Issue no. 1977, May 30, 2021

Deadline e-mail next issue: 0800 UTC, June 13, 2021

Time again for another SWB.

Today we have got summer temperatures, almost 24° no clouds and no winds. A perfect day.

A lot of items in the log as usual.

But I have to say it once more – do not include language for those stations always broadcasting in their native language, like Brazilians, etc. It is waste of space.

A very interesting information was that the big QSL collection from the late member Göte Johansson went for a record amount. I think I heard the whole QSL collection filled 22 folders.

To fill up space I have included some old QSL's where WIBS and Ghana is from my own small collection. It is only for very interesting stations that I nowadays write a report, maybe one every second year or so.

Again many thanks to Ronny Forslund who continues to provide us with rare QSL's and letters from the past.

Keep on

=========

SWB-info

SWB on HCDX: Dateline Bogotá 1993-1998: SWB latest issue/archive: http://www.hard-core-dx.com/swb http://www.hard-core-dx.com/swb/Dateline.htm http://www.hard-core-dx.com/swb/archive.htm

QSL, comments, etc.

Klaus Floer: thank you very much for the fast reply and I am looking forward to receiving the bulletin in the future. My name is Klaus Floer and I am a retired teacher of German, English and Latin. I am 71 years old and have been been a SWL for about 45 years. I am also a ham radio operator under the call sign DL3KF and I serve as president of the local chapter of the German Ham Radio Operators' Association.

Very welcome to the gang! /TN

Christer Brunström: W.I.L. (="What I Like") 6070 (via Moosbrunn) eQSL. WIL is described as a fun project presenting their favourite music. Radio Delta 6005 eQSL. Wants contributions from listeners to the Sunday DX show. Offshore History Radio (via Channel 292) 9670 eQSL.

Lennart Weirell: Två QSL att rapportera: **R Delta - 6020** e-kort 8 t, **Panda R - 6290** e-kort 2 d.

Ronny Forslund: Göte Johansson's QSL collection went for a record amount (SEK 37,200 incl. commission, = 4500\$), which should be a world record for a QSL collection. The only question is how the buyer should be able to earn some money by cutting up the collection and selling it, with such expenses. It is of course sad when Swedish DX's collected material disappears from the country in this way, but we must be happy for what has still been saved for posterity.

WIBS QSL from 1960

| 9835 | | | Sarawak FM (9835 kHz.), on May 20, at 1353 UT. Indigenous chanting (not reciting from | |
| | | | Qur'an); 1400, news till cut off at 1405*. This closed first and then a few seconds later Wai | |
| | | | FM (11665) cut off, also at 1405*; Wai FM continuing to be heard with bad audio. Please | |
| | | | also note Amano's recent informative log - https://radio.chobi.net/DX/bbs/?res:4859 . My | |
| | | | observations match his! (Ron Howard, California) | |
| 9835 | May26 | 0803 | Observed 9835 (Sarawak FM, not // to Wai FM 11665), from 0803-0806* UT. First time | |
| | | | for me to hear the Asr late afternoon prayer; transmitter cut off just after the prayer; had not | |
| | | | returned to the air by last check at 0845, while Wai FM (11665) continued on as normal. | |
| | | | This is very similar to a report from Amano, for his reception yesterday: 9835, Sarawak FM, 0855-0945* *10??-, May 25 (Tuesday). At 0855, no upper and lower | |
| | | | side interference, so fair! At 0900, Interference starts from the lower side, CNR-1 on 9830 | |
| | | | signs on. To avoid interference, I used sync on USB. I enjoyed listening to Sarawak FM | |
| | | | very much. The sound is better than the Wai FM! At 0945, It suddenly signed off. Wai FM | |
| | | | on 11665 is not stopped. Sarawak FM doesn't also sign on after 1000 UTC. At 1100 check, | |
| | | | it was already signed on. | |
| | | | My audio (03:30) attached. [https://radio.chobi.net/DX/bbs/img/4884.mp3] | |
| | | | * 00:00-03:30, 0920:00-0923:30 UTC | |
| | | | * Sarawak FM, ID called by the child at 03:16. | |
| | | | * 00:00- "Raya" Sung by Jalil Hamid (from the middle) https://youtu.be/ti3Gwu65FMk | |
| | | | *My audio, 00:00- // YouTube, 02:38- | |
| | | | Sarawak FM on 9835 is good sound. Thank you very much, Ron!!! | |
| | | | (Amano, Arakawa Riverside, Saitama Toda-city, JAPAN) | |
| | | | Today, I noticed Wai FM (11665) at 0835, with good audio during the news; at 0840, went | |
| | | | back to having the usual very poor audio; it sounded like an echo or out of sync audio. So | |
| | | | the news audio comes from a different source than all their other programming! (Ron Howard, California) | |

Station news

BRAZIL. [WOR] Rádio Aparecida - hasten to QSL 6135

- Já faz algum tempo que a Rádio Aparecida desligou seus transmissores de 5.035, 9.630 e 11.855 kHz. Permanece, no ar, apenas a frequência de 6.135 kHz. No entanto, há rumores dando conta de que tal canal também poderia ser silenciado, até dezembro deste ano, motivado pela crise causada pela pandemia do coronavírus e baixa audiência em ondas curtas. Portanto, se você ainda não tem o cartão QSL impresso da emissora, agilize-se! Envie um relatório de recepção para a direção da emissora, por meio de carta clássica, ao seguinte endereço: Rádio Aparecida, Caixa Postal 2, CEP: 12.570-970, Aparecida (SP).

It has been a while since R Aparecida turned off its transmitters on 5035, 9630 and 11855 kHz. Remains on the air, only 6135. Meanwhile there are rumors that this channel could also be silenced by December of this year, motivated by the pandemic crisis and low audience on SW. Therefore, if you do not yet have a printed QSL from the station, get busy! Send a reception report to the station by p-mail to Caixa Postal 2, CEP 12.570-0970, Aparecida (SP), Brazil. (Célio Romais) [gh`s translation. Glenn Hauser via WOR]

CHINA. Voice of the Strait, Fujian, China announced that they stop the shortwave transmission ("News Program" 4940kHz, "Minnan language Program" 4900kHz) between May 16 – July 13 for maintenance. Shortwave broadcast will be on air again on July 14. During the period listeners are requested to receive on MW and FM. "News Program" :MW 666kHz / FM 90.6MHz(Fujian province), "Minnan language Program" : MW 738kHz / FM 97.8MHz(Amoy province). Original article is at https://cahcn.github.io/posts/2021-05-16-Voice-of-Strait.html. (Takahito Akabayashi, Tokyo, Japan via WOR)

JAPAN. - - - - This is from Hiroshi (May 20):

The 1300 "Shiokaze" can hear 5965 and 7295kHz. The jamming is quite intense, but the radio waves from Yamata are also strong. Jamming can be heard in the back, but the reception condition is generally good. Thursday is an English broadcast.

The reception conditions of 6070 and 7325kHz of 1405 are almost the same. On Japanese broadcast, "Furusato no Kaze", which was broadcast last week at 1330, is out. The end announcement said:

"This is JSR Shiokaze. We are calling on the broadcast to all the abductees from Tokyo to North Korea and those who have been unable to return to North Korea due to various reasons. We have sent you a Japanese program "Furusato no Kaze" produced by the Japanese government. We apologize to all the abductees for leaving them unattended. I will definitely help you. Other people are also trying to return to Japan freely. Please do your best for a while. If you can't receive this broadcast, try looking around here.

Shiokaze broadcasts on multiple frequencies as a countermeasure against disturbing radio waves by the North Korean authorities.

Also, since it is linked with other broadcasts for North Korea, it will always be broadcast somewhere from 10:30 pm to 2:30 pm at that time. We are making various efforts to ensure that you are rescued. Please listen carefully to the information from the program.

If there is a change in the system of authorities such as the situation in North Korea, we will also inform you of an emergency evacuation broadcast. This is JSR Shiokaze. We are calling on the abduction victims from Tokyo to North Korea and those who have been unable to return to North Korea due to various reasons. See you tomorrow at this time, take good care of yourself, this is JSR Shiokaze."

(Ron Howard via WOR)

MALAYSIA. Here is a list of the five Islamic call-to-prayer times for Kuching (Sarawak) for Wednesday, 26 May. Muslims are called-to-prayer five times a day. These are carried via Sarawak FM (9835 kHz.) and the prayers are always about 3 to 4 minutes long. They are different from the usual reciting from the Qur'an. Is easy to ID them by their unique individual timings and during the prayer, many references to "Allah akbar."

05:18 AM (2118 UT) - the dawn prayer Fair Dhuhr 12:40 PM (0440 UT) - early afternoon prayer Asr 16:03 PM (0803 UT) - late afternoon prayer

Maghrib 18:45 PM (1045 UT) - the sunset prayer [I most often hear this one - Ron]

19:59 PM (1159 UT) - the night prayer Isha'a

https://www.muslimpro.com/en/Prayer-times-Kuching-Malaysia-1735634.

(Ron Howard, California)

TAIWAN. 9774, Fu Hsing BS, with some recent monitoring:

May 17 (Monday) - No 9410; no 15375; heard 9774 with cut off at 0958* UT; on much later than usual.

May 25 (Tuesday) - No 9410; no 15375; with 9774 cutting off just after 0900.

May 26 (Wednesday) - No 9410, no 15375; with 9774 cut off at 0902*.

May 29 (Saturday) - No 9410; no 15375; with 9774 cut off at 0900*.

Have not heard 15375 since my decent reception on May 11. Clearly it is a rare frequency for them to use. While 9410 has been non-stop silent for a long time now.

(RonHoward, California)

Other radio news

RX-888

It's not a WinRadio, but the RX-888 provides 32 MHz demodulated bandwidth (or less, your choice). At less than \$200 it's an attractive option; mine installed easily and has worked flawlessly. It has a very robust front end, too-- FAR better than the FDM-Duor, FDM-S3, and RSPdx that I've compared it to.

The RX-888 is a "cottage industry"/one-man-band product and doesn't have the support of a full fledge company like WinRadio, but at it's price it has amazing value. Works gangbusters with SDR-Console too! (Thank you, Simon!)

I don't have a need for any bandwidth greater than 2 MHz, but in tests with my "budget" gaming laptop I've done 32 MHz demod AND recording IQ WAV files simultaneously to an external HD without hiccups or slowdowns.

My apologies, I mistyped. I meant to say the RX-888 performed better than the FDM-Duor and FDM-S2 (not S3!) for overload re-

sistance when DXing the MW band. Both of those radios along with the RSPdx cannot handle the MW band from a Wellbrook ALA1530LNP Imperium. I live near Seattle USA with a lot of strong medium wave stations. I can run the RX-888 with normal gain, but the others need so much attenuation as to render those radios fairly insensitive.

Regarding alias-free bandwidth, I've never investigated the RX-888 closely for phantom signals when experimenting with the full HF bandwidth at once. I'm not interested in LF or upper HF, so if there's false signals at the edges it doesn't matter to me. However, a very wide 32 MHz coverage is only a curiosity to me; I normally use either 2 MHz sampling rate to capture and record MW only, or sometimes the 8 MHz rate to also include the tropical bands and up to 41 meters. Guy Atkins via [SDR-Radio]

Another review here: https://dk8ok.org/2020/09/04/rx-888-32-mhz-16bit-200-us-pricks-up-your-ears/ /TN

Alexanderson Day 2021

The annual transmission on Alexanderson Day with the Alexanderson Alternator on VLF 17.2 kHz with the call sign SAQ is scheduled for Sunday, July 4th, 2021.

The Alexander association are planning to carry out two broadcasts to the world from the old Alexanderson alternator SAQ with minimal staffing in place. Due to the ongoing pandemic, no visitors will be allowed to the transmitter hall, during the transmissions and there will be no visitor activities.

Instead, you can watch both transmissions live on our YouTube Channel.

Two transmissions are scheduled as follows:

- 1. Startup and tuning at 10:30 (08:30 UTC) with a transmission of a message at 11:00 (09:00 UTC).
- 2. Startup and tuning at 13:30 (11:30 UTC) with a transmission of a message at 14:00 (12:00 UTC)

More details on the transmissons and how to send QSL reports, will be posted here, closer to the the transmission date. If you are planning to visit World Heritage Grimeton Radio Station, first see grimeton.org for visitor's information.

*The world heritage site Grimeton Radio Station is a living cultural heritage. All transmissions with the long-wave transmitter SAQ are therefore preliminary and may be set at short notice. (https://alexander.n.se/alexanderson-day-2021/)

Hemmingway with his Zenith Transoceanic receiver

In <u>a Twitter exchange</u> yesterday <u>@dean_frey</u> shared the photo above of Ernest Hemingway on Safari in Kenya in 1952. Yes, It's certainly an H-500, introduced in 1951: https://farm4.staticflickr.com/3363/3550380180_cf1bbce82c_o.jpg (from SWLing Post: https://swling.com/blog/2017/03/hemingway-and-a-zenith-tranoceanic/)

Hallicrafters SX-62

The SX-62 is a single conversion general coverage receiver for AM, CW and FM. It fully covers 540 KHz to 110MHz in six bands. Introduced in 1948, it has 15 tubes. It was primarily intended for the serious shortwave listener who also wanted FM and excellent sound.

The IF section is automatically switched using 455 KHz for the lower four bands and 10.7 MHz for the upper two bands. It is erroneously listed as a double conversion receiver in several references. Only one converter is used in turn for each of two IF frequencies, one for AM broadcast and most shortwave and the other for the upper two bands primarily for VHF and FM. Using a pair of 6V6 for 8 watts of push-pull audio output, the set is designed for high fidelity when listening to FM but offers six bandwidth selections for various communication needs.

Like all other Hallicrafters with the "X" in the model name, the SX-62 is equipped with a crystal filter. It also has a crystal calibrator. The knob to the left of the dial allows repositioning of the dial pointer to an accurate setting as indicated by the calibrator signal.

Tube Complement: (2) 6AG5 rf, 7F8 conv, 6SK7 if1, 6SG7 if2, 7H7 if3, 7H7 FM limiter/AM detector, 6H6 FM detector, 7A4 bfo, 6H6 anl, 6SL7 af1, (2) 6V6 pp af out, 6C4 calib, VR-150 vr, 5U4 rect.

The six bands on the dial are individually highlighted using a separate pair of dial lamps for each band.

Compared with other brands, Hallicrafters used cheap components (wax paper caps, etc.) however chassis

layout is only moderately crowded and this radio is not as difficult to re-cap and restore as some others. Also note that a company called RadioDaze offers a finely-crafted repro glass dial panel for the SX-62.

UNID Russian Numbers Station recorded April 26, 2021

Many thanks to SWLing Post contributor, Paul Walker, who recently shared this recording of an unidentified numbers station in Russian.

Paul recorded this on April 26, 2021 at 0218 UTC in McGrath, Alaska, on 11,615 kHz: ...

I'm not an expert on numbers station identification-if you can ID this station, please comment!

Update: Many thanks to a number of readers who have suggested that this is the "S06 Russian Man".

(RUS-DX # 1135)

In St. Petersburg, a 90-year-old man was deceived by radio scammers.

In the northern capital, a 90-year-old pensioner fell victim to radio scammers. This was reported to 78.ru by a law enforcement source. On Tuesday, May 25, an elderly man contacted the police and said that while listening to the Radio Russii radio station, he found out that there was a special company that returned money to those who were not paid interest by banks in the 90s. Having called the number of the organization, the pensioner found out that in order to receive compensation, it was necessary to pay a commission and transferred 310 thousand rubles to an unknown account. A criminal case was initiated on the fact of fraud.

DX nostalgia by RFK

I guess many of you who are into DX nostalgia have visited the excellent site of The Committee to Preserve Radio Verifications. Here you will find lots of scans of old QSLs and other radio memorabilia as well as links to other similar resources. If you haven't yet discovered this site do check out http://www.ontheshort-waves.com/cprv.html

A member of the CPRV group, Jerry Berg, author of several great books related to the history of broadcasting and the DX hobby, once told me that he thought Sweden was the epicentrum of DX-ing. I think he had a point there. Nowhere else were there so many DX-ers per capita than in Sweden. One might wonder why. Without doubt "The Father of Swedish DX-ing" Arne Skoog played a great role in spreading the interest in our hobby. Apart from writing books on the subject he started the wellknown programme Sweden Calling DX-ers which was broadcast over Radio Sweden on SW. He also travelled across Sweden to record interviews at local DX-clubs, his reports later being broadcast by stations like OTC in Belgian Congo. Arne even was instrumental in getting a new station on the air: Dux Radio, which broadcast on SW over Radio Africa Tanger in the 1950s. The programmes were in Swedish and intended for a Swedish audience.

It is a sad fact that many QSL collections have been thrown away just because relatives didn't know what to do with them when the original owner passed away. As there seem to be a big interest in old QSLs and radio memorabilia I have registered a domain for the purpose of publishing Swedish and Scandinavian DX material. Further information will follow as soon as the site is launched. Hopefully we can together save some of what is left of our DX-heritage.

With that let's get over to this edition of DX nostalgia. First we have a QSL card from the People's Broadcasting Station of Xingjiang, China, submitted by our friend Kanwar Sandhu.

Next we have a QSL letter from Radio Tetuan in Spanish Morocco. The station would later be known as Radio Dersa, Tetuan. Ullmar Quick UQ received this letter in 1951 for a reception report on SW 6067 kHz. Letter scanned by John Ekwall JOE.

EMPRESA TORRES QUEVEDO, S. A.

(T. Q. S. A.)

TELECOMUNICACIONES

Tetuán, 29 Octubre de 1.951

Vllmar. Kvick. Romelevägen 20 Kristinehamn Suecia

Muy Sr. mio:

Recibimos su atenta carta control que corresponde exactamente a nuestra transmisión del día 22 de Octubre de los corrientes, la que agradecemos por su interes en escuchar nuestros programas.

Nos complace informar a Vd. sobre horarios y datos de nuestras emisiones los cuales son los siguientes: Nuestra potencia es de 1,500 Kw. radiamos en 6067 Kc. (49,45 mts.) en español todos los días de 13 a 15 y de 19 a 23 (G.M.T.); tambien radiamos en lengua arabe diariamente de 15 a 17 horas (G.M.T.). No tenemos emisiones en otras lenguas.

Sintiendo muchisimo no poder enviarle avances de nuestros programas (por no tenerlos editados), le ad - juntamos una vista tipica del pais y una fotografía del edificio donde tenemos instalados los Estudios y Dirección Técnica.

Con nuestras felicitaciones por su perfecto cono cimiento del idioma Castellano, queda de Vd.

su atto. s. s. q. e. s. m.

POR RADIO TETUAN

J. Arbide

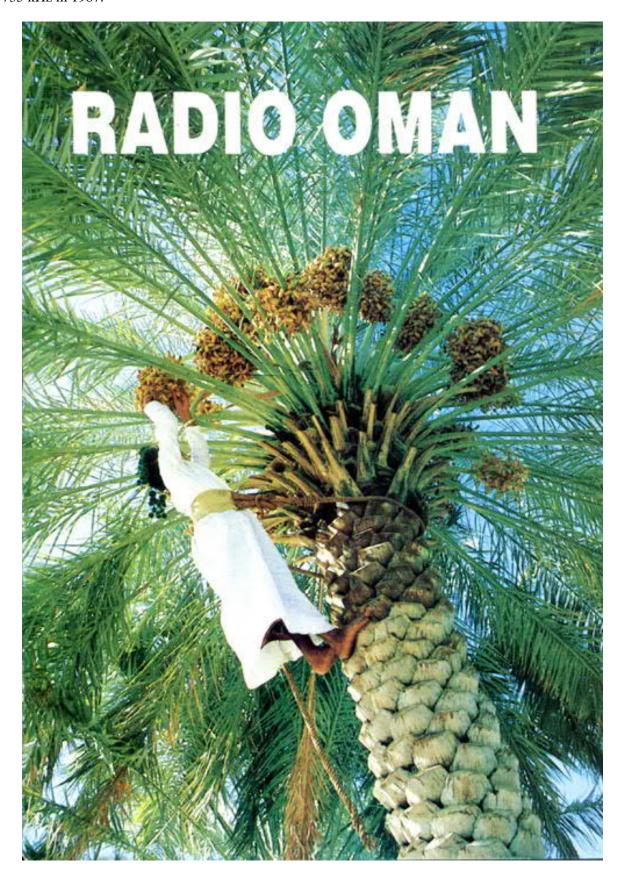

After the Swedish Pentecostal Movement was banned from Swedish radio they tried broadcasting to Sweden over various foreign stations. Transmissions over Radio Andorra did not work out because the programme tapes "disappeared" in the mail. For a short while before starting IBRA Radio over Radio Africa Tanger the organization made some test transmissions over Radio Luxemburg but the results were not satisfactory. Lars Rydén LR received this QSL card for a report on 6090 kHz.

Another QSL card from the collection of Lars Rydén. LR received this card from Göteborgs DX-Klubb in Gothenburg for a reception report on their special programme over Radio Andorra in 1953.

This QSL folder from Radio Oman was received by Lars-Olof Hansson LOH. He reported the station on 9735 kHz in 1987.

Jan-Erik Räf JER got this QSL card from CBC/Radio Canada after reporting their station CBFZ at Vercheres on 15190 kHz in August 1946. The power was just 7,5 kW.

To end up this nostalgia column we have a card which Lars Rydén LR received from Radio Nacional La Voz de Guatemala in 1951 for a report on 15170 kHz.

As usual your contributions are highly welcome – just mail me at info @ rock.x.se.
