays music program.

(Manuel Méndez, Lugo, Spain)

 Or maybe not Rádio Cultura at all, but this one: https://pt.wikipedia.org/wiki/107.5_FM?
 Mauno Ritola via [WOR] [bclnews]

FRANCE/CAMEROON

- On 25 February 2020, the Bulgarian short wave expert Ivo Ivanov noted the absence of **Radio Sawtu Linjiila** via MBR Issoudun, which is still listed by the updated zipped winter file at <http://hfcc.org/data/b19/b19allx2.zip> (dated 25 February).

1830-1858: 9800 ISS 500 kW / 170 deg to WCAf Fulfulde Mon-Thu Voice of Gospel

I can confirm that I did not find a trace of the transmission on 3 March. Web sites like <https://www.sawtulinjila.org> were unavailable too.

The Fulani programmes started in 1966 on the Radio Voice of the Gospel, operated by the Lutheran World Federation in Ethiopia from 1963 to 1977. The production center was in Ngaoundéré (Cameroon), which some years ago celebrated 50 years of service. Back then, this Protestant short wave station operated on an innovative decentralised production concept: All programmes were to be produced by churches or church federations in the target areas. The only exception was, for obvious reasons, the People's Republic of China. Decentralised production made it possible to continue working in many regions when the short wave station was nationalised by the Mengistu regime. The local studios carried on by producing programmes for cassettes or in some cases state broadcasters in their countries. The broadcasts in KiSwahili and Malagasy (2003-2012 via Talanta Volonondry, Madagascar) continued via TWR Swaziland. Fulani, which had been broadcast on the Radio Voice of the Gospel from 1966, came back onto short wave via Radio Africa No. 1 (1982-1985 only) under the umbrella of a Joint Christian Service in West Africa of Lutheran and other Protestant (main line) churches. In 2008, the Fulani broadcasts returned via Wertachtal (Germany). They were later put on the Issoudun site (France).

(Dr Hansjoerg Biener 3 March 2020) via WOR

PERU. Radio Tarma, Tarma (Reg. Junin), was reported on 4775 kHz throughout 2019. We already have reports in Europe for the first months of 2020 (times around midnight UT). People who like an easier access to the audio will use the stream at <https://www.radiotarma.com/radioenvivo>. The website also gives a schedule for 2020 at <https://www.radiotarma.com/programacion> (January 2020). Converted from local time to UT, Radio Tarma broadcasts 0950-0200 h and on Sundays 1050-2300 h only. According to the World Radio TV Handbook 2020, there is a break in transmission on shortwave 1400-2000 h UT. (Dr Hansjoerg Biener 5 March 2020)
(Via WOR)

VANUATU. Adrian Sainsbury has posted news of Vanuatu shortwave transmissions. Here are the details. **VBTC FREQUENCY PLAN EFFECTIVE FROM 01 MARCH 2020**

VILA Time	UT Time	MARCH 2020
0530-1130	1830-0030	3945
1100-1800	0000-0700	5040
1800-2230	0700-1130	3945
2230-0530	1130-1830	2485 occasional use only

{Note the major changes, 5040 replacing 7260 and 3945 replacing 5040 during their approx. former spans. What about Japan on 3945?

March 1 Aoki shows:

[WOR] QSL from KPH MRHS Pt. Reyes CA

QSL received after 2 yrs, 7 mos, 8 days on 2/21/2020 from KPH, Maritime Radio Historical Society in Pt. Reyes CA for the July 13, 2017 "Night of Nights" commemorative CW broadcast. The 3 KW station was logged on 8642 KHz from Bay of Islands KiwiSDR in NZ with a SINPO 45444 signal from 0645 to 0708 (6,580 path miles). The first part of the transmission recounted the historic 1976 "Hokule'a" canoe trip from Hawaii to Tahiti sponsored by the Polynesian Voyaging Society and the subsequent 1978 trip in which the legendary Hawaiian surfer Eddie Aikau was lost while trying to summon help on his surfboard for the foundering "Hokule'a". Eddie was never seen again but the canoe and its remaining crew survived the ordeal. QSL front & back can be seen at the following link:

[NORDX] Motala Långvåg close down 1991

Lyssna på den sista timmen av sändningen från Motala Långvåg (Orlunda) 1991. Pampigt värre med nationalhymnen på slutet. Hur många kommer ihåg detta?

<http://sk5sm.se/Motala-1991/Motala-cd-1991.mp3>

LÄS om Motalasändaren här (kopierat från Radiomuseets tidskrift): <http://sk5sm.se/Motala-1991/Motala-1991.pdf>
(God Lyssning, LennartDeimert via NORDX)

Hallå Lennart! Appropo Motala LV-station. Enligt en seg hörsägen har denna systerstation och Lahtis något mystiskt men gemensamt i sina historier. Vårt verkligen att ta reda på därför att det vad jag är nu ute efter, kan inte kontrolleras i min uppfattning i finska historieböcker eller radiohistoriker. Det handlar om Finska vinterkriget, som började den 30. november 1939, när ryska trupper anföll Finland utan krigsförklaring. Stalin räknade med en promenadseger mot finländarna. Därför satte han in bara 20 divisioner, eller ca 340 000 soldater, mot finnarnas 180 000 man. Stalin påstod att kriget bara skulle vara i tolv dagar, men han fick fel. De finska soldaterna kämpade tappert mot övermakten och lyckades hålla stånd i 105 dagar. I samband med invasionen fick de ryska marktrupperna flitig hjälp av tunga bombflyg, som under den första krigsdagen bombade även många finska städer och samhällen bl.a. Lahtis. "Finlands sak är vår" -kampanjen i Sverige var ett omfattande men frivilligt projekt för att hjälpa broderlandet ekonomiskt men även materiellt. Den svenska regeringen skickade dessutom stora mängder krigsmateriel till Finland, bland annat 135 000 gevär och 144 artilleripjäser. Finland hade bara fyra artilleripjäser vid krigets början. Sverige skickade också vart tredje av landets jaktplan, totalt 12 stycken, till Finland. Totalt anmälde sig över 10 000 personer till den svenska frivilligkåren. Omkring 8000 av dem hann komma till Finland innan kriget var över. Soviet verkställde 36 flygattaker bara mot Lahtis med 373 bombplan fällande hit totalt över 2600 bomber, vid vilka 26 personer avled och över 50 blev mera eller mindre sårade. Lahtis luftvärn hade fullt arbete att skydda staden vars huvudmål syntes vara just radiobacken och alltså långvågsstation som fungerade som nyhetsskälla nästan för hela nationen.

Dess sändningar stördes också regelbundet under bägge krigen.

Bomberflygplan från det sjätte luftburen regementet i Sovjetunionen började försöka förstöra Lahti-radiostationen åtminstone den 6 januari 1940, då flygplan hade attackerat Lahti i fem veckor på en oförutsägbar väg som hade använts fem gånger. På sin returresa sönderdelades sjuflygformationen när DB-3:er som flyger med hastigheter upp till 439 km/h försökte fly Fokker D.XXI flyga med hastigheter upp till 419 km/h. Jorma Sarvanto sköt sex DB-3 på en Fokker FR-97, men fick inte en sjunde när ammunitionen slutade. Den sjunde DB-3 dödades av Per-Erik Sovelius ett ögonblick senare. Bara EN flygbomb träffade Lahtis radiostation den 12 januari, då den tystades i tio dagar! Trots att Lahti-radiostationen hade skyddats med cellulosaaballar, en fragmentbomb hade gått in genom taket i sändarhallen exploderande på en solid betongbalk som lyckligt höll explosionen men förstörelsen inom sändarhallen enl. gamla foton var bedrövande.

DEN TYSTADES I TIO DAGAR!

Där slutar den skrivna radiohistorien om ryssarnas försök att tysta ner Finlands röst i etern! Och vad hände sedan är poängen med denna skrivelse! Liksom jag antydde, kan det vara nästan lika intressant än själva kaoset inom radiohuset. Där återkommer vi till den hörsägen, som jag har hört talas. Liksom ni kan inse, var det ett högt uppsatt mål av ryssar, att försöka förstöra och tysta ned Lahtis radiostation på långvåg! Hur skulle man kunna skoja dem att tro på att bombarnemanget hade igen gått förbi och inte ens ett vådskott hade träffat! JOO! Genom att radiosändningen hade fortsatt som vanligt liksom inget hade hänt! Den uppfattningen kunde man ha fixat, om flera reservstationer inom Finland hade kunnat ta över sändningen på sitt ansvar bara genom att trampa på dem i gång. Sådana fanns inte. Men i granne fanns det en stark långvågstation, i Motala i Sverige! Och denna berättelse väntar nu på er bekräftelse, hur det gick till. Under reparationen av Lahtis station, sägs promrammen av Finlands Rundradio ha fortsatt via Motala "som vanligt" liksom inget hade hänt i Lahtis och det var ju den röda tråden i denna (kamouflage operation)berättelse att skoja ryssar, som bara väntar på sin bekräftelse från er där i Sverige! Nu kastar jag alltså bollen till er för vidare studier. Det måste finnas något dokumenterat där om detta, det är jag nästan bergsäker på. Om så - därigenom skulle ni kunna även väcka uppseende för Motala museum med denna delikata historien om detta bara skulle överskrida sk. nyhetströskeln inom media. Tack om ni ville ta lyran av min boll!
(Kari Kallio via NORDX)

<http://www.nettiradiomailmalla.com/olavi-malisen-radioanityksia-1990-2000-luvulta/#more-19449>

soundclips från olika radiostationer. Lahtis avslutning på långvåg som först, YLEs huvudhallåman Pentti Fagerlund säger de sista orden den 31.5.1993 på finska och svenska. Till slut hör vi klockan 12s klämtningar från Åbo Domkyrka som i årtionden via Finlands Rundradio mitt på dagen.

(Kari Kallio via NORDX)

Korrektion. Den ikonlika radiatorösten hörde förstås till huvudhallåmannen Pentti Fagerholm (!) https://fi.wikipedia.org/wiki/Pentti_Fagerholm, som tagit studenten i samma skola som jag men tidigare, i Jyväskylä Lyceum i den första finskspråkiga övre skolan i Finland <https://www.ksml.fi/keski-suomi/Jyv%C3%A4skyl%C3%A4n-Lyceo-v%C3%A4rj%C3%A4tyti-vaaleanpunaiseksi/297956> som grundat 1858.

(Kari Kallio via NORDX)

Active Wideband Directional Antenna with Vertically Polarized Small Loop and Small Dipole

A combination of a small magnetic loop and small electrical dipole or ground plane (GP), both vertically placed in a single point is widely used as a simple direction finding antenna. How to build a wideband directional version with active small loop and active small dipole is presented in the following publication:

<http://www.lz1laq.signacor.com/docs/active-wideband-directional-antenna.php>

Analysis and experimental evaluation are performed. It might be interesting for Perseus users.

73, Chavdar lz1laq@abv.bg <http://www.lz1laq.signacor.com/>

(via Perseus-SDR)

My wideband solution is simpler in construction, optimize the F/B of an EWE antenna for each MW frequency simultaneously by using a complex terminator. The result is quite impressive. http://dx.3sdesign.de/optimize_ewe_fb.htm

It's in use now for 8 years.

(Jürgen Bartels via Perseus-SDR)

America's Biggest Little Radio Station: WION-in AM Stereo

The Moral of this story first: Don't always suspect your radio station if you have odd reception or no reception!

Today WION received a call from one of our downtown Ionia advertisers, asking if we are having transmission issues on BOTH our AM and FM signals. The answer was a polite "no, we're fine"..(the station had no issues) .but, we always try to help with reception issues so a visit downtown took place.

The radio in this business could hear us all across the AM dial due to the strength of our signal on the small stereo, but at the top end of the AM dial was a "motorboating" sound.....and, on our FM 92-7, we were drowned out completely by the same kind of noise.

Jim Carlyle carried a Sony portable radio to sniff out the issue...and, after eliminating anything inside the location, took the radio outside, then walked back and forth in front of some businesses adjacent to see if the noise would go silent or grow. In all, Jim looked like he was lost and couldn't afford a real boom-box. Long story short, the offending device that was drowning out WION on FM and polluting the AM band was actually a pair of "aromatherapy" type diffusers each powered by a 24 volt "wall wart." The situation was explained to the ladies in the adjacent building, the devices were unplugged, moved and now are not pumping garbage noise back into the AC line and killing off local radio. They are probably now causing problem to the neighbor on the OTHER side of their business.

Today's wall-warts cause more noise on the AC line than you'd believe...and these were powerful enough not just to create AM noise, but to BLANK OUT FM 92-7! Sad part is, these things are sometimes labeled "UL listed" which may mean they don't burn up, but they would NEVER pass FCC regulations as a device that puts out a radiated signal.

The picture shown is not of the EXACT adapter that caused the issue, but similar. We'll try to get the exact pics and edit this post soon. Please remember the moral of this story the next time you think any local radio station is having difficulties and you can't receive them. It could be the fault of that new toy, re-charger or kitchen device you just bought. And, by the way, most of this crap has been coming from China for years, but...American's like "CHEAP" stuff, and its' beyond the point of fixing. One time at our studios, an HDMI splitter we use which was 50 feet from our streaming AM stereo receiver and..on the other side of the building with wiring in conduit was noisy enough to put buzz into our stream! You won't know til you buy this crap whether it's causing an issue, but remember, if it does, TAKE IT BACK...and complain to the manufacturer! One or two small parts they fail to put in the switching adapters could filter the noise...but they're too cheap to put them in.

The two ladies were shocked that their "stink pretty" devices (a Phil Cloud phrase) could completely eradicate WION nextdoor, but they politely cooperated, and we thank them.

It was a happy ending for our advertiser/listening business and...the problem was easily found with an everyday portable radio. You may be amazed at how much noise is being generated by things in your very own business and home if you find odd noises in YOUR radio

This article is copied from the station's website.

(Tore B Vik)

[NORDX] Signalspaning

Hör Christer Olsén berätta hur sovjetiska underrättelsetjänsten GRU kommunicerade med den svenske officeren Stig Bergling i hans hem, signalen som var med att avslöja honom som sovjetisk spion. Christer Olsén berättar även om andra mystiska och fantastiska spionhistorier och hur man kommunicerade genom radiosignaler.

Fenu Radio - Empfangs-Loop

Hallo Leute,

Ich biete zum Verkauf eine Empfangs-Loop mit dem bekannten Bluewave Verstärker. Die hier angebotene Bluewave ist die "plus" Version die es normalerweise nicht zu kaufen gibt. Der Verstärker hat ca. 10dB mehr Pegel in den oberen Frequenzen. Sie ist in einem IP65 Gehäuse eingebaut.

Der Loopträger besteht aus 15mm Aluminiumrohren und ist steckbar. Also auch gut geeignet für Portabel.

Grösstmöglicher Umfang der Loop ist 4.5m. Eine ergibt eine Diagonale von ca. 1.6m. Geht natürlich auch kleiner. 2m Umfang ist das minimum. Mastaufnahme ist mit Krallenschellen realisiert. Mastrohr- Durchmesser bis 50mm.

Ich biete Euch eine solche Loop für 180€ inkl. Versand an. Billiger geht es nicht.

Lieferumfang:

Loop komplett nach Wunschgrösse gebaut(2m - 4.5m Umfang)

Bluewave plus Verstärker in hochwertigem IP65 Gehäuse

Fernspeiseweiche eingebaut in Alugehäuse

DC_Kabel und Bananenstecker inkl.

Bei Interesse mich einfach kontaktieren. fenu@fenu-radio.ch

DX nostalgia (RFK)

First we have a QSL card from The Overseas Broadcasting Station received by Jan-Erik Räf JER in 1955. Those of you who would like to know more about the history of broadcasting in Thailand should check out the very informative webpage of Broadcasting Museum Bangkok at <https://www.tour-bangkok-legacies.com/broadcasting-museum-bangkok.html>

One of the stations which still believe in SW for reaching their audience: station KTWR of Trans World Radio, located in Guam. From the collection of Claës-Wilhelm Englund CWE.

Not only was the kookaburra bird used as interval signal of Radio Australia. For many years this laughing bird could be seen on their QSL cards. A classic QSL received by CWE in 1952.

Once upon a time there was a multitude of Honduras stations in the SW bands. From the collection of Tore Larsson TL: Radio "El Patio" in La Ceiba.

Radio Jornal do Commercio was probably one of the easiest Brazilians to catch in the SW bands and their slogan “Pernambuco falando para o mundo” was quite adequate. The station was owned by the newspaper Jornal do Commercio. From the collection of TL.

Finally a QSL card from FEBC which Lars-Olof Hansson LOH received in 1970. Would you like to share some of your own old SW QSLs with us? Contributions are welcome to info @ rock.x.se.
