

# SHORTWAVE BULLETIN

Issue no. 2080, May 11, 2025

Deadline e-mail next issue: 1000 UT, May 25, 2025

Mika Makelainen writes in DXing.info that the well-known DX-er Chuck Hutton has passed away. RIP. Mika writes: I had the honor of meeting Chuck once in October 2003 when I attended a DXpedition in Grayland, Washington. Chuck was a very active DXpeditionist, visiting multiple locations from Coast to Coast. He was very skilled at identifying remote stations in many languages, and his achievements on the AM dial were quite amazing.

For instance, in 2014 he took part in "Rockwork 4", an ultra-light DXpedition on the Pacific coast, scoring 87 logged stations from New Zealand.

Chuck was always ready to help, and we exchanged recordings of our unidentified catches.

Chuck was also an active contributor to the DXing.info website. As a result of that, I'm happy to share links to these DXpedition reports, which include his logs, comments and a few photos of him spanning almost two decades. All these articles will continue to serve as a lasting tribute to his impressive DX career.

Ronny - thanks a lot for compiling the DX-Nostalgia column for each issue.

Keep on ....

## QSL, comments, etc.

**Christer Brunström: Voice of Türkiye 13635, 17620.** Two cards - one featuring a mosque and a tomb in Romania and the other one a tomb in Kosovo.

**Ron Howard:** The Redeemed Christian Church of God, Malekula - <https://rccgliving-faithchapel.websites.co.in/>. Behind Lakatoro Post Office, LTC Building, Lakatoro Station, Lakatoro, Malekula Text messages to: 7764005 or 5394557

Malekula is the second largest island in Vanuatu.

## The radio man listening to the world from the Arctic

Mika Mäkeläinen is a radio enthusiast who listens to stations from around the world in a remote corner of Lapland, 400km north of the Arctic Circle.

He and a group of fellow hobbyists have set up 14 wire antennas in the forest to capture weak signals from low-power stations, thousands of kilometres away. Mika explains why Lapland is a perfect place for listening to distant radio stations and how his hobby continues to inspire him 40 years after first discovering it as a child.

# Log

- |      |       |      |  |
|------|-------|------|--|
| 2355 | May 4 | 1558 | <p>4TRP, operated by Christopher O'Reilly, from Kuranda, Queensland; on May 4, via Kiwi SDR remote at Townsville, Queensland; assume still with 60 watts; non-stop enjoyable older pop songs: 1558+: pop songs and IDs; Johnny Preston - "Cradle of Love," Fats Domino - "Blueberry Hill," The Animals - "We Gotta Get Out Of This Place" and "House Of The Rising Sun," The Kinks - "Sunny Afternoon," "All Day And All Of The Night," and "You Really Got Me," Manfred Mann - "Pretty Flamingo," etc.</p> <p>Later (2006+ UT); pop songs and IDs; Bob Seger - "Old Time Rock And Roll," Del Shannon - "Hats Off to Larry," Little Richard - "Tutti Frutti," Daniel Boone - "Beautiful Sunday," Bobby Darin - "Dream Lover," etc.</p> <p>(Ron Howard, Monterey, California)</p> <p>-----</p> <p>- Here is the reply from Christopher O'Reilly to my remote reception. The next time I go to Asilomar State Beach (Calif.) I will certainly try to catch a carrier on 2355 kHz. <i>"Hi Ron Howard, That is definitely my list, That would definitely be me. The other is to watch for traces, if you have SSB receiving capabilities, you can sniff out a carrier."</i> - Quickly sent off an email inquiring about the current power. Christopher responded with two quick replies: <i>"Hi Ron, I thought it was 15 watts but it's more like ~20 can't always trust the SWR meter as the rain affects the antenna tune, it shows 20 watt on dummy load, there is 125% positive modulation 90% negative, meter does a little Dance with the music. Flat audio response set at the transmitter so should sound a lot cleaner and louder, there was a bassy preset that had to go."</i> Second reply: <i>"Hi Ron, The corrected watts is more like 20 watts, will have to find the formula, so more like around 80 watts PEP with 125% positive modulation, so the PEP would be more than 80 watts."</i> Greatly appreciate him taking the time to reply to me. (Ron Howard, Monterey, California)</p> |
| 3325 | May 9 | 2303 | <p>Went to check 3325 kHz, at 2303 and amazed to find them still on the air via same remote, carrying the same "Indonesia Today," still with presenter Ahmad Faisal; VOI website - <a href="https://voineews.id/">https://voineews.id/</a> - which has audio streaming, clearly // to 3325, even though that frequency was very poor; website shows "Indonesia Today - New Schedule" from 6:00 AM to 6:00 PM (2300-1100 UT), everyday. This "Indonesia Today" is the very same program I had reported hearing in the past via WRMI (USA) from 0800 to 0900 UT. It is very different from the usual variety of VOI language programs, as it is totally in English; "Indonesia Today" is a contemporary, upbeat type of programming, as I would probably call the</p>  |

			announcer a "DJ"; today with weather reports at 2327 and 2344, for Indonesian cities (Nabire, Bandung, Makassar, etc.). Interesting development! Perhaps when the remote SDR site at Bandung is active again, we can get better reception on 3325. Certainly this needs more monitoring! (Ron Howard, Monterey, California)
3955	May 2	2109	Channel 292, Rohrdorf. E, pops, tks. 3 (CG)
3955	Apr 29	2000	KBS World Radio, German, good (Bleeker)
3975	May 9	2105	Weekend Music R via Shortwave Gold, Winsen. E, tks, pops. // 6160. 4 (CG)
3995	May 8	2142	HCJB, Weenermoor. G, tks. 2 (CG)
4755	May 9	-2301*	Voice of Indonesia, via Kiwi SDR remote at Bogor, Indonesia (Bandung site not available); the usual VOI closing announcement in Japanese. At 2300, with an intro to the <b>VOI program "Indonesia Today,"</b> by Ahmad Faisal. My remote audio - <a href="https://app.box.com/s/3fvo406vldc3mxeqluq5k61y4qc39qe5">https://app.box.com/s/3fvo406vldc3mxeqluq5k61y4qc39qe5</a> (Ron Howard, Monterey, California)
4940	May 4	0442	Estación 4940, religious songs and comments. (Méndez)
5020	May 6	1100	SIBC - Voice of the Nation, via same SDR remote; intro to the news/sports in English with the usual calliope music; 1111, continuation of the "dedications" program in Pijin. My remote seven minute audio - <a href="https://app.box.com/s/4mjiqqdbvuzhh9bq7fcwnbv2y7xfo7">https://app.box.com/s/4mjiqqdbvuzhh9bq7fcwnbv2y7xfo7</a> . (Ron Howard, Monterey, California)

## Station news

**CANADA:** CFRX is a shortwave relay on 6070 kHz of a Toronto local AM station, CFRB (Newstalk 1010 kHz). It has a 1kw shortwave transmitter, but it is quite listenable (especially evenings) in many northern and eastern states in the US including here in Hoosierland. Since so much of the US AM band is either toxic or boring (or both), I began this exercise with low expectations, Toronto traffic and weather for example being unlikely to rivet my attention for long, and 90% of AM talk radio in the United States being unlistenable by reasonably intelligent people. The station surprised me in a good way, and its schedule contains a number of items that would be interesting beyond Canada's borders.

First a word about the news component of CFRX/CFRB's format. The full news programs are actually relays of CTV television (CTV News Toronto every day at 2200-2300 UTC and CTV National News Mon-Sat 0300-0400 UTC, CTV's Your Morning: The Podcast Sundays 1000-1100UTC) and CP24 Television (CP24 Morning Saturdays and Sundays 1100- 1300 UTC). (NASWA e-journal May 2025, SW px Spotlight, page #7, by Bill Tilford-IN-USA May 1st). (BC-DX items 1 May vias WOR)

**DENMARK.** World Music Radio is planning to commence broadcasting on two new frequencies sometime during the

month of June from Hvidovre, previously used for WMR on 927 kHz (which has been silent for the past six months or so, and which will not return) - and previously used for Radio208 on 5970 kHz. The two new frequencies will be 3965 kHz (400W) and 25820 kHz (100W). So from July 1st 2025 WMR will hopefully be on: 3965 (24/7), 5930 (24/7),

15700 (05-22 UTC), 25800 (24/7), and 25820 (24/7) kHz.

Radio208 on the other hand will be closed down in the course of May. That means the end of 1440 (currently 300 Watts) from Ishøj. 1422 in Central Copenhagen has already been switched off. During Easter Radio208 on 5970 also went off the air.

Radio208 began broadcasting on 1440 kHz on December 17th 2019, and from May 1st 2020 shortwave was added.

There are many reasons for closing Radio208. First of all – it is very expensive to run two radio stations. For the past few years I have been paying some 530 euro monthly for music royalties. And with WMR and Radio208 not generating any income – only expenses. Also it would be very difficult to get a new experimental license for mediumwave from the Danish authorities as of July 1st 2025 (obtaining a permanent license is not possible).

So this will be the end of Radio208 – and the end of Mediumwave broadcasting from Denmark.

(SHN – Stig Hartvig Nielsen via <https://mediumwave.info/2025/04/> )

**JAPAN.** - - - Per Hiroshi, the next day Shiokaze changed frequencies: JSR Shiokaze, May 1, 2025

1300-1400 5920, 5965	1405-1435 5935, 5980	1555-1655 5955, 6035	1705-1805 6090, 7320
----------------------	----------------------	----------------------	----------------------

I think it's a good time to pass along this reminder: <https://bdxc.org.uk/asia.pdf> (page 32): ". . . comment on the WOR iog on 10 June 2021": It might be worthwhile to be reminded of a past posting by Glenn, with info from online. . . ; ' . . . Japanese law on broadcasting says only NHK can broadcast 'international service'. And government controlled the license of broadcasting – it is quite difficult to get the permission (license) of broadcasting promptly. At the opening announcement of Shiokaze, they announce call sign as JSR. Exactly speaking, JSR is not call sign for 'general' radio stations. **Shiokaze got a license** for a 'special utility broadcast' - the same as Traffic Information Service Radio on 1620 kHz - not for 'general broadcast' [**So Shiokaze is not really a 'clandestine' station - Ron**]. . . ."

My Shiokaze QSL for April 30, 2008 reception - <https://app.box.com/s/icj1acnh9bwcqrmetemefvyjfebwp849> .

BTW - Located on the Isle of Anglesey is the quaint village of Llanfairpwllgwyngyllgogerychwyrndrobwlilllantisiliogogoch. <https://www.youtube.com/watch?v=fHxOOUdpoxM> contains pronunciation, hi.

(Ron Howard, Monterey, California )

**NEPAL** Radio Nepal celebrates 75th anniversary.

Head of State and Government of Nepal expressed best wishes to Radio Nepal on its 75th Anniversary President Ram Chandra Poudel has issued a message of congratulations on the occasion of the 75th anniversary of Radio Nepal (Diamond Jubilee). While mentioning that the establishment of Radio Nepal is linked to the historical events of the establishment of democracy in Nepal, the President has said that it is the starting point for the country's broadcasting media to enter an era. In detail:

(QSL via <http://www.swlqslmuseum.com/nepal.htm>)

## Other radio news

**As of May 2025 I think this the complete list of licensed, private, low powered SW stations in Europe:**

24/7	DENMARK	World Music Radio	5930, 15700, 25800
24/7	GERMANY	HCJB	3995, 5920, 7365 (German on 3994 and 5920; Russian on 7365)
24/7	GERMANY	Radio Channel 292	3955, 6070, 9670
24/7	NETHERLANDS	Radio Europe	6130
24/7	NETHERLANDS	Radio Veronica	5955
24/7	NORWAY	Radio Northern Star	5895
0700-1600	GERMANY	Europa 24	6150
0700-1700	SPAIN	Radio MiAmigo Int'l	6085 (via Shortwaveservice, Germany)
1000-1500	GERMANY	Shortwaveservice	6005 (mostly Radio Slovakia)
1500-2200	GERMANY	Shortwave Radio	6160 (Sat, Sun, and holidays 07.00-22.00)
1600-1900	GERMANY	Shortwaveservice	3985 (mostly Radio Slovakia)
1700-2400	GERMANY	Shortwave Radio	3975

Additionally there are a few other stations broadcastings weekends only or even on rarer occasions - and/or simply broadcasting irregularly. Please correct me if I'm wrong.

## Don Moore's Photo Album: Guatemala (Part Six) – Huehuetenango

More of Don's traveling DX stories can be found in his book [Tales of a Vagabond DXer](#) [SWLing Post affiliate link]. If you've already read his book and enjoyed it, do Don a favor and leave a review [on Amazon](#).

I first heard of Huehuetenango in February 1974. I had gotten my first serious receiver, a Barlow-Wadley XCR-30, a few weeks earlier. Now I could try for stations in the 120-meter band. The first one I heard was Radio Maya de Barillas on 2360 kHz from a place named Barillas in Guatemala. And Santa Cruz de Barillas (the town's full official name) was in a department named Huehuetenango. The name sounded exotic and magical.

Read all about it here: <https://swling.com/blog/2025/05/don-moores-photo-album-guatemala-part-six-huehuetenango/> (SWLing Post)

## Voice of America Needs to Be Fixed, Not Silenced

This radio address by President Ronald Reagan was beamed to the Soviet Union by Voice of America in 1985. (AP Photo)

Trump's shutdown delights dictators and punishes people who deserve access to the truth.

By [Ethan Dodd](#) 04.28.25

Ted Lipien is Voice of America's fiercest defender and toughest critic. Born in Poland during the Cold War, he fled the communist country at the age of 16, determined to become a journalist so that others wouldn't have to live under lies. While a college student, he became a translator for VOA's Polish Service. Spending nearly 40 years with the U.S.-funded news broadcasting service, he rose to Polish Service chief during the Solidarity trade union's struggle for workers' rights, interviewed future President George H.W. Bush and future Pope John Paul II, and brought live satellite TV newscasts to Russia and Ukraine. Lipien retired as acting VOA associate director in 2006.

## Re: [DXplorer] DXer Ages

Following up on the comments on DXers under 65. I'm currently at the final day of a four-day DX Camp (DXPedition) south of Porto Alegre. Also here are five Brazilians and an Argentine. One of the Brazilians is 68 (one year older than me). The others are in their 40s and 50s. In Latin America there are quite a few DXers in the 'next generation'.

Here's where we are. The larger building has the bedrooms and living space. We're set up for DXing in the smaller auxiliary building. Or past the coordinates into Google Maps. Totally flat with lots of antenna space. The surrounding fields have been harvested since they're heading into winter here. (-30.856687005531015, -51.63285792477155)

## Catholic Radios of Colombia: A Reflective Journey

Tito Ballesteros López's latest book, *Radios Católicas en Colombia*. Maravilloso ayer, sereno presente, complejo futuro, delves into the rich tapestry of Colombia's Catholic radio stations.

This pioneering work offers not just a compilation of data but a critical analysis that encourages discussion and debate.

*Key Insights:*

**Historical Significance:** The book chronicles the evolution of Catholic radio in Colombia, highlighting its role in connecting, educating, and transforming communities through messages of faith and hope.

**Current Challenges:** Despite their potential, many stations operate in isolation, lacking collaboration and shared vision.

This fragmentation hampers the creation of a unified national voice.

**Future Outlook:** The author emphasizes the need for introspection and collective effort to revitalize Catholic radio, ensuring it remains a vibrant medium for evangelization and community engagement.

**Access the Book:** The full text is available for reading and sharing here: [Read the Book]

(<https://www.calameo.com/books/004667637f8fd06cdf101> )

**Join the Conversation:** This book serves as a call to action for broadcasters, clergy, and laity to reflect on the current state of Catholic radio in Colombia and collaborate towards a more connected and impactful future.

## [bdcx-news] Radio 1212 (Operation Annie)

At yesterday's meeting of the Reading International Radio Group I promised to post some further reading about "Twelve Hundred Twelve", the US Army's psychological warfare station that broadcast in German from Radio Luxembourg's longwave transmitter in the last five months of the Second World War.

Unlike most covert radio operations of the war, which did not have their stories told until some (or many) years after the war, Time magazine ran a piece on 1212 Sender in early 1946: <https://time.com/archive/6790186/radio-operation-annie/>

Brewster Morgan, who was 1212 Sender's programme director, wrote a lengthy press article about the operation, published in the Saturday Evening Post on 9 March 1946:

[https://the.hitchcock.zone/wiki/Saturday\\_Evening\\_Post\\_\(09/Mar/1946\)\\_-\\_Operation\\_Annie](https://the.hitchcock.zone/wiki/Saturday_Evening_Post_(09/Mar/1946)_-_Operation_Annie)

An extensive article on the station was published in Electronics Illustrated in 1968. Go to page 89: <https://www.worldradiohistory.com/Archive-Electronics-Illustrated/Electronics-Illustrated-1968-09.pdf>

Disc recordings of most or all of 1212's broadcasts have survived in the US National Archives. They are available online on the website of the US Holocaust Memorial Museum, which provides English summaries of each one:

<https://collections.ushmm.org/search/catalog/irn722297>

(Chris Greeaway, BDXC News via WOR)

There's a 1 minute 17 seconds video with commentary here from the Army Pictorial Service if it wasn't shown yesterday.

*"Radio Luxembourg operated by the Allied Forces' Psychological Warfare Division to break down German morale and induce Nazi troops to surrender during World War II. The Radio Luxembourg station in Luxembourg. U.S. Army soldiers in the recording studio. They read information from a document over the microphone. Other soldiers seated inside. Towers at Radio Luxembourg, the most powerful long wave station in Europe. A man at the controls. officers check the wavelengths. for various locations of reach. The Radio Luxembourg newsroom. Army Intelligence and other military sources prepare*

*material for the especially prepared German broadcasts. The recording studio: A soldier operates controls. Two soldiers seated at a table. They read from a document into a microphone."*

## [WOR] Gander VOLMET to be decommissioned next month

<https://www.navcanada.ca/en/flight-planning/service-notices/2025-06-12-gander.aspx>

Flight Planning Service Notices  
2025-06-12 Gander  
Notice of Change  
Air Traffic Services (ATC/FSS)

Decommission of VOLMET Service provided by Gander International Flight Service Station - Gander, NL

NAV CANADA, the country's provider of civil air navigation services, conducted a review of the requirement for In-flight Meteorological Information (VOLMET) Service provided by the International Flight Service Station (IFSS) at Gander, Newfoundland and Labrador.

The review determined that the removal of the VOLMET service will not have a material impact on stakeholders and would not be a material change to the services provided by NAV CANADA to the aircraft transiting the Gander Oceanic Control Area (OCA).

Aviation technology has evolved to allow suitably equipped aircraft to acquire the required meteorological information directly from alternate sources. This has alleviated the need for pilots to monitor a scheduled VOLMET broadcast on a high frequency (HF) radio.

Aircraft not equipped to receive meteorological information via alternate means may continue to request necessary weather updates from Gander IFSS via the North Atlantic (NAT) family of HF frequencies.

This change will take effect on 12 June 2025 at 0901Z Coordinated Universal Time (UTC). The appropriate aeronautical publications will be amended.

For further information please contact:

NAV CANADA  
Customer and Stakeholder Services  
151 Slater Street  
Ottawa, ON K1P 5H3  
Phone: 1-800-876-4693

## Interesting technical website from PE1ABR

Hej, som vanligt när jag tänkt göra något vettigt vid den stationära hemmadatorn, som att betala räkningar, brukar jag hamna på något totalt ovidkommande under på tok för lång tid... I vilket fall, detta med ferriter är ju intressant, så varför inte?

Här fann jag att Walter, PE1ABR, samlat all världens info om tillverkare, med alla möjliga detaljer:

<https://pe1abr.nl/ferriet.htm>

En massa annat också: <https://pe1abr.nl/index.htm#qmenu>

Nu åter till verkligheten.

(Hermod Pedersen)

## Narrowly Surviving Titanic: Harold Bride's Story

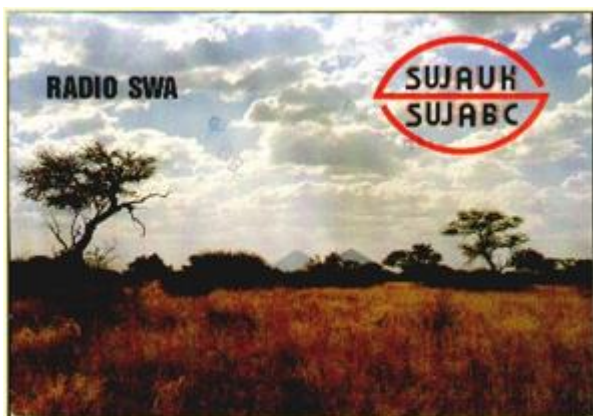

<https://www.youtube.com/watch?v=JcJdlSBsj5Y>

(One of the comments)

Brilliant video! It's such a sad tale and yet the young man survived. He would live with those memories forever. Thanks for helping us to know this personal story and remember this tragedy so vividly.

## [WOR] Namibian Broadcasting Corporation (NBC) Observations.

I am on holiday/vacation for the next three weeks here in Namibia. Staying with extended family on a farm near the town of Mariental which is around 180 miles south of the capital Windhoek. This morning I have been listening to the various frequencies of the state owned Namibian Broadcasting Corporation on FM but which may be of interest to those who used to listen on shortwave, as I did as a youngster when living in South Africa during the 1980s.

NBC is the public broadcaster of Namibia. It was established in 1979, under the name South West African Broadcasting Corporation (SWABC).

QSL: <https://k6eid.com/SWA.htm>

My location here is very remote and its a struggle to even pick up the NBC stations using the main transmitter at Stampriet although in town the commercial stations can also be picked up via the lower powered transmitter in Mariental itself. So this morning (Friday 9th May, 2025) I turned my radio onto the main NBC National FM (English Service) station on 92.8. Opened up at 3.57 UTC with the National Anthem then news briefing followed by an hour of local and international news on this world at six. Only one announcer for most of the hour but there was a lady who read the sports (who I also heard later in the German service). Reports of the President visiting Angola, international news about the new pope and about the USA cutting aid to Zambia because they accuse the Zambian authorities of charging what should be free HIV medication to the public. Sports and weather (not detailed just "hot in the centre, very hot in the south and hot with sandstorms on the coast). Went on to report on more detailed domestic news, for example of the on-going case of land reform as in many other Southern African states. Main domestic news at 7 (0500UTC).

After the news I then tuned into the German Service Funkhaus FM on the frequency of 96FM. Although I can understand English and Afrikaans fluently I was very surprised of how much of the German service I understood! Farming reports, a commercial for a local supermarket, the sports report from the same lady who had read out the sports news on the English service. Although she had a German sounding name her German report sounded as if it was being spoken from a non native speaker, and then at the bottom of the hour at 0530UTC there was the international news headlines from Deutsche Welle. After the DW news (listeners were advised to go to their .de webpage for more news) there was some talk about the weather (hot and sunny of course) then they went onto an environmental report from Bayern state radio in Munich.

So I then tuned into the Afrikaans service Hartklop FM on 89.7 which consisted of two gentlemen talking about the best way to keep snakes out of ones home! And then went onto the subject of eating crocodile meat and of activities taking place on the coast. All in a very upbeat and 'jokey' manor. The main news in Afrikaans at 0600UTC (8am local time) was an exact word for word copy of the English news I had listened to an hour ago only translated of course. The weather however was more detailed and even consisted of weather reports from cities in Angola, Botswana and South Africa. I am a native English speaker but I actually found following the news in Afrikaans much easier. After the news I had to turn off my FM set to go down to breakfast.

I did bring along my shortwave set but I haven't used it for years and when I turned it on it did not work so I am going to go into town and see if I can purchase a shortwave radio there and see what I can pick up in this very remote location with no electrical interference like I have at home in Scotland! As for my cousins who live here they also remember the shortwave service well. It was the only mode of listening at a time before they got satellite TV and that is how they now keep up with the news today which includes all the NBC Radio services.

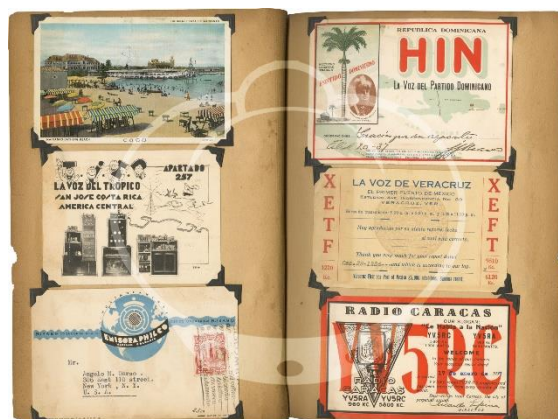

There has always been talk about bringing back shortwave to the NBC but I think the costs would be way over the top. It is clear just by listening that the operation as a whole is very low budget although professionally done non the less. But even the NBC themselves say that only about two thirds of the population can pick up services clearly on FM so you can never tell what may happen in the future! They also advice that by registering to the 'NBC Plus' app you can listen to all the NBC services and watch all the NBC TV stations and I can confirm that it actually works pretty well but it can never replace shortwave in locations like this where internet access is patchy at best and pretty expensive for the local population. Anyway when I get that shortwave radio I'll report back from what I can pick up here.

Thank you and good day from the Hardap region of Namibia (but usually Robert from Glasgow, Scotland.)

## Archive of international QSL cards, letters, and certificates, and other radio related documents from a radio hobbyist, 1936-1938

N.p.: N.p., 1938. Archive of 148 QSL cards, 25 QSL letters, two QSL certificates, and a QSL bi-fold, as well as various other international radio ephemera from over 50 countries, housed in two generic scrapbook bindings, with other QSL cards and ephemera laid in, from dedicated radio enthusiast, Angelo Durso of Manhattan, 1936-1938, the majority of which dates from 1937.

<https://www.biblio.com/book/archive-international-qsl-cards-letters-certificates/d/1512253414?srltid=AfmBOor-PH6wKz5shbPdNaAGSk --Xib7My3FwCzhuxNVat5VWNIEBUl#gallery-2>

## DX nostalgia by RFK

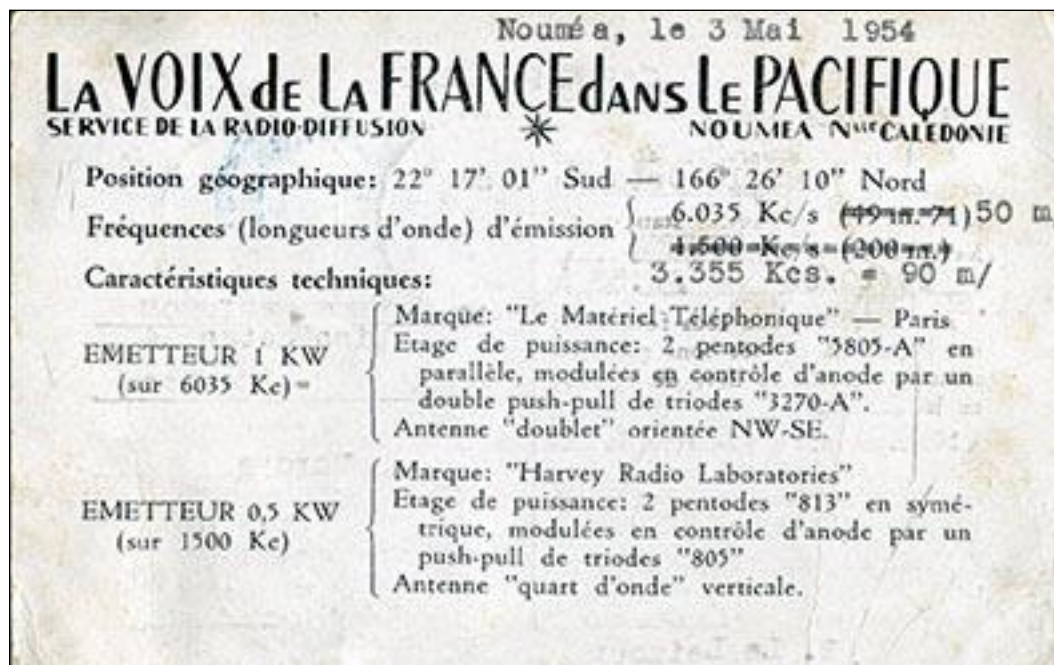

Hello all, it's DX nostalgia time again! Tell me, how do you store your QSLs? After all these years I still haven't put all my QSLs into binders. Some pennants decorate the walls but most are stuffed away in boxes and bags. All the time I say to myself: tomorrow I'll take care of this and get my QSL collection a bit more organized. If nothing else it helps when I am trying to find something special for this column.... But it seems like tomorrow never comes. I still have to look around quite a bit to find what I want. So it's great that other DXers have taken better care of their collections and I am happy to show some of their QSLs in DX nostalgia.

As the habit of answering reception reports by digital QSLs became more common I used to print out the emails, just to have them ready for the binders. You know, that project which I was going to start tomorrow.... But as time went by and more verification emails arrived I even stopped printing them out. I felt safe to know they were saved to my hard drive. I even saved them in a special QSL folder in Outlook. After the latest Windows update, guess what happened? All of a sudden Outlook didn't look the same anymore. All my folders were gone and everything was saved in one big archive. Not only that. I had an old file with thousands of mails from way back when. Eventually it got full so Outlook stopped working. With the help of a computer-savvy friend a new file was created for Outlook. I could still access the old one although I could not delete anything from it. Now it seems like the old folder has lost contact with Outlook, taking a lot of eQSLs with it into obscurity. It's a pity because some of these eQSLs came from stations which are no longer operating.

Is it any wonder I prefer physical QSLs?

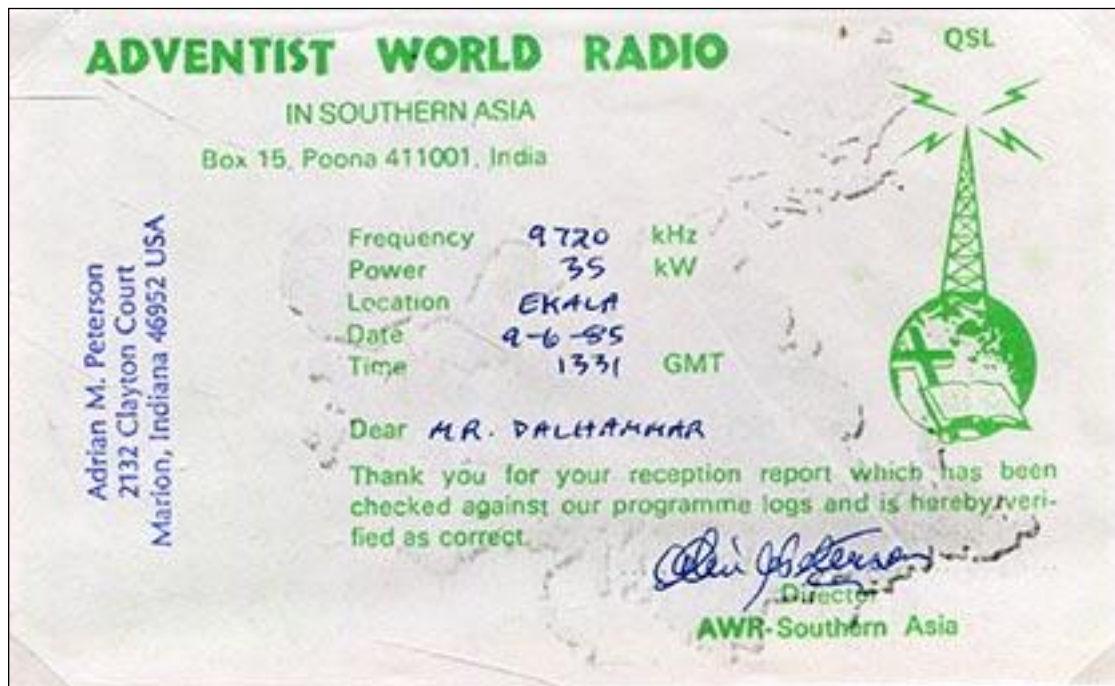

The other day I started reporting stations from my backlog and if I get any QSLs I will be sure to print them out. But how do you handle communications via Facebook, WhatsApp and similar resources? I know that there are people who count a thumbs up to a reception report sent via Facebook as a QSL. But how do you save it? Do you take a screenshot and print it out? Oh, those wonderful days of snail mail....

In 1954 this wasn't a problem. That was the year Bengt Ericson BE got this QSL card from La Voix de la France dans le Pacifique, operating from New Caledonia. A station which has now sadly left SW.

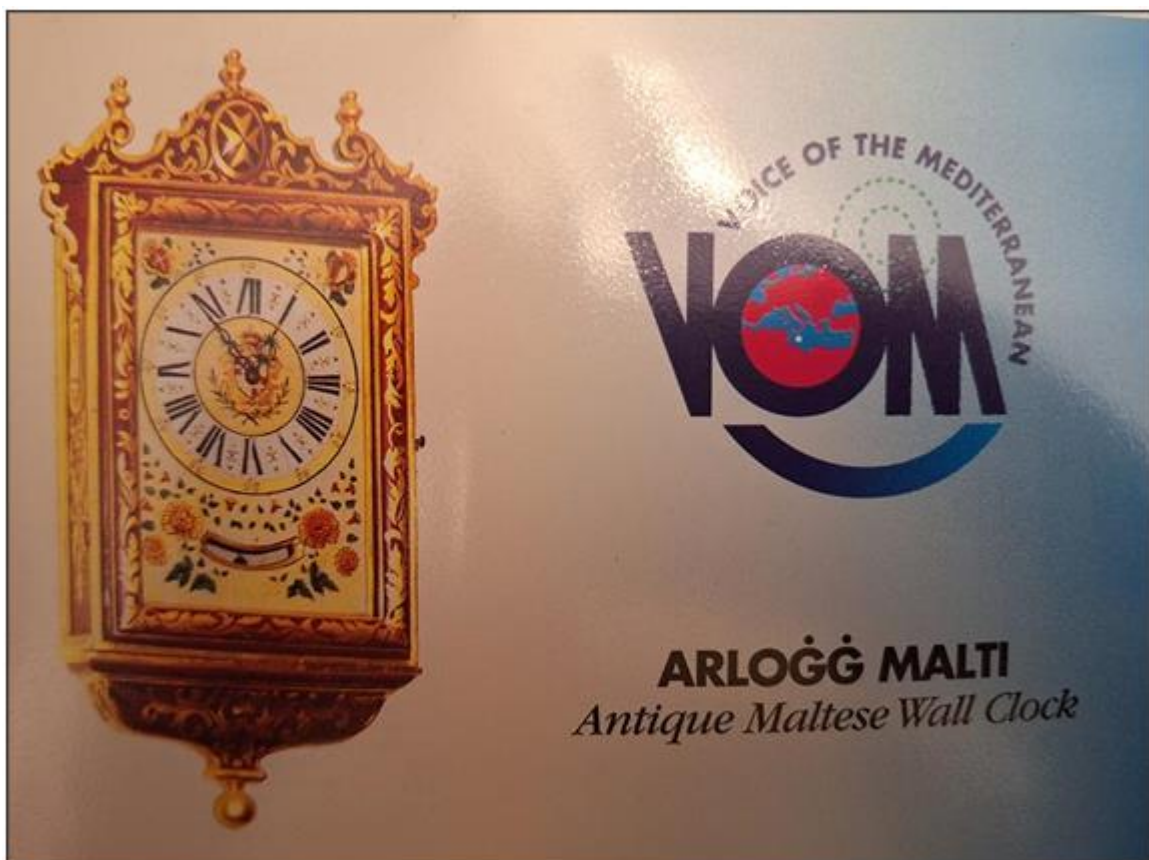

We all know the name of Dr. Adrian M. Peterson through his work for Adventist World Radio, his Wavescan radio programme, his writings and not least for many of the QSL cards he has provided over the years. Here is one which Bengt Dalhammar BD received in 1985 for a reception report of AWR Ekala.

Below we see the QSL card which Angelo Anastasio received from Voice of the Mediterranean in Malta. It shows an antique Maltese wall clock.

Here we have a QSL card from the collection of yours truly. Radio New Zealand, received in 2012 and reported on 11720 kHz. Yes, I will put it into a binder. Tomorrow....

Over the years many DXers have worked in radio. For some it has led to a permanent career in broadcasting. I wonder if there are any DXers still working in the radio industry today? Jan Edh JE received the letter you see on the next page from DXer Jorge Garcia Rangel of Barinas, Venezuela. It verifies the reception of Radio Amazonas in Puerto Ayacucho, received on 4940 kHz. Jorge also offers help to get QSL from other stations in Venezuela. He was at the time working at a local FM station. I don't know whether Jorge continued in radio. Today there are sadly not many stations left operating in Venezuela.

My friends, your comments and contributions to DX nostalgia are as usual most welcome. Please mail me at [info@rock.x.se](mailto:info@rock.x.se) if you want to share something with us. It would also be great to hear a little about your DX experiences of yesterday and today. Maybe you have some interesting story to share? Take care and stay safe, 73 & GOOD DX!

Mr. Jan Edh.  
Fiskaregatan 9,  
S-824 52 Hudiksvall.  
Sweden.

Barinas, May 17, 2002.

Dear Mr. Edh,

In first place, excuse me for my possible errors on the present letter,  
Thanks! I don't speaking English very well yet.

My name is Jorge Garcia Rangel, I am 34 years old, single and been  
a Dx-er since 1985. My profession is Economist but also I work as radioanouncer and  
independent programs producer in a local FM radio station. Thank you! for your reception  
report for Radio Amazonas. The seal on Qsl Card is belonging to Radio Continental from  
Barinas, because it's station and Amazonas are of same owner, Mr. Angel M. Perez.

I hope in the future I can help you with others stations from my  
country Venezuela, if you can listen from Sweden. My receiver is a Sony ICF-SW7600  
Digital, with an antenna multiband dipole of 12 meters.

Finally, again Thanks! for your patience, from Barinas, Venezuela.

Cordial 73's.

Sincerely,

Nombre: Sr. Jan Edh.  
Dirección: Fiskaregatan 9, S-824 52 Hudiksvall.  
Suecia

Agradecemos su Reporte:  
del día 09 de Diciembre de 19 99 en la Frecuencia 4.940 KHz  
Gracias por tan valiosa colaboración.

P.I. Radio Amazonas La Radio  
C.O. Puerto Ayacucho, Estado Amazonas.  
VENEZUELA
