

# SHORTWAVE BULLETIN

Issue no. 1807, Sept 28, 2014.

Deadline e-mail next issue: 0900 UTC, Oct 12, 2014.

Detta nummer innehåller väldigt mycket tips. Dave Valko har sammanställt en mastig logg från sina Micro DX expeditioner. Har sorterat hans logg i frekvensordning istället för landordning för att det skall bli lättare att följa.

Monitoring av stationer är det flera som håller på med. Möjligheten att logga in på SDR mottagare på andra kontinenter har gjort att DX-are som bor i tätorter med mycket störningar också kan få till bra loggar. Christoph Ratzer bifogade en vacker bild tagen på en cykeltur i omgivningarna där han bor i Salzburg. Vackert som i en saga.

JOE har åter skannat in en del gamla fina QSL. Denna gång från Nils Olssons samling. Kul att dessa gamla fina QSL kan bevaras. NO bodde bara någras mil från mig och vi hade många trevliga DX-träffar ute i Södåkra på 60-talet. Så det är lite nostalgi att beskåda de fina svar han erhö.

Slutligen, tack för alla bidrag!

Keep on ....

## QSL, kommentarer, mm.

**Christer Brunström:** Just hemkommen från en vecka i London hittades några nya QSL: **Radio Belarus 11730** kort, **Die Andenstimme 7365** med kort och brev och **WRMI 15770** med kort föreställande betande kor under elledningarna till sändarstationen i Okeechobee.

**Lars Skoglund:** HCDW2 **Radio Cenit**, Portoviejo 4770 svarade med brev efter en follow up på en gammal rapport. V/S var Dr. Dumar Iglesias Mata, Concesionario. Han meddelar att stationen lämnade tillbaka sin AM- licens (1160 KHz) i januari 2014 och att stationen nu endast finns på nätet.

**Christoph Ratzer:** Enclosed a picture of our village from last weekends mountainbike tour. (Thanks a lot for this nice picture of your surroundings! /Thomas)

(I couldn't resist to include Christoph's beautiful picture marked with Tennengau. Wikipedia says: *Der Tennengau ist eine Landschaft im Norden des Bundeslandes Salzburg. Als politische Verwaltungseinheit wird er nach seiner Bezirkshauptstadt Hallein als "Bezirk Hallein" bezeichnet. Der Tennengau grenzt im Norden an den Flachgau und erstreckt sich dabei beinahe bis zur Landeshauptstadt Salzburg. Im Süden trennen ihn das Tennen- und Hagengebirge vom Pongau. Im Westen grenzt er an den bayrischen Landkreis Berchtesgadener Land, während im Osten der oberösterreichische Bezirk Gmunden liegt. Der Tennengau wird bereits von Bergen dominiert, nur Richtung Norden öffnet sich das Salzachtal ins Salzburger Becken. Im Süden und Westen ragen die ersten Gipfel der*

*Nördlichen Kalkalpen wie der Hohe Göll oder die Berge der Osterhorngruppe wie der Schlenken oder der Schmittenstein empor, wobei Letztere der Flyschzone der Voralpen zugeordnet werden.*

Just one more comment. We stayed in Salzburg about 10 years ago and at the same time also visited Kehlstein, a mountain (1,835 m) with its *Kehlsteinhaus (Eagle's Nest)*, which offers spectacular views to its visitors. The roads from Salzburg up to the Eagle's Nest parking place on the hill side was crowded with mountain bikers or road racers. A perfect training area. /Thomas )

**Robert Wilkner:** Watching "The Roosevelts: An Intimate History" by Ken Burns. Noticed the classic radios featured, when people pictured were listening to FDR's "Fireside chats", often had shortwave bands. Rain and thunderstorms complicated dxing for the last week.

**Anker Petersen:** I just returned from a very successful Conference of the European DX Council in Nice and Tende, France. Being back, I checked the 60 mb, but it was the usual poor reception for Latin America on my AOR AR7030PLUS with 28 metres of longwire.

**Dan Olsson:** Hej! Här kommer lite logningar ifrån min semester i Gräsmark tillsammans med frun och hunden. Tyvärr var inte kondsen lika bra som fjoråret och jag var tröttare så utfallet blev bara 40-50 rapporter på två veckor.

Hargeisa carrier is right on-frequency, but with more or less continuous LSB QRhaM in Spanish, also right on 7120.0 with RH as BFO; as amateurs are totally entitled to do not only in the Western Hemisphere, but everywhere now with RH the intruder. 0329 add some CW QRhaM, from CO8RR calling CQ a few times; OC lasts until 0331:30 NA starts; 0332:30 Somali sign-on; 0333 Qur`an; 0337 talk; initially fair signal gradually fades, but still in, to very poor level at 0355. Not really rare with 100 kW, but still exotic, and I haven`t heard it in a long time since I habitually seldom monitor at this hour. Too bad there`s no English now, but presumably still at 1320-1340v, when only in deep winter do we have a remote chance of hearing that in deep North America. BTW, the times are wrong for this in WRTH 2014: says signs on at 0300, but it`s been 0330v as long as I can remember; says SW sign-off is at 1830, but Kouji Hashimoto in Japan has tracked it almost daily for many months varying slightly around 1900* except later in Ramadan. Also claims English news is at 1300, and 1930 (after SW closes, MW and FM only then) (Glenn Hauser, OK)

7345	Sep18	1249	poor signal with flutter, songs; 1255 seems dead air as Navy MARS net starts up on exactly same frequency with this as BFO for USB [see USA]; 1300 music has resumed. Presumed Thazin Radio, a rarity here, per Aoki schedule including 1230-1330 daily in minority language Mon, 50 kW, 356 degrees from Naypyidaw. Tnx to Ron Howard tip that CNR1 blockage is missing. Unlike with Latin American info preserved years after stations disappear, Aoki is right up to date on this, showing the CNR1 1100-1805 broadcast via Beijing off as of Sept 14. It was aimed 175 degrees and must have made a mess in Myanmar, but I wouldn`t assume it`s gone for good, so get Thazin now! (Glenn Hauser, OK)
7345	Sep20	1305	Thazin Radio (presumed). Daily well heard without the strong presence of CNR1. Have yet to actually note a positive "Thazin Radio" ID. Did have moderate USB QRM from MARS net traffic at 1305, on Sept 20, as Glenn previously also heard on 7345. Fair on Sept 22 - <a href="https://app.box.com/s/8ln599cgr73m1mfxqvro">https://app.box.com/s/8ln599cgr73m1mfxqvro</a> (some music at end of audio); 1250-1330*. BTW - Am unable to hear 6165 (Myanmar), with too much QRM. In the past I could detect them at 1430 (English), but recent checks was unable to hear them under China. Interested to note the following via Aoki - 6165 Myanmar Rakhine Broadc. Stn. 0930-1430 1234567 Burmese. So the name Rakhine Broadc. Stn. is still being kicked around. Not longer Thazin Radio? Who knows for sure? Bad news - Sept 23 found 7345 with strong CNR1 at 1106 and subsequent checking. Blocking Myanmar, which was only faintly heard underneath. Am so glad I recorded Myanmar yesterday with decent reception (no CNR1). Was great while CNR1 was recently off the air. (Ron Howard, Calif., USA)

17820 Sep21 1327 Chuck Albertson explains why I was hearing football already in the second half at 1327 Sept 21 on 17820 via SOUTH AFRICA: ``Glenn, The RTE special today was the All-Ireland Senior Football Championship, between Kerry and Donegal, which didn't start until 1430 (I was watching the match at an Irish pub downtown). What you heard earlier was the minors match, also between Kerry and Donegal (by coincidence). Kerry teams won both championships. Next week's special will be the All-Ireland Hurling Championship, starting at 1600 on Saturday [Sept 27]. It's a replay, as the two teams (Kilkenny and Tipperary) played to a draw in the championship match two weeks ago. Don't think there will be a supporting match, as Clare won the under-21 hurling championship last week. Chuck Albertson, Seattle`` BTW, news has just broken that RTÉ will be closing down LW 252 kHz on Oct 27:

### Loggings from 25 August - 25 September

**Dave Valko:** First of all, I have to apologize for the size of this report and any typos than may have crept in. The large size isn't due just to the loggings but also several micro-DXpeditions and continuing observations which I thought may be of some interest. I've included links to videos I've posted as well.

3394,72 PIRATE (NA) '**Old Time R.**' Signal already here at 1940, and mx plainly audible during a peak at 1943. (27 August)

4774,98 BRAZIL **R. Sora de Congonhas** 0848 easy ZY Pop-like mx, 0850 live M DJ in echo starting w/R. Sora ID. Back to mx, then 0854 canned W anncr, then live M returned w/clear "R. Congonhas" ID 0855:00. 0856 lively song. 0959 canned tlk by diff. M over guitar mx. 0902 M DJ again w/ment of informacao and cont. tlk. Good strength but noisy. (28 August)

4845,004 BRAZIL R. Cultura Onda Tropicais (pres.) Upon reviewing the 60mb recordings, found 2 stns on 4845. This had what sounded like a canned discussion between M and W in PT from 2357-2359, then canned anmnt by M until WWCR came on. (25 August)

4845,008 BRAZIL R. Cultura Onda Tropicais (pres.) End of possible rel. pgm, M anncr in PT at 0959 and what sounded like a ment of Manaus at 1001. Canned anmnts at 1002. Fading and a lot of splatter QRM from WWCR. (28 August)

4845,086 UNID. R. Meteorologia Paulista?? Definitely audio mixing in w/4845.004. What sounded very much like a ment of "municipal" during tlk by M anncr at 2355. Sounded PT. M anncr just before WWCR came on. I'm willing to bet both Onda Tropicais and Meteorologia Paulista are both here. (25 August)

4864,8v BRAZIL **R. Alvorada** Nice TC and ID by live studio M anncr between ZY Pop songs at 0850:50. M again at 0856 but all I could copy was a TC, and bom dia. Another mention of Alvorada at 0859:55. Strength wasn't too bad but the modulation was low. The signal varies quite a bit and there wasn't any exact

- pinpoint carrier. Also a buzzing was present, the same as whats on R. Vision and on 4825.  
<http://youtu.be/noDOrUVwG-Q> (28 August)
- 4864,99 BRAZIL **R. Verdes Florestas** 0930 w/midi IS. Nice to hear their IS again. Fair signal and a little noisy. (28 August)
- 5939,849 BRAZIL **R. Voz Missionaria** ZY Pops at 0841 t/in. Sev. men annrcs at 0843 and Rooster mixed w/siren SFX, TC, men laughing SFX, 2 loud TCs at 0847. Very nice signal. And still decent at 0918 w/mooing and bird call SFX during song. The morning DJs took a phone call at 0922 between songs. Found //9664.81 at 0932 w/the 2 DJs still going. (28 August)
- 5965,006 BRAZIL **R. Transmundial** Was getting a weak signal and soft Pop-like mx at 0905. Definite M annrc in PT briefly between songs at 0919:15. M annrc again w/what sounded like another M on the phone at 0923 but fading and pulsing noise. Back to mx at 0926. Have noted a signal here over the past month (never strong enough for audio) and was wondering what it was. Now I know. (28 August)
- 5999,99 BRAZIL **R. Guaiba** Wasn't on at 0847 recording. 0918 ID annmt at t/in w/ment of "...Guaiba, amor...", sev. freqs, and Brasil. Another canned annmt, tango-like song, then M annrc at 0921 past 0927. A lot of slop QRM. (28 August)
- 6024,98 BOLIVIA **Red Patria Nueva** 0950 usual morning nx pgm. Instru. mx at 0952 break, then clear ID at 0953:00, and back to nx w/M mentioning Patria Nueva. Ad/promo block at 0954. Not that bad of a signal and 6030 staying to its own space for the most part. (25 August)
- 6115 CHINA **V.O. the Strait** 1049 break in soft mx for W annmt, //4940. 1054 canned annmt by W, then Pop mx. (28 August)

- 6924,15 PIRATE (NA) **Captain Morgan SW** 0040 w/old R&B songs. Song cut off and abruptly left the air around 0043. Tremendously strong signal. ID per HF Underground. (25 August)
- 9525,9 INDONESIA **V.O. Indonesia** Best audio heard in a very long time. In EG w/phone interview at 1035. W annrc over Indo Pop mx. 1056 end of Pop ballad, canned promo, and 1057:10 ID, then another short feature. Another canned ID at 1059:45, and ID starting the nx 1100:10. (27 August)
- 9565,08 BRAZIL **R. Tupi** 0930 "Voz Libertacao" pgm w/M preaching in a passionate (more like a ghost) manner, //9686.04 9586 was drifting pretty badly from 9586.04 at 0912 up to 9586.26 by 0940. (28 August)
- 9665 CHINA **CRI** Apparently a new freq for the EG pgm w/nx by M at 1002, 1005 ID, and into "People in the Know", // other freqs. QRMing KCBS (just a little weaker), and an extremely weak Voz Missionaria. (25 August)
- 9730 MYANMAR **Myanma R.** 1108:30 start of ABC EG lang pgm. Same pgm at the restaurant as hrd before. "Would you like to see a menu", "Would you like to order now", "Would you like boiled or cooked rice", "Would you like a single or double brew", "Thanks for the use of the towel", "I apologize for any inconvenience", "Thank you, thank you, I'd like a cup of tea", etc. And pgm end. (27 August)
- 9775 VATICAN **Afia Darfur R. (via Santa Maria Galeria, Vatican)** 1929 closing annmts by M, mx, and suddenly off at 1930. Surprised this was coming in as 31m hasn't been doing that well lately. (27 August)
- 9818,64 BRAZIL **R. 9 de Julho** M tlk pgm from 0912. Caught a full ID w/freq and ment of Sao Paulo by M at 0932:25 when it was fading. (28 August)

**MALAYSIA.** On Sept 16, big goings-on in Miri, Sarawak; at various times heard Wai FM (11665), Sarawak FM (9835) and Radio Klasik (5964.7), all via Kajang and //, with coverage of 51st Malaysia Day national-level celebration being held in Miri, with Prime Minister Datuk Seri Najib Tun Razak and federal and state ministers in attendance; several major speeches and a lot of musical entertainment direct from the event. Most enjoyable. Neat audio attached of the ending of a speech. Heard from 1305-1335 (Ron Howard, San Francisco at Ocean Beach, CA, USA)

**MALAYSIA.** Sept 26 with another instance of the Sarawak satellite audio feed not working, resulting in 9835 Sarawak FM) being silent today from 1148 to 1312.

Whereas 11665, normally Wai FM, was carrying the audio feed of Traxx FM instead, from 1148 to 1312. "Evening Buzz" with DJs playing pop songs; 1153-1200 "You are now listening to Reflections," produced by the "Islamic Society of North America" and "brought to you by the Department of Islamic Development Malaysia, JAKIM"; 1200-1203 and 1300-1310 news in English; fair. The usual frequency of Traxx FM (7295) has been silent for some time now (Ron Howard, San Francisco at Ocean Beach, CA, USA)

**PERU.** Peruvian DXer Alfredo Cañote has finally phoned the stn and talked with Eng. David Nieves at **Radio Del Pacífico**, commenting him about the reception. He confirmed they're were transmitting on their usual 9675. Email for reports is: [pacificom@qnet.com.pe](mailto:pacificom@qnet.com.pe)

Per additional comments, it seems, also that modulation is not the level which would be desired for their carrier strength. (73, Horacio Nigro Geolkiewsky, Montevideo, Uruguay via DXPlorer)

### WRTH 2015

Sean Gilbert wrote on Facebook: 24 September 2014:

**WRTH 2015 will be** published, as usual, in early December. This will be the 69th Annual edition! Even though both International and Domestic SW is declining there is still a lot to be heard out there on those broadcast bands, so don't consign the SW receiver to the attic (to gather dust) just yet.

There is a mix of over 200 languages and dialects to get stuck in to, plus the Clandestine broadcasters are always around from politically troubled areas.

Some of these are low powered or broadcasting to a different part of the world and can be a tough challenge to pick up.

All the details you need to stand the best chance of catching these, or any of the other broadcasters (be it LW, MW, SW or FM), can be found in WRTH.

You will soon be able to reserve your copy of the 2015 edition and be one of the first to receive it. Check the WRTH website for pre-ordering details. If the 2014 edition is still showing, try again in a few days time.

### Radio St. Helena

**The following is** from Joe Buch who visited Radio St. Helena a few years ago after their final shortwave broadcast.

Robert Kipp sent me some information on a new RSH web site. He was instrumental in getting Radio St. Helena Day's final SW broadcast on the air in 2009. I have some pictures from my visit there in 2010 which I intend to send to the webmaster. Please pass along to any clubs with which you may be affiliated.

----- Original Message -----

I thought I would draw your attention to our Radio St. Helena page at <http://sainthelena.island.info/radiosthelena.htm> and ask if you have any photos, stories or anecdotes to contribute? I've already had input from Ralph Peters and Tony Leo, but more is always welcome.

WRTH 1975 and 1976 lists RSH on 1511 and also on shortwave 6100 and 11830 with power of 400W. Is this a typo or did they have sw transmitters at that time?

( Jari Savolainen via DXPlorer)

I did some research on this when I was writing my "Broadcasting on the SWs, 1945 to Today" book, and here's what I wound up writing (under "1973"):

From August to November, the St. Helena Government Broadcasting Service carried out tests to determine the feasibility of a service for St. Helenians living on Ascension Island, approximately 700 miles away. The frequencies were 6100 and 11830 kHz. The attempt to establish a link between St. Helena's 400-watt transmitter and available non-professional receivers on Ascension was not successful, however, and the plans were scrapped. The DX press contained no reliable reports of reception of these transmissions in the United States, and shortwave broadcasting from St. Helena was shelved until events brought the station to air in 1990.
