SHORTWAVE

Issue no. 1925, June 2, 2019.

Deadline e-mail next issue: 0800 UTC, June 16, 2019.

Time again for another SWB.

This time with a little more activity on the 60 mb thanks to a few very interesting logs by Karel Honzik in Czechia.

Couldn't resist to check the band also here in South Sweden. On May 22 there were activity on most of the remaining Peruvian frequencies. But not possible to catch any station on 4930.

Since May 22 the conds has been non exsisting on SW. Let's hope things will improve.

No QSL's to report in this issue so had to look for other information and found some quite interesting logotypes from some of the stations in the log.

Also many thanks to Ronny forslund for another DX-Nostalgia column.

I know many of you are very interested in those old verifications.

I got a bunch of old QSL cards from John Ekwall and also found some on eBay which will show up in coming issues.

Keep on

========

QSL, comments, etc.

As we have no QSL information for this issue, here comes instead a small collage of logotypes from stations included in the log from Peru, Ecuador & Surinam.

Regarding **Radio Tarma** there is an interesting article by Don Moore which can be found here: http://www.donmooredxer.com/lam/sam2017/peruDX/tarma.html

2040+	Mov10	0605	HINT Padia Hualles Cali as praviously IDad sorrier obviously there despite high storm
2940+	May19	0605	HJNT, Radio Huellas, Cali, as previously IDed, carrier obviously there despite high storm noise level here. I am surprised that there have been so few reports of this second harmonic,
			in fact the only active Colombian (almost)-SW station. Where are the DXers elsewhere in
			North America, let alone Latin America? Maybe just as well, as attempts to QSL it might
			lead to its demise (Glenn Hauser, OK)
2940.134	May22	0455	z tune-in. Hearing harmonic from presumed R. Huellas, Cali, on tip (tnx!) from Glenn Hau-
	-		ser. MW Offsets shows its fundamental as 1470.075, so if my measurement is accurate, they
			drifted down 8 Hz since December, 2015. Barely any recovered audio on both sidebands, so
			carrier freq. and Glenn's reception are the only clues as to its identity. QSB w/peaks to S-
			2 on Icom's meter. Moderate storm noise w/50 Hz CW filter in to monitor carrier. (Steve
			Zimmerman, Milwaukee, WI via WOR)
3215	May22	0250	WWCR, Nashville, TN English talk, hymns by choir (AP-DNK)
3260	May21	1203	NBC Madang, (Maus Blong Garamut - Voice of Indigenous Drums). Currently this is the
			only PNG that I can hear; Wantok Radio Light (7325) is so low lowered that I can only hear
			a faint carrier and for awhile now NBC Bougainville (3325) has been off the air during my normal monitoring times. Madang, 1203-1213 with news in English (unreadable) and pop
			songs; cut off in mid-song (Ron Howard, Asilomar State Beach, CA)
3264.9	May14	2030	WBCQ. Weak with male EE annrustic Chet Atkins C&W, asst. jazz, honky tonk oldies
3204.7	Way 14	2030	from 78 rpm vinyl for MX ID jingle @ 2045 & 2116 tho it's for "WBCW". Lots of QRN.
			WBCQ ID @ 2100, mentioned 3265 kHz and the FM station. Was on IC-7300 cking re-
			cently installed NR vertical antenna. ME BCB/ham QSOs common here. (Scotka)
3310	May11	2347	R Mosoj Chaski, Cotapachi, steady but just barely audible threshold, not nearly as good as
	•		received in the past. (XM)
3310	May24	0030	Radio Mosoj Chaski, Cochabamba om in Quechua, no music heard. (Wilkner)
3310	May26	0205	Radio Mosoj Chaski, Cotapachi, Quechua, comments. (Méndez)
3325	May24	1133	Voice of Indonesia, via RRI Palangkaraya. Clear audio in Chinese, but later (1209-1232)
			found carrier with no audio at all. May 25, started about 1057; today no audio (only carrier)
2225	T 1	1000	with random checking through 1315 (Ron Howard, Asilomar State Beach, CA)
3325	Jun1	1800	Bevor morgen die Asien und Südamerika Beverage abgebaut wird konnte ich heute nach 18
			Uhr UT die deutsche Sendung der Voice of Indonesia über den Sender in Palangka Raya auf
3375	May24	0020	3325 kHz im Tropenband hören. (Christoph Ratzer via A-DX) Radio Municipal São Gabriel da Cachoeira, om with some brief music. (Wilkner)
3910	May12	1107	V of the People, Goyang, cland, not much more than a carrier w/ ham QRM. (XM)
3975	May22	1710	Shortwaveradio, Winsen English ann, pop songs // 6160 (QRM CRI 6165). (AP-DNK)
3985	May22	1715	Shortwaveservice, Kall-Krekel English ann, pop songs. CWQRM in USB (AP-DNK)
3995	May26	0200	Life FM via HCJB, Weenermoor English ID, ann, hymns (AP-DNK)
4010.23	May22	1725	Birinchi R, Krasnaya Rechka Kyrgyz, conversation (AP-DNK)
4055	May12	0038	R Verdad, San Esteban, relig pgm in SP, M preaching, poor. This used to boom in. Suspect
			that the few stations remaining are using xmtrs near the end of their life. (XM)
4055	May26	0506	Radio Verdad, Chiquimula, religious songs and comments in English. (Méndez)
4747	May11	2352	R Huanta 2000, Huanta, mostly carrier w/ occasional threshold signal. (XM)
4747.57	May24	0020	Radio Huanta 2000, Huanta, Ayacucho, first time over the CODAR om in SP, steady albeit
47.47.500	N 00	2255	weak signal. (Wilkner)
4747.598	May22	2255	R Huanta 2000 with music. (TN)
4747.6	May17	2242	R.Huanta 2000, Huanta. Indian songs. 25332 (CGS)
4747.6	May25	2257	Radio Huanta 2000, Huanta (presumed), extremely weak, carrier and some audio detected
4750	May24	1238	on LSB. (Méndez) Bangladesh Betar (External Service). For the first time heard with semi-readable news in
4730	1V1ay24	1236	English, cutting through the QRM from CNR1; long item about PM Modi's landslide re-
			election in India; Bangladesh government sent their congratulations to Modi; the crowds in
			New Delhi waiting for the PM to speak had to endure heavy rain; normally CNR1 is just too
			strong, but not today. Still no trace of VOI/Makassar here (Ron Howard, Asilomar State Be-
			ach, CA, via DXLD)
4765	May26	0205	R Progreso, Bejucal Spanish ann, nice Cuban songs (AP-DNK)
4765	May25	1838	Takij Radio, Dushanbe, Tajik, comments. (Méndez)
4765.06	May18	1840	Tajik R 1, Yangiyul Tajik reading poem, local music (AP-DNK)
4774.9	May25	2256	Radio Tarma, Tarma (presumed), sound like Peruvian songs but extremely weak to be able
			to confirm it. Best on LSB. (Méndez)

9200	May21	0608	UNID. Glenn Hauser (WOR iog) has reported: "9200, May 21 at 0608, mystery open carrier still, S1-S3. No one else reports it, and might suspect local to here but it does exhibit propagational fading and lots of variation in strength from one log to the next. Who cares? The thing is, it might develop into something significant or interesting if we keep after it.
			9200, May 21 at 1438, JBA carrier at S6-S3 also audible this time. Now could be CNR1 jammer/Sound of Hope, which Aoki spans 2151-1530, but propagationally surely not what I am getting in the nightmiddle."
			May 29, during a quick check, found a decent level carrier at 0429, with no audio at all, on 9200 kHz., so Glenn's UNID is not local to just him (Ron Howard, Asilomar State Beach, CA, USA)

Station news

CONGO, 6210.2, Radio Kahuzi, Bukavu, irregular at closing time (1730-1803*). At this time can be heard here when propagation condition are good. Some days out of air and other on. I have contacted with the station, via email and here is the replay about electricity problems.

"Thank you for your questions and monitoring!

We have been on the air most mornings, but city-wide problems have limited most zones to one or two hours during the day and similarly the nights!

And we were on the air yesterday morning (8h35 to 9h50) and evening the 28 May 2019 -- however, the SNEL cut the current for Bukavu after we relayed the News, after about half an hour at about 18h45.

Today we were on SW 6210 KHz 8h26 to10h00 and lacked current until the evening when it was cut several times until about 19h20 until a cut-off by SNEL at 19h45.

We hope conditions were good enough for you to pick up our signal again.

The main problem seems to be that reconnections of city cables are made without proper use of tape and protection of supply aluminum cables from the rains and short circuits.

You can imagine how difficult it is to be on the air and protect equipment from current swings to 180 Volts or 380 Volts, when there are short circuits in local cabinets where the transformers are. Keep Looking UP!"

ECUATORIAL GUINEA, 5005, Radio Nacional, Bata, irregular at open time, at about 0510, more days on, but some days off air. Yesterday, May 31 open at about 0590 with songs, but today June 1 out of air.

GUINEA, 9650, Radio Guinea, Conakry, this station seems to be out of air for about a weak. Only Saudi Arabia heard on 9650.

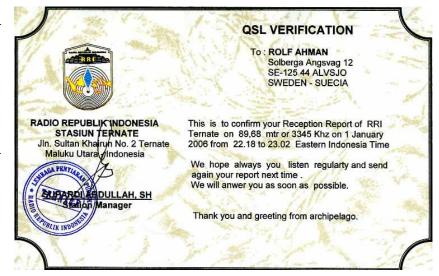

INDONESIA 3345, RRI, Ternate. 2103-2113, 11/5. Texto; 15331. 73, (Carlos Gonçalves, SW coast of Portugal,

WORLD OF RADIO 1983, DXLD)

Ternate is rarely active. That was in their morning; for our benefit, hope it's also on in evening (gh, ibid.)

Carlos previously reported it presumed this March: 3345 RRI (p), Ternate, 1849-1856, 12/3. Texto; 15331.

For his DBS, Anker Petersen said it was "only sporadic", last logged in October 2018. Until he himself reported later in December: 3345, 2235-2240 13.12, RRI, Ternate (p), Bahasa Indonesia talk - best in USB, 13131 (AP-DNK)

My last report was Oct 6, 2018 circa 1233: "Propagation is certainly OK, as I again detect the JBA off-frequency carrier just below 3345 from RRI Ternate, which BTW is in the Maluku Islands of eastern Indonesia". There were definite logs of it on 3344.86, Sept 19, 2018 as in DXLD 18-39. Carlos and all should check for this precise frequency (Glenn Hauser, DXLD)

Hi Glenn,

May 27 - Have been checking Ternate almost daily, including today, as it is the one RRI station most likely to reactivate for Ramadan, as they have done a number of times in past years, but no results so far during my morning monitoring. Today at 1118+, was checking 3325 for VOI (heard in Chinese, with faint audio) and also checked for Ternate, but nothing there. Will keep checking. You are certainly correct, a good sign that it is them is the off frequency (3344.86 kHz.). (Ron Howard, California, via WOR)

Other radio news

BOG - Beverage On Ground

Die Beverage Boxen von RemoteQTH.com gibt es nun auch als "BOG" also Beverage on Ground Version.

https://remoteqth.com/single-wire-beverage.php

(Christoph Ratzer via A-DX FB)

Radio Onda Popular, Bambamarca.

Fredrik Dourén managed to hear this station on 950 kHz some time ago and recently he received a verification from them and has a few comments.

Checked some history on this name. On SW 5200 + -100, they were noted in WRTH 1988-93. On MW 950 from 2014. I have a recording on 5274 kHz from 1987 which of course was never answered. Currently R Onda Popular is probably run from Cajamarca and has several relays in different provinces in Cajamarca. The current name was first known in MV-Eko 56-1.

Lisette Åkesson says: Speaking of Onda Popular, I was looking in the drawersand found some fun stuff. They replied with postcards, letters and a few ither stuff like soles banknotes! Enclosed my old verification.

CAJAMARCA O5 DE ABRIL DE 1989.

SUECIA - EUROPA /
CUERIDO Y ESTIMADO AMIGO :

Espere que al resibir

la presente carta se encuentre gozando de una buena y perfecta salud en union de todos sus familiares y amistades presentes que le redean en esa.

Luego de saludarte paso ha d ecirte lo siguiente, si resibi tu ca carta en el mes de marzo, luego quiero que me disculpe por no habe rte escrito antes el motivo es de que no contabamos con los medio s suficientes para peder contestarte le mas pronte pesble , pero a ahera si te premete centetar tedas tus cerrespendencias que Ud. nes embie, y tambien estado en bambamarca y me he d morado un tiempito, pero como le digo que ahora ya me encuentro n la ciu dad de cajamarca, mi estimado ROLAND, no sabe ud. cuanto gusto me dio al resibir su carta , gracias al sr. ZET JACOBSSON , que tambien le escrito, le contesto siempre sus cartas, dele mis saludos al buen amigo, que tambien vive en EUROPA (SUECIA) Luego quiero contarle algo de la radio , la radio " ONDA POPULAR" conformada per tres socios que semes des hermanes y un tie (CARLOS E/ MINCH AN RIOS , SEGUNDO MINCH AN RIOS y CLAUDIO MINCH AN Somes les tres muchaches , jevenes nes gusta la musica , que junteme un dinere del frute de nuestre trabaje y comprames un transmiser y decidimos poner una emisera en la provincia de BAMBAMARCA, y asi le hicimes hasta el dia de hey, pere tenemes problemas con les equipes per que ne centames cen tedes les equipes necesaries, sel solo de nuestra propiedad contamos solo con el transmisor que es nuestro, el resto de los equipos son prestados, tales como: AMPLIFICADOR , CONSOLA y MICROFONOS , tal como lo hemos contado al sr/. zet jacobsson, y tambien le hemos pedido ayuda y hasta ahera ne hemos resibide su contestacion, con respecto de la emisora es como le voy ha decir :

TRANSMISOR 500 vatios
ANTENA 60 metros
FRECUENCIA 5,270 Khz
ONDA CORTA
BANDA TROPICA L.

AME (A.M.E.), Ateliers de Montages Électriques; Paris, 7G1480

The 7G-1480 communication receiver is a derivative of the previous 8G-1460 receiver.

Built between 1954 and 1960, it benefits from the technical achievements of the receivers 7G-1680 BA / 7G-1680 MA.

It is a superheterodyne double-frequency receiver that covers the MF band and the HF bands, from 1.5 to 40 Mc/s, in seven sub-ranges.

The first intermediate frequency is 1400~Kc/s and the second is 80~Kc/s. It operates as a superhet, the frequency of the local oscillator is higher than 1,400~Kc/s at the reception frequency.

It is equipped with 16 miniature tubes: 6AM6, 6BA6, 6AU6, 6BE6, 6J6, 6AL5, 6AV6, 6AQ5,6X4, OB2 and an octal magic eye 6AF7.

It has a variable selectivity: 1, 2, 6 kHz.

It allows the reception of telegraphy A1, telegraphy modulated A2 and AM A3. It is equipped with a BFO and a noise limiter.

There are two military versions: RR10A for the Army, RR10B for the Air Force. Model: RR-10-B - net weight 46 kg.

SDRplay demonstrating diversity receive - SDRduo/SDRuno at Dayton

I don't know if anyone has heard, but the SDRplay folks are demonstrating an experimental version of SDRuno (there will be a released version soon) that has diversity capability with the SDRduo SDR at the Dayton hamfest. From what I have seen there is dual (i.e. separate) amplitude control and a target-type window to adjust the relative amplitudes and phasing of the two phase-locked receivers.

I wasn't able to attend so I haven't seen it work, but I was thinking that this could be very useful for phasing two antennas, or I was wondering about one of the dual-D-Kaz configurations? I'm guessing here, but there would probably be a few interlocking adjustments with the remote termination adjustments and then the phasing, but does anyone see anything positive for mediumwave? (Rick Kunath, K9AO, May 18, MWCircle yg via DXLD)

Re: SDRplay demonstrating diversity receive - SDRduo/SDRuno at Dayton

I addressed the issue yesterday, following a Facebook post by Jon Hudson. I also raised the question if it could be possible to see a solution for pre-recorded IQ files, as I assume the current solution is for live listening only (Bjarne Mjelde, http://arcticdx.blogspot.com May 18, MWCircle yg via DXLD)

Ah, good point. I hadn't thought about being able to record an IQ file from the 2 receivers and then to adjust the diversity later. That would be a killer feature (Rick Kunath, May 19, ibid.)

Re: SDRplay demonstrating diversity receive - SDRduo/SDRuno at Dayton Not to mention being able to phase antennas in software to null interference (Bjarne Mjelde, May 20, MWCircle yg via DXLD)

NEW HISTORY MATERIAL AT < http://www.ontheshortwaves.com>

About 25 years ago, a postcard turned up depicting the "Government Wireless Station" in Stanley, the Falkland Islands, Seeking more information, we sent it down to the Falkland Islands Broadcasting Station to see if they could provide some more specific information. Under "DX History/Stations," we have posted the card and the FIBS reply, together with two sets of Falkland Islands "radio communications" postage stamps, one of which is on a 1962 Falklands first day cover. The first North American logging of FIBS shortwave, then on 3958 kc., was in July 1958, and was accomplished by ace DXer John Beaver of Canon City, Colorado. Loggings by others, including Don Jensen, followed, but the whole affair was deemed "impossible" by some die hards. It played out in the pages of the NNRC Bulletin from August 1958 to February 1961, and you can read it all (and see DNJ's Falklands QSL) here. -- And Adrian Peterson has supplied this new entry under "Specialized Resources/Wavescan": "The Shortwave Station in England that Refused to Die: The Woofferton Story - 2" (Wavescan N535, May 26, 2019)

DX nostalgia

Sorry I missed the nostalgia section for the last edition of SWB. I thought it was closed for vacation.... Anyway, here is a nice old QSL card from 1948 and OAX4P Radio Huancayo in Peru. /Ronny Forslund

From Juticalpa, Honduras station HRXE Radio 1030 sent this letter to TL in 1964. Apart from the obvious frequency of 1030 kHz MW it could also be heard in the 49 m. SW band on 6145 kHz.

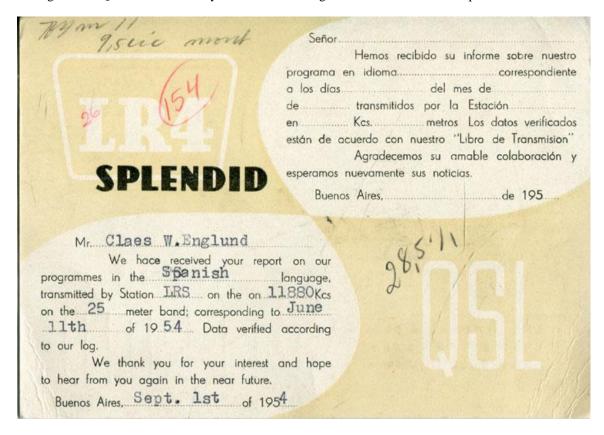

page 10

From the collection of Claës-W. Englund CWE comes this 1950s QSL card from Radio El Mundo in Argentina. The station first came on the air in 1935 and is still fairly common on MW 1070 kHz today. It has now left SW.

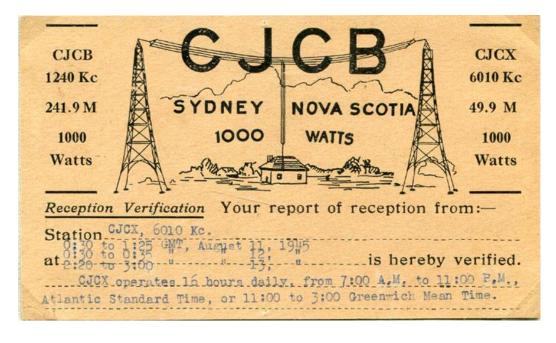

Another Argentinian QSL card received by Claës-Wilhelm Englund in 1954 from Radio Splendid.

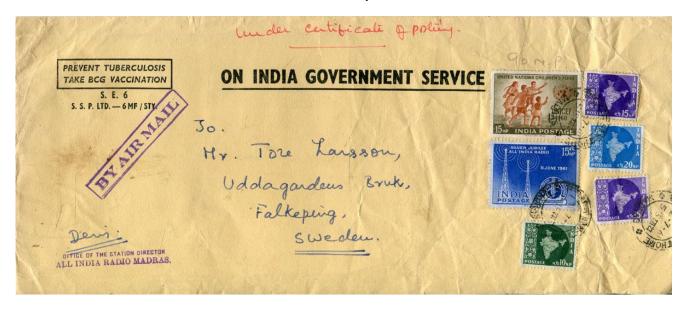

Radio Rural Brasileira sent this QSL to CWE in 1959 with a small pennant stapled to the card.

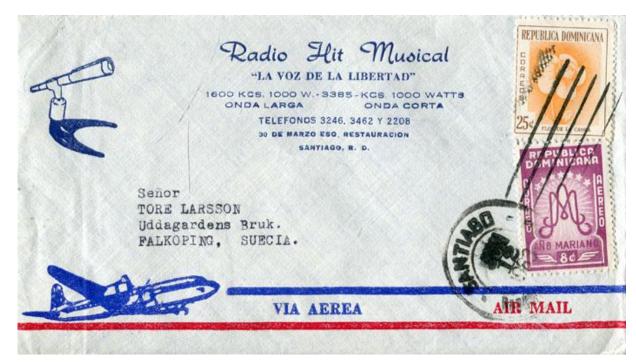

From the collection of Jan-Erik Räf JER: CJCX Sydney NS. One of the private commercial Canadian stations which also used SW. CJCB started already in 1929 and was broadcasting on SW using the call CJCX from 1938 to 1976. Today the station is running a country format on 1270 kHz MW.

A letter to TL from the All India Radio station in Madras received in 1961. The stamp showing two radio towers was issued to commemorate the Silver Jubilee of All India Radio that year.

Station Radio Hit Musical, "La Voz de la Libertad", in the Dominican Republic sent TL this letter in 1963.

Finally a poster which Radio Katanga sent to TL. The State of Katanga was a breakaway state that proclaimed its independence from the Republic of Congo-Léopoldville in 1960 under the leadership of Moïse Tshombe. The state existed until 1963 when it was reintegrated with the Republic of Congo. Tshombe would become prime minister of the new Republic in 1964-65 until he was charged with treason by President Mobutu who had overthrown the former president Kasa-Vubu. Tshombe fled to Spain and in 1967 the aircraft in which he was traveling was hijacked by an agent from French intelligence agency SDECE and Tshombe was taken to Algeria where he died two years later.
