Redaktör: Gert Nilsson, Rodervägen 30, 890 33 BONÄSSUND tfn 0660/58083

En del medlemmar har efterlyst förra veckans bulletin. Brist på bidrag gjorde att jag sköt på det hela en vecka. När detta skrivs har jag fortfarande stor brist på tips. Emellertid har en del härt av sig med QSL-anmälningar. Dessutom finns som planerat SB:s SW-Info och som en liten extra aptitretare inför Asienssäsongen en hörighetslista för Indonesien sågnerad HGV.

JAN SVENSSON sänder ett tjusigt vykort med en äkta skånsk "mölla" och meddelar R Cobiya-4856 brev efter 1 år v/s Nestor Murillo Pardo, Jefe de Prensa. Dessutom R Tachira -4830 kort. JS är nu åter i Örebro, Olofsbergsvägen 4, 70229 Örebro.

SUNE MARTINSSON har hängt upp nya antenner, 30 resp 40 meter. För FM finns numera en 8-elementare som verkar fungera fint. Telefonnr till SUM:s nya QTH är 0431/40114. 3:e veckan i augusti är planerad som en rekreativvecka på Öland, men det verkar inte helt omöjligt att någon antenn dras ut på Alvaret..... Sune har fått brev+kort från Radio Los Andes-5030, kort från Senegal-4090 och Libyen-11816. Även La Voz del C I D -5106 har sänt ett kort.

BIRGER NORGRÉN ringer från sommarstugan in följande: Radio Columbia-4825 kort, TIPC-5055-kort, brev, dekal, broschyr och Radio Dublin-6910 kort, brev, info.

OLLE ALM gläds åt ett långt brev, rekat, från La Voz del Tropico - 4458. V/s var Oskar Ustáriz Arandia, director. I brevet uppgavs effekten till 250 watt.

REPORT FROM PERU part XVII (July 12-23)

All times in UTC

- 3955.7 R Quiruvilca, Quiruvilca, La Libertad, Peru now in this range July 15 0030. This is the old R Huamachuco that now moves to this mining center, located between Huamachuco and Trujillo. Announces 3950 kilociclos, but varying from 3954-3956, some days down to 3935. Back in Dec 83 RWP received a verie from R Huamachuco stating that in the near future they would move to this mining center. Now, 7 months later, they move as planned. In Huamachuco there is now only a MW-transmitter left. Slogan "R Quiruvilca, la pionera". Cd at 0300 (Sun, Mon UTC), announcing to be back at 1000, with a military march that has a relation to the battle of Huamachuco, one of the most important battles that the peruvians fought against chilean invaders, last century.
- 4195.9 R Santa Rosa, Yacuma, Beni, Bolivia. This rare station is heard as early as 2200. As usual lots of canned echo-IDs (The echo made me mistake it for Santa Rita), as "R Santa Rosaaa, desde Yacuma". Very nice music too. At 2335 July 15 I heard the following ID: "...te damos la hora en nuestro estudio, 19 horas, 35 minutos, transmite R Santa Rosa, en forma experimental, en 4196 kHtzs, banda de 60 metros, onda corta". Heard Sundays (UTC Mon) until 0245cd.
- 4584.8 R Litoral, Cochabamba, Bolivia reactivated after exactly one year and 15 days. Heard with very faint signal July 13 at first check 0127, until 0230cd, but remember that this day solar flux was 90, and A-index was 45, acc to WWV!
- 5072.9 R San Juan de Caraz, Caraz, Ancash, Peru heard here July 22 at 2230. First believed to be San Juan de Chota, x5274.3, but instead it is this one. The day before still heard on 4898.8, so this day was their first on this new frequency. Very good power, and now surely in the clear, so now they will be heard elsewhere. Going now until 0230.
- 5273.5 R Moderna, San Marcos, Cajamarca, Peru. A new stn first heard July 22 at 2300 after stn below finished its daily transmissions. Some IDs heard: "Desde la provincia de San Marcos, transmite R Moderna, un mensaje de amistad en los cielos del Peru". "Esta es R Moderna de San Marcos, Cajamarca, transmitiendo en los 5270 kilociclos, para todo el Norte del Peru". Stn announcing that 15 days ago they made some tests from a bakery store!, but now they are well established in its studios, located in "Jiron Alfonso Ugarte 331, a media cuadra de La Plaza de Armas de San Marcos".
- 5274.3 R San Juan de Chota, Chota, Cajamarca, Peru. First noted July 14 at 0000 with 30dB over 9 signal. Very well modulated too, one of best heard here in Peru. Plays lots of cumbias. Seems to be testing, because sometimes only open carrier. Beginning of cd-announcement, always around 2300 is: "Desde Chota, transmite R San Juan de Chota, 5275 kilociclos, banda internacional de 60 metros. Nuestros estudios se encuentran ubicados en el Pasaje Cruz Ramirez, frente al hospital de esta ciudad de Chota. R San Juan, potencia y calidad, 1000 wátios de super potencia, cubriendo nitidamente Chota y a nivel nacional (music)..."
- 5906-5910 R Panamericana, La Paz, Bolivia earlier reported here is a spurious, confirmed July 20. This is 195 kHz below 6105, and the other 195 kHz higher than 6105 is coming through on 6300.

JCC

SURINAM Media Network reported some time ago that this country is going to introduce a service to Holland from August 15. This is to be via R Bras, Brasil on 17755 with 250 kW transmitter. Mon-Fri 1800-1900, and Sat-Sun 1430-1530.

FK/DSWCI

URUGUAY An actual scene of active SW-stations:

6034 La Radio 1300-0500

6045 R Sport 0930-0300

9620 SODRE 0900-0300

11835 R El Espectador 0900-0400

The other listed stations is not active.
