SHORTWAVE

Issue no. 2051, March 31, 2024

Hope you all have had a fine Easter Holiday.

This issue is delayed a bit due to family matters which took most of the time here.

But I haven't forgot you.

In this issue there is a link to an interesting pdf-file -Parish Radio Frequency *List*. This list is compiled by Patrick Robic in Austria.

He says in the foreword:

If you hear a station, this list will be only a little help for further investigations, as there may be more than one station transmitting on a frequency at the same time. The mentioned mass times may be subject of change.

Update information can be found on the Webpages of the Parishes / Dioceses or at <u>www.catholicire-</u> land.net

Please remember that there are also masses on special occasions like weddings, funerals, etc. outside this schedule.

This is a new interesting area for exciting DX so check this out.

> Keep on _____

[WOR] 40 years of amateur radio in space, Amateur Radio Newsline

Amateur Radio on the International Space Station - had a big celebration recently in Florida, and I was fortunate to attend. I filed this report while I was still there -- to give listeners a sense of all the excitement.

ARISS celebrated the positive impact of 40 years of amateur radio on human space flight at its conference held late last month at the Center for Space Education: Astronauts Memorial Foundation near the Kennedy Space Center in Florida. One hundred and ten leaders, volun-

teers and fans of the program gathered to hear and see memorabilia from the past four decades and got a look into how to rocket into the future. Keynote speaker Richard Garriott, ex-W5KWQ, inspired the group toward a bold future and passed his license exam at the conference to become re-licensed. His previous license had lapsed not long ago. ARISS also had a few announcements, including a new partnership with Estes model rockets and expansion of the SPARKI radio kit availability for school classrooms. HamTV will return on the next ISS supply mission, SpaceX 30, scheduled for mid-March and be returned to service soon after. Lou McFadin, W5DID, received a special achievement award for his work in building amateur stations in space since the very first one on STS-9, which carried the first Spacelab mission and the first astronaut representing the European Space Agency 40 years ago. Of course, the crowd was treated to a live contact with astronauts on the ISS as three youths presented their questions to the astronauts.

From Kennedy Space Center Florida, this is Neil Rapp WB9VPG (Mike Terry via WOR)

Ciao Thomas,

World Music Radio on 15700 kHz gets here in Milan with good signal. They use a real large bandwidth, 22 kHz, and audio is just great. I attach an image. RX: Winradio Excalibur Pro - Antenna Folded Dipole Have an Happy Easter Giampiero Bernardini

Station news

KOREA. 5855.5U HLL2 Seoul Meteorological Radio. I realised something about this that might actually be obvious. Nonetheless, it's a few additional facts to add to the mix. According to the "Worldwide Marine Radiofacsimile Broadcast Schedules", HLL2 is on the following frequencies with WEFAX maps:

3585 kHz 1200-0000 UTC 5857.5 kHz ALL BROADCAST TIMES 7433.5 kHz ALL BROADCAST TIMES 9165 kHz ALL BROADCAST TIMES 13570 kHz 0000-1200 UTC J3C 3 kW

In general, one usually tunes to the nominal frequency minus 1.9 khz in USB: 3583.1/ 5855.6/ 7431.6/ 9163.1/ 13568.1 for example if one uses FLDigi.

Therefore 5855.6 is not a new frequency as such, but rather the minus 1.9 khz 'version' of 5857.5.

According to the WEFAX schedule no charts are transmitted at around 1300 UTC. This makes me wonder if the voice forecasts are a new addition to the schedule.

It may be worth checking 3583.1/7431.6/9163.1 USB at around 1300 UT to see if voice forecasts are there as well. BTW - I have logged maps on both 7431.6 and 9163.1. as late as October 2023

International Marconi Day 2024:

This year, International Marconi Day (IMD) is on April 27. Italian inventor and electrical engineer Guglielmo Giovanni Maria Marconi was born on April 25, 1874, and is credited for inventing the radiotelegraph system, creating Marconi's law, and sending the first wireless transmission over the open sea.

IMD was created to honor Marconi and is hosted annually by the Cornish Radio Amateur Club <u>http://gx4crc.com/</u>, GX4CRC. The purpose of the day is for amateur radio enthusiasts around the world to contact historic Marconi sites using communication techniques similar to those that he would

have used.

The 24-hour event will operate from 0000 UTC to 2359 UTC, and registration is required. Participants can register at GX4CRC's registration web page <u>https://gx4crc.com/imd/imd-registration/</u>.

Stations in the United States, including Marconi Cape Cod Radio Club, KM1CC, in Massachusetts, are already registering for the event. KM1CC hosts several on-air events each year to keep the accomplishments and story of Marconi and his wireless station site in South Wellfleet alive. In 1975, the Wellfleet station was listed as a National Historic Landmark on the National Register of Historic Places and is now part of Cape Cod National Seashore, a unit of the National Park Service. When possible, KM1CC sets up a temporary radio station inside the park. More information about KM1CC is available on their Facebook <u>https://www.facebook.com/KM1CC/</u> page. Avast and CCleaner no longer work. The developer has banned the launch of its products in the Russian Federation.

Avast has blocked the operation of all its products in Russia.

Avast has decided to stop operating its products in Russia, including the popular CCleaner utility. Users were faced with a notification "This product is prohibited for use in your location," and this happened after previously restricting access to Russian users to download and pay for services. However, the user community has shown incredible resourcefulness in discovering a method to circumvent the restrictions. To restore CCleaner to work, you need to uninstall the application, reinstall it while the Internet connection is off, and then uncheck "Automatic program updates" in the settings. After this, you can turn on the Internet again, and the utility will continue to work, ignoring the Avast ban.

This case is an example of how the technology community quickly adapts to changes and finds ways to work around new restrictions.

 $(\ \underline{https://overclockers.ru/blog/History/show/136418/Avast-i-CCleaner-bol-she-ne-rabotajut-Razrabotchik-zapretil-zapusk-svoih-produktov-v-RF \)$

CCleaner is prohibited for use in your region. Solution to the problem. Video in Russian - 2:07 <u>https://www.youtube.com/watch?v=wlB79tXHBrA</u> (RUS-DX #1282)

From the series "Now Live with It."

Our experienced subscribers should remember that in Russian (Soviet) analog television worked in the SECAM color system, which was developed in France. Until very recently, it also provided satellite broadcasting, including the analogue platform NTV-Plus. In the rest of Europe, with the exception of French television channels with 5 grams of debt. the broadcast has been in PAL for a long time. But few people know that there was also a Soviet NIIR color system, which in its characteristics was not much inferior to the same PAL, and according to some descriptions, was even better than it. But why was the French SECAM chosen? And the whole point is that at the time of choosing the standard, France left NATO and the leadership of the Soviet Union decided to make a kind gesture towards France, and all the patents for SECAM went to our television workers for free. Many television channels of the socialist bloc of countries that were part of the Warsaw Pact worked for a long time in the SECAM system. (Tele-SAtINFO.Ru - Telegram)

[WOR] Willis Conover doing Jazz on VOA

Sorry for the delay in posting this. I remind fellow listeners that VOA does currently have a jazz program: "**Jazz from the Heart of America**" that is broadcast over the VOA's FM stations overseas and streamed over the VOA Global English stream (<u>https://www.voanews.com/live/audio/60</u>) on Sundays at 12:00 UTC with a repeat at the following time on the following Saturday.

I always record it. The program is produced and presented by WDCB (Chicago) station manager Dan Bindert. Dan had hoped that it would also be broadcast on SW following the tradition of Willis Conover. It's a great program for jazz aficionados and I've had at least one call-out on the program. There's another VOA jazz program that goes out on the Global English stream just before the first airing of Dan Bindert's show: "Beyond Category" (https://www.voanews.com/z/3499).

It might be VOA is streaming old versions of this show unlike "Jazz from the Heart of America," which has a fresh show every week. I don't know if "Beyond Category" is repeated at other times. Interestingly, "Beyond Category" uses "Take the A Train" as its theme tune just as Conover did. (-- Richard Langley)

(Richard Bangle

"I've not reconfirmed this in the last few months, but I believe that repeats of a shortened version of Beyond Category is still also heard monthly, (rotating with repeats of Hamilton Live [live concerts], Border Crossings and the Soul Lounge) in the Music Alley strand broadcast on shortwave at 0430-0500, (Alan Roe, Teddington, UK)

(Christoph Ratzer via A-DX Fernempfang)

This book was born out of necessity: the dissemination of promoting SDRsharp. Since there was no work like this, I decided to start with one to write a small guide and now a big book...

Remember that no book is suitable for everyone, but for all SWL people, experimentalists, specialists and non-specialists alike have this book waiting, slowly and with a lot curiosity to be read

In total 232 pages.

Bob Heil: 50 Years of Maximum Rock n' Roll

Many thanks to *SWLing Post* contributor, William (W8LV), who writes:

Bob Heil's story, as told BY Bob Heil, is available as a podcast. Here, find real music and amateur radio history as told firsthand!

Check out: 50 Years of Maximum Rock n' Roll:

For the full episode archive: <u>https://bobheil.libsyn.com/</u> (from SWLing Post)

WORLD OF RADIO PODCAST ON YOUTUBE, replacing Google Podcast

Thanks to Keith Weston for arranging this: ``Hi Glenn, It looks like the new "podcast" feed via YouTube is now fully active and reliable. <u>https://www.youtube.com/@WorldofRadio</u>

Official details of what this is and why it is happening at: <u>https://support.google.com/podcast-publish-ers/thread/264592324</u>

Basically, the iTunes-like Google Podcast service will cease to function on 2 April 24. Anyone who uses the Google Podcast app (or a play their podcasts via Google Smart speaker) will need to start using YouTube or YouTube Music apps paired with their devices. It's a real pain and I hate this decision, but that's the Googleverse we live in now. Setting the new stuff up for smart speakers is a little tricky, but your followers are smart cookies and I wager they'll figure it out.

Best, -- Keith Weston`` <u>http://keithweston.com http://www.facebook.com/keithweston</u> All podcasts linked at <u>http://www.worldofradio.com/audiomid.html</u> (via WOR)

[WOR] Severe Geomagnetic Storm - The Strongest in years

As predicted, a CME struck Earth's magnetic field on March 24th (1437 UT). The impact opened a crack in our planet's magnetosphere and sparked a severe G4-class geomagnetic storm--the strongest geomagnetic storm since Sept. 2017. <u>https://spaceweather.com/</u> (Mike Terry via WOR)

[WOR] Tony Rogers` DX Guides taking a short break

http://www.dxguides.info/

DX Guides is taking a short break. Unfortunately I do not have sufficient time at present to compile the guides for the A24 season and keep them maintained. I hope to have things back

on track just as soon as circumstances allow. I apologise for any inconvenience caused.

Whilst the older guides are no longer relevant and have been removed, the DX Library (and links) and DX Memories pages will remain in place to at least keep some sort of useful presence on this site until the other content can be restored.

Thanks to everyone who has encouraged and supported me in the past. It has been greatly appreciated. I hope that you will have good reason to visit dxguides.info again at some point in future!

In the meantime please take a look at the DX Library page where lots of interesting DX-related links can be found for your enjoyment.

Good listening, Tony

All content compiled, edited and arranged by Tony Rogers, Birmingham, England (unless otherwise stated).

This is a personal site that I maintain as a hobby and it is not affiliated with any DX club.

Email address for DX Guides: <u>dxguides@gmail.com</u> (via WOR)

BONITO GERMANY Hyperflex 5 Crystal Koaxkabel

Dennis Walter hat das wunderschöne Hyperflex 5 Crystal Koaxkabel wieder im Angebot, "verbesserte Rezeptur", und hat mich gebeten sein Angebot hier für die A-DXer zu teilen.

Frisch eingetroffen: Hyperflex 5 Crystal

Nach langer Entwicklungs- und Testzeit hat <u>Messi & Paoloni - Coaxial</u> <u>Cables</u> endlich wieder das Hyperflex 5 Crystal im Programm. Als einziger Händler in Deutschland, haben wir das Kabel heute bereits

bekommen und in großen Mengen am Lager. Ihr bekommt dieses wunderschöne Kabel als Meterware oder fertig konfektioniert. Wir können sofort liefern.

PARISH RADIO FREQUENCY LIST

Compiled by Patrick Robič

Last updated: March 28th, 2024

DX nostalgia by RFK

Once there were numerous DX clubs in Sweden, probably more than in any other country. A lot of those clubs arranged contests where the listener was asked to report some special programmes, often produced by the clubs themselves. Jan Görlin, formerly member of Folkunga DX-Club of Linköping/Norrköping in the 1960s, tells about a contest which the club arranged in 1966 under the name of 'Östergyllen'. The club had their own report forms and here we see the masthead:

On the next page we see the participating stations. Jan can't find any results of the contest and is most curious to know who actually won. If by any chance the winner reads SWB we would very much like to hear from you. Just mail me at info @ rock.x.se. I suppose that Folkunga DX-Club had a special QSL card for this event – anybody who could send a scan? Thank you for your contribution, Jan Görlin. Welcome back.

Here we have a letter from Radio Diffusion UFAC of Elizabethville in the then Belgian Congo. This station was established by the Armed Forces in 1952 and was dedicated not only to the military forces but also broadcast educational programmes for European youth in the province of Katanga as well as religious programmes. The station operated with a 3 kW Collins transmitter on 4980 and 7156 kHz. From the collection of Lars Rydén LR.

FF U 0 N U F DI SI A C R A D 0 1 ELISABETHVILLE B. P. 97 0.0.2.A.D. Section de l'Union des Anciens Combattants du Katanga U.A.C.K. Elisabethville, le 26 août 1957.
