SHORTWAVE BULLETIN

Issue no. 1843, Feb 14 2015.

Deadline e-mail next issue: 0800 UTC, Feb 28, 2016.

Hello all,

It is amazing that we can show a very impressive log in each issue of SWB. Some of you are really active.

For me most of time is spent on mediumwave. My main interest from the start in 1962 has been the Tropical bands. Nowadays very few stations remain and it is not at all thrilling like in the old days to tune over those bands.

MW is much more exciting with lots of stations from different areas most of the day. Late in the afternoon and just before midnight it is possible to log Asian stations. During nighttime, depending on the conds, almost every night something from NA, CA or SA come through.

Interesting news comes from Svenn Martinsen that he on his website has published Geir Stokkeland (c) dx-history fro Arktis and Northern-Norway from the 80'ies. 397 pages in Norwegian! Indeed, very interesting reading.

Keep on

Redaktion: Thomas Nilsson

E-mail: <u>thomas.nilsson@ektv.nu</u>

QSL, kommentarer, mm.

Vi har nåtts av ett par väldigt trista besked som rör två av våra medlemmar. Gunnar Wrange var medlem in i det sista och Arne Härkönen fram till mitten av 90-talet.

Gunnar Wrange, avled den 5 januari 2016 efter just ha fyllt 96 år. Han började med DX-ing redan 1934. Han var medlem i SWB redan på 70-talet

Hans radiointresse var mycket stort och han skulle alltid ha det bäst tillgängliga. Ekonomi var inget problem, då fadern grundade den stora juvelerarkedjan i Göteborg, Wranges, som sedan Gunnar och hans bror drev.

Vila i frid Gunnar och tack för många trevliga telefonsamtal under årens lopp! /TN

AH Arne Härkönen in Memoriam

Vi har också nåtts av meddelandet att vår före detta medlem Arne Härkönen avled den 21.1.2016. Arne var en mycket framstående KV- och framför allt MVDX-are, intresset var främst riktat mot NA. Arne var medlem i ARC och SWB mellan åren 1963-1994 och åtminstone vid ett av våra konvent (i Laxå) var Arne med. Arne blev 87 år. *Vila i frid Arne! /TN*

Anker Petersen: Here are my latest loggings from Skovlunde, where a meteorite from outer space landed last Saturday 6.2. Nobody were hurt.

Lars Jeppesen: Var ute med MKVK i Saxtorp i helgen 6-7/2-16. Antenner: 100 m lw, 400 m lw samt en ALA. Mottagare:SDR-IQ.

Robert Wilkner: Mosquito Coast DX News ... February 13th 2016

Logs from southern California and Florida. Rather poor band conditions this week. Devoted a few hours to band scans producing many of the "the usual suspects" ~ Casablanca a favorite film. ...rlw

Dan Olsson: Hej! Dags att sätta sig ner och skriva lite tips till SWB. Tipsen märkta 6-7/2 är hörda i Saxtorp och övriga via SDXF:s

remote på Öland. Annars her det varit en händelserik vecka då jag både i onsdags och i fredags blev hämtad av ambulansen efter njurstensanfall. Första gången var det på jobb och andra gången här hemma. Ha en sten på 8 mm som ska opereras bort på torsdag inne i Malmö. *(Krya på dig! /Thomas)*

SW lives

I was surprised to see the attached half-page ad in today's *New York Times*, first section, p. A7. Very nice. (Jerry Berg via DXPlorer)

2485 2582U	Feb2 Feb7	1815 0036	VL8K ABC, Katherine, Australia, English, talks, weak (Bernardini) Listening for Bermuda Radio, ZBR, tnx to tips from DXLD yg members Stephen C Wood in MA who is hearing it nearly every evening at 0040, and Rich Ray near Chicago who reported it starting at 0036. At first I hear nothing, then 0037 barely audible talk, sounds like marine weather intonation, fades up a bit, but only S7, equivalent to noise level. 0039 a little better so I hear fragments such as ``through Sunday afternoon; gale warning, small craft warning, Monday evening and night``; British accent past 0042 but seems to have finished at 0043. EiBi shows ZBM as Bermuda Harbo[u]r, nominal 10-minute broadcasts at 0035, 0435, 0835, 1235, 1635. But it`s not the only marine station on 2582. Unlisted by him but in the Canadian Coast Guard page, 2582 is also used for shore-ship comms in At- lentia Canada and the North in summary (Clong Hauser, OK)
2598u 2749U	Feb13 Feb7	1015 0044	lantic Canada and the North in summer (Glenn Hauser, OK) VOK - Labrador wx "winds westseas 25 knots" etc (Wilkner) robotic YL in English with marine weather at S6. CCG website shows this is MCTS Syd- ney NS, VCO starting at 0040 via Port Caledonia site, with: "Radiotelephony Technical marine synopsis and forecasts for marine areas 209, 213, 214, 215, 216, 217, 218, 231 and 232. Wave height forecast for marine areas 209, 213, 214, 215 and 217. Notices to Ship- ping in areas Cape Breton Shore (covering Cabot Strait to Banquereau Bank), Gulf of St. Lawrence, Newfoundland South Coast, P.E.I. and Miramichi Bay. Notices to Shipping revising the position of every reported offshore exploration and exploitation vessel`` (Glenn Hauser, OK)
			Frequency 2749 is currently doing well here most mornings when tuned around 0745UT. English is heard at that time, but changes to French around 0750 / 0755. Frequency 2598 is also a good signal and only English is heard so far. There is a STANAG transmission on - or very close to - this frequency which makes copy difficult some days. I haven't IDed the locations of the transmitters at this time. Other interesting ones to watch propagationally are Gander volmet on 3485 which is often much better than // 6604. at 0730. I believe it may be New York from 0800 - a much weaker signal here. And CHU 3330 is also doing well and usually better than // 7850.at 0730 / 0800. (Noel R. Green via DXLD)
2850.00	Feb10	2015	KCBS, Pyongyang Korean talk, unknown heterodyne tone (AP-DNK)
3220.00	Feb10	2015	KCBS, Hamhung Korean ann, songs and talk (AP-DNK)
3250.00	Feb10	*2130-	Voice of Korea, Pyongyang IS, Japanese ann, National Anthem, military song, news, 2147
3259.996	Feb2	1050	more military songs, orchestra music. (AP-DNK) Radio Madang, poor S=4-5 signal, Pidgin?,wandered up from x.992 kHz. (wb, wwdxc BC-
3239.990	1002	1050	DX TopNews Febr 2)
3260	Feb7	1200	NBC Madang. The syndicated (Florida, USA) Sunday program "Island Praise" presented by Stacy Rose, with her playing Caribbean gospel music (reggae, soca, calypso, hip hop gospel, etc.); off the air by 1229 check; clearly // 6020. (Ron Howard, Asilomar State Be- ach, CA, USA)
3274.993	Feb2	1053	NBC Southern Highlands logged. Poor and tiny at S=4-5 level in remote Tokyo SDR. (wb, wwdxc BC-DX TopNews Febr 2)
3289.9	Feb13	0930	Voice of Guyana, sadly listened to this ~ 0930 " cover most of your body as much as possible if you are pregnant so far casesnoted some vomiting and xxx ? Ministry of Pubic Health" 0937 Minister mentioning "The Lord Jesus " (Wilkner)
3310	Feb5	2317	R.Mosoj Chaski, Cochabamba, quíchua, texto; 45333. Melhor sinal em 06/2, pelas 2300. (Carlos Gonçalves)
3310	Feb12	0932	Radio Mosoj Chaski, Cochabamba re-check om and yl chat in Quechua, fair to good signal, best audio on the Drake R8. (Wilkner)
3310.00	Jan31	0135	R Mosoj Chaski, Cotapachi Quechua talk by two men (AP-DNK)
3325	Jan30	1700	Bougainville was yesterday (Jan 30) also AFTER 1700 UT on air. Palangka Raya s/off at 1659, and around 15 minutes later there was again a strong signal on and off, shure Bou-
3325	Feb2	1315	gainville testing. (Christoph Ratzer via A-DX). I am hearing one station S5-S7 with soft talk, 1316 music, presumed still RRI Palangkara- ya and not NBC Bougainville. Ron Howard confirms the latter was again absent yesterday. So when are they going to come back and stay on? Maybe they are now looking for a new clear frequency; fat chance. Later: nope; Ron says both were on today with RRI domina- ting for him. Karel Honzik in Czechia also heard Buka day frequency testing on 6020.7 at 0700-0842* (by long path, direct??) (Glenn Hauser, OK)

 beard in Salzborg at the same time. Chistoph, thanks for the tip and for a strong and clear recording with the 1D, ideed a remarkable difference in signal clarity. (TN) 3325 Feb 8 1905 NBC Radio Bougainville. Appua. Gut zu hören bis ca. 1945 UT, danach durch den Sonne-angung an cask, stawdeher. (Christoph Ratzer vi a ADX) 3325 Feb 3 1313 From 1313 to 1335: clearly two stations: RRI Palangkaraya with mostly music an IDP. 1314 From 1313 to 1335: clearly two stations: RRI Palangkaraya with mostly music an IDP. 1325 Feb 3 1333 From 1313 to 1335: clearly two stations: RRI Palangkaraya with mostly music an IDP. 1320 1332. Feb 4 1300 RRI Palangkaraya with full ID. Also as late as 2000 heard by Christoph Ratzer down in Salzborg. No sign of NBC this evening. RRI also noted exceptionally strong on Feb 7 at 1415 with mx. 4055	Feb11	1334	 Bill Bingham in South Africa checking and finding nothing. I would welcome anyone Truly finding another Verdad, to prove wrong my fear that the worldwide relay deal Dr Madrid says he has been paying for is nothing but a scam (Glenn Hauser, OK) R. Verdad has faded to a JBA carrier as to be expected past sunrise here and there: no ``injexion`` of a strong signal somehow as Dr Madrid thinx is being done in various places. Ken Zichi suggests maybe this *could be* about carrier current, a very old, not new technology, wherein a transmitter (normally on MW) is fed into powerlines as antennas, nothing to do with computers. But that term has never been used in describing this experiment. ``Injecting`` a signal would seem to fit, however. With C.C., a radio within close range (before going thru various transformers), plugged into AC would get the noisy and lo-fi signal. There is also a very limited amount of radiation around the powerlines whether wanted or not. I suppose a SW frequency could be used as well. I myself was involved in C.C. college stations in the 60s – KFRH at Forsyth Residence Halls, Washington University, St Louis MO (IIRC on 570 between real stations KSD 550 and WRTH 590); it's mentioned in the Wikipedia article about successor KWUR 90.3 FM. And later, at KNMD, 880, (New Mexico Dorms), UNM in Albuquerque. Searching for that is obscured by the calls now applying to a digital TV relay in Santa Fe of KNME. KNMD was the predecessor of KUNM now 89.9, an excellent public radio station; see Wikipedia about KUNM. Carrier current is similar to ``Rediffusion`` or ``wired broadcasting`` which was used in the early-to-mid XX century in places of limited extent such as Malta; in Russian cities in order
			to restrict and control what citizens could listen to; and probably still in North Korea. Some
			of this may have `injected` signals on MW radio frequencies rather than simply being a wired-loudspeaker network.
			Getting back to Guatemala, if this magical technology is really carrier-current injexion, that
			could be done anywhere, modulated by any source off webcasts, but it would be extremely

4955	Feb4	2339	R.Cultural Amauta, Huanta, quíchua, texto, canções índias; 35342. Sinal muito melhor em
			06/2, pelas 2330. (Carlos Gonçalves)
4955	Feb6	2337	R Cultural Amauta. (LHU)
4970	Feb3	1540	AIR Shillong, India, talks, mx, "This is the Northern Service", EE nx, fair (Bernardini)
4970	Feb10	1356	AIR Shillong, randomly 1356-1547. Preempted regular programming for special live cove-
			rage from Jawaharlal Nehru Stadium in Shillong of the women's "football" (soccer) match
			between India and Sri Lanka; alternating coverage in English and Hindi; part of the 12th
			South Asian Games being held in both Shillong and also in Guwahati. The games end on
			Feb 16. <u>http://goo.gl/X2bYJy</u> . Look for more live coverage from Shillong. Found no
			AIR stations //. Shillong today did not switch over to the usual audio feed from Delhi
			(1512-1515 advertisements; 1515-1530 news in Hindi; 1530-1545 news in English), but
			instead continued with the live sports coverage.
			Shillong is the capital and hill station of Meghalaya, also known as "The Abode of Clouds",
			one of the smallest states in India. It is said that the rolling hills around the town reminded
			the European settlers of Scotland. Hence, they would also refer to it as the "Scotland of the
4070	E-10	1200	East" (Ron Howard, Asilomar State Beach, California, USA)
4970	Feb10	1300	CNR1 jamming. As of Feb 10, continue to hear the jamming of AIR from just before 1300 till about 1331. Is here instead of being on 4790 against the BBC. Seems they are locked in
			here and may never note their error in frequency! (Ron Howard, Asilomar State Beach,
4970+	Feb11	1330	CA, USA) S8 carrier, same past 1333, so apparently AIR Shillong, slightly on hi side, rather than the
47701	10011	1550	CNR1 jamming which has been here for weeks by mistake instead of blocking BBC Uzbek
			on 4790 at 1300-1330 only, as reported by Ron Howard. If we could get it better than this,
			like Ron, we could be hearing Hindi/English coverage of the XII South Asian Games until
			Feb 16, pre-empting regular programming including Delhi news at 1530, as I quote him on
			WOR 1812 (Glenn Hauser, OK)
4980	Feb1	1740	PBS Xinjiang, Urumqi, China, music, talks, fair/good (Bernardini)
4990	Feb6	2330	R.Apintie (p), Paramaribo, texto, música; (Carlos Gonçalves)
5004.99	Feb4	0520	Very poor signal combating storm noise far from our area, with music, presumed R. Bata.
			Γ m checking during this hour encouraged by Ron Howard re-hearing it in further Califor-
			nia. By 0543 it's up to S7 with talk, can't tell if Spanish; 0556 still JBA. Very slightly on
			the lo side (Glenn Hauser, OK)
			Hi Clenn Feb 7 on 5005 RNGE signed on between 0531 0541 with 0541 till 0601 non

5910.25	Feb6	0735	BTW, the Tennesseans on 5830, 5890, 5935 are much weaker, S7 very poor, not always the case. I had thought HJDH inactive, as I have not been hearing it after ~0630 when I usually start bedtime monitoring. Maybe they sign off circa 0600 now? Also check for sibling on 6010, finding only a JBA carrier, maybe something other than Conciencia. I don't check again until 0744 when 5910 is definitely off. I see in WRTH 2016 schedule as 23-10 UT for both 6010 and 5910, but 5910 has a single dagger by it, unexplained, unlike the double dagger meaning inactive next to the only other Colombian SW listed, HJOY, LV del Guaviare, 2000-0300 with 5 kW on 6035 which has been gone for years, so is there some reason to expect it back? The April 2015 Domestic Broadcasting Survey from DSWCI has it on the ever-expanding roster of deleted stations, as not heard since May 2011 (Glenn Hauser, OK) Alcaraván Radio, Puerto Lleras, religious comment in Spanish by Martin Stendal, id. "Vd.
			está en sintonía del Sistema Alcaraván Radio, son las 2 de la mañana con 51 minutos", Latin American songs, id. "Desde Puerto Lleras, departamento del Meta, transmite Al- carván Radio, 1530 AM y en onda corta 5910 kHz.". (Méndez)
5914.993	Feb1	0630	Myanmar R, Naypyidaw, fair S=7. Noted in neighbour eastern Thailand unit. (wb, wwdxc BC-DX TopNews Febr 1st)
5915	Feb6	1748	ZNBC-Radio 1, Lusaka, dialecto local, texto, hinos relig., noticiário em inglês, às 1800, música, já c/ emissão novamente em língua africana; (Carlos Gonçalves)
5915	Feb6	2000	R Zambia med nyheter. (DO)
5915.00	Jan31	0305	ZNBC, R Zambia, Lusaka English talk (AP-DNK)

			chamado Corno de África; 34432, QRM adjacente. (Carlos Gonçalves)
5952,5	Feb4	2342	R.Pío XII, Siglo XX, quíchua, texto; QRM adjacente. (Carlos Gonçalves)
5952.36	Feb13	1025	Pio XII, Siglo Veinte in ssb to avoid co channel slop. om and yl in language, fair signal at
			best, been missing often 2300+ band scans (Wilkner)
5965	Feb6	0741	Radio Transmundial, Santa María, religious comments, id. "Transmundial.com.br". (Mén- dez)
5985	Feb2	1430	Myanma Radio, Phin Oo Lwin, Myanmar, talks, some mx, weak/fair (Bernardini)
5985.00	0035	5.2	Myanma R, Naypyidaw Bamar talk with musical interludes (AP-DNK)
5990	Feb1	1607	Shiokaze/Seabreeze (via Yamata). Clear of the NK jammer this morning with CH pro- gramming until 1630, then Korean. (Dan Sheedy)
5995	Feb5	0732	Radio Mali, Bamako, French, comments. Bad modulation. (Méndez)
5995	Feb4	2344	R.Mali, Kati, dialecto local, texto, música pop'; QRM adjacente. (Carlos Gonçalves)
6005	Feb7	0818	R MiAmigo. (LHU)
6006.627	Feb1	0634	Dac Lac spurious, S=5 -98dBm signal. Wobbling signal some +/-5 Hertz up and down. (wb, wwdxc BC-DX TopNews Febr 1st)
6010.1	Feb5	0733	La Voz de tu Conciencia, Puerto Lleras, religious comments in Spanish, Martin Stendal, mentioned "Rey de Reyes". Also noted on Feb6 id. at 0845 "La Voz de tu Conciencia". (Méndez)
6015	Feb1	0400	S9 signal, YL with Habari = news in presumed Swahili from ZBC (Glenn Hauser, OK)
6015.00	Jan31	0310	Zanzibar Broadcasting Corp., Dole Swahili talk. QRM 6020 Chinese (AP-DNK)
6020	Feb4	0746	I have an S7-S9 signal, no QRM at all, with lo-key talk possibly in English; 0748 music, 0753 talk, 0758 piano music, and singing past 0801. 0802 an announcement I think mentioning NBC, cut off the air abruptly at 0802:44*. I figure the reactivated NBC outlet here has finished with its day frequency at 7 pm local, and is moving to night frequency 3325, which I do not expect to propagate this early, and do not hear; and besides it`s way past my bedtime. This was certainly not on 6020.7 where Karel Honzik recently reported it by long path to Czechia around this same time of day; maybe initially they did not have the frequency accurately tuned up. Yet Γm awake again at 1248, to find an S9 signal with music on 3325, maybe a second
6020	Feb4	1315	carrier? Not sure. But I decide this is Indonesia, q.v. (Glenn Hauser, OK) I finally check NBC's day frequency, and there it is, after midnight local time! With Indo- nesia on 3325, and only two frequencies available, it makes sense to stay/resume on 6020, altho designed for day propagation only. This is S9, and no sign of Vietnamese from Viet- nam, or anything else on 6020. I hear some English words, constitution, people of Solo- mons, so in suspected Tok Pisin; lo-key studio announcer is interviewing various people on phone, with brief instrumental music interludes between, and abruptly faded out when so- meone else is ready to speak. 1320 seems to mention numbers, phone? 1323 music (diffe- rent music on 3325 with Indonesia); 1324 back to tok in Pisin; 1326 music; 1330 phone talk; 1333 hear feminine voice on phone for first time; 1335 music and running-water ute

6020	Feb6	1143	QRM; 1356 woman singing, music past 1400, song maybe mentions ``my country``, anthem? 1401 definite ID by YL as ``NBC National Radio``, back to more music with autotune. At 1402, 6020 is S9+20; 1405 mentions Papua New Guinea, another song; 1410 NBC promo, mostly music. 1415, half a sesquihour after sunrise here, beginning to fade down, to only S9 by 1420; JBA carrier by 1443. If they are still testing the new 10 kW transmitter, can`t be sure which frequency if either will be on air at any particular time the next days. I wonder what kind of antenna, not NVIS? (Glenn Hauser, OK) I find myself awake, so check for NBC: there it is with bouncy music at S9, 1150 heavy beat, no CCI, 1156 announcement sounds Tok Pisin, 1158 more music past 1200, to 1201.5 brief announcement, 1202 more music, 1205 announcement (and back to sleep for me). 1357 still S9 but sounds a bit louder with music, 1401 NBC ID, 1402 back to music. Walt Salmaniw in BC was still hearing it at 1632, mostly music, announcements in English. Earlier at first wakeup 1133 I checked for other carriers, and found JBA ones on 2325, 2485, 2850, 3240, 3320, 3325 and at 1147, 4835, i.e. Australia, North Korea and Indonesia. Except for odd one out, 3240, nothing listed, so that could be an harmonic from MW 1620, 1080, 810 or 540. (Glenn Hauser, OK)
6020	Feb6	1656	Tent. R Free Asia with a strong, silent carrier here until 1700 when they signed on with Mandarin service. A jammer started up in the background at 1658. Unfortunately no sign of NBC in the background. (TN)
6020	Feb7	1200	NBC Bougainville from 1200. Clear ID at 1302. A lot of pop mx. Decent strength but with
6020	Feb7	1349	quite muddy speech. (TN) S9 open carrier at least I can`t make out any modulation, but presumably NBC. By 1407
6020	Feb7	1200	it's S7 to S9 and maybe a trace of modulation. However, Ron Howard in CA says it was off the air by 1327, after carrying the `Island Praise` show from Voice of PNG, 90.7 FM at 1200-1258 Sundays. He also says they did not switch to 3325; so maybe they just left the carrier on 6020 (Glenn Hauser, OK) NBC Bougainville, 1200-1258. Stacy Rose with her "Island Praise" Caribbean gospel music show (Richie Stephens "In The Name of God," etc.); email, Facebook and Twit- ter info; many "Island Praise" IDs; "I'm Stacy Rose. Turn up your radio. You are listening to 'Island Praise' right here on the Voice of PNG, 90.7 FM "; "Island Praise, stay connec- ted"; language lesson where she asked many people if they knew the word "Tandede" (stay right where you are); // 3260. Before 1200 pulsating noise jamming (N. Korea). Off the air by 1327; did not switch to 3325. First heard Stacy's"Island Praise" show back in July 2013
6024,96	Feb8	2230	via NBC Madang. (Ron Howard, Asilomar State Beach, CA, USA) Tent. Red Patria Nueva (no ID) disturbed a little stronger Xisang on 6025,0 and totally wiped out by CRI on 6020. (TN)
6025	Jan31	0052	wiped out by CRI on 6020. (1N) two very weak carriers beating, one of which is on the lo side circa 6024.95. Only two listed in Aoki at this time, and which I find to be quite a reasonable explanation: PBS Xi- zang, Lhasa, Tibet on one of its multiple frequencies, and Bolivia, the off-frequency one, Radio Patria Nueva, which Aoki still denominates by its old name, Radio Illimani. Is that still used on air? WRTH 2016 shows ``Rede Illimani Radio Patria Nueva``. Rede would be Portuguese, not Spanish! (Glenn Hauser, OK)
			Red Patria Nueva (Radio Illimani), La Paz, Bolivia, YL CX sobre las tradiciones y cos- tumbres, después el OM CX hablando que Bolivia es liderada de forma, Continental. Día
6025	Feb2	1602	25 Enero 2016 en 1044. (Daniel Wyllyans, Nova Xavantina MT, Brazil, DXLD) PBS Xizang, Tibet, China, English news, good //6130 (Bernardini)
6030	Feb2	1602	Radio Oromiya, Ethiopia, reports like economics, fair/good over China (Bernardini)
6030	Feb5	1718	Radio Oromiya, Addis Ababa, Vernacular comments. (Méndez)
6035	Feb2	1435	Myanma Radio, Naypyidaw, talks, some mx, weak/fair (Bernardini)
6035.05	Jan30	0059	BBS. Just after missing sign on, heard the usual chanting/singing; weak (Ron Howard, Asilomar State Beach, CA, USA)
6040,4	Feb7	2201	R. B2, Curitiba PR, retransm. da R.Aparecida c/ o prgr. Com A Mãe Aparecida; QRM adjacente. (Carlos Gonçalves)
6060.00	Feb9	1320	Sichuan PBS-2, Chengdu talk in a local minority dialect, not Mandarin or Tibetan, music. // 7225 (AP-DNK)
6070.00	Jan31	1035	Atlantic 2000, via Rohrbach German ann, "Funkwetterbericht" with sun activity. The // 9485 via Göhren only had a weak carrier and no audio! (AP-DNK)
6080	Feb5	2336	R.Marumby, Curitiba PR, texto; 23431, QRM na mesma frequência. Inaudível em // 9515, nos dias 4-5-6-7/2, à noite. (Carlos Gonçalves)

7030	Jan31	1354	Voice of Jammu Kashmir Freedom Movement (presumed). Indigenous music; unable to
			make out the language as the signal was weak and also with heavy ham (CW) QRM.
			Thanks for all the work put into IDing this during the month by Mauno Ritola (Finland) and
			Sei-ichi Hasegawa (Japan). Greatly appreciated! (Ron Howard, Asilomar State Beach, CA,
			USA)
7030	Feb9	1400	Radio Sada-e Hurriyet Jammu Kashmir unter CW-QRM schwach zu hören. s/off 1413
			UTC. (Patrick Robic via A-DX)
7030AM	Feb11	1319	[non]., very poor signal S5, with talk, and music so sure sounds like a broadcast station;
			however some of the talk could have been a very weak phone LSB ham (XE?) riding in on
			that carrier; but at 1325 I can hear the modulation on USB setting. Presumably V. of Jam-
			mu & Kashmir Freedom Movement, as IDed last month by Japanese DXers and Mauno
			Ritola; tnx to S. Hasegawa, Jan 15 & 28 between *1310v and 1430*v. Ron Howard had it
			Jan 31 at 1354, but Feb 1 only until 1347*. In Communication of the British DX Club,
			Tony Rogers reported it Jan 29 from 1430 to 1445* clearly mentioning ``7.230 MHz`` [in

			English?] at sign-off, so maybe they are mis-punching the frequency, temporarily?
			WRTH 2016 pp. 510-511 says this comes out of a R. Pakistan, Islamabad transmitter, add-
			ress in Muzaffarabad, but it was then on 3995 at 1300-1430 daily in Kashmiri/Urdu, irregu-
7120.00	Elic	1540	lar and times variable. (Glenn Hauser, OK)
7120.00 7120AM	Feb6 Feb11	1540 1324	R Hargeisa, Hargeisa Somali talk occasional HAM QRM (AP-DNK) also bears a JBA carrier, presumably R. Hargeisa, Somaliland via long-path supposedly in
/1201101	10011	1521	English at this time (Glenn Hauser, OK)
7210.000	Feb1	0646	VoVTN 1st program from Dac Lac, female annc program. S=9+15dB or -60dBm, and
			accompanied by two spurious signals on 7196.242 and 7223.758 kHz, some 13.758 kHz distance apart away. Wobbling signal wanders some +/-5 Hertz up and down. (wb, wwdxc
			BC-DX TopNews Febr 1st)
7230.0	Feb1	0651	AIR Kurseong, poor signal, pop mx at S=5-6 tiny level. Kurseong Mehta Club Building,
			Kurseong-734203, Darjeeling Dist., West Bengal, India <kurseong -at-="" air.org.in=""> 1x50</kurseong>
7722 16	Eab 1	0404	txer(wb, wwdxc BC-DX TopNews Febr 1st)
7233.46	Feb1	0404	S9+20 but undermodulated talk, to music, to talk, surely usual way-off-frequency 100 kW ND Addis Ababa-Gedja transmitter which varies a lot, on both sides of 7235, as we discus-
			sed a bimonth ago in DXLD 15-49. Per Aoki with day $1 =$ Sunday: at 0400 on days $2/4/6 =$
			M/W/F like today, it's V. of Eritrea; on days $1/3/5 = \text{Sun/Tue/Thu it's V}$. of Peace and
			Democracy, both in Tigrinya, and nothing on Saturdays. EiBi day numbers are the other
			system, day 1 = Monday, and frequency as 7236.2, but result in a match to Aoki: VOE on M/W/F; VOPAD on Sun/Tue/Thu. Just the opposite in WRTH 2016! Which uses letters,
			not numbers designating days of week: VOPAD on M/W/F; VOE on T/T/S and nothing on
			Sundays.
			All agree that VOE is for one semihour, while VOPAD is for one fullhour. Perhaps someo-
			ne can catch an ID and clear up this confusion once and for all: WRTH shows VOE says: ``Dimtsi Ertrai``; VOPAD: ``Yeh Radio Demtsi Selaman Demokratia Ertrai``. Apparently
			there is no agreement between them on how to spell/transliterate Dimtsi/Demtsi. Or note
			which days it goes off at 0430 vs 0500.
			At many other times in evenings, it's plain old R. Ethiopia programming on same transmit-
			ter, including English at 16-17, which I've not seen reported in ages; beware of CRI Kash- gar also in English 16-17 on 7235.0 (Glenn Hauser, OK)
			I believe at least in the evenings it is only VOPAD, no more VOE - and it's only MWF
			I believe at least in the evenings it is only VOPAD, no more VOE - and it's only MWF 1800-1830v, nothing after 1800 on the other days (but I don't check regularly). No idea

Checked the local 1 pm reception in 49 / 41 / 31 mb in eastern Thailand SDR remote unit today:

- 5914.994 MMR noted rather tiny S=5-6 at 0600 UT, local noon decrease
- 5975.0 VTN VoVietnam Son Tay site, also S=5-6
- 6020.0 VTN VoVietnam Dac Lac site, and as usual two symmetrical spurious signals 'seen' as peaks as 6006.624 and 6033.376 kHz.
- 6130.0 LAO Lao National Radio, Vientiane site, tiny at 0610 UT.
- 7210.0 VTN VoVietnam 1st progr service from Dac Lac site, and as usual two symmetrical spurious signals 'seen' as peaks as 7196.240 and 7223.760 kHz.
- 7230.0 IND Probably AIR Kurseong at S=6-7 signal 0615 UT Febr 14.
- 7274.978 CHN UNID Probably PBS Xinjiang from Urumqi, tiny S=3-4.
- nothing of RTM Traxx FM Kajang Malaysia anymore !
- 7390.002 IND AIR Port Blair, S=7 signal at 0618 UT. S=9+5dB at 0915
- 9459.991 MMR Myanmar RS, Pyin U Lwin, northern bcast center, modern hip hop pop mx, at 0619 UT, S=8
- 9589.997 MMR Myanmar RS, Pyin U Lwin, northern bcast center, little less S=7-8
- 9720.003 CHN CNR2 Baoji, weak and tiny
- 9730.0 MMR Strongest Burmese MMRS station, probably from old British Empire bcast center Rangoon Yegu, S=9 at 0627 UT
- 9835.0 MLA RTM Sarawak FM still on service, heard Asian pop mx, at S=8 0630 UT Febr 14.

Station news

GUATEMALA. **4055**, Feb 4 at 0528, **R. Truth** has preacher in English as usual during the final hour of the broadcast day, and still no sign of any clone signals around it. Ditto Feb 4 at 1250, one S7-9 station in Spanish, very poor S6 by 1310. On Feb 3 got this from Dr. Madrid:

``Dear Glenn Houser and Víctor Gutiérrez: Our test transmissions for Radio Verdad are on the same frequency 4055 kHz. However, in some countries the frequency may vary a Little (one or two points). If a country is close to Guatemala, the frequency may vary a little bit, in order not to bother our master signal. We are not using any transmitters, but only computers, which inject the signal into many short wave antennas. They are attempting to maintain the same frequency 4055, as far as it is possible.

It is a completely new technology on trial. A group of European, US and one Mexican Engineers are working on it. It is a scientific experiment in order to rescue short wave. I myself do not fully comprehend the system. The whole transmission system is being controlled by satellite, and also the power injected into all short wave antennas in the whole world.

I have paid different amounts of money for the United States, Canada, Europe, Africa, Russia, China, Japan, Mexico, South America and the Caribbean Islas. I hope everything comes out all right, as it is a scientific experiment.

The schedule is the same as regular Radio Verdad, beginning by 1000 UT up to 0605 UT. This set of tests will last only this weeks. This week transmissions are being sent from Guatemala City, but, depending on the results, we'll start permanent transmissions from Chiquimula. I will appreciate any reports about the quality and strength of the signal. May God be with you, Dr. Édgar Amílcar Madrid, Radio Verdad & Radio Verdad TV

Can anyone explain how this could possibly work? If I were he, before handing over any money, would insist/demand that the purveyors explain exactly how this is supposed to be accomplished. It makes no sense to me, and I am almost certain this is a scam and a fraud, and have told Dr Madrid so. If anyone is so inclined, a thorough search for 4055v signals on SDRs around the world might disprove this, or prove, if R. Verdad is heard at a time of day when it could not possibly propagate from Guatemala. So far he says he has got good reports from Panamá and Indonesia, no details (Glenn Hauser, OK, WORLD OF RADIO 1811, DX LISTENING DIGEST)

Doesn't this sound that cheaters are injecting Dr Madrid's money to their own pockets. (Jari via DXLD

This is EXACTLY what I have been thinking. How can you 'inject' a radio signal using a computer and not a transmitter?

Are they trying to 'explain' some sort of 'carrier current' transmitter being experimented in some areas but think saying 'computer' makes it sound 'modern' and 'up to date'?

I've heard some carrier current stations, (for example, there was a student run station at the University of Michigan in the 1970s when I was there that was fed through the University owned and operated power grid. ...

If it isn't that, then I agree with Jari, it is being used as a way to inject money into someone's pockets through fraud. If it IS a carrier current scheme, it may not be fraud, but I also can't imagine it being terribly useful either! (Kenneth V Zichi via DXLD)

PAPUA NEW GUINEA. I'm officially informed that DRM SW test transmissions from NBC Bougainville have occurred during the current testing phase to test linearity of the new 10kW transmitter.

I suspect Bryan Clark in NZ heard one such transmission on February 4th on 6020kHz earlier in local evening. Further DRM testing will occur.

Please don't ask when, as there is no schedule. But you have been alerted to keep an ear out :-) These DRM transmissions are the first such DRM transmissions to have occurred from PNG.

(Ian Baxter, [AUS via DXLD)

PAPUA NEW GUINEA. NBC Radio Bougainville. Hallo a-dxer, OM Timm Breyel in Malaysia hat NBC Radio Bougainville auf 3325 kHz gehört und den Empfang von NBC bestätigt bekommen. http://shortwavedxer.blogspot.de/ Wie schon hier berichtet wurde, wird die Tagfrequenz 6020 kHz und die Abend-/Morgenfrequenz 3325 kHz benutzt. Der Sender befindet sich immer noch im Testbestrieb und es wird auch (noch) nicht 24 Stunden gesendet. Offizielle Übergabe ist zum Monatsende geplant.

Momentan ist Programmbeginn um 1900 UT (+/-), da könnte auch was in Europa ankommen.

Es besteht übrigens kein Konflikt mit RRI Palangkaraya, wie zunächst befürchtet. Sendebeginn RRI ist erst um 2155 UT.

(Viele Grüsse, Uwe Volk via A-DX)

PAPUA NEW GUINEA. David Ricquish writes on the WRTH Facebook group: February 3 2016. NBC Madang [called Radio Madang by locals] is on 3260 SW with 4kw [reduced from 19kW says the local technician] and 90.7 FM with 250w. Daily schedule: 1900-2300 UTC NBC Madang; 2300-0700 UTC relay NBC National from Port Moresby; 0700-1200 UTC NBC Madang; and 1200-0200 UTC relay NBC National from Port Moresby. The AM transmitter on 864 is no longer operational. Radio Wantok Light shares the NBC FM tower for 105.9 FM with 600w which covers a greater area. Contact is Makalai Bell, Director Provincial Radio, NBC Madang. Email is rmadang@nbc.com.pg. This information is correct as at February 3 2016 NZ date.

(Mike Terry via DXLD)

Hi Mike,

Thanks for sharing the interesting post from David re NBC Madang. However a couple of points.

1. I should think that SW TX power reduced from 10kW down to 4kW, not 19kW (typo?)

2. The FM frequency of 90.7 should be for NBC Karai Radio in Madang & not NBC Madang. Happy to be proved wrong on this, but 90.7MHz is a standard Karai service freq throughout PNG.

That said there are frequency reassignments occuring within PNG for the NBC FM frequencies at the moment. (Ian Baxter via DXLD)

PHILIPPINES. Radio Veritas Asia: 0030-0055 15280 Hindi is now discontinued. Only on the Web and 11825 in the evening however, continues. They are win ding down operations slowly. By the end of the year much of S. Asian broadcasts will be gone from Short Wave, only on the web, but I have not checked the web. For me Radio is on the air. Web is something else. I just don't have the time or inclination!! WRTH Facebook group, Victor Goonetilleke. (Mike Terry via DXLD)

URUGUAY. 6125 Radio Difusión Nacional (ex SODRE) current status.

CXA6, the low powered transmitter from RNU, Radiodifusión Nacional del Uruguay, on 6125, devoted to relay MW 1050 CX26 Radio Uruguay, is currently off the air, while work of reallocation of the different transmitters (MW) inside the building. It is expected that it will be resuming around midyear, this 2016.

In a visit to the transmitter site located near Santiago Vázquez, we learned this, and, for the first time we could take some pictures of it. A photo of the corresponding aerial (halfwave dipole) is shown.

In one of them we appear: From L to R: Horacio Nigro, CX3BZ; Francisco "Pancho" Escobar, CX7AF, site technician, Gabriel Gómez, CX7BI, also DXer for many years here in Montevideo, Uruguay. More photos and story about this visit will appear in my blog soon.

(Horacio Nigro, CX3BZ, "La Galena del Sur", Montevideo, Uruguay)

Mr RL Wilkner

Fort Lauderdale

U.S.A.

14 February 1984

Dear Sir

Thank you for your letter of 4 February 1984, concerning events of the 1982 invasion and occupation.

I confirm that indeed Argentine military forces "took-over" Cable and Wireless PLC; initially we were allowed to run telegraph telex services under censorship, latterly we were not allowed to run any services. Your supposition was indeed correct, as from the 2 April to 14 June 1982, the branch was to all intents under Argentine Military control, in fact was used almost exclusively for telephone traffic to the Argentine mainland.

Thank you for your good wishes for 1984, and for your interest in the events of 1982 in the Islands.

Yours faithfully

rewant

Anbefaeles, veldig interessant lesning ! /Arvid Husdal via DX-LISTENERS' CLUB Facebook

Manmade interference.

Hello All,

There are many new kinds of manmade interference. Some of them can to some extent be managed by our software.

I have made a new page here: http://www.sm5bsz.com/lir/crankshaw/crankshaw.htm

It has two recordings made by Paul Crankshaw in Scotland. There is a daytime recording with few AM stations where the interference more or less dominates. There is also a night time recording with a lot of strong AM stations.

The page has video clips where I try the different blankers in HDSDR, perseus.exe and Linrad.

In the daytime recording the vectorial blanker of perseus.exe is outstanding. In the night time recording it works less well, something I think Nico could improve - although I do not quite understand what the processing is....

The wideband blankers of perseus.exe and HDSDR are useless while the dumb wideband blanker in Linrad gives some relief.

Narrowband blankers do work, but there is not (yet?) any narrowband blanker in Linrad. In Linrad one can use the AGC as a blanker by setting a long attac time and short release and hold times.

I think the interference is some kind of switchpower. It is frequency modulated with a triangular wave and on-off keyed.

It shows some similarity with this interference: http://www.sm5bsz.com/linuxdsp/usage/bengan/bengan.htm

I am still interested in wideband recordings with interference problems in them. Files I can make available for future SDR development here: <u>http://www.sm5bsz.com/rf_library.htm</u>

(Regards, Leif Asbrink via Perseus_SDR)

Amateur Radio Roundtable, Heard Island DXpedition ready to go

This week's guest on W5KUB.com's Amateur Radio Roundtable (Feb 9) will be Dr. Robert Schmieder, KK6EK, from Walnut Creek, California. Bob is the founder and Expedition Leader of Cordell Expeditions, a nonprofit research group started in 1977. The group is responsible for the creation of the Cordell Bank National Marine Sanctuary and for numerous research expeditions to remote oceanic sites. Bob is a research physicist, by profession, with about 100 publications and four patents.

During our webcast, Bob will provide details and an update on the progress of the Heard Island DXpedition. They depart on March 1st for the 45 day event. The DXpedition will be operating for 21 days but the entire trip takes 45 days to complete. We hope to have live updates from this group during our Tuesday night shows in March.

To learn more about the Expedition, go to their website, Heard Island: The 2016 Cordell Expedition and/or subscribe to their newsletter.

Next week (Feb 16) Riley will be back with us. Riley Hollingsworth, K4ZDH is the former FCC Special Counsel for Enforcement in Amateur Radio, and will answer your questions. Send your questions to <u>askriley@w5kub.com</u> for discussion in the program. The phone lines will be available for questions. Joe Eisenberg, K0NEB will be back showing some new kits.

If you missed last week's show on FlexRadio Systems you can watch it here.

W5KUB.com webcasting was proud to be featured on radio station KTKK in Salt Lake City, Utah on Saturday, Feb 6. The program's host was Pat Daniels, K7LNP, and the name of his show is The Fringe Radio Show. You can hear the archives here.

We are proud to announce a new sponsor of our webcast, CQ Amateur Radio Magazine, a magazine for active hams, with a focus on the practical. The magazine is available in both print and digital editions.

Amateur Radio Roundtable, is a live weekly amateur radio and shortwave program, held every Tuesday night at 8 PM CST (0200 UTC Wednesday). The show can viewed at W5KUB.com or heard on shortwave radio station, WBCQ on 5110 KHz.

To watch Amateur Radio Roundtable on Tuesday evenings, go to W5KUB.com. If you are listening on 5110 KHz, we would like to hear from you. Please send an email to <u>tom@w5kub.com</u> and tell us your location and signal report.

We need help with topics. If you have a specific subject that you would like to present in a future show, send an email to tom@W5KUB.com. Forward this message to a Friend will allow you to share this message with your friends.

Join us for fun and interesting discussions!

(Tom Medlin, W5KUB, DX LISTENING DIGEST)

Kiwi-SDR

Moin, es gibt wohl eine neue WEB-SDR-Entwicklung: KiwiSDR Das ist ein Add-On-Board "Cape" zu einem Linux-Einplatinencomputer "Beaglebone Black". <u>http://beagleboard.org/BLACK</u>

Die Hardware arbeitet mit der Software "openwebrx" zusammen: <u>http://sdr.hu/openwebrx</u> Dort findet man auch eine Liste mit anderen RX, wobei die Hardware teilweise auch auf simplen RTL-Sticks mit Upconverter basiert: <u>http://sdr.hu/</u>

Hier eine Blogseite, die weitere interessante Links enthält, u.A. auch den Schaltplan einer Aktivantenne: <u>http://www.jks.com/KiwiSDR/</u>

Denke, daß man das Projekt im Auge behalten sollte... (vy73, Christof Proft via A-DX)

Re: perseus vs cloud IQ

Can anyone point out some pros and cons between these two radios and why you would choose one over the other?? i have listened to some comparison recordings and it's very difficult tell them apart. I'm on the fence between these two sdr's, but I tend to be leaning towards the Perseus because i had one for a short time a few years ago, loved it, but had to sell it due to a divorce. The Cloud IQ is a newer design, a bit cheaper, but is it better in any other aspect? (Thanks, John Ferrow via Perseus_SDR)

I hadn't intented to take part in this thread, but I noticed a couple of posts from people who have obviously not used the CloudIQ. Perhaps people who use both on a daily basis may give less biased opinions.

It's mostly about software, and what you intend to do with it. Automated recording sessions? Need detailed waterfalls/spectrum? Receiving digital modes? Hassle-free installation? Remote operation? Web operation? The native softwares from both Perseus and CloudIQ have their pros and cons (but to be fair I don't understand what's so dreadful about Spectravue), but there are alternatives, like Jaguar Lite for Perseus and SDR-Radio + HDSDR (and others, I believe) for CloudIQ.

Since the CloudIQ is quite new, here are some of my impressions: The CloudIQ is 5-6 dB more sensitive than the Perseus, but unless you live in a very quiet RF environment, and hunt very weak signals, it won't matter much. The Clo udIQ is extremely easy to set up with no USB driver problems (ethernet connection), it can be set up as a web server (without a local PC), and is accessible via web for anyone if you would want to share the radio. The manufacturer RF Space has a long history of making excellent hardware, and providing excellent service for the user.

I have four Perseus, three of which are my main receivers used in combination with Jaguar, + one CloudIQ and one on loan. What my main receivers will be in the future depends on how the software develops. It may well be the CloudIQ.

(Bjarne Mjelde, arcticdx.blogspot.com via Perseus_SDR)

Perseus Datenbanken aktualisiert - neue Adresse

The Perseus Databases were updated with the following frequency lists:

MWList/TBL 20160205 EMWG/ELWG 20160205 (last edition from Herman Boel) KOJE/KOH/KOMEX 20160131 Eibi 20160120

http://www.radio-portal.org/sdr.html - SDR-Special

Due to a kind offer from Günter Lorenz a new location for my files could already be found: http://www.myradiobase.de/perseus/DJ6JZ/

Please bookmark this address for later reference.

(vy 73, Willi, DJ6JZ via Perseus_SDR)

Perseus buttons: Snap and FFT

Snap is "snap to grid". If you click on the waterfall, the cursor snaps to the nearest grid kHz/Hz raster of your selection. F.i. with 1kHz snap, click on 11.1746 MHz and Perseus automatically selects 11.1750 Mhz

FFT is more complex. It is a setting to get optimal FFT resolution depending on circumstances.

-"Time" has a fast time response, but more frequency domain line "blur". If you want to read CW this is best. -"Freq" has a sharper freq. line resolution, but more "tailing" in the time domain. This mode will tend to connect the dits and dahs in CW.

-"Mix" combines both to get a good avarage, somewhere in the middle.

(73! Paul Via Perseus_SDR)

Snap has 4 positions, off, 100 Hz , 500 Hz and 1 kHz.

With this function you can select the freuncy the tuning "jumps" on when you double click on the waterfall. At off it does nothing of course and at 100 Hz, it "jumps" to the nearest 100 Hz. In other words, it provides a fixed tuning grid of 100 Hz, 500 Hz or 1 KHz.

Time, Mix and Freq effect the way signals are displayed on the waterfall screen. For reading Morse Code off screen, I use Time.

(Roelof Bakker Via Perseus_SDR)

Schweden: Parlament begräbt Digitalradio DAB+

Hallo allerseits, SatelliFax brachte heute diese Meldung:

"Das schwedische Parlament hat sich einstimmig gegen das digital-terrestrische Radio DAB+ entschieden. Die Migrationsphase zwischen 2017 und 2022 wurde von allen acht Parteien im Parlament abgelehnt. Bereits im Juni 2015 hatte sich die Regierung gegen DAB+ ausgesprochen. In Zukunft soll UKW weiter die Grundversorgung mit Radio übernehmen, ergänzt um mobiles Internetradio über 3G und 4G.

Das staatliche Sveriges Radio sieht sich nach dem Parlamentsbeschluss gezwungen, seine digital-terrestrischen DAB-Sendernetze abzuschalten. Von der Regierung verlangt man jedoch, die mobile Internetradioverbreitung im Jahr 2018 erneut kritisch unter die Lupe zu nehmen. Die kommerziellen Radiogruppen Bauer und Modern Times Group halten noch zwei nationale Lizenzen für DAB-Multiplexe, haben aber bereits angekündigt ohne Sveriges Radio alleine nicht in den Ausbau von DAB+ zu investieren.

Mit der Entscheidung isoliert sich Schweden jedoch von der übrigen Entwicklung des digialen Radios in Europa. Das Nachbarland Norwegen schaltet 2017 nicht DAB+, sondern UKW ab. Erste Privatradios haben bereits ihre UKW-Frequenzen verlassen und senden nur noch digital-terrestrisch."

(Gruß, Wolfgang Thiele via A-DX)

Dab in Europe

In Norway now over 20 channels (NRK and commercial channels) broadcast in the digital terrestrial network, compared to five channels in FM. The advent of new channels, according to NRK meant listening to the radio has increased and reached new radio listening groups.

Switzerland has decided to switch from FM to DAB + in 2020-2024.

While the UK and Denmark has extended its digital radio network. In Britain, a powerful additional expansion occurred in the past year. The decision is a new frequency layer for commercial radio with more channels in 2016. The government in the UK has not yet decided on a plan for the transition from FM to digital radio.

The Danish network is also expanded. In Denmark, made in the autumn of 2015 a survey to give politicians and radio

industry basis for further decisions.

In addition to these four countries theree are three countries where digital radio is now being expanded rapidly. It is Germany, the Netherlands and Poland. Another dozen countries, including France, transmits digital radio at different levels and at different stages of development of the digital terrestrial network. In some countries, these are outright attempts, others have been longer.

The standard used is DAB + (or the earlier version of DAB). It is also the standard that the EBU (European Broadcasting Union) has recommended. In some cases, EBU means, also the additional DRM technology is used. See link to the EBU Recommendation R138 below.

More about the expansion of digital radio in Europe, see www.worlddab.org (From www.sverigesradio.se:)

Colombia DX Blog update

My Colombia DX Travel Blog now has a complete medium wave bandscan with station recordings for the Cali area. Cali is the third largest city in Colombia. There is also a section of some "DX" (non-local) MW stations I heard

in Cali. The regular travel blog has also been updated with photos from Cali.

I had some great (and quiet) conditions a few days ago while staying in rural areas near Armenia, in the coffee region. I haven't begun to go through those recordings yet.

US Ham Radio licenses at all-time high

Southgate, February 9, 2016

The Ironton Tribune reports amateur radio licenses are at an all time high, with over 700,000 licenses in the United States

Many hams have a ham radio license so they can help their communities during emergencies. Weather related cies such as tornados, hurricanes, flooding, lighting, can se power failures and loss of communication. Hams have and DC operated gear, some have generators. The repeaters

hams use have backup generators. When all other communications including phones and cell phones fail, ham radio can communicate.

During an emergency hams are needed at the scene, shelters, fire stations, local red cross stations, law enforcement, 911/EMA, and many others. Several of the local National Weather forecasters are hams.

Each year SOARA – ARES has 20 or more hams helping provide communications for the Memorial Day Parade. Also communications in the Christmas Parade. We can provide communications for runs like 5K run and other activities in our communities needing communications. Ham radio is very much needed for many things in our communities, we need more hams to help.

Many astronauts are ham radio operators. Amateur Radio is used as a back up for the Space Station communicating with Houston, Cape Canaveral, and other needed locations. Their normal communications have failed more than once and they used ham radio. Part of their training is an optional Amateur Radio licensing class. Once licensed and in space, these astronauts can use Amateur Radio to communicate with people here on Earth. Hams with the proper equipment may be able to schedule a contact with the space station when it is passing over your location.

Lista på grejjor som är till salu efter SM4EXP Lars Lundström Borlänge/Stockholm

Här kommer en lista som ni kan lägga upp på hemsidorna för ARC och shortwave bulletin och länka till i SWB och MV-Eko.

Nåra grejjor är sålda men det skall finnas 2 st ANTENNFÖRDELARE till salu.

Lite länkar till Lars Lundströms Hemsida (TROR ATT EN DEL KÄN-DE HONOM!)

http://privat.bahnhof.se/wb850982//inde x.html

http://privat.bahnhof.se/wb850982// Han höll visst på med en del Mellanvåg

också...... Kolla noga på hemsidan.

Den som sköter försäljningen heter: Bengt-Åke Eriksson, SA0AGA, Skogsslingan 1, 127 41 SKÄRHOLMEN Telefon: 08-7105600, 070-6998497 E-post: <u>sa0aga@ssa.se</u> eller <u>sa0aga@gmail.com</u>
