CLANDESTINES

To tell an exact frequency for these stations is difficult, since they use several different frequencies to avoid QRM from the opposite side.

Here however is some notations:

R Guazapa seems to have stabilized on 9850 0130-0200, but check 9800-9900

R Farabundo Marti 7030 7048 around 0100, but check 6900-7100

R Venceremos 0230-0330 check 6200-7100, also noted on 3800!

LV de la Libertad 6895 until 0214

LV de Nicaragua Libre 5750 2310-0010 5770 0412-0455 Check 5700-5800

LV de Sandino 6220 2305-0002 0402-0500

R Miskus 6870 6992 noted until 0125, 2354-0217

R 15 de Septiembre 5565 6200 6510 6900 7050 7000 0230-0342, 0500-0611

LV de CID has several transmitters: 5106, 7352, 7410, 7465 and 6850. Also buys time over Ecos del Torbes and R Clarin.

Sorting out the Central Americans: The three Costa Rican USB transmitters are apparently shared by 6 different stations, whose sch seems to correlate.

No 1. Used only by LV de Sandino

No 2. Used by LV de Nic Libre and R 15 de Septiembre

No 3. Used by Music jammer, R Miskus and LV de la Libertad

At a later date at least 6 different transmitters operated simultaneously:

R 15 de Septiembre on 7000, 6900, 6200 & 5565, LV de Sandino on 6220, and

LV de Nic Libre on 5770. 4 of them were USB: 6900, 6220, 6200 and 5770.

2 were DSB: 7000 and 5565.

All 4 transmitters of R 15 de Septiembre are probably in Honduras, also used by R Miskus & possibly LV de la Libertad.
