

# SHORT WAVE BULLETIN

Nr 905  
840703  
nxt nr  
840710

Redaktör: Lars Bygdén, Täfteåvägen 23, 910 36 SÄVAR tel 090/501 96

I ett trist sommarväder, dvs ihållande regn skrivs denna veckas bulletin. Cx'en har den senaste veckan varit relativt normala, inga speciella toppar har noterats, men de aktiva har inte blivit helt lottlösa heller. Ett par bidrag kom för sent till förra veckans bulletin, bl a kom inte SB:s SWI-sida förrän onsdag till mig (trots avsänd i rätt tid - fy skäms Postverket!) och då var SWB redan tryckt och avsänd. Bifogas alltså denna bulletin istället. Innan vi tar några QSL-anmälningar vill jag bara påpeka att jag fr o m nästa vecka har semester, så skall ni ringa så ring hem. Nu några QSL:

ROLAND ÅKESSON har hittat följande i sin låda efter äventyret i Argentina: LV del CID-5106 kort, frim, R Columbia-4825 kort, 2-sid brev, dekaler, frim, R Macarena-5975 med kort, 3-sid brev, invit, car-stickers mm (v/s Enrique Zambrano Nieto).

JORMA MÄNTYLÄ har kammat hem RRI Sibolga-5257.5 brev (v/s Hutabarat B.A.) samt R Nac Bata-7998.5 brev via baptistkyrkan i Dexter, NM, USA.

CHRISTER BRUNSTRÖM ringer in LV del Rio Carrizal-3260 brev och KNLS-11790 stencil.

KURT NORLIN meddelar att det blir dåligt med tid till DX-ing framöver p g a omfattande husrenovering. QSL som kommit är R Kara-3222 kort, R Educadora de Limeira-2380 vyk-QSL (såväl tecknad som textad baksida) samt fullskrivet vykort, R Educação Rural de Coari-2490 brev samt R Record-15135 med brev och dekal.

8900v	3	0100-	R Continente de Juanjui drev mellan 8899-8902 och hördes bäst
		-0354	mellan 0300 - c/d. Tnx to JCC for info. Ex 4916.3. Ingen överton som JCC ev trodde, annonserade klart 3lmb /ID'et gick fint fram per telefon från Norrköping till red/ 2-3 SB

Några strykningar blev det tyvärr. Vi hörs nästa vecka! 73 de *dm*

# SHORT WAVE INFO

Nr 27  
Suppl. SWB  
840624  
nxt nr  
840706

Ed: Stefan Bursell, Finspångsvägen 181, S-602 10 Norrköping tel 011/112172

I'm writing this number during a very rainy Midsummer-weekend, at least here in Norrköping. Conditions isn't so very good, the little I've checked, due to my work is very hard at the moment. But next week my five weeks holiday starts... wonderful! Suggestions made to always have SWB & SWI on separate papers, because people store them separately it seems. What do you think? You may answer either to me, or to SWB editor. Now over to the info: ALL TIMES IN UTC

## REPORT FROM PERU part XIV (May 16-June 6)

As from April JCCs reports is published in RIB on a regular basis, for those of you that want his complete info! (I only select the items that is "hot").

- 4617.1 UNID, Peru, first heard May 22 with 20 dB over 9, totally distorted, but in the end something understandable: pops, rock, some Paraguayan music, and also some andean music. Noted 0000-0015 abrupt cd. v-4615
- 4916.1 R Central with ID as follows: "Desde la progresiva ciudad de Bellavista, enclavada en las orillas del Huallaga, transmite para el Peru y el mundo, R Central, La Voz de la Selva, al servicio de la cultura y el pueblo, en su frecuencia de OAZ9A, 4920 kCs, banda de 60 mts, amplitud modulada, ofreciendo nitidez y calidad en su onda corta tropical (piece of mx).. agradeceremos a nuestros oyentes comunicarnos como reciben nuestra transmision, escribiendos a R Central, Calle Progreso 389, Bellavista, Huallaga, San Martin, Peru"
- 4833.4 R Sicuani, Sicuani, Peru reactivated! First noted June 3 at 2145 under the heavy splatter of R Andahuaylas. Many mentions of "Canchis" & "en el sur del pais". Last time noted one year ago, on 4826.7
- 5198 R San Martin de Uchiza, San Martin, Peru now heard with far better power, nearly 20 dB over 9, as early as 2130, going until 0230. Generally pops and modern mx. I can't believe this stn isn't yet heard in the States, or in Sweden! It has better power now than R Eco. Regarding the location, I always, from one year ago, was supposing that the name of the city was Iquija, but after careful checking of my maps & relistening to my tapes, I found it must be this name. City located in the south of Dptmt, near the limit San Martin-Huanuco. Also checking my old tapes the address is: Pasaje Grau, Hotel San Martin, 2° Piso, Uchiza, San Martin.
- 6364.1 Estacion Preferencial, Jepelacio, San Martin, Peru. This is without doubt the old transmitter of R Moderna, transmitting now with another name, perhaps to compete with its neighbour Estacion C (Check Hot Loggings for solution JCC!). One ID heard: "Esta es Estacion Preferencial, transmitiendo en los 6374 kilociclos, en onda corta, desde el corazon de Jepelacio, Peru". Lots of IDs between salsa-mx nonstop. In the closing announcement they said that they are a new station, the address is: Jiron Moyobamba 334. Announced to open 2300 next day. Heard 0250 until 0400cd.
- 7303.8 R Selva, Moyobamba, San Martin, Peru heard now here, lower than before, May 27.
- 7411.1H R Lux, Colombia. This stn is now confirmed to be located in Guachucal, Narino Dept. Lots of mentions for this town in commercials. Wait for the address..
- 10040.3 LV del CID. This frequency as they announced May 19, will be the most powerful of their transmissions. Call is "R Camilo Cienfuegos". This is another big lie: A contrarevolutionary anti-cuban stn is named after the great revolutionary cuban hero Camilo Cienfuegos, the same case as R Marti is. JCC

BOLIVIA 7400v R Carlos V transmitting times is 1000-1300, 2230-0230 Tony Jones/FRENDX

BRASIL 2400 R Ecuatorial, Macapa, Amapa is to be reactivated here within 30 days, says Antonio to OA June 5.  
9665 R Marumby times is: Weekdays 0930-2400, Sundays 0930-2200 (unfortunately)  
3335 R Clube da Conquista again active. ARM via OA

NICARAGUA 6220 R Sandino, Managua noted here 0950 (Isn't this cland. LV de Sandino?) " " "

ALASKA KNLS changed frequencys May 6-Sept 1 is 0700-0930 11850, 1200-1500 11945 OA

GUINEA-BISSAU Gary Hickerson heard R Nacional on 5475.2 in Portuguese 0612-0645 June 2.  
WRTHNL reports this on 5745.3 (mistype?). Times is 0600-2400 FK

011e Alm has also sent me a DXA logging list with plenty of asian stations, but this is saved until next number, when it is closer to the asian peak.  
Reached end of paper, so Hot Loggings will also have to wait until next number.
