SHORTWAVE BULLETIN

Issue no. 1855, July 31, 2015.

Deadline e-mail next issue: 0800 UTC, Aug 14, 2016.

Lots of logs in this issue. The log of NBC/Palangkaraya in Salzburg at 2000 UTC is a first sign that the days are getting shorter. Unfortuantely the Asian & Pacific stations on the tropical bands are very few nowadays.

All of us never forget back in the 60'ies when the bands were full of interesting Indonesians.

Many thanks to those of you who have shared some nice pictures and QSL's for this issue. Always nice to show.

Also many thanks to Stefan Wikander who sent a paper comparing the noise floor of a few receivers and the noise level from different antennas in his urban QTH and at his isolated summer QTH. For me living just outside a small town it is hard to believe you can have such low noise levels.

E-mail: <u>thomas.nilsson@ektv.nu</u>

SWB-info

SWB on HCDX: SWB member information: Dateline Bogotá 1993-1998: SWB latest issue/archive:

http://www.hard-core-dx.com/swb http://www.hard-core-dx.com/swb/member.htm http://www.hard-core-dx.com/swb/Dateline.htm http://www.hard-core-dx.com/swb/archive.htm

QSL, kommentarer, mm.

Johan Letterstål: Tack för bullen och för ditt stora arbete med dito! Semestrat i Italien nu i juli, sk "Giro di Italia", med bl.a Verona o La Traviata, Dolomiterna o vandring, Gardasjön med vingårdar, Cinque Terra o vandring igen och till slut Pisa (gissa vad..?). Pust och varmt!

Nu på Gotland där dx normalt sker numera, någon vecka per år. Tyvärr ingen radio i bagaget denna gång.

Dock har jag bokat en solo-vecka i början av sep i stugan då det kommer att riggas för fullt. Skissar redan på en större ALA loop.

Christoph Ratzer: for next SWB:

"Celebrating Radio Vanuatu's Golden Jubilee from the 2nd-6th August 2016."

Pauline Thimothy Radio Presenter & Program Producer 'Joinem mifala time mifala celebratem Golden Jubilee blo Radio Vanuatu lo 2nd - 6th August'...

(Christoph, thanks for nice pictures! /TN)

Robert Wilkner: Drought conditions here with two storms to watch in the Atlantic. Tropical band conditions below average.

Dan "DO" Olsson. Dags att bidraga igen. Tyvärr har aktiviteten inte varit så hög hos mig men det är svårt att motivera sig med att sitta och lyssna på samma stationer hela tiden. **QSL: 6040 Eighties Radio** e-brev, **6255 Mr Cash** e-brev och kort samt **6269 R Antony** kort. Ullmar Qvick: Orolig att missa igen passar jag på att skriva nu. QSL list this time: CNR1 Beijing-11710 e-card via CRI, IRIB Teheran-9665 card, CRI via Cerrik AL .13665 ecard, CNR2 Lingshi-11740 via CRI e-card, FEBC Bocaue-12095 e-card after one hour!, FEBC Bocaue-11750 e-

card, CRI Kashi-Saibagh-13760 e-card, CNR17 Lingshi-11630 e-card via CRI, CRI17 Lingshi-9630 e-card via CRI, CNR13 Lingshi-9420 e-card via CRI, CRI Kashi-Saibagh-7415 e-card, VOA Deewa R-7540 via Udon Thani card, Vatican radio Santa Maria di Galeria -15570 e-card, Radio Mi Amigo via Armenia-11850 and via Kall-6005 e-crd.

Jag började skriva på mobilen men tröttnade. Har haft mer tid nu sedan det blivit mer rutin i Röda Korset-projektet. Tack för ditt som vanligt fina arbete! Också lite info från Ullmars Facebook sida (hoppas du inte har något emot att jag plockar lite info med fina QSL /TN)

Som många av mina vänner vet om började jag syssla med att lyssna på världsradio redan vid10-11 års ålder. Intresset har följt mig genom åren. Jag skriver lyssnarrapporter till radiostationer på kortvåg och får oftast svar.

Här är ett par av de senaste, det övre från International Broadcasting Bureaus avdelning i Thailand som bl.a. sänder Voice of Amerikas program på pashto till Afghanistan "VOA Deewa Radio" och det nedre kortet från Indonesien, vars program på tyska hördes med anrop "Die Stimme Indonesiens". Verifikationstexten finns på kortens baksida.

Fredrik Dourén: Kan bidra med ett tips även till SWB, trots att jag knappast är ensam om Mi Amigo!

Några svar också:

R Mi Amigo Int, Armenien 11850 med e-QSL samt **ZPA5 R Encarnación** 11945 från 1989 med epost.

Jag bifogade ett ljudklipp i ett tackmail då de hade verifierat ZP80 760 kHz. V/s Edgar González som bl a skrev "Efectivamente el audio que me enviaste corresponde a un programa de Radio Encarnacion del año 1989 que se llama "De vez en cuando la vida" y la locutora que se puede escuchar en la grabación se llama Norma Centurion."

(Tack för bild på ett snyggt QSL! /TN)

Log

2850	Jul20	1253	KCBS (Pyongyang). Very poor signal today with long KR chat across TOH (if there was an
3260	Jul25	0904	ID break, i didn't catch it). (Dan Sheedy) NBC Madang. A day of very good PNG propagation; randomly 0904-1219*; 0904-0914 NBC
	54125	0704	news in English (// 3325 NBC Bougainville); 1003 did not carry the NBC News; 1110 local news in Pidgin; 1119 & 1130 "NBC Madang" IDs; 1120-1130 announcements in Pidgin; pop Pacific Islands music; 1204-1208 PNG bird call and news in English (item about "UN envoy," etc.) (news // 3325); 1208-1219* relay of "NBC National Radio," with DJ in English playing pop hit songs (Elton John's "Sacrifice," etc.); caller on the phone asked some political questions (sounded like a contest?); suddenly off in mid-sentence at 1219; poor, but at times semi-readable. A uniquely good day for them! (Ron Howard, San Francisco, CA, USA)
3289.95			[Non] GBC Voice of Guyana silent ! 25 to 30 July (Wilkner)
3310 3320	Jul29 Jul23	2335 1937	Radio Mosoj Chaski, Cochabamba noted in Quechua with fair to poor signal (Wilkner) SAUK/R.Sonder Grense, Meyerton, africânder, música ligeira e canções, texto, valsas, trechos de ópera. (Carlos Gonçalves)
3320.01 3325	Jul19 Jul29	2330 1955	R Sonder Grense, Meyerton Afrikaans discussion. (AP-DNK) tent. NBC Bougainville, Papua. Eine sehr dünne Veranstaltung. Willi hörst du etwas? (Chris- toph Ratzer via A-DX)
			Ja, sehr dünne, Christoph. S5 ohne mod., vielleicht auch Palangkaraya? (Willy Westrupp via A-DX)
			Hätte ich zuerst auch gedacht, aber die beginnen eigentlich immer erst nach 20 UT. Ich werde morgen abend mal den Wasserfall aufnehmen, dann erkennen wir das besser. Grundsätzlich wäre ja Anfang/Mitte August gegen 19/20 Uhr UT immer ein schönes Fenster in den Pazifik. Palangkaraya startete heute 30 Juli pünktlich um 22.00 UT auf 3325 kHz. Duch die vielen Gewitter ist der Empfang aber kein Spaß. (Christoph Ratzer via A-DX)
3325	Jul30	0944	Also noted here in Ängelholm on July 29at 2000 with weak signal and threshold audio. Not possible to tell if it is Palankaraya or NBC at this point. (TN) NBC Bougainville. In Tok Pisin/Pidgin; DJ mostly playing pop songs (Dire Straits "Walk Of
5525	Ju 150	0744	Life," Cyndi Lauper "Time After Time," etc.); 1000-1009 PNG bird call, news; poor (Ron Howard, San Francisco, CA, USA)
3375.1	Jul30	0927	Radio Municipal São Gabriel da Cachoeira, fair to good signal. (Wilkner)
4029	Jul24	2204	Laser Hot Hits_G, música pop', QRM adj. de sinal de ponto a ponto. (Carlos Gonçalves)
4009.81	Jul24	1653	KGR1 noted in passing at 1653 with local music. Low modulation. (David Sharp).
4055	Jul28	-0604*	Radio Verdad, Chiquimula, English, religious comments and songs, identification, anthem and close. (Méndez)
4055	Jul23	1047	R. Verdad, good with hymns. (David Sharp).
4747.48	Jul23	1035	Huanta Dos Mil, fair with huaynos. (David Sharp).
4747.5 4750	Jul29 Jul24	2345 *1252-	Radio Huanta 2000 Huanta Ayacucho under CODAR om dj to 2342. (Wilkner) Bangladesh Betar (Home Service), *1252-1310*. Seems they have an erratic, abbreviated schedule now; underneath a stronger CNR1, which had a lot of singing, making BB reception difficult; 1305 tentative ID. Thanks again to Mauno Ritola for his assistance with IDing this
4750	Jul29	1245+	short broadcast (Ron Howard, San Francisco, CA, USA) CNR1 (Hailar), 27, 28, 29 July. Watching the surf, listening to CNR1's amiable chat/sounders with a low noise level on 60M for a few days. (Dan Sheedy)
4760	Jul29	1700	AIR Port Blair, noted in passing with talk by a man, low modulation. (David Sharp).
4765.01	Jul23	1840	Tajik Radio, noted in passing with local music. (David Sharp).
4774.9	Jul25	2249	R.Tarma, Tarma, castelhano, anúncios comerciais, canções índias. (Carlos Gonçalves)
4774.91	Jul30	1010	Radio Tarma, with Peruvian music om dj, weaker than normal signal after seemingly silent for previous two days. (Wilkner)
4774.94	Jul23		Radio Tarma, presumed with mensajes by a woman, bothered by CODAR. (David Sharp).
4790	Jul22	1248	CNR1 program jamming. All set to jam BBC Uzbeck *1300; CNR1 clearly // 6125 (Ron Howard, CA, USA)
4800	Jul28	1239	CNR1 (Geermu). Doing fairly well this morning //4750, 6125 (& dozens of other frequencies, too). (Dan Sheedy)
4810	Jul23	1826	Armenian Radio, very good with local vocals, talk by a woman. (David Sharp).
4810	Jul24	1715	AIR Bhopal (presumed), mixing with Armenia. (David Sharp)
4835	Jul28	1937	VL8A, Alice Springs, NT, religious comments and songs. (Méndez)

 Jul22 2148 Tent. R.Rio Mar, Manaus AM, canções, texto, A Voz do Brasil, às 2202. (Carlos Gonçalves) Trax for your always thorough logs especially about Brasil, but I think there must be some mistake on this one 5035 is not a known Rio Mar frequency! Rather R. Aparecida and R. Coari. I believe RRM is more or less inactive on 6160 and 9695. /Glenn Hauser The stn I heard on 5035 was not R.Aparecida as the beam was different and the prgr. was different too. I know, there was no ID, but I followed the up dated list in the DSWCI's DBS 2016, which includes both R.Aparecida and R.Rio Mar now using 5035 instead of R.Educação Rural, Coari AM. As to R.Rio Mar, o', I don't get them on 9695 for ages, but then they also close a bit early at least on 31 m. Maybe I logged them on 6160, but can't remember - I'd have to check this in my logsheets. Let me post a message at Radioescutas and find out whether the situation has reverted. Thanks for pointing this out to me! I didn't remember about my log and the report, but am almost sure I've read something about this on the Radioescutas forum. As to this year's DBS, I don't think they (Anker Petersen?) used my report, I believe there was some piece of news on the matter in Radioescutas or elsewhere; however, if they actually used my report for DBS, then they simply failed to understand my text. Let's await a comment from our Brazilian colleagues. (Carlos Gonçalves) 5066.4 Jul23 1820 R. Candip, good with French talk by a man. (David Sharp). 5915 Jul20 1322 CRI (Hohhot). CRI's 13-14 RU service doing well this morning with "radyo Khitaya" ID @ :25. (Dan Sheedy) 				
 Thx for your always thorough logs especially about Brasil, but 1 think there must be some mistake on this one 5035 is not a known Rio Mar frequency! Rather R. Aparecida and R. Coari. I believe RRM is more or less inactive on 6160 and 9695. /Glenn Hauser The stn I heard on 5035 was not R.Aparecida as the beam was different and the prgr. was different too. 7245	Jul29	0942	RNZI. Talking about the NZ wool industry; fair-good. July 30, at 1021, very strong signal with pop music (Ron Howard, San Francisco, CA, USA)
7254.94	Jun30	1815	Voice of Nigeria in English, ID. SHN
7289.93	Jul18	-0657*	RRI Nabire. Unusual reception, due to actually hearing audio here; EZL music; conforms to Atsunori Ishida's info; Dave Valko on the east coast was also hearing audio till sign off. Uni- que reception! (Ron Howard, Pacific Grove, CA, USA)
7295	Jul22	0850	Radio Sakha, via Yakutsk, with decent open carrier; 0900 started with IS and time pips; into the news and later some music; started out almost fair; by 1015 was very good, with // 7345
			fair. So Hiroyuki Komatsubara's reception and mine, of hearing them recently on the air before 0900, must have been related to the unique situation of the Yakutsk sports games being held then. What was strange today was that by 1050 it was just the reverse regarding what I heard at 1015. 7345 was many times stronger than 7295. Could they have changed transmitters during the broadcast? 1100-1300 found 7295 mostly unusable and 7345 covered by CNR1 1100-1300 (Ron Howard, CA, USA)
7295	Jul27	1050	// 7345, Radio Sakha, via Yakutsk. July 27 with anomaly reception; both frequencies do- ing very well at 1050, with usual "Radio Sakha" ID and chimes leading into series of ads; subsequent checking continued to find them both with about equal signal strength; this is a
			first for me, as normally only one or the other is much stronger.
			Received another email from "TV and Radio NVK Sakha" (Новости НВК Caxa <nvk-news< td=""></nvk-news<>
			@ <u>mail.ru</u> >) asking me more about my shortwave receptions of their station and indicating they want to interview me. Perhaps they think I speak Russian, as I have corresponded with
			them in that language. Am rather flattered that they would make this offer to me! (Ron Ho-
			ward, San Francisco, CA, USA)
7324.95			[non-log] Wantok Radio Light. Quick checked at 0903, July 25, to only find a clear frequency; this on a day with very good PNG propagation; has been off the air for a while now. (Ron Howard, San Francisco, CA, USA)
7325	Jul29	*1405-	Shiokaze/Sea Breeze (via Yamata). Loud with piano & opening announcement ("Kochiwara [JSR?] Shiokaze deh"). (Dan Sheedy)
7345	Jul26	0900	Radio Sakha, via Yakutsk. July 26 was another day of starting at 0900 without any IS or time
			pips; subsequent random checking till 1119. 7345 continues to be several times stronger than // 7295, which for a while around 1042-1050 was off the air, but by 1104, was back broadcasting again and still much weaker than 7345 (Ron Howard, San Francisco, CA, USA)
7505	Jul31	0310	WRNO with "Country Road" until close-down at 0402. From 0310 until 0400 the frequency drifted from 7504.92 to 7505.12 kHz. 3-4 (CB)
7505.19	Jul21	0340	WRNO with gospel programming in Chinese with some brief announcements in English. The frequency is far from stable. 3 (CB)
7520 7540	Jul31	0300	WHRI with a bulletin of news. Very strong signal. 5 (CB)
7540 7749.9	Jul15 Jul17	1805 1650	VOA Deewa R. via Udon Thani in Pashto, good. (UQ) Warsan R, Baydhabo. NEW STATION, 1650-1930. Somali ann, Horn of Africa music and

0525 01	1,120	1810	nesia". (Méndez) Voice of Indonesia, t/in to FZL vocals, then brief "Welcome to Indonesia" non ID and back to
9525.91	Jul29	1810	Voice of Indonesia, t/in to EZL vocals, then brief "Welcome to Indonesia" non-ID and back to music, fair to good strength and decent modulation. (David Sharp).

9545	Jul20	1237- 1301	UNID First day I have heard this here; strong signal. In Chinese; a native speaker from PRC listened to my recording and said probably not from PRC, so perhaps Taiwan? RTI on new frequency? Played pop songs; end of program at 1257 and gave email address to send in to request songs. Very unfortunate, as occasionally SIBC (Solomon Islands) is here during this time period, but they will not do well against this strong station. Thanks very much to Hiroyuki Komatsubara for this: http://goo.gl/IodSUu "Ron-san, ARIGATOUGOZAIMASU! -1026- 9545kHz Chinese, strong signal TAIWAN ??? 6105, 6180, 7200, 9660, 11640kHz No frequencies can parallel check in the interference of China (CNR-1). add; -1115- // 7200kHz, RTI Radio Taiwan International - Chinese program s/on at *1000-??, -1310- still on air, *1000-1400* ??? TNX! AOKI (AOKI List) : http://www1.s2.starcat.ne.jp/ndxc/pc/nd/userlist1.txt 9545 1000-1400 TWN *.TAIWAN INT.
			<i>Chi Tamsui Dist 1-7."</i> Also appreciate Aoki updating his excellent database: 9545 * R.TAIWAN INT. 1000-1400 1234567 Chinese 100 352 Tamsui District TWN 2511N12125E CBSC a16 Jul.20 - Again, this
9545	Jul26		is sad news for SIBC (Solomon Islands)! (Ron Howard, Pacific Grove, CA, USA) non-log of RTI. My observations yesterday must have been correct; China was listening and found, just as I also observed, that RTI was not broadcasting on the 25th. So on July 26, found this frequency complete free of either RTI or CNR1, with random checking 1000-1121. So it is fine now for SIBC (Solomon Islands) to again have extended use of this frequency, which they sometimes do have long after their normal 0500*. July 27, non-log of both RTI & CNR1 (CHINA), econd day of no broadcasters here; 1052- 1205- (Day Iday of the Son Frequency CA, USA)
9545	Jul21	1247	1205. (Ron Howard, San Francisco, CA, USA) RTI 1137-45, 1247-1300, *1000+ 22 July Thanks to Ron Howard's tip, found RTI's NF with no CNR1 jamming (yet)//7200 when checked @ 1247-1300+ on 21 July with CH pop & an Amy Winehouse song (7200 very tough with CNR1 echo jamming). (Dan Sheedy)
9565	Jul26	2114	SRDA, Curitiba PR, propag. relig., QRM dos EUA (R.Martí) + CUB (sinal de empastelamen- to visando a R.Martí). (Carlos Gonçalves)
9580	Ju130	0904	RA back to normal, with 9580 (good) // 12065 (poor) // 12085 (fair), plus // 4835, ABC Alice Springs NT (fair); 0904 with the end of the match up of Magpies vs Eagles, via "Grandstand AFL"; same frequencies at 0931 with coverage of the Kangaroos vs the Saints. A lot of AFL sports tonight! (Ron Howard, San Francisco, CA, USA)

Station news

BRASIL. Please try to listen to **Radio TransMundial** (Brazil), on 5965 kHz (after 0300 UTC), 9530 kHz and 11735 kHz (both after 1000 UTC), and send your reception report to qsl@transmundial.com.br . I will verify your information with a QSL-card. I am the V/S for the station. One of my home jobs! Inform the frequencies to your friends. It will be a nice friendship with our friends in the Nordics.

(Rudolf Grimm São Bernardo SP)

CLANDESTINE. New Eritrean clandestine Radio Adal was observed signing-on 15205kHz in Arabic at 15:00 UT 16 July 2016, switching to Tigrinya language at 15:30 UT. Blocked by co-channel Saudi Radio Koran Programme at 15:53 UT. Radio Adal was also observed in progress in Tigrinya at 15:35 UT on 13 July 2016, blocked by Saudi Radio at 15:48 UT. So the schedule seems to be 15:00-16:00 UT Saturday & Wednesday, though start time for the latter is still to be confirmed. See WRTH Facebook for further details.

Reception for both broadcasts was fair to good via Twente remote receiver, Netherlands.

The Sultanate of Adal was a medieval state located in the area of present-day Eritrea.

Radio Adal confirmed signing on at 15:00 UT today (20 Jul 2016), switching to Tigrinya at 15:30 UT. Schedule is thus confirmed as Saturday & Wednesday 15:00-16:00 UT, with the first 30 minutes in Arabic then the remainder in Tigrinya. (David Kernick, Interval Signals Online)

GUATEMALA: A todos los amigos y oyentes de **Radio Verdad**, les informamos que, finalmente, logramos salir al aire por Internet con el mixlr. vMañana pensamos instalarle un tarjeta estabilizadora de Internet. Además, en esta semana pensamos salir al aire otra vez con Radio Verdad TV por medio de YouTube. Que Dios les bendiga.

-----English-----

To all our friends and listeners of Radio Truth, may I inform you that, finally, we got to come on air by Internet through the mixIr. We plan to instal a stabilizer card for Internet tomorrow. Besides that, we are planning to come on the air with our televisión on YouTube this week. May God bless you.

(Dr. Édgar Amílcar Madrid Radio Verdad -Radio Truth, 0516 UT July 29, via DXLD)

USA. Unique Radio will be on WINB. "The show will be hosted by Aussie Tim each Thursday night on 9265 kHz over WINB, the USA's first commercial shortwave broadcaster."

Well, not THE first. There were commercial SW broadcasters in the U.S. before WW II. After the war, only WRUL and KGEI returned to the air. WINB, the first new post-WW II private broadcaster, received FCC authorization in 1962. It might be argued that WINB is the longest running "commercial" or private U.S. SW broadcaster still on the air. And "commercial" in the sense that they rent air time. However, WRUL (which considered itself an educational rather than commercial broadcaster) became WNYW, which was sold to WYFR.

And of course, WYFR's Okeechobee facility was sold to WRMI. So, WRMI's lineage (in the sense of the transmitter owners) goes back before WW II. Perhaps this is why WRMI is currently IDing itself as "the commercial shortwave station in the USA" using what sounds like a vintage recording. Some of this I remembered but some I had to check in Jerome Berg's excellent book Broadcasting on the Short Waves, 1945 to Today. (Richard Langley via DXLD)

Other radio news

Radio Suecia Internacional, personal del Servicio en castellano. (1980s).

Here is a couple of pics from Radio Sweden's Spanish Service staff in the 80s and earlier. Great voices, they are well remembered till ou present days. In particular Mrs. Brita Brand who was named the "Lady of the Shortwaves" by Spanish and LAm community of SWLs and DXers.

Read the full story here:

RUSSIA TO DEPLOY TWO POWERFUL OTH RADAR SYSTEMS IN THE BALTIC AND BLACK SEAS and beyond

Russian Interfax news agency reported that Russia may attempt to compensate for the increase in NATO's military activity by placing two new radar stations in the Baltic Sea and the Black Sea, which would be able to control the 200-mile coastal zone.

"It is expected that modified Podsolnuh (Sunflower) over-the-horizon radar units will start combat duty in the Baltic Sea in 2017," Interfax's source said, adding that similar radar could be deployed in the Crimea in 2017. "It can see any warship that sails through the Bosporus Strait."

The Podsolnuh radar system passed the Russian government tests in 2006. There are three stations currently on duty: one in the Sea of Okhotsk, another in the Sea of Japan and the third in the Caspian Sea. Podsolnuh allows its operators to automatically and simultaneously detect, track and classify potential threats beyond the radio horizon. It can find up to 300 offshore objects and 100 air objects, determine their coordinates and transfer them to targeting complexes and systems of armed naval vessels and air defense systems.

In June, Podsolnuh's developer, RTI, told Interfax that the company plans to supply the Ministry of Defense of the Russian Federation with several more radars in the future. "In 2017, the Russian Defense Ministry plans to purchase several stations for the Navy that will be deployed in the Arctic, as well as at the southern and western borders of Russia," said the Director General of RTI, Sergey Boev.

In March, Podsolnuh guided warships of the Caspian fleet equipped with the Caliber-NK missile complex during naval military exercises (UAWIRE Thursday, July 7, 2016 via La Rassegna stampa, Radiorama numero 58, AIR Associazione Italiana Radioascolto, Torino, Italy via RusDX 24 July via DXLD)

OTH = over the horizon, which requires the use of HF = SW frequencies (Glenn Hauser via DXLD)

Reuter Pocket Preise

Das Grundgerät Pocket C1 (Receiver 0...30 MHz + 50...71 MHz, 2x14 Bit ADC) wird 999,- Euro kosten. Die Optionen werden voraussichtlich (noch kleine Änderungen möglich) wie folgt kosten:

- Pocket D1 mit 2x16 Bit ADC: +100,- Euro

- Pocket C/D2 mit UKW-Modul (87,5...108 MHz + 136...151 MHz): +200,- Euro
- Pocket C/D3 mit TX-Modul (9 Band KW + 6 m, 1...5 W PEP): 500,- Euro

Eine Bestellung wird ab ca. Ende August / Anfang September möglich sein. Die Lieferzeiten schätzen wir derzeit auf ca. 8 - 10 Wochen ab Bestellung.

(Viele Grüße, Burkhard Reuter via A-DX)

Över tre tusen radioamatörer har mist sina licenser. Artikeln redovisar vilka andra grupper som råkat i onåd. (Henrik Klemetz via NORDX)

Receiver noise floor and antenna noise on Mediumwave

I have sketched a little on the receiver and antenna noise on the medium wave at home and at the cottage. The figures are true within some db.

1. NRD 515 modified with BP filter on MW has a noise floor at nearly -140 dB. The set has sufficient sensitivity for all modes.

2. AOR 7030 has a sensitivity that is insufficient in a really quiet QTH. An external 10-dB preamp is needed to get the S-meter to move the antenna noise on my beverage in the cottage during daytime.

3. Perseus has a sensitivity that is not at all sufficient in a quiet QTH. About a 15 db low noise preamp is needed to raise the antenna noise on the beverage above Perseus own noise in a quiet QTH as in the cottage. At home there is no need at all for a preamp. My man-made noise level at home is S-3.

4. The noise level on my beverage at the cottage in daytime. Varies a few db due to the season but remain roughly at this level. A little quieter on summer days than on winter days. This is at frequencies free from interference from wind power. The cottage is located about 5 km from the nearest power line, about 100 km from any major city and about 50 km from a large wind farm.

	Mottagare brusgolv	Antennbrus

	3= Perseus	
	4= Beverage 450 meter vid s	stugan på dagtid.
	5= Beverage 450 meter vid s	
		stugan coronaurladdning vid snöfall från 400 kV 7 km bort.
	7= Beverage 450 meter vid s framriktning. Omöjliggör D	stugan bred störtopp runt 530 kHz från vindkraftpark 50 km i Kunder 650 kHz.
	8= Beverage 450 meter vid :	stugan störtopp vid 1030-1130 kHz från vindkraft 50 km.
	9= KAZ antenn 30 meter bas	s, här hemma. Dag och natt. Lite lägre brus vid regn.

5. The noise increase in the cottage at evening / night is from propagated noise from lots of thunderstorms in the tropics. Those form a noise carpet that is reflected as a radio signal when it is dark between the tropics and the receiver. You don't hear the individual lightning crackle from thunderstorms in Europe, but only as a white noise. Generally this noise is called atmospheric noise, and it's the noise you hear as a background noise in a silent QTH on medium wave both night and day. Not to be confused with the cosmic noise that dominate at frequencies above about 10 MHz. During the day when it si light the reflection is low and the noise level from the thunderstorms will be lower. When it darkens the reflection is better and the noise level increases. The noise typically increases by about 15 dB when it darkens. To perceive this, one must have a real interference free QTH.

Here at my home QTH, you will not hear the noise increase due to local noise level from industries, small communities and the town of Sundsvall about 15 km away. Here at home, you will never hear the atmospheric noise but all you hear is the local man made noise even at night. In the cottage this noise increase is clearly noticed. It varies depending on the reflection in the ionosphere from the tropics and decreases when it starts to get light in the morning in southeast Asia. When it started to brighten here the noise decreases to daytime level.

6. In case of snow, fog, rain corona discharge from the 220 and 400 kV lines located 5-7 km away from my house disturb. The lines are located behind two mountains down into a valley. There is no electricity closer than 5 km from the cottage, incidentally. All equipment in the cottage is running on battery.

7. Wind farm of 3MW (about 90 units) is located about 50 km away in the forward direction on my Beverage. This is at 530 kHz. The area below 650 kHz is impossible for DX. Before the wind power started the band was completely clean.

8. Wind farm in a band area where the interference is lower. Also a band area around 1500-1600 is disturbed.

9. Noise from a KAZ antenna with 30 meter base without any extra gain at home in the countryside 10 km from any major industries and 15 km from the town of Sundsvall.

10. Noise on an identical KAZ with 30 meter base in the cottage but with 20 dB gain. The noise is despite two 10 dB preamplifiers below the noise on the home antenna without a preamp. /Stefan Wikander

(Thanks a lot for a very interesting comparison! Unbelievable that you can have such a low noise level. /TN)
