

# SHORT WAVE BULLETIN

890912  
nr 1091  
nxt nr  
890926

Red: Nils Jakobsson, Nordkapsgratan 7, 164 35 KISTA. Tel. 08-751 87 46.

Dags för höstens skrivelser av SWB från Stockholms utmarker. Inte alltför märkvärdiga cx.

Nils Ingelström har ny adress (och ny YL; Yvonne): Virvelvindsvägen 41, 161 28 BROMMA.  
Rx-en är med även här - på vinden ....

Torre Ekblom inleder QSL-paraden med R Anhanguera de Araguaina-4905 brev, folder, dekal från v/s Edson Guimares; R Católica Nacional-5030 brev, info, dekal; samt VoA/Tanger-15205 kort och info!

Dan Olsson med (tidigare?) omöjliga LV del Rio Arauca-4895 brev och dekal från v/s Gabriel Cúcuma Niño, (oläslig titel på ditt kort DO); samt lite mera mänskliga R Centenario-4855 brev, dekal, bokmärke; R Japan-21690 kort m.m.

Björn Fransson gläds över genomslagskopier (som kanske hamnat hos fler SWB-are?) från LV de Yopal-5050 v/s Blanca Lilia Silva G. och Martha Cecilia Socha P. som också bifogade en bunt dekaler; Voice of the OAS-15160 kort och broschyrer på EE och SS.

Roland Åkesson har varit på "chansnatt" på Söderåsen, och dessutom fått QSL: KVOH-17775 kort, info m.m.; KUSW-15560 kort, katalog, schedule; samt R K'ekchi'-4845 med brev, frimärken och vimpel.

Per Erik Tell är just nu ute i busken på repövning. Innan han ryckte in hann han få RFPI-21565 med kort och stencil.

Nils Jakobsson är f.n. utan antenn, men med QSL från sommarens begivenheter: R Centenario-4855 brev, dekal, schedule och bokmärke; R K'ekchi'-4845 brev och pappersvimpel, v/s som tidigare berättar om 2,5 kW i masten och följande sändningstid: 11-17 och 21-03 UTC.

Så är det dags för ...

# SHORT WAVE INFO

Nr 83  
Suppl. SWB  
890910  
nxt nr  
890922

Ed: Stefan Bursell, Finspångsvägen 181, S-602 10 Norrköping tel 011-112172

Yet, another SWI. This time delayed due to lack of info, but now I have a lot of late received info for you all! Besides, over the last 1 1/2 week I've been busy expanding my cable-TV-net to about 45 households now! ALL TIMES IN UTC

- ARGENTINA 7500 R Aurora, Moreno, Buenos Aires province heard July 27th 1600-1700 by Ricardo L. Biselli, Rosario, Argentina. This pirate station identified as: "Esta transmitiendo Radio Aurora desde Moreno, Republica Argentina en su frecuencia habitual de 7520 kHz amplitud modulada". The station was varying from 7475 to 7500. (A commentary from Julian Anderson is: It seems to have a very irregular broadcasting schedule, as I wasn't able to log it). PAMPAS19
- BOLIVIA 4991.1 R Animas, Chocaya heard July 26th 1030-140 announcing broadcast hours to be 1030-1830 and no more says JA. PAMPAS19  
6094.6 An unidentified stn heard here July 27th 1145-1200. Lot of news and adv., it apparently is from La Paz and it is not R Cosmos de Cochabamba. Heard several times that week, but impossible to get a clear ID, absolutely covered by VOA up to 1130 says JA (Julian Anderson) PAMPAS19  
The staff of Paititi 4865n is: Propietario... Ancir Vara Cuellar Director... Dorian Arias Montero Radialistas... Esther Semo Suarez, Dalia Malala Malale, Jorge Medina Monasterio, Wilson Villaroel, Nicolas Panama Salazar, Enrique Ibanez, Rotana Bertol (if I got the cryptical gothic letters correct).
- BRASIL 6020 R Gaucha, Av. Ipiranga 1075, Azenha, 90069 Porto Alegre. DG: Ricardo Ferro G. says stn. Also on 11915.  
4855 R Por Um Mundo Melhor, Avenida Brasil 2770. DG: Odilon Lagares says stn. WRTHLANL8
- COLOMBIA 4975 Ondas del Orteguzaza, px 1000-0300, power SW is 10 kW says stn. WRTHLANL8
- COSTA RICA 9725 R Lira Int., AWR-px: 1000-1415, 2030-0100 says stn. WRTHLANL8
- GUATEMALA 5955 TGNC R Cultura has 250W on this frequency. WRTHLANL8
- PERU 4921.8 R Ondas del Titicaca heard July 20th 1025-1040. Good reception in the mornings, not heard in the evenings, so I think they are operating with a reduced schedule says JA. PAMPAS19  
6191.7 R Cuzco heard July 27th. Reactivated after some time of inactivity says JA. PAMPAS19
- URUGUAY 6077.2 La Voz de Artigas heard here July 25th says JA. PAMPAS19
- VENEZUELA 4780 La Voz de Carabobo has been off the air because they are changing to another transmitter. They should be on the air again from beginning of August says Jairo Salazar R. This from TK. THE RADIO NEWS13  
4850 The reason why R Capital left the air on 4850 is due to interferences from its new FM 104.5 MHz. The problems will probably be solved during August and then the station will be back on the air on 4850. All according to Manuel Rodriguez Lanza. This from TK THE RADIO NEWS13  
4940 R Yaracuy intends to reactivate its SW-transmitter according to information supplied by the Director in a phone call. However R Continental, Barinas is now on 4940 so that means a mess says Manuel Rodriguez Lanza. This from TK TRN13  
5000 YVTO changed its frequency on July 20th from 6100 to 5000 kHz. Power is 1 kW says Manuel R. Lanza. This from TK TRN13

BOTSWANA R Botswana changes frequency, since June 19th the 60mb outlet has been observed on 4830 instead of 4820. Schedule is 0350-2100.  
DX SPREAD via Chris Hambly. This from OA DXA8

NEW ZEALAND RNZ International is to use a 100 kW Thompson CSF transmitter to be located on the Rangitāiki settlement in the centre of the North Island, and will use two aerial systems covering 9-18 MHz to cover Cook Islands in the east to Papua New Guinea in the west. Stage 2 will include a further 100 kW transmitter an aerial system covering 6-12 MHz with coverage of Australia and the Far East. Operations are scheduled to commence in January says Arthur Cushen. This from OA DXA8  
Radio for the Print Disabled, P.O. Box 360, Levin, NZ, has been granted a short wave licence by the Ministry of Commerce and will relay 2XA Print Disabled Radio Levin in the 75m-band 3900-4000 kHz using 990W. The frequency not yet assigned, it will relay 2XA 1602 kHz operating Sunday, Monday, Thursday 0630-10000. Tests have been carried out and broadcasting will commence as soon as a frequency has been assigned says Arthur Cushen. This from OA and TK DXA8

TONGA 5030 R Tonga has been off air since May 3rd. Valve failure in the transmitter final amplifier has caused the shutdown. Mr Indiran, CE of TBC, expects to have 5030 operating again by the end of August. They have not used any frequency other than 5030, nor do they expect to in the immediate future. This from OA DXA8

MARSHALL ISLANDS Station Manager of WSZO Majuro, Sam Jordan has confirmed by phone that their SW-transmitter is still unserviceable. They left the air late 88 as a result of transmitter problems and a faulty aerial tuning unit. Replacements still awaited, but Mr Jordan could give no estimate of when they would be back on shortwave. This from OA DXA8
